As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be

---

[1] Northeast Nuclear Energy Company (a wholly-owned subsidiary of Northeast Utilities) has no ownership interest in the Unit. The following fifteen electric utilities own the unit as tenants in common: The Connecticut Light and Power Company and Western Massachusetts Electric Company (also wholly-owned subsidiaries of Northeast Utilities), Burlington Electric Light Department, Central Maine Power Company, Central Vermont Public Service Corporation, Chicopee Municipal Lighting Plant, Connecticut Municipal Electric Energy Cooperative, Fitchburg Gas and Electric Light Company, Village of Lyndonville Electric Department, Massachusetts Municipal Wholesale Electric Company, Montaup Electric Company, New England Power Company, Public Service Company of New Hampshire, The United Illuminating Company and the Vermont Electric Cooperative, Inc.

entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend his petition, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the basis for each contention set forth with reasonable specificity. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Services Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. by April 4, 1983. A copy of the petition must also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, and to Gerald Garfield, Esq., Day, Berry & Howard, One Constitution Plaza, Hartford, Connecticut 06103, attorney for the applicant. Any requests for additional information regarding the content of this notice should be addressed to the Chief Hearing Counsel, Office of the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer, or the Atomic Safety and Licensing Board designated to rule on the petition and/or request, that the petitioner has made a substantial showing of good cause for the granting of a later petition and/or request. That determination will be based upon a balancing of the factors specified in 10 CFR § 2.714(a)(1)(I)–(v) and 2.714(D).

For further details pertinent to the matters under consideration, see the application for the facility operating license, including the Final Safety Analysis Report and the Environmental Report, forwarded on February 2, 1983, which are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. 20555 and at the Waterford Public Library, Rope Ferry Road, Route 156, Waterford, Connecticut 06385. As they become available, the following documents may be inspected at the above locations: (1) The safety evaluation report prepared by the Commission's staff; (2) the draft environmental statement; (3) the final environmental statement; (4) the report of the Advisory Committee on Reactor Safeguards (ACRS) on the application for the facility operating license; (5) the proposed facility operating license; and (6) the technical specifications, which will be attached to the proposed facility operating license.

Copies of the proposed operating license and the ACRS report, when available, may be obtained by request to the Director, Division of Licensing, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. Copies of the Commission's staff safety evaluation report and final environmental statement, when available, may be purchased at current rates, from the National Technical Information Service, Department of Commerce, 5282 Port Royal Road, Springfield, Virginia 22161.

Dated at Bethesda, Maryland this 4th day of February 1983.

For the Nuclear Regulatory Commission.

B. J. Youngblood,

Chief, Licensing Branch No. 1, Division of Licensing.

BILLING CODE 7590-01-M

[Docket No. 50-375]

Negative Declaration for the Rockwell International Corporation L-85 Nuclear Examination Reactor

The U.S. Nuclear Regulatory Commission (the Commission) has considered the Order authorizing dismantling of facility and disposition of component parts for the Rockwell International Corporation (the licensee) L-85 Nuclear Examination Reactor operated under Facility License No. R-118. The Order authorizes the licensee to disassemble the reactor which had operated at power levels up to 3 kW (thermal), and to dispose of the component parts.

The Commission's Office of Nuclear Reactor Regulation has prepared an environmental impact appraisal for this training reactor. On the basis of this appraisal, the Commission has concluded that an environmental impact statement for this particular action is not warranted because there will be no significant environmental impact attributable to the proposed action. The environmental impact appraisal is available for public inspection at the Commission's Public Document Room at 1717 H Street, NW., Washington, D.C.

Dated at Bethesda, Maryland, this 22d day of February 1983.

For the Nuclear Regulatory Commission.

Darrell G. Eisenhut,

Director, Division of Licensing.

BILLING CODE 7590-01-M

[Docket No. 50-375]

Rockwell International; Order Authorizing Dismantling of Facility and Disposition of Component Parts

By application dated March 10, 1980, as amended by letter dated December 14, 1982, Rockwell International (the licensee) requested authorization to dismantle its L-85 Nuclear Examination Reactor (the facility), located at the licensee's site at Santa Susana Field Laboratory, Ventura County, California, and to dispose of the component parts, in accordance with the plan submitted as part of the application. A "Notice of Proposed Issuance of Orders Authorizing Dismantling of Facility, Disposition of Component Parts, and Termination of Facility License" was published in the **Federal Register** on April 30, 1980 (45 FR 30759). No request for a hearing or petition for leave to intervene was filed following notice of the proposed action.

The Nuclear Regulatory Commission (the Commission) has reviewed the application in accordance with the provisions of the Commission's rules and regulations and has found that the dismantling and disposal of component parts under the licensee's dismantling plan will be in accordance with the regulations in 10 CFR Chapter I, and will not be inimical to the common defense and security or to the health and safety of the public. The basis for the findings is set forth in the concurrently issued Safety Evaluation by the Office of Nuclear Reactor Regulation.

The Commission has prepared an environmental impact appraisal for this action. Based on that appraisal, the Commission has determined that this action will no result in any significant environmental impact and that an environmental impact statement need not be prepared.

Accordingly, Rockwell International is hereby authorized to dismantle the facility covered by Facility License No. R-118, and dispose of the component

parts in accordance with its corrected dismantling plan dated December 14, 1982 and the Commission's rules and regulations.

After completion of the dismantling and decontamination of the reactor, the submission of a report on the radiation survey to confirm that radiation levels in the facility area meet the values defined in the dismantling plan, and inspection by representatives of the Commission, consideration will be given to whether a further order should be issued terminating Facility License No. R–118.

For further details with respect to this action see: (1) The application for authorization to dismantle facility and dispose of component parts dated March 10, 1980, as revised by letter dated December 14, 1982, (2) the Commission's related Safety Evaluation, (3) the Commission's Environmental Impact Appraisal, and (4) the Commission's Negative Declaration dated February 22, 1983 (which is also being published in the **Federal Register**). All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 22d day of February 1983.

For the Nuclear Regulatory Commission.

Darrell G. Eisenhut,

Director, Division of Licensing.

BILLING CODE 7590-01-M

[Docket No. 50–361]

Southern California Edison Co., et al.; Exemption to 10 CFR 50, Appendix A, General Design Criterion 56; Facility Operating License No. NPF–10

The U.S. Nuclear Regulatory Commission (the Commission) has granted an exemption to 10 CFR Part 50, Appendix A, General Design Criterion 56 until March 22, 1983, to Southern California Edison Company, San Diego Gas and Electric Company, the City of Riverside, California and the City of Anaheim, California (licensees) for the San Onofre Nuclear Generating Station, Unit 2 (the facility) located in San Diego County, California.

The exemption is associated with Amendment No. 12 to Facility Operating License NPF–10, issued to the licensees on December 23, 1982. The exemption allows the licensees 60 days to change two remote-manual CCW non-critical loop isolation valves to automatic isolation. The exemption is based on the Staff's evaluation as reflected in the Safety Evaluation accompanying Amendment No. 12 and on a finding by the NRC staff that the exemption is authorized by law and will not endanger life or property or the common defense and security and is otherwise in the public interest.

For further details with respect to this action, see: (1) The Commission's letter to the licensees dated February 22, 1983, (2) Amendment No. 12 to Facility Operating License No. NPF–10, dated December 23, 1982 and (3) the Commission's related Safety Evaluation.

These items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., and the San Clemente Library, 242 Avenida Del Mar, San Clemente, California 92672. A copy of items (1), (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 22nd day of February 1983.

For the Nuclear Regulatory Commission.

BILLING CODE 7590-01-M

[Docket Nos. 50–361 and 50–362]

Southern California Edison Co., et al; Issuance of Amendments Facility Operating License Nos. NPF–10 and NPF–15

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 15 to Facility Operating License No. NPF–10, and Amendment No. 4 to Facility Operating License NPF–15 to Southern California Edison Company (SCE), San diego Gas and Electric Company, The City of Riverside, California and The City of Anaheim, California (licensees) for the San Onofre Nuclear Generating Station, Units 2 and 3 (the facility) located in San Diego County, California. These amendments are effective February 17, 1983.

The amendments modify the Emergency Preparedness license conditions to grant additional time to satisfy the requirements of 10 CFR 50.47(b)(12) related to medical services. These amendments were requested by the SCE letter of January 14, 1983 and were authorized by the Atomic Safety and Licensing Board's Order of February 1, 1983.

Issuance of these amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations. The Commission has made appropriate findings as required by the Act and the Commission's regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Notice of these amendments is subsumed by the prior public notice of the overall action regarding issuance of operating licenses for these facilities, published in the **Federal Register** on April 7, 1977 (42 FR 18460).

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and the pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see: (1) Southern California Edison Company's letter dated January 14, 1983, (2) Amendment No. 15 to Facility Operating License No. NPF–10, and (3) Amendment No. 4 to Facility Operating License NPF–15.

These items are available for public inspection at the Commission's Public Document Room 1717 H Street, NW., Washington, D.C., and the San Clemente Library, 242 Avenida Del Mar. San Clemente, California 92672. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 17th day of February, 1983.

[Docket Nos. 50–445/446–OL (ASLBP No. 79–430–06 OL)]

Texas Utilities Generating Co., et al., Comanche Peak, Units 1 & 2; Reconstitution of Board

Pursuant to the authority contained in 10 CFR 2.721 (1980), the Atomic Safety and Licensing Board for *Texas Utilities Generating Company, et al.* (Comanche Peak, Units 1 & 2), Docket Nos. 50–445/446–OL, is hereby reconstituted by

appointing Dr. Walter H. Jordan to the Board in place of Dr. Richard F. Cole, who because of a schedule conflict, is no longer able to serve.

As reconstituted, the Board is comprised of the following Administrative Judges:

Marshall E. Miller, Chairman
Dr. Kenneth A. McCollom
Dr. Walter H. Jordan

All correspondence, documents and other material shall be filed with the Board in accordance with 10 CFR 2.701 (1980). The address of the new Board member is: Dr. Walter H. Jordan, 881 W. Outer Drive, Oak Ridge, Tennessee 37830.

Issued at Bethesda, Maryland this 24th day of February 1983.

BILLING CODE 7590-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-19541; File No. SR-Amex-83-3]

American Stock Exchange, Inc.; Self-Regulatory Organizations; Proposed Rule Change By Relating To Amendment of Exchange Rules 131 and 154 on Percentage Orders

Pursuant to section 19 (b) (1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s (b) (1), notice is hereby given that on February 10, 1983, the American Stock Exchange filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The American Stock Exchange, Inc. is proposing to amend Rules 131 and 154 to allow percentage orders to be converted and executed on "zero plus" ticks (for buy orders) and "zero minus" ticks (for sell orders) when the order causing the conversion is at least 5,000 shares.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(1) *Purpose.* The Commission recently approved amendments to Amex Rules 131 and 154 which redefined the term "percentage orders" and provided new procedures to facilitate the handling of such orders. (See SR-Amex-82-21.) Included in these rule changes is a new procedure whereby a percentage order may be converted into a regular limit order (if so specified in writing by the entering broker) thus enabling it to fully participate in a block trade or in the opening trade in the security. This procedure was implemented since a percentage order could not participate in a block transaction that would otherwise have been an electing sale, even though such participation would fully satisfy the terms of the order.

Exchange Rules 131 and 154 now provide that a percentage order can only be converted on a stabilizing tick. In order to further facilitate the execution of blocks, add liquidity to the market and enable specialists to handle percentage orders more effectively, the Exchange has further revised Rules 131 and 154 so as to allow percentage orders to be converted and executed on zero plus ticks (for buy orders) or zero minus ticks (for sell orders) when the order causing the conversion is at least 5,000 shares. The 5,000 share requirement is being imposed to limit the conversion of percentage orders on destabilizing ticks as previously requested by the Commission staff.

(2) *Basis.* The proposed amendments are consistent with Section 6 (b) of the Exchange Act in general and further the objectives of Section 6 (b) (5) in particular in that they are designed to facilitate the handling of large orders, while making percentage orders a more useful tool for investors.

B. Self-Regulatory Organization's Statement on Burden on Competition

The proposed rule change will have no impact on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within thirty-five days of the date of publication of this notice in the Federal Register or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 5th Street, NW., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 5th Street, NW., Washington, D.C. 20549. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should be submitted within 21 days after the date of this publication.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: February 25, 1983.

George A. Fitzsimmons,

Secretary.

[FR Doc. 83-5804 Filed 3-3-83; 8:45 am]

BILLING CODE 8010-01-M

Boston Stock Exchange, Inc.; Application for Unlisted Trading Privileges and of Opportunity for Hearing

February 25, 1983.

The above named national securities exchange has filed an application with the Securities and Exchange Commission pursuant to Section 12(f)(1)(C) of the Securities and Exchange Act of 1934 (the "Act") and Rule 12f–1 thereunder, for unlisted trading privileges in the following stock: [1]

Bally's Park Place, Inc.

Common Stock, $.10 Par Value

The security is currently traded over-the-counter and is reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before March 18, 1983 written data, views and arguments concerning the above-referenced application. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549. Following this opportunity for hearing, the Commission will approve the application if it finds, based upon all the information available to it, that the extension of unlisted trading privileges pursuant to such application is consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[File No. 22-12216]

Exxon Shipping Co.; Application and Opportunity for Hearing

February 28, 1983.

Notice is hereby given that Exxon Shipping Company (the "Company") has filed an application pursuant to clause (ii) of Section 310(b)(1) of the Trust Indenture Act of 1939, as amended (the "Act") for a finding by the Securities and Exchange Commission (the "Commission") that the trusteeship of Bankers Trust Company under an indenture dated as of October 15, 1975 (the "Qualified Indenture") among Exxon Pipeline Company ("Exxon Pipeline"), as issuer, Exxon Corporation ("Exxon") as Guarantor and Bankers Trust Company which was heretofore qualified under the Act, and the successor trusteeship by Bankers Trust under an indenture dated as of September 1, 1982 among the Company as issuer, Exxon as Guarantor, and Bankers Trust Company as successor Trustee (the "New Indenture"), are not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify Bankers Trust Company from acting as Trustee under the Qualified Indenture or under the New Indenture. The New Indenture was filed as an Exhibit to Registration Statement No. 2–79104 of Exxon and the Company under the Securities Act of 1933, which was declared effective on September 10, 1982, and was contemporaneously qualified under the Act.

Section 310(b) of the Act provides in part that if a trustee under an indenture qualified under the Act has or shall acquire any conflicting interest it shall within ninety days after ascertaining that it has such conflicting interest, either eliminate such conflicting interest or resign. Subsection (1) of this section provides, in effect, with certain exceptions, that a trustee under a qualified indenture shall be deemed to have a conflicting interest if such trustee is trustee under another indenture under which any other securities of the same issuer are outstanding. However, under clause (ii) of subsection (1), there may be excluded from the operation of this provision another indenture under which any other securities of the same issuer are outstanding if the issuer shall have sustained the burden of proving, on application to the Securities and Exchange Commission and after opportunity for hearing thereon, that trusteeship under such qualified indenture and such other indenture is not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify such trustee from acting as trustee under either of such indentures.

In support of its application the Company alleges that:

(1) At September 1, 1982, Exxon Pipeline, as issuer, and Exxon, as Guarantor, had outstanding $300,000,000 aggregate principal amount of 8¾% Debentures Due October 15, 2000, under the Qualified Indenture (the "Debentures"). The Debentures issued pursuant to the Qualified Indenture were registered under the Securities Act of 1933 and the Qualified Indenture was qualified under the Act. Exxon Pipeline is a wholly-owned subsidiary of Exxon.

(2) Bankers Trust Company is successor Trustee under the New Indenture under which there is outstanding $757,111,590 aggregate principal amount of Guaranteed Deferred Interest Debentures Due 2012. The Company is a wholly-owned subsidiary of Exxon.

(3) The obligations of Exxon under the Qualified Indenture and under the New Indenture are wholly unsecured and all such obligations will rank equally without seniority or subordination of any such obligations to any of the others.

(4) No default has at any time existed under the Qualified Indenture or the New Indenture.

(5) Such differences as will exist between the Qualified Indenture and the New Indenture are not likely to involve a material conflict of interest so as to make it necessary in the public interest or for the protection of investors to disqualify Bankers Trust Company from acting as trustee under the Qualified Indenture were it to act as trustee under the New Indenture.

The Company has waived: (1) Notice of hearing, (b) hearing on the issues raised by the application, and (c) any and all rights to specify procedures under the Rules of Practice of the Commission with respect to the application.

For a more detailed statement of the matters of fact and law asserted, all persons are referred to said application which is on file in the offices of the Commission at 450 Fifth Street NW., Washington, D.C. 20549.

Notice is further given that any interested person may, not later than March 22, 1983, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, that the issues of fact or law raised by said Applicant which he desires to controvert, or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. At any time after said date, the Commission may issue an order granting the application upon such terms and conditions as the Commission may deem necessary or appropriate in the public interest and the interest of investors, unless a hearing is ordered by the Commission.

---

[1] The Boston Stock Exchange applied for unlisted trading privileges on November 27, 1979. The security has been trading on the exchange pursuant to a temporary exemption from the registration requirements of Section 12 of the Act contained in Rule 12a–5. The exemption will continue until the Commission grants for denies the unlisted trading privileges application.

For the Commission, by the Division of Corporation Finance, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 19550; File No. SR-NASD-82-25]

National Association of Securities Dealers, Inc.; Order Approving Proposed Rule Change

February 28, 1983.

In the matter of National Association of Securities Dealers, Inc., 1735 K Street, N.W., Washington, D.C. 20006.

The National Association of Securities Dealers, Inc. ("NASD"), submitted copies of a proposed rule change on November 12, 1982, and an amendment thereto on December 7, 1982, pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), to amend both Section 28 of Article III of the NASD Rules of Fair Practice and the Board of Governors Interpretation on Private Securities Transactions ("Interpretation") under Section 27 of Article III of the NASD Rules of Fair Practice.

Section 28 prescribes the responsibilities of members and their associated persons when securities transactions are knowingly executed by a member ("executing member") for an associated person of another member ("employer member"). The proposed rule change will require that an associated person notify an executing member of his affiliation with an employer member whenever an account is opened or a securities transaction requested if that associated person has a financial interest in the transaction or discretionary authority over such account ("qualified account"). An executing member will be required to notify the employer member in writing prior to executing transactions, to give duplicate copies of confirmations to the employer member upon written request, and to notify the associated person that such communications will be sent to the employer member. Transactions in variable contracts and redeemable investment company securities will be exempted from these notice requirements. The proposed rule change would also amend the Interpretation by exempting transactions in variable contracts or redeemable investment company securities done for the personal account of an associated person.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by the issuance of a Commission Release (Securities Act Release No. 19347, December 16, 1982) and by publication in the **Federal Register** (47 FR 58416, December 30, 1982. No comments were received with respect to the proposed rule change.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to the NASD and, in particular, the requirements of Section 15A of the Act and the rules and the regulations thereunder.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and thereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority. 17 CFR 200.30-3(a)(12).

George A. Fitzsimmons,

Secretary.

[FR Doc. 83-5636 Filed 3-3-83; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 19549; File No. SR-NASD-82-17]

National Association of Securities Dealers, Inc.; Filing of Amendment to Proposed Rule Change

February 28, 1983.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on February 3, 1983, the National Association of Securities Dealers, Inc. ("NASD"), filed with the Securities and Exchange Commission an amendment to proposed rule change SR-NASD-82-17 which prescribes standards for NASD members who do not maintain an office in the United States responsible for preparing and maintaining financial and other reports required to be filed with the Commission and the NASD ("foreign members"). The proposed rule change, notice of which was published on October 6, 1982, in Securities Act Release No. 19105, 34 FR 19105 (October 14, 1983), would amend Schedule C of the NASD's By-Laws to require foreign members to meet certain conditions for membership. The amendment clarifies that foreign members must utilize, either directly or indirectly, the services of a registered broker-dealer, registered clearing agency, or bank located in the United States to clear all transactions involving NASD members unless both parties to the transaction agree otherwise.

In order to assist the Commission in determining whether to approve the proposed rule change as amended or institute proceedings to determine whether the proposed rule change should be disapproved, interested persons are invited to submit written data, views and arguments concerning the submission within 21 days after the date of publication in the **Federal Register**. Persons desiring to make written comments should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549. Reference should be made to File No. SR-NASD-82-17.

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change which are filed with the Commission and all written communications relating to the proposed rule change between the Commission and any person, other than those which may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Room, 450 Fifth Street, NW., Washington, D.C. Copies of the filing and of any subsequent amendments also will be available for inspection and copying at the principal office of the NASD.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.[1]

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 22863 (70-6843)]

Ohio Valley Electric Corp.; Proposed Refinancing of Demand Notes

February 25, 1983.

In the matter of Ohio Valley Electric Corp., P.O. Box 468, Piketon, Ohio 45661.

The Ohio Valley Electric Corporation ("Ohio Valley"), an electric utility subsidiary of American Electric Power Company ("AEP"), a registered holding company, has filed a declaration with this Commission pursuant to Sections 6(a) and 7 of the Public Utility Holding Company Act of 1935 ("Act") and Rules 42(b)(2) and 50(b)(2) promulgated thereunder.

Ohio Valley and its wholly owned subsidiary, Indiana-Kentucky Electric

---

[1] 17 CFR 200.30-3(a)(12).

Corporation, operate electric generation facilities for the principal purpose of supplying electric power to an agency of the United States of America. The capital stock of Ohio Valley is jointly owned by AEP, Allegheny Power System, Inc., a registered holding company, and several other utility companies, which, pursuant to a power agreement, provide supplemental power to, and purchase surplus power from, Ohio Valley and its subsidiary.

Shortly after its organization in 1952, Ohio Valley was authorized by this Commission to issue and sell $10,000,000 principal amount of unsecured demand notes pursuant to a loan agreement with several banking institutions. The demand notes mature ninety days after demand for payment thereof, and bear interest at a rate per annum equal to the prime commercial lending rate of Citibank, N.A., agent for the lending banks, as the rate may fluctuate from time to time, for loans having ninety-day maturities.

Ohio Valley requests the authority to refinance these demand notes at any time until December 31, 1983, by issuing up to $10,000,000 aggregate principal amount of unsecured promissory notes in connection with borrowings from one or more commercial banks, pursuant to a proposed Term Loan Agreement ("Agreement"), for terms of not less than two nor more than ten years. It is contemplated that Ohio Valley may enter into a single agreement for the full amount of the proposed loan, or separate agreements with different banks, each for a part of the proposed borrowings, possibly having different maturities. Each promissory note will bear interest not greater than 200 basis points over the then applicable prime rate payable to Citibank, N.A. under the existing loan agreement as of the date upon which a definitive Agreement is executed, but in no event greater than 14% per annum. No compensating balances or commitment fees will be required.

The proposed Agreement also provides that in the event a note is paid prior to maturity, or upon the occurrence of an event of default, Ohio Valley will be required to pay a fee to the lending bank calculated to reimburse the bank for interest lost, if any, as a result of the prepayment. All proceeds from the borrowings will be applied to retire the outstanding demand notes. Prepayment penalty provisions in the existing loan agreement have been waived. Ohio Valley will incur no penalty for prepayment of the outstanding demand notes.

Ohio Valley states that it believes that funds at a fixed rate at or near the applicable prime rate are currently available on loans having maturities of up to but not exceeding two years. Rates quoted to Ohio Valley on loans having longer maturities have generally been in the range of up to 200 basis points higher than the prime rate. Ohio Valley believes that it will be of long-term benefit to the company to reduce its exposure to wide fluctuations in interest rate expense and to refund its outstanding variable rate demand notes, in whole or in part, with proceeds of notes having longer maturities, even though such long-term notes may bear a fixed rate of interest higher than current short-term rates at the time of such borrowings.

Ohio Valley also asserts that long-term debt financing of the kind herein proposed is the most practicable and cost-effective in light of its size, capital needs, and the relative difficulty of more conventional alternatives such as mortgage bond financing. Ohio Valley presently has no effective mortgage indenture nor is it encumbered with any other type of long-term debt.

It is represented that Ohio Valley will not be required to obtain a guaranty of its obligations under the proposed Agreement by any of the companies holding its capital stock. Ohio Valley believes that the lending bank or banks will look only to the continuing obligations to purchase and supply power under the aforementioned power agreement. Accordingly, the proposed Agreement specifies that the termination of the inter-company power agreement shall be an event of default, and that certain amendments or material modifications thereof would require the lender's written consent.

The declaration and any amendments thereto are available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by March 22, 1983, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the declarant at the address specified above. Proof of service (by affidavit or, in the case of an attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date, the declaration, as it may be amended, may be permitted to become effective.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 19546; File No. SR-Phlx-83-1]

Philadelphia Stock Exchange, Inc.; Filing and Immediate Effectiveness of Proposed Rule Change

February 28, 1983.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on January 27, 1983, the Philadelphia Stock Exchange, Inc. ("Phlx") filed with the Securities and Exchange Commission the proposed rule change as described hererin. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

The Phlx is proposing to amend Rule 715 to change the due date for monthly reporting of floor brokerage commission income and the payment of the prescribed assessment to the twenty-eighth day of the month following the month covered by the report. The Phlx states that the statutory basis for the proposed amendment is Section 6(b)(4) of the Securities Exchange Act which provides among other things, for the equitable allocation of dues, fees and other charges.

The foregoing change has become effective, pursuant to Section 19(b)(3)(A) of the Act and subparagraph (e) of Rule 19b-4 under the Act. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

Interested persons are invited to submit written data, views and arguments concerning the submission within 21 days after the date of publication in the **Federal Register**. Persons desiring to make written comments should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 450 5th Street, N.W., Washington, D.C. 20549. Reference should be made to File No. Phlx-83-1.

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change which are filed with the Commission, and all written

communications relating to the proposed rule change between the Commission and any person, other than those which may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Room, 450 5th Street, N.W., Washington, D.C. Copies of the filing and of any subsequent amendments also will be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

SMALL BUSINESS ADMINISTRATION

Small Business Investment Company Maximum Annual Cost of Money To Small Business Concerns

13 CFR 107.301(c) sets forth the SBA Regulations governing the maximum annual cost of money to small business concerns for Financing by small business investment companies.

Section 107.301(c)(2) requires that SBA publish from time to time in the **Federal Register** the current Federal Financing Bank (FFB) rate for use in computing the maximum annual cost of money pursuant to § 107.301(c)(1). It is anticipated that a rate notice will be published each month.

13 CFR 107.301(c) does not supersede or preempt any applicable law that imposes an interest ceiling lower than the ceiling imposed by that regulation. Attention is directed to new subsection 308(i) of the Small Business Investment Act, added by section 524 of Pub. L. 96-221, March 31, 1980 (94 Stat. 161), to that law's Federal override of State Usury ceilings, and to its forfeiture and penalty provisions.

Effective March 1, 1983, and until further notice, the FFB rate to be used for purposes of computing the maximum cost of money pursuant to 13 CFR 107.301(c) is 10.545% per annum.

Dated: February 28, 1983.

Edwin T. Holloway,

Associate Administrator for Finance and Investment.

VETERANS ADMINISTRATION

Agency Forms Under OMB Review

AGENCY: Veterans Administration.

ACTION: Notice.

SUMMARY: The Veterans Administration has submitted to OMB for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). This document lists new and revised forms. Each entry contains the following information: (1) The department or staff office issuing the form; (2) The title of the form; (3) The agency form number, if applicable; (4) How often the form must be filled out; (5) Who will be required or asked to report; (6) An estimate of the number of responses; (7) An estimate of the total number of hours needed to fill out the form; and (8) An indication of whether section 3504(H) of Pub. L. 96-511 applies.

ADDRESSES: Copies of the proposed forms and supporting documents may be obtained from Patricia Viers, Agency Clearance Officer (004A2), Veterans Administration, 810 Vermont Ave. NW., Washington, DC, 20420, (202) 389-2146. Comments and questions about the items on this list should be directed to the VA's OMB Desk Officer, Joe Lackey, Office of Management and Budget, 726 Jackson Place, NW., Washington, DC 20503, (202) 395-6880.

DATE: Comments on the forms should be directed to the OMB Desk Officer within 60 days of this notice.

Dated: February 23, 1983.

By direction of the Administrator.

Dominick Onorato,

Associate Deputy Administrator for Information Resources Management.

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 2:03 p.m. on Tuesday, March 1, 1983, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session, by telephone conference call, to consider a recommendation regarding the liquidation of assets acquired by the Corporation from American City Bank, Los Angeles, California (Case No. 45,623-L).

In calling the meeting, the Board determined, on motion of Chairman William M. Isaac, seconded by Director Irvine H. Sprague (Appointive), concurred in by Director C. T. Conover (Comptroller of the Currency), that Corporation business required its consideration of the matter on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matter in a meeting open to public observation; and that the matter could be considered in a closed meeting pursuant to subsection (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(9)(B)).

Dated: March 1, 1983.

Part II

Department of Labor

Employment Standards Administration, Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

DEPARTMENT OF LABOR

Employment Standards Administration, Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor specify, in accordance with applicable law and on the basis of information available to the Department of Labor from its study of local wage conditions and from other sources, the basic hourly wage rates and fringe benefit payments which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of the character and in the localities specified therein.

The determinations in these decisions of such prevailing rates and fringe benefits have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of part 1 of subtitle A of title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's Orders 12–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in effective date as prescribed in that section, because the necessity to issue construction industry wage determination frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions are effective from their date of publication in the **Federal Register** without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision together with any modifications issued subsequent to its publication date shall be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR, Part 5. The wage rates contained therein shall be the minimum paid under such contract by contractors and subcontractors on the work.

Modifications and Supersedeas Decisions to General Wage Determination Decisions

Modifications and supersedeas decisions to general wage determination decisions are based upon information obtained concerning changes in prevailing hourly wage rates and fringe benefit payments since the decisions were issued.

The determinations of prevailing rates and fringe benefits made in the modifications and supersedeas decisions have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of part 1 of subtitle A of title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's orders 13–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in foregoing general wage determination decisions, as hereby modified, and/or superseded shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged in contract work of the character and in the localities described therein.

Modifications and supersedeas decisions are effective from their date of publication in the **Federal Register** without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5.

Any person, organization, or governmental agency having an interest in the wages determined as prevailing is encouraged to submit wage rate information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Office of Government Contract Wage Standards, Division of Government Contract Wage Determinations, Washington, D.C. 20210. The cause for not utilizing the rulemaking procedures prescribed in 5 U.S.C. 553 has been set forth in the original General Determination Decision.

New General Wage Determination Decision

Arizona	AZ83-5102 AZ83-5105

Modifications to General Wage Determination Decisions

The numbers of the decisions being modified and their dates of publication in the **Federal Register** are listed with each State.

Alabama: AL82-1087	Dec. 10, 1982.
Florida	
FL82-1015	March 5, 1982.
FL82-1083	Nov. 19, 1982.
[illegible]	
LA82-4063	Nov. 5, 1982.
LA83-4001	Jan. 7, 1983.
LA83-4019	Feb. 4, 1983.
New York:	
NY81-3024	Apr. 3, 1981.
NY81-3062	Sept. 11, 1981.
New Jersey:	
NJ81-3053	Oct. 9, 1981.
NJ81-3063	Dec. 28, 1981.
Oklahoma:	
OK82-4035	June 25, 1982.
OK83-4012	Jan. 14, 1983.
OK83-4011	Jan. 14, 1983.
Texas:	
TX82-4025	June 18, 1982.
TX83-4004	Jan. 7, 1983.
TX83-4006	Jan. 7, 1983.
TX83-4007	Jan. 7, 1983.
Virginia: VA81-3015	Mar. 6, 1981.
Wyoming: WY82-5108	Mar. 12, 1982.
Indiana: IN82-2030	May 14, 1982.

Supersedeas Decisions to General Wage Determination Decisions

The numbers of the decisions being superseded and their dates of publication in the **Federal Register** are listed with each State. Supersedeas decision numbers are in parentheses following the numbers of the decisions being superseded.

Illinois: IL82-2032(IL83-2014)	May 21, 1982.

Cancellation of General Wage Determination Decisions

The general wage decisions listed below are cancelled. Agencies with construction projects pending to which one of the cancelled decisions would have been applicable should utilize the project determination procedure by submitting form SF–308. See Regulations Part 1 (29 CFR), § 1.5. Contracts for which bids have been opened shall not be affected by this notice. Also consistent with 29 CFR 1.7(b)(2), the incorporation of one of the cancelled decisions in contract specifications, the opening of bids is within ten (10) days of this notice, need not be affected.

AR–2058—Kanawha County, West Virginia dated October 4, 1974 in 39 FR 35948—Residential Construction.

NJ79–3052—Morris County, New Jersey dated November 30, 1979 in 44 FR 69102—Residential Construction.

Signed at Washington, D.C., this 25th day of February 1983.

Dorothy P. Come,

Assistant Administrator, Wage and Hour Division.

GROUP DESCRIPTIONS

POWER EQUIPMENT OPERATORS

Group 1: Air Compressor Operator; Pump Operator; Conveyor Operator; Generator Operator (all); Power Grizzly Operator; Fireman (all); Welding Machine Operator; Tripper Operator; Concrete Mixer Operator, skip type; Highline Cableway Signalman

Group 2: Oiler; Forklift and Ross Carrier Operator; Skiploader, 1¼ cu. yd. and less; Pavement Breaker; Roller Operator (except as otherwise classified); Wheel-type Tractor Operator (Ford-Ferguson type); Slurry Seal Machine Operator (driver Moto-paver); Power Sweeper

Group 3: Self-propelled Chip Spreading Machine Conveyor Operator; Dinky Operator, under 20 ton; Elevator Hoist Operator, Husky and similar

Group 4: Motor Crane Driver; Beltcrete Operator; Curing Machine Operator, Boring Bridge and Texture; Cross Tineing and Pipe Float; Straw Blower; Hydrographic Seeder; Hydrographic Mulcher; Jumbo Finishing Machine; Joint Inserter

Group 5: A-Frame Boom Truck or Winch Truck Operator; Grade Checker (excluding Civil Engineer); Multiple Power Concrete Saw Operator; Screed Operator; Stationary Pipe Wrapping and Cleaning Machine Operator; Tugger Operator

Group 6: Aggregate Plant Operator (including crushing, screening, and sand plants, etc.); Asphalt Laydown Machine Operator; Asphalt Plant Mixer Operator; Boring Machine Operator; Concrete Mechanical Tamping, Spreading or Finishing Machine Operator (including Clary, Johnson or similar types); Concrete Pump Operator; Concrete Batch Plant Operator, all types and sizes; Conductor, Brakeman, or Handler; Drilling Machine Operator, all types and sizes except as otherwise classified; Field Equipment Serviceman; Kolman Belt Loader Operator or similar type, with belt width 48" or over; Locomotive Engineer (including Dinky 20 tons weight and over); Moto-paver and similar type equipment Operator; Operating Engineer Rigger; Pneumatic-tired Scraper Operator, up to and including 12 cu. yds. (Turnapull, Euclid, Cat, D.W. Hancock, and similar equipment); Power Jumbo Form Setter Operator; Pressure Grout Machine Operator (as used in heavy engineering construction); Road Oil Mixing Machine Operator; Roller Operator, on all type apshalt pavement; Self-propelled Compactor, with blade; Skip Loader Operator, all types with a rated capacity over 1¼ but less than 4 cu. yds.; Slip Form Operator (power driven lifting device for concrete forms); Soil Cement Road Mixing Machine Operator, single pass type; Stationary Central Generating Plant Operator, rated 300 K.W. or more; Surface Heater and Planer Operator; Traveling Pipe-wrapping Machine Operator

POWER EQUIPMENT OPERATORS (Cont'd)

Group 7: Pneumatic-tried Scraper Operator, all sizes and types over 12 cu. yds. MRC (Turnapull, Euclid, Cat, D.W. Hancock and similar equipment); Tractor Operator (Pusher, Bulldozer, Scraper); Trenching Machine Operator

Group 8: Asphalt or Concrete Planing, Rotomill, and Milling Machine Operator; Auto Grade Machine Operator (CMI and similar equipment); Boring Machine Operator (including Mole, Badger and similar type); Concrete Mixer Operator, paving type and Mobile Mixers; Concrete Pump Operator, with boom attached (truck mounted); Crane Operator, Crawler and Pneumatic type under 100 ton capacity MRC; Crawler-type Tractor Operator, with boom attachment or Slope Bar; Derrick Operator; Forklift Operator for hoisting personnel; Gradall Operator; H. D. Mechanic and/or Welder; Helicopter Hoist Operator; Highline Cableway Operator (less than 20 tons rated capacity); Mass Excavator Operator (150 Bucyrus Erie and similar types); Mechanical Hoist Operator (two or more drums); Motor Grader Operator, any type power blade; Motor Grader Operator, with Elevating Grader attachment; Mucking Machine Operator;

Overhead Crane Operator; Piledriver Engineer (portable, stationary or skid rig); Pneumatic-tired Scraper Operator, all sizes and types (Turnapull, Euclid, Cat, D.W. Hancock and similar equipment over 45 cu. yds. MRC); Power driven Ditch Lining or Ditch Trimming Machine Operator; Skip Loader Operator, all types rated capacity 4 cu. yd. but less than 8 cu. yds.; Slip Form Paving Machine Operator (including Gunnert, Zimmerman and similar types); Specialized Power Digger Operator, attached to wheel-type tractor; Tower Crane (or similar type) Operator; Tugger Operator (two or more); Universal Equipment Operator, Shovel, Backhoe, Dragline, Clamshell, etc., up to 8 cu. yds.

Group 9: Crane Operator, Pneumatic or Crawler, 100 ton hoisting capacity and over MRC rating; Helicopter Pilot, FAA qualified, when used in construction work other than executive travel and single casual rental; Highline Cableway Operator, over 20 ton rated capacity and using traveling head and tail tower; Remote-control Earth Moving Equipment Operator; Skip Loader Operator, all types with rated capacity of 8 cu. yds. or more; Universal Equipment Operator, Shovel, Backhoe, Dragline, Clamshell, etc., 8 cu. yds. and over

TRUCK DRIVERS

Group 1: Teamsters; Pick-ups; Station Wagon; Man Haul Driver

Group 2: Dump or Flatrack (2 or 3 axle); Water Truck (under 2500 gallons); Buggymobile (1 cu. yd. or less); Bus Driver; Self-propelled Street Sweeper; Shop Greaser

Group 3: Dump or Flatrack (4 axle); Dumptor or Dumpster (less than 7 cu. yds.); Water Truck (2500 gallons but less than 4000 gallons); Fireman

Group 4: Dumptor or Dumpster (7 cu. yds. but less than 16 cu. yds.); Dump or Flatrack (5 axle); Water Truck (4000 gallons and over); Slurry type equipment Driver or Leverman; Vacuum Pump Truck Drivers; Flaherty Spreader or similar type equipment or Leverman; Transit Mix (8 cu. yds. or less mixer capacity); Ambulance Driver

Group 5: Dump or Flatrack (6 axle); Transit Mix (over 8 cu. yds. but less than 10.5 cu. yds.); Rock Truck (i.e. Dart, Euclid and other similar type end dumps, single unit) less than 16 cu. yds.

Group 5A: Oil Tanker or Spreader and/or Bootman, Retortman or Leverman

Group 6: Transit Mix (over 10.5 cu. yds. but less than 14 cu. yds. mixer capacity); Ross Carrier, Fork Lift or Lift Truck; Hydro Lift, Swedish Crane, Iowa 300 and similar types; Concrete Pump (when integral part of transit Mix Truck); Dump or Flatrack (7 axle); Transport Driver (unless axle rating results in higher classification)

Group 7: Dump or Flatrack (8 axle)

Group 8: Off-highway equipment Driver including but not limited to: 2 or 4 wheel power unit, i.e. Cat, DW Series, Euclid, International and similar type equipment, transporting material when top loaded or by external means including pulling Water Tanks, Fuel Tanks or other applications under Teamster Classifications; Rock Trucks (Dart, Euclid, or other similar end dump types) 16 cu. yds. and over; Eject-alls; Dumptor or Dumpster (16 cu. yds. and over); Dump or Flatrack (9 axle)

Group 8A: Heavy-duty Mechanic/Welder; Body and Fender Man

Group 8D: Field Equipment Servicemen or Fuel Truck Driver

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29 CFR, 5.5 (a)(1)(ii))

CLASSIFICATION DEFINITIONS - LABORERS:
DeKalb County

CLASS I - Common Laborers; Carpenters' Tenders; Tool, Cribmen, Firemen, or Salamander Tenders; Gravel Box Men; Dumpmen & Spotters; Form Handlers; Material Handlers; Fencing Laborers; Cleaning Lumber; Pit Men; Dispatchers; Landscapers; Unloading Explosives; Laying of Sod; Planting of Trees; Removal of Trees; Asphalt Plant Laborers; Wrecking Laborers; Fireproofing Laborers; Driving of Stakes; Stringlines for all Machinery; Asphalt Workers with Machines and Layers; Grade Checker; Signal Man on Crane; Coring Machine Operator; Concrete Workers (wet), on Concrete Paving; Placing, Cutting and Tying of Reinforcing Steel Form Setters-Street and Highway

CLASS II - Scaffold Workers; Handling of Materials Treated with any Foreign Matter Harmful to Skin or Clothing; Bulk Cement Handlers; Unloading of Re-Bars; Tunnel Tenders in Free Air; Batch Dumpers; Mason Tenders; Kettle and Tar Men; Tank Cleaners; Plastic Installers; Motorized Buggies or Motorized Unit Used for Wet Concrete or Handling of Building Materials; Vibrator Operators; Mortar Mixer Operators; Cement Silica; Clay Fly Ash; Lime and Plasters Handlers (Bulk or Bag); Deck Hand; Dredge Hand and Shore Laborers; Bankmen on Floating Plant; Power Tools; Material Selector (Firebrick or Castable Material); Chain Saw Operators; Air Tamping Hammerman; Concrete Saw Operator; Front End Man on Chip Spreader; Luteman; Asphalt Raker

CLASS III - Jackhammer and Drill Operator; Laborers with De-Watering Systems; Bottom Sewer Workers Plus Depth; Cofferdam Workers Plus Depth; Caisson Workers Plus Depth; Gunnite Nozzle Men; Leadman on Sewer Work; Welders, Cutters, Burners, & Torchmen; Layout Man and/or Tile Layer; Screenman on Asphalt Pavers; Laborers Tending Masons with Hot Material; Multiple Concrete Duct-Leadman; Curb Asphalt Machine Operator; Ready-Mix Scalemen; Permanent, or Temporary Plant; Laser Beam Operator; Concrete Burning Machine Operators; Underpinning and Shoring of Building; Pump Men

CLASSIFICATION DEFINITIONS - LABORERS (CONT'D):
Remaining Counties:
Heavy & Highway Construction:
Group 1 - Construction; Tenders; Material Expeditor (Asphalt Plant); Street Paving, Grade Separation, Sidewalk, Curb & Gutter, Strippers & All Laborers not Otherwise Mentioned
Group 2 - Asphalt Tampers & Smoothers; Cement Gun
Group 3 - Cement Gun Nozzle (Laborers) Gunite
Group 4 - Rakers & Lutemen; Machine-Screwmen; Kettlemen; Mixermen; Drum-Men; Jackhammermen (Asphalt); Paintmen; Mitre Box Spreaders; Laborers on Birch, Overman & Similar Spreader Equipment; Laborers on Apsco; Laborers on Air Compressors; Paving Form Setters; Jackhammermen (Concrete); Power Driven Concrete Saws; Other Power Equipment
Sewer & Tunnel Construction:
Group 1 - Top Laborers; All Laborers not Otherwise Mentioned
Group 2 - Concrete; & Steel Setters.
Group 3 - Cement Carriers; Cement Mixers; Concrete Repairmen; Mortar Men; Scaffold Men; & Second Bottom Men
Group 4 - Air Trac Drill Operations; Bottom Men; Bracers-Bracing; Bricklayers Tenders; Catch Basin Diggers; Drainlayers; Dynamiters; Form Men; Jackhammermen; Pipelayers; Rodders; Welders & Burners; & Well Point System Men

CLASSIFICATION DEFINITIONS - POWER EQUIPMENT OPERATORS:
Class 1: Asphalt Plant; Asphalt Heater and Planer Combination; Asphalt Spreader; Autograde; Belt Loader; Caisson Rigs; Central Redimix Plant; Concrete Breaker (truck mounted); Concrete Conveyor; Concrete Paver over 27E cu. ft.; Concrete Placer; Concrete Tube Float; Cranes, all attachments; Cranes, Linden, Peco and Machines of a like nature; Derricks, traveling; Dredges; Euclid Loader; Elevating type Gradall and Mechanics of a like nature; Derricks; All Derrick Boats; Derricks, traveling; Dredges; Euclid Loader; Elevating type Gradall and Mechanics of a like nature, 1 cu. yd. and over; Mucking Machine, under 1 cu. yd.; Piledrivers and Skid Rig; Pre-stress Machine; Pump Cretes, Dual Ram (requiring frequent lubrication and water); Rock Drill, Crane type; Slip Form Paver; Straddle Buggies; Tractor w/boom; Tractaire w/attachments; Trenching Machine; Underground Boring and/or Mining Machine, under 5 ft.; Wheel Excavator Widener (Apsco)

Class 2: Mechanic-welder; Batch Plant; Bituminous Mixer; Bulldozer; Combination Backhoe Front End Loader Machine; Concrete Breaker of Hydro-hammer; Concrete Grinding Machine; Concrete Mixer or Paver, 7S Series to and including 27 cu. ft.; Concrete Spreader; Concrete Curing Machine; Burlap Machine; Belting Machine and Sealing Machine; Finishing Machine; Concrete Grader; Motor Patrol; Auto Patrol; Form Grader; Pull Grader; Subgrader; Highlift Shovels or Front End Loader; Hydraulic Boom Trucks (all attachments); Locomotives, Dinky; Pump Cretes: Squeeze Cretes, Screw type Pumps; Cypsum Bulker and Pump; Rock Drill (self-propelled); Roto-tiller; Seaman, etc.; Self-propelled Scoops; Tractor drawn, self-propelled Compactor, Spreader, Chipstone, etc.; Scraper; Tank Car Heater; Tractor, push, pulling Sheeps Foot, disc.; Compactor, etc.; Tug Boats

CLASSIFICATION DEFINITIONS - POWER EQUIPMENT OPERATORS (CONT'D):

Class 3: Boilers; Boiler and Throttle Valve; Brooms, all power propelled; Cement Supply Tender; Compressor Throttle Valve; Concrete Mixer (2 Bags and over); Conveyor, portable; Fireman on Boiler; Forklift Trucks; Greaser Engineer; Grouting Machine Hoists; Automatic Hoists; All Elevator Hoists; Tugger, single drum; Jeep Diggers; Pipe Power Saw, Concrete; Power-driven Pug Mills; Rollers, all; Steam Generators; Stone Crushers; Stump Machine; Winch Truck with "A" Frame; Work Boats; Tamper; Form Motor driven

Class 4: Air Compressors, all; Generators; Heaters; Mechanical Light Plants, all (1 through 5); Pumps, all; Pumps, well points; Tractairc; Welding Machines (2 through 6)

Class 5: Oilers

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29 CFR, 5.5 (a)(1)(ii)).

Part III

Department of Health and Human Services

National Institutes of Health

Recombinant DNA Research; Meeting and Proposed Actions Under Guidelines

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

National Institute of Allergy and Infectious Diseases; Recombinant DNA Advisory Committee; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of a meeting of the Recombinant DNA Advisory Committee at the National Institutes of Health, Building 31C, Conference Room 6, 9000 Rockville Pike, Bethesda, Maryland 20205, on April 11, 1983, from 9 a.m. to approximately 6 p.m. The meeting will be open to the public to discuss:

Report on the Social and Ethical Issues of Genetic Engineering with Human Beings;
Report of Working Group on Revision of the Guidelines;
Proposed update of risk-assessment plan;
Amendment of Guidelines;
Revision of large-scale physical containment recommendations;
Classification of microorganisms for purposes of Guidelines;
Review of protocols for required containment levels; and
Other matters requiring necessary action by the Committee.

Attendance by the public will be limited to space available.

Dr. William J. Gartland, Jr., Executive Secretary, Recombinant DNA Advisory Committee, National Institutes of Health, Building 31, Room 3B10, telephone (301) 496–6051, will provide materials to be discussed at the meeting, rosters of committee members, and substantive program information. A summary of the meeting will be available at a later date.

There will be no meeting of the Large-Scale Review Working Group in conjunction with this meeting.

OMB's "Mandatory Information Requirements for Federal Assistance Program Announcements" (45 FR 39592) requires a statement concerning the official government programs contained in the *Catalog of Federal Domestic Assistance*. Normally NIH lists in its announcements the number and title of affected individual programs for the guidance of the public. Because the guidance in this notice covers not only virtually every NIH program but also essentially every federal research program in which DNA recombinant molecule techniques could be used, it has been determined to be not cost effective or in the public interest to attempt to list these programs. Such a list would likely require several additional pages. In addition, NIH could not be certain that every federal program would be included as many federal agencies, as well as private organizations, both national and international, have elected to follow the NIH Guidelines. In lieu of the individual program listing, NIH invites readers to direct questions to the information address above about whether individual programs listed in the *Catalog of Federal Domestic Assistance* are affected.

Dated: February 18, 1983.

Betty J. Beveridge,

Committee Management Officer, NIH.

BILLING CODE 4140-01-M

Recombinant DNA Research; Proposed Actions Under Guidelines

AGENCY: National Institutes of Health, PHS, DHHS.

ACTION: Notice of Proposed Actions under NIH Guidelines for Research Involving Recombinant DNA Molecules.

SUMMARY: This notice sets forth proposed actions to be taken under the NIH Guidelines for Research Involving Recombinant DNA Molecules. Interested parties are invited to submit comments concerning these proposals. After consideration of these proposals and comments by the NIH Recombinant DNA Advisory Committee (RAC) at its meeting on April 11, 1983, the Director of the National Institute of Allergy and Infectious Diseases will issue decisions on these proposals in accord with the Guidelines.

DATE: Comments must be received by April 4, 1983.

ADDRESS: Written comments and recommendations should be submitted to the Director, Office of Recombinant DNA Activities, Building 31, Room 3B10, National Institutes of Health, Bethesda, Maryland 20205. All comments received in timely response to this notice will be considered and will be available for public inspection in the above office on weekdays between the hours of 8:30 a.m. and 5:00 p.m.

FOR FURTHER INFORMATION CONTACT: Background documentation and additional information can be obtained from Drs. Stanley Barban and Elizabeth Milewski, Office of Recombinant DNA Activities, National Institutes of Health, Bethesda, Maryland 20205 (301) 496–6051.

SUPPLEMENTARY INFORMATION: The National Institutes of Health will consider the following actions under the Guidelines for Research Involving Recombinant DNA Molecules.

I. Proposed Modification of Appendix G–II–D–2–c (P4 Containment)

The RAC Working Group on Revision of the Guidelines, at its January 21, 1983, meeting, discussed modifying the language of Appendix G–II–D–2–a of the NIH Guidelines for Research Involving Recombinant DNA Molecules (47 FR 38048, August 27, 1982). That Appendix currently reads:

Appendix G–II–D–2–a. Experimental procedures involving organisms that require P4 level physical containment shall be conducted either in (i) a Class III cabinet system or in (ii) Class I or Class II cabinets that are located in a specially designed area in which all personnel are required to wear one-piece positive pressure isolation suits.

During the January 21, 1983, discussion, it was noted that the specification requiring use of the Class III glove box is to protect the investigator from infection acquired through aerosol exposure. The Class III glove box, however, does not afford protection when infection by the organism being studied does not occur through the respiratory route. Members of the working group pointed out that automatic assignment of all procedures to the Class III glove box, as specified in Appendix G–II–D–2–a, is not desirable since manipulations are more difficult to perform in the glove box. This slows research while not necessarily protecting the investigator. The working group suggested that authority to set containment for certain experiments within the P4 facility might be delegated to the local IBC in situations in which colonization or infection does not ordinarily result from aerosol exposure.

On the recommendation of the working group, NIH staff has proposed the following modification of Appendix NG–II–D–2–c, which is considered the more appropriate section to modify:

Appendix G–II–D–2–c. *Alternative Selection of Containment Equipment.* Experimental procedures involving a host-vector system that provides a one-step higher level of biological containment than that specified can be conducted in the P4 facility using containment equipment requirements specified for the P3 level of physical containment. Alternative combinations of containment safeguards are shown in Table II. In those cases where the host is an organism which does not cause infection by the respiratory route (e.g., use of *E. coli* K–12 or *S. cerevisiae* host-vector systems), the local IBC may set appropriate containment for procedures within the P4 facility.

II. Proposed Modification of Section III–B–5

The RAC Large-Scale Review Working Group, which met on October 26, 1982, has forwarded to RAC without comment a proposal by Dr. Allan Waitz of DNAX Corporation (a wholly owned subsidiary of Schering-Plough Corporation) to amend Section III–B–5 of the NIH Guidelines. Section III–B–5 currently reads:

III–B–6. Experiments Involving More Than 10 Liters of Culture. The appropriate containment will be decided by the IBC. Where appropriate, the large-scale containment recommendations of the NIH should be used (45 FR 24968).

Dr. Waitz said greater flexibility in scale-up procedures would be gained if the IBC could be notified simultaneously with initiation of large-scale procedures involving *E. coli* K–12, *Saccharomyces cerevisiae* and *Bacillus subtilis* host-vector systems. He suggested that Section III–B–5 be modified to read as follows:

III–B–5. *Experiments Involving More Than 10 Liters of Culture.* The appropriate containment will be decided by the IBC except where exempted under Section III–D–5. Where appropriate, the large-scale containment recommendations of the NIH should be used (45 FR 24968).

Language in Appendix C, *Exemptions Under III–D–5,* would also be modified to reflect this change. The relevant paragraphs of Appendix C–II, C–III, and C–IV, which deal with exceptions to the exemption, would be modified to read as follows:

Large-scale experiments (i.e., more than 10 liters of culture) require IBC notice simultaneously with the initiation of experiments where IBC-approved practices and an IBC-apptoved P1–LS containment facility will be used. Where these conditions are not satisfied, refer to Part III–B–5.

III. Proposed Modifications of Physical Containment Recommendations for Large-Scale Uses of Organisms Containing Recombinant DNA Molecules (45 FR 24968, Federal Register of April 11, 1980)

A. Proposed Modification of Section VII–D–6

Mr. Richard F. Geoghegan of E. I. DuPont de Nemours and Company has requested that Section VII–D–6 of the Large-Scale Recommendations be revised. Section VII–D–6 reads as follows:

VII–D–6. A closed system used for the propagation and growth of viable organisms containing recombinant DNA molecules shall be operated so that the space above the culture level will be maintained at or slightly below atmospheric pressure.

Mr. Geoghegan proposed that Section VII–D–6 be modified to read as follows:

VII–D–6. A closed system used for the propagation and growth of viable organisms containing recombinant DNA molecules shall be operated so that the space above the culture level be maintained at no more than 10 psig.

He argued that the revision will permit fermentations more in line with industrial practices (high biomass production through efficient oxygen transfer) to be conducted, without compromising safety by operating at unnecessarily high vessel pressures. The RAC Large-Scale Review Working Group, at its meeting on October 28, 1982, however, felt the language might appropriately be modified, but felt no specific pressure limit should be indicated as any pressure limit should be dependent on the maximum design presure of the system. The working group, thus, suggested the following language:

VII–D–6. A closed system used for the propagation and growth of viable organisms containing recombinant DNA molecules shall be operated so that the space above the culture level will be maintained at a pressure as low as possible, consistent with equipment design, in order to maintain the integrity of containment features.

The Large-Scale Review Working Group at its meeting on October 28, 1982, recommended this language by a vote of five in favor, none opposed, and no abstentions.

Both proposed modifications of Section VII–D–6 are published for comment.

B. Proposed Modification of Sections VII–B–1, VII–C–1, and VII–D–1

Dr. Allan Waitz of DNAX Corporation has proposed revising Sections VII–B–1, VII–C–1, and VII–D–1 of the Large-Scale Recommendations. The current language of those Sections reads as follows:

VII–B–1. Cultures of viable organisms containing recombinant DNA molecules shall be handled in a closed system (e.g., closed vessel used for the propagation and growth of cultures) or other primary containment equipment (e.g., biological safety cabinet containing a centrifuge used to process culture fluids) which is designed to reduce the potential for escape of viable organisms. Volumes less than 10 liters may be handled outside of a closed system or other primary containment equipment provided all physical containment requirements specified in Section II–B–1 of the Giudelines are met.

VII–C–1. Cultures of viable organisms containing recombinant DNA molecules shall be handled in a closed system (e.g., closed vessel used for the propagation and growth of cultures) or other primary containment equipment (e.g., Class III biological safety cabinet containing a centrifuge used to process culture fluids) which is designed to prevent the escape of viable organisms. Volumes less than 10 liters may be handled outside of a closed system or other primary containment equipment provided all physical containment requirements specified in Section II–B–2 of the Guidelines are met.

VII–D–1. Cultures of viable organisms containing recombinant DNA molecules shall be handled in a closed system (e.g., closed vessels used for the propagation and growth of cultures) or other primary containment equipment (e.g., Class III biolngical safety cabinet containing a centrifuge used to process culture fluids) which is designed to prevent the escape of viable organisms. Volumes less than 10 liters may be handled outside of a closed system provided all physical containment requirements specified in Section II–B–3 of the Guidelines are met.

Dr. Waitz suggested the first sentence in all of these sections should be modified to read as follows:

Cultures of viable organisms containing recombinant DNA molecules shall be handled in a closed system used for the propagation, growth and processing of cultures, other primary containment equipment, or other appropriate method of containment approved by the IBC which is designed to reduce the potential for escape of viable organisms * * *

The Large-Scale Review Working Group, at its meeting on October 28, 1982, pointed out that a closed primary system is one from which there is no release of organisms into the environment or work place; a primary system could be defined as a fermentor attached to several pieces of processing equipment. The working group agreed that the language as currently written is purposely flexible while at the same time conveying the intent; they, therefore, recommended against accepting this proposal.

C. Proposed Modification of Section VII–B–3

Dr. Allan Waitz also proposed amending Part VII–B–3 which reads as follows:

VII–B–3. Sample collection from a closed system, the addition of materials to a closed system and the transfer of culture fluids from one closed system to another shall be done in a manner which prevents the release of aerosols or contamination of exposed surfaces.

Dr. Waitz suggested that the word "prevents" implies an absolute condition which at the P1–LS level is neither realistic nor necessary. He suggested that the work "minimizes" be substituted for the word "prevents." The Large-Scale Review Working Group did not discuss this proposal at its meeting on October 28, 1982.

IV. Proposed Incorporation Into Guidelines of Physical Containment Recommendations for Large-Scale Uses of Organisms Containing Recombinant DNA Molecules

Dr. Allan Waitz of DNAX Corporation proposed that the Physical Containment Recommendations for Large-Scale Uses of Organisms Containing Recombinant DNA Molecules (45 FR 24968) be formalized by incorporating them into the Guidelines as a new Appendix. Dr.

Waitz said industry believes such an action would provide a more efficient mechanism for further comment or change to the Recommendations. He expressed industry's concern that failure to take such action may leave a perceived gap in the overall regulatory scheme thereby encouraging the development of conflicting regulatory requirements.

The Large-Scale Review Working Group, which met on October 28, 1982, forwarded this proposal to the RAC and to the Working Group on Revision of the Guidelines without comment.

The Working Group on Revision of the Guidelines, at its January 21, 1983, meeting, recommended incorporation into the Guidelines of the Physical Containment Recommendations for Large-Scale Uses of Organisms Containing Recombinant DNA Molecules. If the RAC recommends this action, editorial modifications to revise and update sections of the Physical Containment Recommendations will be necessary. The proposed incorporation of the Physical Containment Recommendations into the Guidelines as a new Appendix K, requires all sections be renumbered. Minor editorial changes will be introduced throughout the document to reflect the modifications introduced into the Guidelines since the Recommendations were published in April 1980. Proposed changes within the text are enumerated below. Readers should note that sections in the Recommendations which contain proposed revisions are identified by their current Section numbering. The proposed modified language is identified by new section numbering. The revised Large-Scal Recommendations are reprinted in their entirety at the end of this section.

A. Section VII. Physical Containment for Large-Scale Uses of Organisms Containing Recombinant DNA Molecules

1. Section VII would become Appendix K.

2. The language of the first paragraph would be modified. It currently reads:

> This part of the NIH Guidelines specifies physical containment guidelines for large-scale (greater than 10 liters of culture) research or production involving viable organisms containing recombinant DNA molecules. It shall apply to all large-scale research or production activities approved by the Director, NIH, in accordance with Sections IV- E-2-b-(1)-(c) and IV-E-1-b-(3)-(d) of the NIH Guidelines.

That paragraph would be modified to read as follows:

> This part of the NIH Guidelines specifies physical containment guidelines for large-scale (greater than 10 liters of culture) research or production involving viable organisms containing recombinant DNA molecules. It shall apply to large-scale research or production activities as specified in Section III-B-5 of the Guidelines.

3. The third paragraph (first bullet) will be modified to read:

> Appendix K shall replace Appendix G when quantities in excess of 10 liters of culture are involved in research or production.

4. An editorial modification, substituting "Section IV-B-4" for "Section IV-D-4," will be introduced into the third paragraph of the introduction. That paragraph will be modified to read:

> The institution shall appoint a biological safety officer if it engages in large-scale research or production activities involving viable organisms containing recombinant DNA molecules. The duties of the biological safety officer shall include those specified in Section IV-B-4 of the Guidelines.

B. Section VII-A. Selection of Physical Containment Levels.

This section will be renumbered as Appendix K-A.

C. Section VII-B. P1-LS Level

1. Section VII-B will be renumbered as Appendix K-B.

2. Section VII-B-1 will be renumbered to Appendix K-B-1 and an editorial modification will substitute Section "Appendix G-II-A" for "Section II-B-1." The last sentence of Section VII-B-1 will read:

> Volumes less than 10 liters may be handled outside of a closed system or other primary containment equipment provided all physical containment requirements specified in Appendix G-II-A of the Guidelines are met.

3. Section VII-B-2 will be renumbered Appendix K-B-2 and an editorial modification will substitute "Appendix K-B-3" for the current "VII-B-3." The first sentence of Section VII-B-2 would read:

> Appendix K-B-2. Culture fluids (except as allowed in Appendix K-B-3) shall not be removed from a closed system or other primary containment equipment unless the viable organisms containing recombinant DNA molecules have been inactivated by a validated inactivation procedure.

4. In Section VII-B-6, an editorial modification will change the language to read:

> Appendix K-B-6. Emergency plans required by Section IV-B-3-f shall include methods and procedures for handling large losses of culture on an emergency basis.

D. Section VII-C. P2-LS Level

1. Section VII-C will be renumbered to Appendix K-C.

2. Section VII-C-1 will be renumbered Appenix K-C-1 and in the last sentence of Section VII-C-1, an editorial modification will substitute "Appendix G-II-B" for the current "Section II-B-2."

3. Section VII-B-2 will be renumbered to Appendix K-C-2 and an editorial modification will substitute "Appendix K-C-3" for the current "VII-C-3."

4. In Section VII-C-11, to be renumbered Appendix K-C-11, an editorial modification will substitute "Section IV-B-3-f" for the current "Section IV-D-3-d."

E. Section VII-D. P3-LS Level

1. Section VII-D will be renumbered to Appendix K-D.

2. Section VII-D-1 will be renumbered to Section Appendix K-D-1 and an editorial modification will substitute "Appendix G-II-C" for the current "Section II-B-3."

3. Section VII-D-2 will be renumbered to Appendix K-D-2 and an editorial modification will substitute "Appendix K-D-3 for the current " IV-D-3."

4. In Section VII-D-12, to be renumbered Appendix K-D-12, an editorial modification will substitute "Substitute IV-B-3-f" for the current "Section IV-D-3-d."

5. In Section VII-D-14-a, to be renumbered Apendix K-D-14a, an editorial modification will substitute "Appendix K-D-13a" for "Section VII-D-13-a."

Note.—In addition, if the Large-Scale Recommendations are incorporated into the Guidelines, the language of Secion III-B-5 of the Guidelines should also be modified as follows:

III-B-5. *Experiments Involving More Than 10 Liters of Culture.* The appropriate containment will be decided by the IBC. Where appropriate, Appendix K, Physical Containment for Large-Scale Uses of Organisms Containing Recombinant DNA Molecules, should be used.

Proposed Appendix K

Physical Containment for Large-Scale Uses of Organisms Containing Recombinant DNA Molecules

This part of the NIH Guidelines specifies physical containment guidelines for large-scale (greater than 10 liters of culture) research or production involving viable organisms containing recombinant DNA molecules. It shall apply to large-scale research or production activities as specified in Section III-B-5 of the NIH Guidelines.

All provisions of the NIH Guidelines shall apply to large-scale research or production activities with the following modifications:

• Appendix K shall replace Appendix G when quantities in excess of 10 liters of culture are involved in research or production.

• The institution shall appoint a biological safety officer if it engages in large-scale research or production activities involving viable organisms containing recombinant DNA molecules. The duties of the bological safety officer shall include those specified in Section IV–B–4 of the Guidelines.

• The institution shall establish and maintain a health surveillance program for personnel engaged in large-scale research or production activities involving viable organisms containing recombinant DNA molecules which require P3 containment at the laboratory scale. The program shall include: preassignment and periodic physical and medical examinations; collection, maintenance and analysis of serum specimens for monitoring serologic changes that may result from the employee's work experience; and provisions for the investigation of any serious, unusual or extended illness of employees to determine possible occupational origin.

Appendix K–A. *Selection of Physical Containment Levels.* The selection of the physical containment levels required for recombinant DNA research or production involving more than 10 liters of culture is based on the containment guidelines established in Part III of the Guidelines. For purposes of large-scale research or production, three physical containment levels are established. These are referred to as P1–LS, P2–LS, and P3–LS. The P1–LS level of physical containment is required for large-scale research or production of viable organisms containing recombinant DNA molecules which require P1 containment at the laboratory scale. The P2–LS level of physical containment is required for large-scale research or production of viable organisms containing recombinant DNA molecules which require P2 containment at the laboratory scale. The P3–LS level of physical containment is required for large-scale research or production of viable organisms containing recombinant DNA molecules which require P3 containment at the laboratory scale. No provisions are made for large-scale research or production of viable organisms containing recombinant DNA molecules which require P4 containment at the laboratory scale. If necessary, these requirements will be established on an individual basis.

Appendix K–B. *P1–LS Level.*

Appendix K–B–1. Cultures of viable organisms containing recombinant DNA molecules shall be handled in a closed system (e.g., closed vessel used for the propogation and growth of cultures) or other primary containment equipment (e.g., biological safety cabinet containing a centrifuge used to reduce the potential for escape of viable organisms. Volumes less than 10 liters may be handled outside of a closed system or other primary containment equipment provided all physical containment requirements specified in Appendix G–II–A of the Guidelines are met.

Appendix K–B–2. Culture fluids (except as allowed in Appendix K–B–3) shall not be removed from a closed system or other primary containment equipment unless the viable organisms containing recombinant DNA molecules have been inactivated by a validated inactivation procedure. A validated inactivation procedure is one which has been demonstrated to be effective using the organism that will serve as the host for propagating the recombinant DNA molecules.

Appendix K–B–3. Sample collection from a closed system, the addition of materials to a closed system and the transfer of culture fluids from one closed system to another shall be done in a manner which prevents the release of aerosols or contamination of exposed surfaces.

Appendix K–B–4. Exhaust gases removed from a closed system or other primary containment equipment shall be treated by filters which have efficiencies equivalent to HEPA filters or by other equivalent procedures (e.g., incineration) to prevent the release of viable organisms containing recombinant DNA molecules to the environment.

Appendix K–B–5. A closed system or other primary containment equipment that has contained viable organisms containing recombinant DNA molecules shall not be opened for maintenance or other purposes unless it has been sterilized by a validated sterilization procedure. A validated sterilization procedure is one which has been demonstrated to be effective using the organism that will serve as the host for propagating the recombinant DNA molecules.

Appendix K–B–6. Emergency plans required by Section IV–B–3–f shall include methods and procedures for handling large losses of culture on an emergency basis.

Appendix K–C. *P2–LS Level.*

Appendix K–C–1. Cultures of viable organisms containing recombinant DNA molecules shall be handled in a closed system (e.g., closed vessel used for the propagation and growth of cultures) or other primary containment equipment (e.g., Class III biological safety cabinet containing a centrifuge used to process culture fluids) which is designed to prevent the escape of viable organisms. Volumes less than 10 liters may be handled outside of a closed system or other primary containment equipment provided all physical containment requirements specified in Appendix G–II–B of the Guidelines are met.

Appendix K–C–2. Culture fluids (except as allowed in Appendix K–C–3) shall not be removed from a closed system or other primary containment equipment unless the viable organisms containing recombinant DNA molecules have been inactivated by a validated inactivation procedure. A validated inactivation procedure is one which has been demonstrated to be effective using the organism that will serve as the host for propagating the recombinant DNA molecules.

Appendix K–C–3. Sample collection from a closed system, the addition of materials to a closed system, and the transfer of cultures fluids from one closed system to another shall be done in a manner which prevents the release or aerosols or contamination of exposed surfaces.

Appendix K–C–4. Exhaust gases removed from a closed system or other primary containment equipment shall be treated by filters which have efficiences equivalent to HEPA filters or by other equivalent procedures (e.g., incineration) to prevent the release of viable organisms containing recombinant DNA molecules to the environment.

Appendix K–C–5. A closed system or other primary containment equipment that has contained viable organisms containing recombinant DNA molecules shall not be opened for maintenance or other purposes unless it has been sterilized by a validated sterilization procedure. A validated sterilization procedure is one which has been demonstrated to be effective using the organism that will serve as the host for propagating the recombinant DNA molecules.

Appendix K–C–6. Rotating seals and other mechanical devices directly associated with a closed system used for the propagation and growth of viable organisms containing recombinant DNA molecules shall be designed to prevent leakage or shall be fully enclosed in ventilated housings that are exhausted through filters which have efficiencies equivalent to HEPA filters or through other equivalent treatment devices.

Appendix K–C–7. A closed system used for the propagation and growth of viable organisms containing recombinant DNA molecules and other primary containment equipment used to

contain operations involving viable organisms containing recombinant DNA molecles shall include monitoring or sensing devices that monitor the integrity of containment during operations.

Appendix K–C–8. A closed system used for the propagation and growth of viable organisms containing the recombinant DNA molecules shall be tested for integrity of the containment features using the organism that will serve as the host for propagating recombinant DNA molecules. Testing shall be accomplished prior to the introduction of viable organisms containing recombinant DNA molecules, and following modification or replacement of essential containment features. Procedures and methods used in the testing shall be appropriate for the equipment design and for recovery and demonstration of the test organism. Records of tests and results shall be maintained on file.

Appendix K–C–9. A closed system used for the propagation and growth of viable organisms containing recombinant DNA molecules shall be permanently identified. This identification shall be used in all records reflecting testing, operation, and maintenance and in all documentation relating to use of this equipment for research or production activities involving viable organisms containing recombinant DNA molecules.

Appendix K–C–10. The universal biohazard sign shall be posted on each closed system and primary containment equipment when used to contain viable organisms containing recombinant DNA molecules.

Appendix K–C–11. Emergency plans required by Section IV–B–3–f shall include methods and procedures for handling large losses of culture on an emergency basis.

Appendix K–D. *P3–LS Level.*

Appendix K–D–1. Cultures of viable organisms containing recombinant DNA molecules shall be handled in a closed system (e.g., closed vessels used for the propagation and growth of cultures) or other primary containment equipment (e.g., Class III biological safety cabinet containing a centrifuge used to process culture fluids) which is designed to prevent the escape of viable organisms. Volumes less than 10 liters may be handled outside of a closed system provided all physical containment requirements specified in Appendix G–II–C of the Guidelines are met.

Appendix K–D–2. Culture fluids (except as allowed in Appendix K–D–3) shall not be removed from a closed system or other primary containment equipment unless the viable organisms containing recombinant DNA molecules have been inactivated by a validated inactivation procedure. A validated inactivation procedure is one which has been demonstrated to be effective using the organisms that will serve as the host for propagating the recombinant DNA molecules.

Appendix K–D–3. Sample collection from a closed system, the addition of materials to a closed system, and the transfer of culture fluids from one closed system to another shall be done in a manner which prevents the release of aerosols or contamination of exposed surfaces.

Appendix K–D–4. Exhaust gases removed from a closed system or other primary containment equipment shall be treated by filters which have efficiencies equivalent to HEPA filters or by other equivalent procedures (e.g., incineration) to prevent the release of viable organisms containing recombinant DNA molecules to the environment.

Appendix K–D–5. A closed system or other primary containment equipment that has contained viable organisms containing recombinant DNA molecules shall not be opened for maintenance or other purposes unless it has been sterilized by a validated sterilization procedure. A validated sterilization procedure is one which has been demonstrated to be effective using the organisms that will serve as the host for propagating the recombinant DNA molecules.

Appendix K–D–6. A closed system used for the propagation and growth of viable organisms containing recombinant DNA molecules shall be operated so that the space above the culture level will be maintained at or slightly below atmospheric pressure.

Appendix K–D–7. Rotating seals and other mechanical devices directly associated with a closed system used to contain viable organisms containing recombinant DNA molecules shall be designed to prevent leakage or shall be fully enclosed in ventilated housings that are exhausted through filters which have efficiencies equivalent to HEPA filters or through other equivalent treatment devices.

Appendix K–D–8. A closed system used for the propagation and growth of viable organisms containing recombinant DNA molecules and other primary containment equipment used to contain operations involving viable organisms containing recombinant DNA molecules shall include monitoring or sensing devices that monitor the integrity of containment during operations.

Appendix K–D–9. A closed system used for the propagation and growth of viable organisms containing recombinant DNA molecules shall be tested for integrity of the containment features using the organisms that will serve as the host for propagating the recombinant DNA molecules. Testing shall be accomplished prior to the introduction of viable organisms containing recombinant DNA molecules, and following modification or replacement of essential containment features. Procedures and methods used in the testing shall be appropriate for the equipment design and for recovery and demonstration of the test organism. Records of tests and results shall be maintained on file.

Appendix K–D–10. A closed system used for the propagation and growth of viable organisms containing recombinant DNA molecules shall be permanently identified: This identification shall be used in all records reflecting testing, operation and maintenance and in all documentation relating to the use of this equipment for research production activities involving viable organisms containing recombinant DNA molecules.

Appendix K–D–11. The universal biohazard sign shall be posted on each closed system and primary containment equipment when used to contain viable organisms containing recombinant DNA molecules.

Appendix K–D–12. Emergency plans required by Section IV–B–3–f shall include methods and procedures for handling large losses of culture on an emergency basis.

Appendix K–D–13. Closed systems and other primary containment equipment used in handling cultures of viable organisms containing recombinant DNA molecules shall be located within a controlled area which meets the following requirements:

Appendix K–D–13–a. The controlled area shall have a separate entry area. The entry area shall be a double-doored space such as an air lock, anteroom or change room that separates the controlled area from the balance of the facility.

Appendix K–D–13–b. The surfaces of walls, ceilings, and floors in the controlled area shall be such as to permit ready cleaning and decontamination.

Appendix K–D–13–c. Penetrations into the controlled area shall be sealed to permit liquid or vapor phase space decontamination.

Appendix K–D–d. All utilities and service or process piping and wiring entering the controlled area shall be protected against contamination.

Appendix K–D–13–e. Handwashing facilities equipped with foot, elbow, or

automatically operated valves shall be located at each major work area and near each primary exit.

Appendix K–D–13–f. A shower facility shall be provided. This facility shall be located in close proximity to the controlled area.

Appendix K–D–13–g. The controlled area shall be designed to preclude release of culture fluids outside the controlled area in the event of an accidental spill or release from the closed systems or other primary containment equipment.

Appendix K–D–13–h. The controlled area shall have a ventilation system that is capable of controlling air movement. The movement of air shall be from areas of lower contamination potential to areas of higher contamination potential. If the ventilation system provides positive pressure supply air, the system shall operate in a manner that prevents the reversal of the direction of air movement or shall be equipped with an alarm that would be actuated in the event that reversal in the direction of air movement were to occur. The exhaust air from the controlled area shall not be recirculated to other areas of the facility. The exhaust air from the controlled area may be discharge to the outdoors without filtration or other means for effectively reducing an accidental aerosol burden provided that it can be dispersed clear of occupied buildings and air intakes.

Appendix K–D–14. The following personnel and operational practices shall be required:

Appendix K–D–14–a. Personnel entry into the controlled area shall be through the entry area specified in Appendix K–D–13–a.

Appendix K–D–14–b. Persons entering the controlled area shall exchange or cover their personal clothing with work garments such as jumpsuits, laboratory coats, pants and shirts, head cover, and shoes or shoe covers. On exit from the controlled area the work clothing may be stored in a locker separate from that used for personal clothing or discarded for laundering. Clothing shall be decontaminated before laundering.

Appendix K–D–14–c. Entry into the controlled area during periods when work is in progress shall be restricted to those persons required to meet program or support needs. Prior to entry all persons shall be informed of the operating practices, emergency procedures, and the nature of the work conducted.

Appendix K–D–14–d. Persons under 18 years of age shall not be permitted to enter the controlled area.

Appendix K–D–14–e. The universal biohazard sign shall be posted on entry doors to the controlled area and all internal doors when any work involving the organism is in progress. This includes periods when docontamination procedures are in progress. The sign posted on the entry doors to the controlled area shall include a statement of agents in use and personnel authorized to enter the controlled area.

Appendix K–D–14–f. The controlled area shall be kept neat and clean.

Appendix K–D–14–g. Eating, drinking, smoking, and storage of food are prohibited in the controlled area.

Appendix K–D–14–h. Animals and plants shall be excluded from the controlled area.

Appendix K–D–14–i. An effective insect and rodent control program shall be maintained.

Appendix K–D–14–j. Access doors to the controlled area shall be kept closed, except as necessary for access, while work is in progress. Serve doors leading directly outdoors shall be sealed and locked while work is in progress.

Appendix K–D–14–k. Persons shall wash their hands when leaving the controlled area.

Appendix K–D–14–l. Persons working in the controlled area shall be trained in emergency procedures.

Appendix K–D–14–m. Equipment and materials required for the management of accidents involving viable organisms containing recombinant DNA molecules shall be available in the controlled area.

Appendix K–D–14–n. The controlled area shall be decontaminated in accordance with established procedures following spills or other accidental release of viable organisms containing recombinant DNA molecules.

V. Proposed Field Testing of Genetically Engineered Plants

Cetus Madison Corporation requests permission to field test genetically engineered plants. The proposal is divided into there separate requests:

A. Field test in Wisconsin very small plots (less than 0.5 acre per experiment) of wheat, cotton, soybean, corn, tobacco, tomato and potato plants grown from seeds containing recombinant DNA. There will be "extremely close nonitoring" as defined by the submitter.

B. Field test in several southern U.S. states very small plots (less than 0.5 acre per experiment) of cotton, rice and tomato plants grown from seeds containing recombinant DNA. There will be "very close monitoring" as defined by the submitter.

C. If the above experiments succeed, aproximately fifty field plots or less than 5 acres such would be tested in many U.S. locations. There will be "close monitoring" as defined by the submitter.

VI. Request to Release Strains of Pseudomonas Syringae and Erwinia Herbicola

Drs. Nickolas Panopoulos and Steven Lindown of the University of California, Berkeley, request permission to construct and release *Pseudonomas syringae* pv. *syringae* and *Erwinia herbicola* carrying in vitro generated deletions of all or part of the genes involved in ice nucleation for purposes of biological control of frost damage in plants.

VII. Proposed Amendment of Section III–A–2 and Addition of a New Section III–B–4–c

The RAC Working Group on Revision of the Guidelines, at its January 21, 1983, meeting, recommended that guidelines for field experimentation involving plants modified by recombinant DNA techniques be developed for consideration at the April 11, 1983, RAC meeting. The following changes in the Guidelines have been proposed.

Section III–A–2 would be modified to read as follows:

III–A–2. Deliberate release into the environment of any organism containing recombinant DNA except certain plants as described in Section III–B–4–c.

A new Section, III–B–4–c, would be added as follows:

III–B–4–c. Approval may be granted by the IBC with notification to ORDA for growing plants containing recombinant DNA in the field under the following guidelines:

III–B–4–c–1. The plant species is an annual cultivated crop of a genus that has no species known to be a noxious weed,

III–B–4–c–2. The introduced DNA consists of well characterized genes containing no sequences harmful to humans, animals, or plants. Antibiotic resistance genes may be introduced as selectable marker traits if stable integration into the host DNA known to occur,

III–B–4–c–3. The vector consists of DNA from (i) exempt host-vector systems (Appendix C), (ii) plants of the same or closely related species; (iii) non-pathogenic prokaryotes or non-pathogenic lower eukaryotic plants; (iv) plant pathogens if known sequences causing disease symptoms have been deleted; or (v) DNA constructed from specific sequences of any of the above sources.

The DNA may be introduced by any suitable method but if co-infection or co-cultivation is utilized absence of the assisting organism must be demonstrated.

III–B–4–c–4. Plants are grown in control access fields under specified conditions appropriate for the plant under study in the geographical location. Such conditions should include provisions for using good cultural and pest control practices, for physical isolation

from plants of the same species outside of the experimental plot in accordance with pollination characteristics of the species, and for preventing plants containing recombinant DNA from becoming established in the environment. Review of the IBC should include an appraisal by scientists knowledgable in the crop, its production practices, and the local geographic conditions.

OMB's "Mandatory Information Requirements for Federal Assistance Program Announcements" (45 FR 39592) requires a statement concerning the official government program contained in the *Catalog of Federal Domestic Assistance*. Normally NIH lists in its announcements the number and title of affected individual programs for the guidance of the public. Because the guidance in this notice covers not only virtually every NIH program but also essentially every federal research program in which DNA recombinant molecule techniques could be used, it has been determined to be not cost effective or in the public interest to attempt to list these programs. Such a list would likely require several additional pages. In addition, NIH could not be certain that every federal program would be included as many federal agencies, as well as private organizations, both national and international, have elected to follow the NIH Guidelines. In lieu of the individual program listing, NIH invites readers to direct questions to the information address above about whether individual programs listed in the *Catalog of Federal Domestic Assistance* are affected.

Dated: February 28, 1983.

Richard M. Krause,

Director, National Institute of Allergy and Infectious Diseases; National Institutes of Health.

Part IV

Department of Labor

Employment and Training Administration

Trade Adjustment Assistance for Workers; Proposed Rule

DEPARTMENT OF LABOR

Employment and Training Administration

20 CFR Part 635

Trade Adjustment Assistance for Workers

AGENCY: Employment and Training Administration, Labor.

ACTION: Proposed rule.

SUMMARY: The Department of Labor proposes to revise the regulations for implementing the program of trade adjustment assistance for workers (TAA Program) provided under Chapter 2 of Title II of the Trade Act of 1974 (Pub. L. 93–618). These proposed regulations implement the amendments to the Trade Act of 1974 made by Title XXV of the Omnibus Budget Reconciliation Act of 1981 (Pub. L. 97–35). These proposed regulations also reorganize and revise the existing rules to state the rights and obligations of workers for services and allowances, and to clarify the responsibilities of the Secretary of Labor and the State agencies. The setting forth of this information in each part dealing with a separate program conforms to the more recent practice in writing regulations for unemployment compensation and related benefit programs.

DATE: Written comments on these proposed regulations must be received by the Department of Labor on or before April 4, 1983.

ADDRESS: Send comments on these proposed regulations to the U.S. Department of Labor, Employment and Training Administration, Room 7000, Patrick Henry Building, 601 "D" Street, NW., Washington, D.C. 20213.

All comments received will be available for public inspection during normal business hours, in Room 7000 at the above address.

FOR FURTHER INFORMATION CONTACT: Carolyn M. Golding, Director, Unemployment Insurance Service, Employment and Training Administration, U.S. Department of Labor, 601 "D" Street, N.W., Washington, D.C. 20213; telephone: (202) 376–7032 (this is not a toll-free number).

SUPPLEMENTARY INFORMATION: The Trade Act of 1974 made major changes in the TAA Program for workers displaced by increased imports of articles like or directly competitive with articles produced by the workers. On the filing of a petition by a group of workers or their representative, the Department of Labor conducts an investigation of adverse impact of imports, and if it is found that the workers of a firm or a subdivision of a firm have been adversely affected by import competition, a certification is issued declaring that the adversely affected workers are eligible to apply for Trade Adjustment Assistance (TAA). In Title XXV of the Omnibus Budget Reconciliation Act of 1981 further major changes were made in the TAA Program. In today's proposal, the regulations for the TAA Program are extensively revised to implement those changes and to make other improvements and clarify the regulations.

The amended TAA provisions are designed to assist adversely affected workers to return to work in equivalent or better employment as quickly as possible. The Act provides for TAA in the form of weekly trade readjustment allowances (TRA), reemployment services, training, and job search and relocation allowances.

The 1981 amendments change the TAA Program to strengthen the emphasis of getting workers reemployed as soon as possible, and to modify the TRA provisions as to the qualifying requirements, the weekly and maximum amounts of TRA payable, and the eligibility periods in which TRA is payable. Most of the 1981 amendments were effective on October 1, 1981.

Under the 1981 amendments workers who are separated from employment adversely affected by imports are eligible for reemployment services and allowances immediately after the Department of Labor issues a certification of eligibility to apply for TAA, but are not eligible for weekly TRA payments until after they have exhausted all rights to State or Federal unemployment insurance (UI).

In addition, the 1981 amendments increase the amounts of subsistence and transportation allowances payable to a worker in training approved under the Act, and the amounts of job search and relocation allowances. They also reduce the weekly and maximum amounts of TRA payments and the eligibility periods for receipt of TRA payments. The amount of the weekly TRA payment will be equal to the UI weekly benefit amount. Generally, workers are now eligible to receive a combination of UI (including Extended Benefits (EB)) and TRA not to exceed an amount derived by multiplying the TRA weekly benefit amount by 52. In addition, workers receiving TRA are required to apply for and accept offers of work and actively seek work in accordance with the work test provisions of State law which apply to EB claimants, except when the workers are engaged in tranining approved under the Act or training approved under State law.

Workers in training approved under the Act may receive up to 26 additional weeks of TRA in order to complete such training.

Additional weeks of TRA, previously payable to workers solely because they reached age 60 on or before their separation from adversely affected employment, are no longer payable for any weeks beginning after September 30, 1981.

These proposed regulations also make other changes, including technical and clarifying changes.

The significant changes proposed in this document are:

1. Section 635.11(a)(2) requires, for purposes of TRA entitlement, that a worker's first separation from adversely affected employment must occur: (a) On or after the impact date stated in the certification; (b) before the expiration of the two-year period beginning on the date of the certification; and (c) before the termination date, if any, of the certification.

"First separation" is defined as the worker's first total or partial separation from adversely affected employment on or most closely following the impact date of the certification under which the worker is covered, and which occurs before or within the worker's first UI benefit period.

The "date of separation" is defined to mean: (a) With respect to a total separation, the last day the worker worked in adversely affected employment, except that if the worker was on employer-authorized leave, it would mean the last day the worker would have worked in such employment had the worker been working; and (b) with respect to a partial separation, the last day of the week in which the partial separation occurred.

2. Section 635.11(a)(3) removes the limitation whereby only weeks of employment in the 52 weeks "immediately preceding" the worker's total or partial separation can be counted as qualifying weeks for TRA entitlement. Under the 1981 amendments, the week of employment in which the worker's separation occurs will be included as one of the weeks in the 52-week qualifying period.

In addition, § 635.11(a)(3) provides that any week a worker is on employer-authorized leave for purposes of vacation, sickness, injury, maternity, or inactive duty or active duty military service for training, does not work because of a disability that is compensable under a State or Federal workers' compensation law or plan, or

has had employment interrupted in order to serve as a full-time representative of a labor organization in the firm or subdivision, shall be treated as a week of employment at wages of $30 or more. Not more than 3 weeks of such employer-authorized leave or leave to serve as a full-time union representative (or both), or not more than 7 weeks of disability covered by workers' compensation, or not more than 7 weeks total, combining weeks of disability and not more than 3 weeks of employer-authorized or union representation leave (or both), may be counted as weeks of employment for this purpose.

3. Section 635.11(a)(4) requires, for purposes of TRA entitlement, that a worker must have been entitled to UI (or would have been entitled if the worker applied therefore) for a week within the UI benefit period established after the worker's first separation, or within the UI benefit period in which such separation occurred.

"Benefit period" is defined as: (a) The benefit year and any ensuing period, as determined under State law, during which a worker is eligible for regular UI, additional UI, or EB; or (b) the equivalent of such a benefit year or ensuing period provided for under Federal UI law.

"UI" is defined as unemployment compensation payable to a worker under any State or Federal unemployment compensation law, including chapter 85, title 5, of the United States Code, and the Railroad Unemployment Insurance Act. This term includes regular UI, additional UI, and EB. (It also will include any temporary Federal supplemental compensation during periods when such compensation is payable.)

4. Section 635.11(a)(5) requires, for purposes of TRA entitlement, that a worker must have exhausted all rights to UI to which the worker was entitled under State or Federal law. Once the worker has exhausted all rights to UI, the worker will be entitled to TRA payments except for any week the worker is entitled to a payment of any further UI or waiting period credit.

"Exhaustion of UI" is defined as exhaustion of all rights to UI in a benefit period by reason of: (a) Having received all UI to which a worker was entitled under State or Federal UI law with respect to such benefit period; or (b) the expiration of such benefit period.

Under the 1981 amendments, once a worker has exhausted all rights to UI in the UI benefit period in existence or established after the worker's first separation, the worker may not be determined to have a subsequent exhaustion of rights to UI under that same certification. The purpose of this is to limit a worker to one period of entitlement to TRA under a particular certification, and to preclude establishing entitlement to a second period of TRA following a subsequent UI benefit period. However, the worker will be eligible to collect any remaining amount of the original TRA entitlement if the worker is still within the TRA eligibility period following exhaustion of UI in a subsequent UI benefit period.

5. Section 635.11(a)(6) requires workers, as a condition of eligibility for receiving TRA for any week, to apply for and accept offers of work and actively seek work in accordance with the provisions of conforming State law which apply to EB claimants. The EB work test requires that claimants, whose prospects of returning to work are not good, will be disqualified in they fail to apply for, or accept offers of, "suitable work," as defined for EB purposes, or to actively seek such work. The EB work test does not apply to workers engaged in training approved under the Act or in training approved under State law.

6. Section 653.11(b) specifies the first week a worker is eligible for a TRA payment. Such first week is the later of: (a) The first week of unemployment which begins more than 60 days after the date of filing the petition that resulted in the certification under which the worker is covered; or (b) the first week after the worker exhausts UI. The purpose of this amendment is to encourage timely petitions before exhaustion of UI, thereby reducing the frequency of retroactive lump sum TRA payments.

"Week of unemployment" is defined as a week of total, part-total, or partial unemployment, as determined under State or Federal UI law.

7. Section 635.13 provides that the TRA weekly benefit amount payable to a worker for a week of total unemployment shall be equal to the most recent UI weekly benefit amount (including dependents' allowances) payable to the worker for a week of total unemployment preceding the worker's first exhaustion of UI. In a State in which weeks of UI are paid at varying amounts, related to wages with separate employers, the TRA weekly benefit amount shall be calculated the same as the EB weekly benefit amount is calculated. In addition, if a State calculates a base amount of UI and calculates dependents' allowances on a weekly supplemental basis, TRA weekly benefit amounts will be calculated in the same manner.

The TRA weekly benefit amount is reduced by: (a) Income deductible from UI under the disqualifying income provisions of State or Federal UI law; and (b) the amount of a training allowance that is deductible under Section 232(c) (formerly 232(d)) of the Act. In addition, the TRA weekly benefit amount will be reduced by any amount deductible from UI for days of absence from training under the provisions of the State law which apply to individuals in approved training.

Prior to the 1981 amendments, the TRA weekly benefit amount was a national uniform standard equal to 70 percent of the worker's previous gross weekly wage, not to exceed the average weekly manufacturing wage, reduced by: (a) The amount of the worker's UI entitlement, if any; (b) 50 percent of any remuneration for services performed during the week; and (c) certain training allowances paid under Federal law. The TRA weekly benefit amount was also reduced for days of unexcused absence from training approved under the Act.

There is no change in section 232(b) of the Act, which provides that any adversely affected worker entitled to TRA and undergoing training approved under the Act, including on-the-job training, shall receive for each week of such training the TRA weekly benefit amount or the amount, if greater, of any weekly training allowance under any other Federal law to which the worker would be entitled. This TRA amount would be paid in lieu of any such training allowance.

8. Section 635.14 provides that the maximum amount of basic TRA payable to an adversely affected worker under a certification shall be an amount equal to 52 times the TRA weekly benefit amount, minus the total sum of UI payable to the worker in the worker's first UI benefit period.

Prior to the 1981 amendments, basic TRA was payable for up to 52 weeks of unemployment. In addition, workers who reached age 60 on or before their last separation from adversely affected employment and workers in training approved under the Act were entitled to receive up to 26 additional weeks of TRA. Workers in training approved under the Act will continue to be entitled to receive up to 26 additional weeks of TRA after October 1, 1981, but under the statutory amendments older workers will not longer be entitled to receive TRA for additional weeks.

9. Section 635.15 provides that basic TRA is payable during the 52-week eligibility period beginning with the first week following the first week in which the worker has exhausted all rights to regular UI. Additional weeks of TRA to assist a worker to complete training

approved under the Act are payable during the 26-week eligibility period following the last week of the worker's entitlement to basic TRA.

Prior to the 1981 amendments, basic TRA was payable over a 2-year benefit period following the worker's most recent separation from adversely affected employment, and additional weeks of TRA were payable over a maximum 3-year period.

10. Section 635.16 provides, for purposes of determining the applicable State law for a worker, that such law will be the State law under which the worker: (a) Is currently entitled to UI; or (b) has most recently exhausted all rights to any UI to which the worker was entitled. The State law so determined will remain applicable to a worker unless the worker becomes entitled to UI under another State law. In such case, the applicable State law will be the law of the State in which the worker is entitled to UI.

11. Section 635.20 requires, as do the present regulations, that State agencies provide, or arrange to have provided, appropriate reemployment services to workers, such as counseling, testing, placement, supportive services, job search and relocation assistance, training and other services provided for under any other Federal law.

12. Section 635.22 provides that training may be approved under the Act for a worker if specified conditions are met: (a) There is no suitable employment available for the worker; (b) the worker would benefit from the training; (c) there is a reasonable expectation of employment following completion of the training; (d) the training is available from governmental agencies or private sources; and (e) the worker is qualified to undertake and complete the training. Because training costs must be paid by the Secretary if training is approved under the Act, no training may be approved unless there are sufficient federal funds on hand to pay for the training.

"Suitable employment," for purposes of approval of training under the Act, is defined in § 635.22 as work of a substantially equal or higher skill level than the worker's past adversely affected employment, and wages for such work at not less than 80 percent of the worker's average weekly wage. (This is a defined term in section 236 of the Act.)

13. Section 635.23 provides that, when suitable employment is not available, the State agency will explore, identify, develop and secure training opportunities and establish linkages with other public and private agencies, Private Industry Councils, employers, and CETA prime sponsors, as appropriate, so as to arrange for training and the return of adversely affected workers to employment as soon as possible.

14. Section 635.27 provides that a worker in training approved under the Act outside the commuting area shall receive subsistence payments not to exceed the lesser of the actual per diem expenses, or 50 percent of the prevailing per diem authorized under the Federal travel regulations.

"Commuting area," for purposes of eligibility for subsistence and transportation payments while in training approved under the Act, and job search and relocation allowances, is defined as the area in which an individual would be expected to travel to and from work on a daily basis as determined under the State law.

15. Section 635.28 provides that a worker in training approved under the Act outside the commuting area shall receive transportation payments not to exceed the lesser of the actual cost for travel by the least expensive means of transportation reasonably available, or the cost per mile at the prevailing mileage rate authorized under the Federal travel regulations.

16. Subpart D, *Job Search Allowances*, provides for an increase in reimbursement for job search expenses from 80 percent to 90 percent of the costs of necessary expenses, but not in excess of 90 percent of the levels of subsistence and transportation expenses authorized for workers in training approved under the Act. In addition, Subpart D provides for an increase in the maximum amount of reimbursement from $500 to $600.

To qualify for a job search allowance, the worker must: (a) Have no reasonable expectation of securing suitable employment in the commuting area; and (b) have a reasonable expectation of obtaining suitable employment outside the commuting area and in the area where the job search will be conducted. For this purpose, "suitable employment" means suitable work as defined in the applicable State law for regular UI claimants or EB claimants, whichever is applicable to the worker.

17. Subpart E, *Relocation Allowances*, provides for an increase in reimbursement for relocation expenses from 80 percent to 90 percent of the costs of necessary expenses, but not in excess of 90 percent of the levels of subsistence and transportation expenses authorized for workers in training approved under the Act. In addition, Subpart E provides for an increase in the additional lump sum payment from a $500 to $600 maximum. Eligibility for TRA is no longer a requirement for entitlement to relocation allowances after September 30, 1981.

To qualify for a relocation allowance, the worker must: (a) Have no reasonable expectation of securing suitable employment in the commuting area; and (b) have obtained suitable employment, or a bona fide offer of suitable employment, outside the commuting area and in the area of intended relocation. For this purpose, "suitable employment" means suitable work as defined in the applicable State law for regular UI claimants or EB claimants, whichever is applicable to the worker.

In accordance with the Federal travel regulations, Subpart E provides for the cost of: (a) Transportation of household goods and personal effects, not to exceed 11,000 pounds net weight for a worker with a family, and 5,000 pounds net weight for a worker without a family; and (b) temporary storage of household goods and personal effects, where necessary, for a period not to exceed 60 days.

18. Section 635.52 restates the rules of construction and other provisions governing the uniform interpretation and application of the law. In this regard, the regulation is revised to incorporate into §§ 635.52(c) (3) and (4) specific rules for assigning responsibility to the States for the payment of TAA only in accordance with the law and the regulations, and the States' responsibility for making the United States whole where they violate the law and regulations. These rules (incorporating what is sometimes referred to as the "Lopez Rule") were developed following a series of cases where a State had paid claims in flagrant disregard of the law and the regulations.

19. Section 635.55 provides that a worker receiving a TAA overpayment, whether fraudulent or otherwise, will be liable for repayment. Section 243(a)(1) of the Act provides that repayment of an overpayment "may" be waived under certain conditions in accordance with guidelines prescribed by the Secretary of Labor. Such guidelines are prescribed in these proposed regulations at § 635.55(a).

Unless a TAA overpayment is otherwise recovered, or is waived under the guidelines prescribed in these regulations, the State agency shall recover the overpayment by deductions from any sums payable to the worker under the TAA Program or under any other Federal law administered by the State agency providing payments with respect to unemployment.

No single deduction may exceed 50 percent of the amount otherwise

payable to the worker, and when a deduction is made, it shall be 50 percent of the amount actually payable.

In the case of false statement or representation, or of nondisclosure of a material fact, the worker would also be ineligible for any further TAA payments in the future.

No repayment may be required or deduction made until a determination of overpayment has been made, notice has been given to the worker of the determination, an opportunity has been given to the worker for a fair hearing, and the determination has become final. These provisions were effective on August 13, 1981, and apply to all TAA overpayments outstanding on that date or determined on or after that date.

20. Section 635.62 provides transitional procedures for administering the TAA Program for those workers who filed applications or qualified for services and allowances before and after the effective date of the 1981 amendments. This section also includes conforming amendments required to be made in existing State law, and the dates by which such amendments must be made.

21. Section 635.64 reflects the change in the termination date of the TAA Program from September 30, 1982, to September 30, 1983.

22. Other technical and clarifying changes have been made in the regulations.

Drafting Information

This document was prepared under the direction and control of the Director of the Unemployment Insurance Service, Employment and Training Administration, U.S. Department of Labor, 601 "D" Street, N.W., Washington, D.C. 20213; telephone: (202) 376-7032 (this is not a toll-free number).

Classification—Executive Order 12291

The proposed rule in this document is not classified as a "major rule" under Executive Order 12291 on Federal Regulations, because it is not likely to result in (1) an annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. While several of the proposed provisions may entail some costs, for example, the work test provisions, they will be more than offset by the budgetary savings that result from the lower weekly and maximum benefits and tightened eligibility requirements. In addition, any added costs, to the extent that they exist, do not represent new burdens imposed by the proposed regulations, but rather are direct statutory obligations. Accordingly, no regulatory impact analysis is required.

Regulatory Flexibility Act

The Department believes that this proposed rule will have no "significant economic impact on a substantial number of small entities" within the meaning of 5 U.S.C. 605(b), as provided in the Regulatory Flexibility act. This rule will affect those agencies in small States that administer the TAA Program. However, current TAA Program recipients are concentrated in larger industrial States, where jobs have been "hardest hit" by foreign import competition. States may find some increased administrative costs as a result of the proposed provisions to implement work tests in accordance with State provisions applicable to extended benefit claimants.

However, most of the operating mechanisms needed for the proposed TAA program are in place through the UI system, including benefit payments, appeals, work search and work test procedures and relocation and training assistance. This will assure that any additional administrative costs are minimal. Moreover, these costs will decline over time as adversely affected workers find reemployment in substantially equivalent jobs. The Secretary has certified to the Chief Counsel for Advocacy of the Small Business Administration to this effect. Accordingly, no regulatory flexibility analysis is required.

Regulatory Flexibility Act Certification

I, Raymond J. Donovan, Secretary of Labor, hereby certify, pursuant to 5 U.S.C. 605(b), that the proposed rule published hereinafter (20 CFR Part 635) will not have a significant economic impact on a substantial number of small entities, because this rule implements amendments that do not heavily impact agencies in small States and which, moreover, have no significant economic impacts on agencies in small States.

Dated: February 24, 1983.

Raymond J. Donovan,

Secretary.

List of Subjects in 20 CFR Part 635

Labor, Trade adjustment assistance, Job search assistance, Reemployment services, Relocation assistance, Trade readjustment allowances, Vocational education, Unemployment compensation.

Words of Issuance

For the reasons set out in the preamble, the addition of Part 635 to Title 20 of the Code of Federal Regulations is proposed as set forth below.

Signed at Washington, D.C., on February 24, 1983.

Albert Angrisani,

Assistant Secretary of Labor.

PART 635—TRADE ADJUSTMENT ASSISTANCE FOR WORKERS UNDER THE TRADE ACT OF 1974

Subpart A—General

Sec.

635.1 Scope.
635.2 Purpose.
635.3 Definitions.

Subpart B—Trade Readjustment Allowances (TRA)

635.10 Applications for TRA.
635.11 Qualifying requirements for TRA.
635.12 Evidence of qualification.
635.13 Weekly amounts of TRA.
635.14 Maximum amount of TRA.
635.15 Duration of TRA.
635.16 Applicable State law.
635.17 Availability and active search for work.
635.18 Disqualifications.

Subpart C—Reemployment Services

635.20 Responsibilities for the delivery of reemployment services.
635.21 Reemployment services and allowances.
635.22 Approval of training.
635.23 Selection of training methods and programs.
635.24 Preferred training.
635.25 Purchased training.
635.26 Approval of other training, including interstate.
635.27 Subsistence payments.
635.28 Transportation payments.
635.29 Application of EB work test.

Subpart D—Job Search Allowances

635.30 General.
635.31 Applications.
635.32 Eligibility.
635.33 Findings required.
635.34 Amount.
635.35 Time and method of payment.

Subpart E—Relocation Allowances

635.40 General.
635.41 Applications.
635.42 Eligibility.
635.43 Time of relocation.
635.44 Findings required.
635.45 Amount.
635.46 Travel allowance.
635.47 Moving allowance.
635.48 Time and method of payment.

Subpart F—Administration by Applicable State Agencies

635.50 Determinations of entitlement; notices to individual.
635.51 Appeals and hearings.

Sec.

635.52 Uniform interpretation and application.
635.53 Subpoenas.
635.54 State agency rulemaking.
635.55 Overpayments; penalties for fraud.
635.56 Inviolate rights to TAA.
635.57 Recordkeeping; disclosure of information.
635.58 UI.
635.59 Agreements with State agencies.
635.60 Administration absent State Agreement.
635.61 Information, reports, and studies.
635.62 Transitional procedures.
635.63 Savings clause.
635.64 Termination date.

Authority: Sec. 248, Pub. L. 93-618, 88 Stat. 2029, 19 U.S.C. 2320; Secretary's Order No. 3-81, 46 FR 31117.

Subpart A—General

§635.1 Scope.

The regulations in this Part 635 pertain to:

(a) Adjustment assistance, such as counseling, testing, training, placement, and other supportive services for workers adversely affected under the terms of Chapter 2 of Title II of the Trade Act of 1974, as amended (hereafter referred to as the Act);

(b) Trade readjustment allowances (hereafter referred to as TRA) and other allowances such as allowances while in training, job search and relocation allowances; and

(c) Administrative requirements applicable to State agencies to which such individuals may apply.

§635.2 Purpose.

The Act created a program of trade adjustment assistance (hereafter referred to as TAA) to assist individuals, who became unemployed as a result of increased imports, return to suitable employment. The TAA Program provides for reemployment services and allowances for eligible individuals. The regulations in this Part 635 are issued to implement the Act.

§635.3 Definitions.

For the purposes of the Act and this Part 635:

(a) "Act" means Chapter 2 of Title II of the Trade Act of 1974, Pub. L. 93-618, 88 Stat. 1978, 2019-2030 (19 U.S.C. 2271-2322), as amended.

(b) "Adversely affected employment" means employment in a firm or appropriate subdivision of a firm if workers of such firm or appropriate subdivision are certified under the Act as eligible to apply for TAA.

(c) "Adversely affected worker" means an individual who, because of lack of work in adversely affected employment:

(1) Has been totally or partially separated from such employment; or

(2) Has been totally separated from employment with the firm in a subdivision of which such adversely affected employment exists.

(d) "Appropriate week" means the week in which the individual's first separation occurred.

(e) "Average weekly hours" means a figure obtained by dividing:

(1) Total hours worked (excluding overtime) by a employment in the 52 weeks (excluding weeks in such period during which the individual was sick or on vacation) preceding the individual's appropriate week by;

(2) The number of weeks in such 52 weeks (excluding weeks in such period during which the individual was sick or on vacation) in which the individual actually worked in such employment.

(f) "Average weekly wage" means one-thirteenth of the total wages paid to an individual in the individual's high quarter. The high quarter for an individual is the quarter in which the total wages paid to the individual were highest among the first four of the last five completed calendar quarters preceding the individual's appropriate week.

(g) "Average weekly wage in adversely affected employment" means a figure obtained by dividing:

(1) Total wages earned by a partially separated individual in adversely affected employment in the 52 weeks (excluding weeks in such period during which the individual was sick or on vacation) preceding the individual's appropriate week by;

(2) The number of weeks in such 52 weeks (excluding weeks in such period during which the individual was sick or on vacation) in which the individual actually worked in such employment.

(h) "Benefit period" means, with respect to an individual:

(1) The benefit year and any ensuing period, as determined under the applicable State law, during which the individual is eligible for regular compensation, additional compensation, or extended compensation; or

(2) The equivalent to such a benefit year or ensuing period provided for under the appplicable Federal unemployment insurance law.

(i) "Bona fide application for training" means an application for training filed on a form approved by the Secretary containing information which shall include the individual's name, petition number, local office number, type of training, and which is signed and dated by the individual applying for training and a State agency representative.

(j) "Certification" means a certification of eligibility to apply for TAA issued under the Act with respect to a group of workers.

(k) "commuting area" means the area in which an individual would be expected to travel to and from work on a daily basis as determined under the applicable State law.

(l) "Date of separation" means:

(1) With respect to a total separation—

(i) For an individual in employment status, the last day worked; and

(ii) For an individual on employer-authorized leave, the last day the individual would have worked had the individual been working; and

(2) With respect to a partial separation, the last day of the week in which the partial separation occurred.

(m) "Eligibility period" means, for purposes of paying TRA:

(1) *Basic weeks.* The 52-week period beginning with the first week following the week with respect to which the individual first exhausts all rights to regular compensation; and

(2) *Additional weeks.* The 26-week period immediately following the last week of entitlement to basic TRA, to assist an individual to complete training approved under Subpart C of this Part 635.

(n) "Employer" means any individual or type of organization, including the Federal government, a State goverment, a political subdivision, or an instrumentality of one or more governmental entities, which had one or more individuals performing service in employment for it within the United States.

(o) "Employment" means any service performed for an employer by an individual for wages or by an officer of a corporation.

(p) "Exhaustion of UI" means exhaustion of all rights to UI in a benefit period by reason of:

(1) Having received all UI to which an individual was entitled under the applicable State law or Federal unemployment insurance law with respect to such benefit period; or

(2) The expiration of such benefit period.

(q) "Family" means the following members of an individual's household whose principal place of abode is with the individual in a home the individual maintains or would maintain but for unemployment:

(1) A spouse;

(2) An unmarried child, including a stepchild, adopted child, or foster child, under age 21 or of any age if incapable of self-support because of mental or physical incapacity; and

(3) Any other person whom the individual would be entitled to claim as a dependent for income tax purposes under the Internal Revenue Code of 1954.

(r) "First benefit period" means, with respect to an individual, the benefit period established after the individual's first separation or in which such separation occurs.

(s) "First exhaustion of UI" means the first time in an individual's first benefit period that the individual exhausts all rights to UI, and such first exhaustion shall be deemed to be complete at the end of the week in which such exhaustion occurs.

(t) "First separation" means an individual's first total or partial separation from adversely affected employment on or most closely following the impact date of the certification under which the individual is covered, and which occurs before or within the individual's first benefit period.

(u) "Head of family" means an individual who maintains a home for a family. An individual maintains a home if over half the cost of maintenance is furnished by the individual or would be furnished but for unemployment.

(v) "Impact date" means the date stated in a certification issued under the Act on which total or partial separations began or threatened to begin in a firm or a subdivision of a firm.

(w) "Layoff" means a suspension of or separation from employment by a firm for lack of work, initiated by the employer, and expected to be for a definite or indefinite period of not less than 7 consecutive days.

(x) "Liable State" means the State against which an interstate claim is filed.

(y) "Partial separation" means that during a week ending on or after the impact date specified in the certification under which an adversely affected worker is covered, the individual had:

(1) Hours of work reduced to 80 percent or less of the individual's average weekly hours in adversely affected employment; and

(2) Wages reduced to 80 percent or less of the individual's average weekly wage in such adversely affected employment.

(z) "Regional Administrator" means the appropriate Regional Administrator of the Employment and Training Administration, United States Department of Labor (hereafter Department).

(aa) "Remuneration" means remuneration as defined in the applicable State law.

(bb) "Secretary" means the Secretary of Labor of the United States.

(cc) "Separate maintenance" means maintaining another (second) residence, in addition to the individual's regular place of residence, while attending a training facility outside the individual's commuting area.

(dd) "State" means the States of the United States, the District of Columbia, and the Commonwealth of Puerto Rico, and the term "United States" when used in a geographical sense includes such Commonwealth.

(ee) "State agency" means the State Employment Security Agency of a State which administers the State law.

(ff) "State law" means the employment insurance law of a State approved by the Secretary under section 3304 of the Internal Revenue Code of 1954 (26 U.S.C. 3304).

(gg) "Suitable work" means, with respect to an individual:

(1) Suitable work as defined in the applicable State law for claimants for regular compensation; or

(2) Suitable work as defined in the applicable State law provisions consistent with section 202(a)(3) of the Federal-State Extended Unemployment Compensation Act of 1970; whichever is applicable, but does not in any case include self-employment or employment as an independent contractor.

(hh) "Total separation" means a layoff or severance of an individual from employment with a firm in which, or in a subdivision of which, adversely affected employment exists.

(ii) "Trade adjustment assistance" means the services and allowances provided for achieving reemployment of adversely affected workers, including TRA, training and other reemployment services, and job search allowances and relocation allowances, and which is referred to as TAA.

(jj) "Trade readjustment allowance" means a weekly allowance payable to an adversely affected worker with respect to such worker's unemployment under Subpart B of this Part 635, and which is referred to as TRA.

(kk) "Unemployment insurance" means the unemployment compensation payable to an individual under any State law or Federal unemployment compensation law, including chapter 85, title 5 of the United States Code, and the Railroad Unemployment Insurance Act, and which is referred to as UI. This term also includes "regular compensation," "additional compensation," and "extended compensation," defined as follows:

(1) "Regular compensation" means unemployment compensation payable to an individual under any State law, and, when so payable, includes unemployment compensation payable pursuant to chapter 85, title 5 of the United States Code, but does not include extended compensation or additional compensation;

(2) "Additional compensation" means unemployment compensation totally financed by a State and payable under a State law by reason of conditions of high unemployment or by reason of other special factors and, when so payable, includes unemployment compensation payable pursuant to chapter 85, title 5 of the United States Code; and

(3) "Extended compensation" means the extended unemployment compensation payable to an individual for weeks of unemployment which begin in an Extended Benefit Period, under those provisions of a State law which satisfy the requirements of the Federal-State Extended Unemployment Compensation Act of 1970 and regulations with respect to the payment of extended unemployment compensation, and, when so payable, includes unemployment compensation payable pursuant to chapter 85, title 5 of the United States Code, but does not include regular compensation or additional compensation. Extended compensation is also referred to in this Part 635 as Extended Benefits or EB.

(ll) "Wages" means all compensation for employment for an employer, including commissions, bonuses, and the cash value of all compensation in a medium other than cash.

(mm) "Week" means a week as defined in the applicable State law.

(mm) "Week of unemployment" means a week of total, part-total, or partial unemployment as determined under the applicable State law or Federal unemployment insurance law.

Subpart B—Trade Readjustment Allowances (TRA)

§ 635.10 Applications for TRA.

(a) *Before and after certification.* An individual covered under a certification or a petition for certification may apply to a State agency for TRA. Determinations with respect to an application shall be made at any time to the extent necessary to establish or protect an individual's entitlement to TRA or other TAA, but no payment of TRA or other TAA may be made by a State agency until a certification is made and the State agency determines that the individual is covered thereunder.

(b) *Timing of applications.* An initial application for TRA may be filed at any time in order to establish individual entitlement, and may be filed late for good cause; for this purpose good cause includes, but is not limited to, an individual's lack of knowledge of a certification or misinformation supplied the individual by the State agency. However, an application for TRA for a continued claim week shall be filed in accordance with the filing requirements of the applicable State law unless good cause, as determined under the applicable State law, exists for the late filing.

(c) *Applicable procedures.* Applications shall be filed in accordance with instructions and on forms approved by the Secretary, which shall be furnished to the individual by the State agency. The procedures for reporting and filing applications for TRA shall be consistent with this Part 635 and the Secretary's "Standard for Claim Filing, Claimant Reporting, Job Finding and Employment Services" (*Employment Security Manual*, Part V, sections 5000 *et seq.*).

§ 635.11 Qualifying requirements for TRA.

(a) *Basic qualifying requirements for entitlement.* To qualify for TRA for any week of unemployment, an individual must meet each of the following requirements of paragraphs (a)(1) through (a)(6) of this section:

(1) *Certification.* The individual must be an adversely affected worker covered under a certification.

(2) *Separation.* The individual's first separation before application for TRA must occur:

(i) On or after the impact date;

(ii) Before the expiration of the two-year period beginning on the date of the certification; and

(iii) Before the termination date, if any, of the certification.

(3) *Wages and employment.* (i) In the 52-week period ending with the week of the individual's first separation, the individual must have had at least 26 weeks of employment at wages of $30 or more a week in adversely affected employment with a single firm or subdivision of a firm. Evidence that an individual meets this requirement shall be obtained as provided in § 635.12. An individual may not combine employment and wages in adversely affected employment covered under more than one certification in order to qualify for TRA.

(ii) For purposes of this paragraph (a)(3), any week in which such individual:

(A) Is on employer-authorized leave from such adversely affected employment for purposes of vacation, sickness, injury, maternity, or inactive duty or active duty military service for training;

(B) Does not work in such adversely affected employment because of the disability that is compensable under a workers' compensation law or plan of a State or the United States; or

(C) Had employment in such adversely affected employment interrupted in order to serve as a full-time representative of a labor organization in such firm or subdivision;

shall be treated as a week of employment at wages of $30 or more: *Provided,* That not more than the following number of weeks may be treated as such weeks of employment—

(*1*) 3 weeks if no weeks described in paragraph (a)(3)(ii)(B) of this section occurred during the 52-week period concerned; or

(*2*) 7 weeks if all are weeks described in paragraph (a)(3)(ii)(B) of this section; or

(*3*) 7 weeks in the case of weeks described in paragraphs (a)(3)(ii)(B) and (A) or (C) of this section, or both, except that not more than 3 of such weeks may be other than weeks described in paragraph (a)(3)(ii)(B) of this section.

(iii) Wages and employment creditable under paragraph (a)(3) of this section shall not include employment or wages earned or paid for employment:

(A) Which is contrary to or prohibited by any Federal law; or

(B) Which is not adversely affected employment.

(4) *Entitlement to UI.* The individual must have been entitled to (or would be entitled to if the individual applied therefor) UI for a week within the benefit period:

(i) In which the individual's first separation occurred; or

(ii) Which began (or would have begun) by reason of the filing of a claim for UI by the individual after such first separation.

(5) *Exhaustion of UI.* The individual must:

(i) Have exhausted all rights to any UI to which the individual was entitled (or would be entitled if the individual applied therefor); and

(ii) Not have an unexpired waiting period applicable to the individual for any such UI.

(6) *EB work test.* (i) The individual must:

(A) Accept any offer of suitable work, as defined in § 635.3(gg), and apply for any such suitable work to which the individual was referred by the State agency; and

(B) Actively engage in seeking work and furnish the State agency tangible evidence of such efforts each week; and

(C) Register for work and be referred by the State agency to work which is suitable work for the individual;

in accordance with the provisions of the applicable State law which apply to EB claimants and which are consistent with section 202(a)(3) of the Federal-State Extended Unemployment Compensation Act of 1970.

(ii) The EB work test shall apply to an individual only with respect to weeks which begin after the date the individual files an initial application for TAA under any certification.

(b) *First week of eligibility.* The first week of eligibility for TRA shall be whichever of the following is the later:

(1) The first week beginning more than 60 days after the date of the filing of the petition which resulted in the certification under which the individual is covered; or

(2) The first week beginning after the individual's first exhaustion of UI (as provided in paragraph (a)(5) of this section) following the individual's first separation (as provided in paragraph (a)(2) of this section).

§ 635.12 Evidence of qualification.

(a) *State agency action.* When an individual applies for TRA, the State agency having jurisdiction under § 635.50(a) shall obtain information necessary to establish:

(1) Whether the individual meets the qualifying requirements in § 635.11;

(2) The individual's average weekly wage; and

(3) For an individual claiming to be partially separated, the average weekly

hours and average weekly wage in adversely affected employment.

(b) *Insufficient data.* If information specified in paragraph (a) of this section is not available from State agency records or from any employer, the State agency shall require the individual to submit a signed statement setting forth such information as may be required for the State agency to make the determinations required by paragraph (a) of this section.

(c) *Verification.* A statement made under paragraph (b) of this section shall be certified by the individual to be true to the best of the individual's knowledge and belief and shall be supported by evidence such as Forms W–2, paycheck stubs, union records, income tax returns, or statements of fellow workers, and shall be verified by the employer.

(d) *Determinations.* The State agency shall make the necessary determinations on the basis of information obtained pursuant to this section, except that if, after reviewing information obtained under paragraph (b) of this section against other available data, including agency records, it concludes that such information is not reasonably correct, it shall make appropriate adjustments and shall make the determination on the basis of the adjusted data.

§ 635.13 Weekly amounts of TRA.

(a) *Regular allowance.* The amount of TRA payable for a week of total unemployment (including a week of training approved under Subpart C of this Part 635 or under the provisions of the applicable State law) shall be an amount equal to the most recent weekly benefit amount of UI (including dependents' allowances) payable to the individual for a week of total unemployment preceding the individual's first exhaustion of UI following the individual's first separation: *Provided,* That in a State in which weeks of UI are paid in varying amounts related to wages with separate employers, the weekly amount of TRA shall be calculated as it would be to pay extended compensation: *Provided, further,* That where a State calculates a base amount of UI and calculates dependents' allowances on a weekly supplemental basis, TRA weekly benefit amounts shall be calculated in the same manner and under the same terms and conditions as apply to claimants for UI, except that the base amount shall not change.

(b) *Increased allowance.* An individual in training approved under Subpart C of this Part 635 entitled for any week to a training allowance under any Federal law for the training of workers in a greater amount than the amount provided in paragraph (a) of this section (whether or not the individual filed a claim for such training allowance) shall receive the greater amount as TRA, as provided in section 232(b) of the Act. A payment under this paragraph (b) shall be in lieu of any other training allowance to which the individual is entitled under Federal law for the training of workers.

(c) *Reduction of amount.* An amount of TRA payable under paragraph (a) or (b) of this section for any week shall be reduced (but not below zero) by:

(1) Income that is deductible from UI under the disqualifying income provisions of the applicable State law or Federal unemployment insurance law;

(2) The amount of a training allowance (other than a training allowance referred to in paragraph (b) of this section) under any Federal law that the individual receives for such week, as provided in section 232(c) of the Act. This paragraph (c) shall apply to Veterans Education Assistance, Basic Educational Opportunity Grants, Supplemental Educational Opportunity Grants, and other training allowances under any Federal law other than for the training of workers and which are payable to the individual; and

(3) Any amount that would be deductible from UI for days of absence from training under the provisions of the applicable State law which apply to individuals in approved training.

§ 635.14 Maximum amount of TRA.

(a) *General rule.* Except as provided under paragraph (b) of this section, the maximum amount of TRA payable to an individual under a certification shall be the amount determined by:

(1) Multiplying by 52, the amount of TRA payable, as determined under § 635.13(a), to such individual for a week of total unemployment; and

(2) Subtracting from the product derived under paragraph (a)(1) of this section, the total sum of UI to which the individual was entitled (or would have been entitled if the individual had applied therefor) in the individual's first benefit period described in § 635.11(a)(4).

(b) *Exceptions.* The maximum amount of TRA payable to an individual under paragraph (a) of this section will not include:

(1) The amount of dependents' allowances paid as a supplement to the base weekly amount determined under § 635.13(a);

(2) The amount of the difference between the individual's weekly increased allowances determined under § 635.13(b) and the individual's weekly amount determined under § 635.13(a); and

(3) The amounts paid for additional weeks determined under § 635.15(b); but nothing in this paragraph (b) shall affect an individual's eligibility for such supplemental, increased or additional allowances.

(c) *Reduction for Federal training allowance.* If a training allowance under any Federal law is paid to an individual for any week of unemployment as to which the individual would be entitled, determined without regard to § 635.13(c)(2) or any disqualification under § 635.18(b)(2), to TRA, the amount of the training allowance paid for such week plus the amount of TRA otherwise payable, not to exceed an amount equal to the individual's regular weekly TRA, as determined under § 635.13(a), shall be deducted from the maximum amount of TRA payable under paragraph (a) of this section when the individual applies for and is determined to be entitled to TRA, as provided in section 232(c) of the Act.

§ 635.15 Duration of TRA.

(a) *Basic weeks.* An individual shall not be paid basic TRA for any week after the 52-week eligibility period beginning with the first week following the first week in the period covered by the certification with respect to which the individual has first exhausted (as determined under § 635.11(a)(5)) all rights to regular compensation.

(b) *Additional weeks.* (1) TRA payments may be paid for up to 26 additional weeks in the 26-week eligibility period following the last week of entitlement to basic TRA otherwise payable under this Part 635 to an individual, in order to assist the individual to complete training approved under Subpart C of this Part 635. However, TRA shall not be paid for a week under the provisions of this paragraph (b) unless the individual attends training during such week.

(2) To be eligible for TRA for additional weeks, an individual must make a bona fide application for such training:

(i) Within 210 days after the date of the first certification under which the individual is covered; or

(ii) If later, within 210 days after the date of the individual's first separation.

(3) No payment of TRA shall be made for any additional week unless the individual is actually engaged in training during the week and has not been determined under § 635.18(b)(2) to be failing to make satisfactory progress in the training.

(c) *Limit.* In no case may an individual receive TRA for any week which begins

after the 78-week period following the week with respect to which the individual has first exhausted (as determined under § 635.11(a)(5)) all rights to regular compensation.

§ 635.16 Applicable State law.

(a) *What law governs.* The applicable State law for purposes of this Subpart B is the State law under which the individual:

(1) Is currently entitled to UI (or would be entitled if the individual applied therefor); or

(2) Has most recently exhausted all rights to any UI to which the individual was entitled (or would be entitled if the individual applied therefor).

(b) *Change of Law.* (1) A State law determined under paragraph (a) of this section shall remain applicable to an individual unless the individual becomes entitled to UI (or would be entitled if the individual applied therefor) under another State law.

(2) If a State law ceases to apply to an individual, the applicable State law thereafter shall be the law of the State in which the individual became entitled to UI (or would be entitled if the individual applied therefor).

(c) *UCFE–UCX claimants.* If an individual is entitled to UI under chapter 85, title 5 of the United States Code, the applicable State law for purposes of paragraphs (a) and (b) of this section is the law of the State to which the individual's Federal service and wages were assigned or transferred under Part 609 or Part 614 of this chapter.

(d) *RRUI claimants.* If an individual is entitled to UI under the Railroad Unemployment Insurance Act, the applicable State law for purposes of paragraphs (a) and (b) of this section is the law of the State in which the individual's first separation occurs.

§ 635.17 Availability and active search for work.

An individual shall not be paid TRA for a week of unemployment in which the individual is not able to work or is unavailable for work under the applicable State law, or if the individual fails or refuses to make an active search for work or to apply for or accept work or to accept a referral to work under the applicable State law, including the provisions of the applicable State law which apply to EB claimants and which are consistent with section 202(a)(3) of the Federal-State Extended Unemployment Compensation Act of 1970. This section shall not apply to an individual with respect to a week in which the individual is undergoing training approved under the provisions of the applicable State law or under Subpart C of this Part 635, unless the individual is determined to be ineligible for such week under the applicable State law or § 635.18(b)(2).

§ 635.18 Disqualifications.

(a) *State law applies.* Except as stated in paragraph (b) of this section and § 635.55(b), an individual shall not be paid TRA for a week of unemployment for which the individual is or would be disqualified to receive UI under the disqualification provisions of the applicable State law, including the provisions of the applicable State law which apply to EB claimants and which are consistent with section 202(a)(3) of the Federal-State Extended Unemployment Compensation Act of 1970.

(b) *Disqualification of trainees.* (1) A State law shall not be applied to disqualify an individual from receiving either UI or TRA because the individual:

(i) Is undergoing training approved under Subpart C of this Part 635; or

(ii) Refuses work to which the individual has been referred by the State agency if such work would require the individual to discontinue training or, if added to hours of training, would occupy the individual more than 8 hours a day or 40 hours a week, except that this paragraph (b)(1)(ii) does not apply to an individual who has been given notice of a determination of ineligibility under paragraph (b)(2) of this section unless and until the individual enters or resumes and makes satisfactory progress in such training; or

(iii) Quits work if the individual was employed in work which was not suitable employment, as described in §635.22(a)(1), and it reasonably was necessary for the individual to quit work to begin or continue training, except that this paragraph (b)(1)(iii) does not apply to an individual who has been given notice of a determination of ineligibility under paragraph (b)(2) of this section unless and until the individual enters or resumes and makes satisfactory progress in such training.

(2) An individual who, without good cause, refuses to accept or continue or fails to make satisfactory progress in training approved under Subpart C of this Part 635 shall not be entitled to basic or additional TRA, or any other payment under this Part 635, for the week of such occurrence and any week thereafter until the week in which the individual enters or resumes and makes satisfactory progress in such training. For purposes of this paragraph (b), good cause means such reasons as would justify an individual's conduct when measured by conduct expected of a reasonable individual in like circumstances, including but not limited to reasons beyond the individual's control and reasons related to the individual's capability to make satisfactory progress in or continue training.

Subpart C—Reemployment Services

§ 635.20 Responsibilities for the delivery of reemployment services.

(a) *State agency referral.* The State agency shall be responsible for referring adversely affected workers to the appropriate office for reemployment services when such individual:

(1) Expresses interest in any reemployment services while receiving UI; or

(2) Exhausts all rights to UI and becomes entitled to TRA.

(b) *State agency responsibilities.* State agency responsibilities under this Subpart C include, but are not limited to:

(1) Registering the adversely affected worker for work;

(2) Informing the adversely affected worker of the reemployment services and allowances available under the Act, the application procedures, and the filing date requirements for such reemployment services and allowances;

(3) Determining whether suitable employment, as described in § 635.22(a)(1), is available;

(4) Developing, reviewing, and updating, when necessary, a reemployment plan for the adversely affected worker;

(5) Providing counseling, testing, placement, and supportive services;

(6) Provising or procuring self-directed job search training;

(7) Provising out-of-area job search and relocation assistance;

(8) Making referrals to training;

(9) Locating, approving and procuring training;

(10) Monitoring the provisions of the approved training program;

(11) Determining which occupations and training institutions offer, in a cost effective manner, a reasonable expectation of employment following such training; and

(12) Documenting the standards and procedures used to select occupations and training institutions in which training is approved.

§ 635.21 Reemployment services and allowances.

Reemployment services and allowances under this Subpart C shall include, as appropriate, the following:

(a) *Employment registration.* To ensure, so far as practical, that individuals are placed in jobs which utilize their highest skills and that

applicants qualified for job openings are appropriately referred, applications for registration shall be taken on adversely affected workers who apply for reemployment services.

(b) *Employment counseling.* When local job opportunities are not readily available, counseling shall be used to assist individuals to gain a better understanding of themselves in relation to the labor market so that they can more realistically choose or change an occupation or make a suitable job adjustment.

(c) *Vocational testing.* Testing shall be used as a tool in helping individuals to determine which skills or potentials can be developed or to determine the appropriateness of future training.

(d) *Job development.* A State agency shall develop jobs for individuals by soliciting job interviews from public or private employers and shall work with potential employers to customize a particular job to meet an individual's needs which may involve job restructuring.

(e) *Supportive services.* Supportive services shall be provided to enable individuals to obtain or retain employment or to participate in employment and training programs leading to eventual placement in permanent employment. Such services may include work orientation, basic education, communication skills, and any other services necessary to prepare an individual for full employment in accordance with the individual's capabilities and employment opportunities.

(f) *On-the-job training (OJT).* OJT is training, in the public or private sector, and may be provided to an individual who meets the conditions for approval of training, as provided in § 635.22(a), and who has been hired by the employer, while the individual is engaged in productive work which provides knowledge or skills essential to the full and adequate performance of the job.

(g) *Classroom training.* This training activity is any training of the type normally conducted in an institutional setting, including vocational education, and may be provided to individuals who meet the conditions for approval of training, as provided in § 635.22(a), to impart technical skills and information required to perform a specific job or group of jobs. Training designed to enhance the employability of individuals by upgrading basic skills, through the provision of courses such as remedial education of English-as-a-second-language, shall be considered as supportive services under paragraph (e) of this section.

(h) *Self-directed job search.* Self-directed job search programs shall be initiated to assist individuals in developing skills and techniques for finding a job. Such programs vary in design and operation and call for a carefully structured approach to individual needs. There are basic elements or activities which are common to all approaches. These include the following:

(1) *Job search workshop.* A short (1–3 days) seminar designed to provide participants with knowledge that will enable them to find jobs. Subjects are not limited to, but should include, labor market information, applicant resume writing, interviewing techniques, and finding job openings.

(2) *Job finding club.* Encompasses all elements of the Job Search Workshop plus a period (1–2 weeks) of structured, supervised application where participants attempt to obtain jobs.

(i) *Job search allowances.* The individual may be provided job search allowances under Subpart D of this Part 635 to defray the cost of seeking employment outside of the commuting area.

(j) *Relocation allowances.* The individual may be provided relocation allowances under Subpart E of this Part 635 to defray the cost of moving to a new job outside of the commuting area.

§ 635.22 Approval of training.

(a) *Conditions for approval.* Subject to the availability of funds allocated by the Department to the State to pay for the full costs of training, such training may be approved for an adversely affected worker if the State agency determines that:

(1) There is no suitable employment (which may include technical and professional employment) available for an individual. For purposes of this section, the term "suitable employment" means, with respect to an individual, work of a substantially equal or higher skill level than the individual's past adversely affected employment, and wages for such work at not less than 80 percent of the individual's average weekly wage;

(2) The individual would benefit from appropriate training;

(3) There is a reasonable expectation (not necessarily a prior guarantee) of employment following completion of training;

(4) Approved training is available to the individual from governmental agencies or private sources, which may include area vocational education schools (as defined in section 195(2) of the Vocational Education Act of 1963) and employers; and

(5) The individual is qualified to undertake and complete such training.

(b) *Time limits for commencing training.* An individual for whom training has been approved under paragraph (a) of this section must commence training within 60 days after the date of such approval, *except* that if the individual for good cause, as described in § 635.18(b), does not commence training within the 6-day period, such period may be extended up to a maximum of 120 days after the date of such approval.

(c) *Approval of training under State law.* Training approved by a State agency under State law is not considered to be approved training for the purposes of this Part 635. If the State agency subsequently determines that the individual and course of training meet the requirements of this Part 635 and training is approved, the State agency shall provide such training at no cost to the individual after such approval. Under no circumstances shall reimbursement be authorized for any costs incurred for any period prior to the approval of such training.

(d) *Applications.* Applications for, selection for, approval of, or referral to training shall be in accordance with instructions and on forms approved by the Secretary. Applications shall be furnished to an individual by the State agency.

(e) *Determinations.* Selection for, approval of, or referral of an individual to training under this Subpart C, or a decision with respect to any specific training or non-selection, non-approval, or non-referral for any reason shall be a determination to which §§ 635.50 and 635.51 apply.

(f) *Length of training and hours of attendance.* The State agency shall determine the appropriateness of the length of training and the hours of attendance as follows:

(1) The training shall be of suitable duration to achieve the desired skill level in the shortest possible time;

(2) No approved training program shall exceed 104 weeks; and

(3) The hours and days in a week of attendance shall be in accordance with procedures established by the State agency and with established hours and days commensurate with the course as determined by the training facility.

(g) *Training of reemployed workers.* Adversely affected workers who obtain new employment which is not suitable employment, as described in § 635.22(a)(1), and have been approved for training may elect to:

(1) Terminate their jobs; or

(2) Continue in full or part-time employment; in order to undertake such training, and shall not be subject to ineligibility or disqualification for UI or TRA as a result of such termination or reduction in employment.

(h) *Fees prohibited.* In no case shall an individual be approved for training under this Subpart C for which the individual is required to pay a fee or tuition.

§ 635.23 Selection of training methods and programs.

(a) *State agency responsibilities.* If suitable employment, as described in § 635.22(a)(1), is not otherwise available to an individual or group of individuals, it is the responsibility of the State agency to explore, identify, develop and secure training opportunities and to establish linkages with other public and private agencies, Private Industry councils, employers, and CETA prime sponsors, as appropriate, which will return adversely affected workers to employment as soon as possible.

(b) *Firm-specific retraining program.* To the extent practicable before referring an adversely affected worker to approved training, the State agency shall consult with the individual's adversely affected firm and certified or recognized union, or other authorized representative, for the purpose of developing a retraining program that meets the manpower needs of such firm and to preserve or restore the employment relationship between the individual and such firm. The fact that there is no need by other employers in the area to train individuals in a specific occupation shall not preclude the development of an individual retraining program for such occupation with the adversely affected firm.

(c) *Methods of training.* Adversely affected workers may be provided either one or a combination of the following methods of training:

(1) Insofar as possible, priority will be given to on-the-job training, which includes related education necessary to acquire skills needed for a position within a particular occupation, in the facilities of the firm or elsewhere pursuant to §§ 635.24, 635.25, and 635.26, including training for which the firm pays the costs. This is to ensure that on-the-job training does in fact provide the skills necessary for the individual to obtain employment in a particular occupation rather than a job on a particular site; and

(2) Institutional training, with priority given to providing the training in public area vocational education schools if it is determined that such schools are at least as effective and efficient as other institutional alternatives, pursuant to §§ 635.24, 635.25, and 635.26.

(d) *Standards and procedures.* The State agency shall document the standards and procedures used to select occupations and training institutions in which training is approved. Such occupations and training shall offer a reasonable expectation of employment following such training.

(1) *Standards.* The State agency shall approve training in occupations for which an identifiable demand exists either in the local labor market or in other labor markets for which relocation planning has been implemented. To the extent practicable, placement rates and employer reviews of curriculum shall be used as guides in the selection of training institutions.

(2) *Procedures.* In determining the types of training to be provided, the State agency shall consult with local employers, appropriate labor organizations, Job Service Improvement Program Committees, CETA prime sponsors, Private Industry Councils, local educational organizations, local apprenticeship programs, local advisory councils established under the Vocational Education Act of 1963, and post-secondary institutions.

(3) *Exclusions.* In determining suitable training the State agency shall exclude certain occupations, including, but not limited to, the following:

(i) Lack of employment opportunities as substantiated by job orders and other pertinent labor market data; or

(ii) Occupations which provide no reasonable expectation of permanent employment; or

(iii) Self-employment and occupations for which remuneration is wholly or primarily in the form of a commission.

§ 635.24 Preferred training.

When a State agency refers an adversely affected worker for training, the State agency shall attempt to obtain such training at no cost through:

(a) On-the-job training offered by an employer;

(b) Area vocational education schools, as defined in section 195(2) of the Vocational Education Act of 1963;

(c) The Comprehensive Employment and Training Act, as amended, offered by a prime sponsor; or

(d) Any other applicable law, if preferred training under paragraph (a), (b) or (c) of this section cannot be provided within a reasonable period of time.

§ 635.25 Purchased Training.

If the State agency determines that placement of an adversely affected worker in preferred training under § 635.24 cannot be accomplished, the State agency shall attempt to make arrangements or enter into agreements to purchase training or provide for reimbursement of the cost of training through:

(a) On-the-job training offered by an employer;

(b) Area vocational education schools, as defined in section 195 (2) of the Vocational Education Act of 1963;

(c) The Comprehensive Employment and Training Act, as amended, offered by a prime sponsor; or

(d) Any other applicable law, if purchased training under paragraphs (a), (b) or (c) of this section cannot be provided within a reasonable period of time.

§ 635.26 Approval of other training, including interstate.

A State agency may approve and purchase for an adversely affected worker any other training, including on-the-job training or institutional vocational training, if:

(a) Circumstances preclude referral to training under § 635.24 or 635.25; and

(b) If institutional vocational training, the training has been approved by the State vocational education agency as meeting the standards of adequacy required by the applicable law; and

(c) The approval conditions in § 635.22 are met.

(d) The State agency performing as an agent State shall be responsible for selection and approval of training under §§ 635.22, 645.24 and 635.25. The agent State agency will pay any training related cost, including subsistence and transportation. The liable State agency is responsible for determining eligibility for FRA, and job search and relocation allowances. The agent State shall assist the individual in applying for such allowances.

§ 635.27 Subsistence payments.

(a) *Eligibility.* A trainee under this Subpart C may be afforded supplemental assistance necessary to pay costs of separate maintenance when the training facility is located outside the commuting area, but may not receive such supplemental assistance for any period for which the trainee receives such a payment under the Comprehensive Employment and Training Act, as amended, or any other law, or for any day referred to under § 635.28 (c) (3) pursuant to which a transportation allowance is payable to the individual, or to the extent the individual is entitled to be paid or reimbursed for such expenses from any other source.

(b) *Amount.* Subsistence payments shall not exceed the lesser of:

(1) The individual's actual per diem expenses for subsistence; or

(2) 50 percent of the prevailing per diem rate authorized under the Federal travel regulations for the locale of the training.

(c) *Applications.* Applications for payment of subsistence shall be in accordance with instructions and on forms approved by the Secretary and furnished to the trainee by a State agency. Such payments shall be made on completion of a week of training, except that at the beginning of a training project a State agency may advance a payment for a week if it determines that such advance is necessary to enable a trainee to accept training. An adjustment shall be made if the amount of an advance is less or more than the amount to which the trainee is entitled under paragraph (b) of this section. A determination as to an application made under this section shall be subject to §§ 635.50 and 635.51.

(d) *Unexcused absences.* No subsistence payment shall be made to an individual for any day of unexcused absence as certified by the responsible training facility.

§ 635.28 Transportation payments.

(a) *Eligibility.* A trainee under this Subpart C shall be afforded supplemental assistance necessary to pay transportation expenses if the training is outside the commuting area, but may not receive such assistance if transportation is arranged for the trainee as part of a group and paid for by the State agency or to the extent the trainee receives a payment of transportation expenses under another Federal law, or to the extent the individual is entitled to be paid or reimbursed for such expenses from any other source.

(b) *Amount.* A transportation allowance shall not exceed the lesser of:

(1) The actual cost for travel by the least expensive means of transportation reasonably available between the trainee's home and the training facility; or

(2) The cost per mile at the prevailing mileage rate authorized under the Federal travel regulations.

(c) *Travel included.* Travel for which a transportation allowance may be paid shall include travel:

(1) At the beginning and end of the training program;

(2) When the trainee fails for good cause, as described in § 635.18(b)(2), to complete the training program; and

(3) For daily commuting, in lieu of subsistence, but not exceeding the amount otherwise payable as subsistence for each day of commuting.

(d) *Applications.* Applications for transportation payments shall be made in accordance with instructions and on forms approved by the Secretary and furnished to the trainee by the State agency. Payments may be made in advance. An adjustment shall be made if the amount of an advance is less or more than the amount to which the trainee is entitled under paragraph (b) of this section. A determination as to an application made under this section shall be subject to §§ 635.50 and 635.51.

(e) *Unexcused absences.* No transportation payment shall be made to an individual for any day of unexcused absence as certified by the responsible training facility.

§ 635.29 Application of EB work test.

(a) *Registration for employment.* Adversely affected workers who have exhausted all rights to UI and who otherwise qualify for TRA under § 635.11, shall, except as provided in paragraph (b) of this section:

(1) Register for work and be referred to work by the State agency in the same manner as required for EB claimants under the applicable State law provisions which are consistent with section 202(a)(3) of the Federal-State Extended Unemployment Compensation Act of 1970; and

(2) Be subject to the work test requirements to the same extent as EB claimants under the applicable State law provisions which are consistent with section 202(a)(3) of the Federal-State Extended Unemployment Compensation Act of 1970.

(b) *Exceptions.* Paragraph (a) of this section shall not apply to any week with respect to which an individual is training approved under this Subpart C.

Subpart D—Job Search Allowances

§ 635.30 General.

A job search allownace shall be granted an adversely affected worker to assist the individual in securing a job within the United States as provided in this Subpart D.

§ 635.31 Applications.

(a) *Forms.* An application for a job search allowance shall be made in accordance with instructions and on forms approved by the Seceretary, which shall be furnished to an individual by the State agency.

(b) *Submittal.* An application may be submitted to a State agency at any time by an individual who has been totally or partially separated regardless of whether a certification covering the individual has been made. However, an application must be submitted to a State agency before the job search begins in order for the job search allowance to be granted, and the job search may not be approved until after the individual is covered under a certification.

(c) *Time limits.* Notwithstanding paragraph (b) of this section, an application for a job search allowance may not be approved unless submitted before:

(1) The 365th day after the date of the certification under which the individual is covered, or the 365th day after the date of the individual's last total separation, whichever is later; or

(2) The 182nd day after the concluding date of training approved under Subpart C of this Part 635, or approved under the regulations superseded by this Part 635.

§ 635.32 Eligibility.

(a) *Conditions.* To be eligible for a job search allowance an individual must:

(1) File a timely application;

(2) Have been totally separated from adversely affected employment at the time the job search commences;

(3)(i) Be registered with the State agency which shall furnish the individual such reemployment services as are appropriate under Subpart C of this Part 635, and the State agency shall determine that the individual has no reasonable expectation of securing suitable employment in the commuting area, and has a reasonable expectation of obtaining suitable employment of long-term duration outside the commuting area and in the area where the job search will be conducted; and

(ii) For purposes of this section, the term "suitable employment" means suitable work as defined in § 635.3(gg)(1) or (2), whichever is applicable to individual; and

(4) Complete the job search within a reasonable period not exceeding 30 days after the day on which the job search began.

(b) *Completion of job search.* A job search is deemed completed when the individual either secures employment or has contacted each employer to whom referred by the State agency in connection with a job search.

(c) *Verification of employer contacts.* The State agency shall verify contacts with employers certified by the individual.

§ 635.33 Findings required.

Before final payment of a job search allowance may be approved, the following findings shall be made:

(a) The State agency having jurisdiction under § 635.50(a) must find

that the individual meets the requirements of § 635.32(a).

(b) The State agency of the State where the individual resides must find that:

(1) The application was submitted within the time limits stated in § 635.31(c);

(2) The individual meets the requirements of § 635.32(a)(3)(i), and such finding shall state the basis thereof; and

(3) The individual completed the job search within the time limits stated in § 635.32(a)(4).

§ 635.34 Amount.

(a) *Computation.* The amount of a job search allowance shall be 90 percent of the total costs of each of the following allowable transportation and subsistence items:

(1) *Travel.* The cost allowable for travel shall not exceed the lesser of:

(i) The actual cost of roundtrip travel by the most economical public transportation the individual reasonably can be expected to take from the individual's residence to the area of job search; or

(ii) The cost per mile at the prevailing mileage rate authorized under the Federal travel regulations for such roundtrip travel by the usual route from the individual's residence to the area of job search.

(2) *Lodging and meals.* The cost allowable for lodging and meals shall not exceed the lesser of:

(i) The actual cost to the individual of lodging and meals while engaged in the job search; or

(ii) 50 percent of the prevailing per diem allowance rate authorized under the Federal travel regulations for the locality in which the job search is conducted.

(b) *Limit.* The total job search allowances paid to an individual under a certification may not exceed $600, regardless of the number of job searches undertaken by the individual. The amounts otherwise payable under paragraph (a) of this section shall be reduced by any amounts the individual is entitled to be paid or reimbursed for such expenses from any other source.

§ 635.35 Time and method of payment.

(a) *Determinations.* A State agency promptly shall make and record determinations necessary to assure entitlement of an individual to a job search allowance at any time, whether before or after a certification covering the individual is made. No job search allowance may be paid or advanced to an individual until the State agency determines that the individual is covered under a certification. If delay in payment occurs under the preceding sentence, a State agency shall make payment as promptly as possible upon determining that the individual is covered under a certification and is otherwise eligible.

(b) *Payment.* Unless paragraph (a) of this section applies, a job search allowance shall be paid promptly after an individual completes a job search and complies with paragraph (d) of this section.

(c) *Advances.* A State agency may advance an individual (except an individual not yet covered under a certification) 60 percent of the estimated amount of the job search allowance payable on completion of the job search, but not exceeding $360, within 5 days prior to commencement of a job search. Such advance shall be deducted from any payment under paragraph (b) of this section.

(d) *Worker evidence.* On completion of a job search, the individual shall certify on forms furnished by the State agency as to employer contacts made and amounts expended daily for lodging and meals. Receipts shall be required for all lodging and purchased transportation expenses incurred by the individual pursuant to the job search. An adjustment shall be made if the amount of an advance is less or more than the amount to which the individual is entitled under § 635.34.

Subpart E—Relocation Allowances

§ 635.40 General.

A relocation allowance shall be granted an adversely affected worker to assist the individual and the individual's family, if any, to relocate within the United States as stated in this Subpart E. A relocation allowance shall not be granted an individual more than once under a certification. A relocation allowance shall not be granted to more than one member of a family with respect to the same relocation. If applications for a relocation allowance are made by more than one member of a family as to the same relocation, the allowance shall be paid to the head of the family if otherwise eligible.

§ 635.41 Applications.

(a) *Forms.* An application for a relocation allowance shall be made in accordance with instructions and on forms approved by the Secretary which shall be furnished to an individual by the State agency.

(b) *Submittal.* An application may be submitted to the State agency at any time by an individual who has been totally or partially separated regardless of whether a certification covering the individual has been made. However, an application must be submitted to a State agency before the relocation begins in order for the relocation allowance to be granted, and the relocation may not be approved until after the individual is covered under a certification.

(c) *Time limits.* Notwithstanding paragraph (b) of this section, an application for a relocation allowance may not be approved unless submitted before:

(1) The 425th day after the date of the certification under which the individual is covered, or the 425th day after the date of the individual's last total separation, whichever is later; or

(2) The 182nd day after the concluding date or training approved under Subpart C of this Part 635, or approved under the regulations superseded by this Part 635.

§ 635.42 Eligibility.

(a) *Conditions.* To be eligible for a relocation allowance an individual must:

(1) File a timely application;

(2) Have been totally separated from adversely affected employment at the time relocation commences;

(3) Have not previously received a relocation allowance under the same certification;

(4) Relocate within the United States and outside the individual's present commuting area;

(5)(i) Be registered with the State agency which shall furnish the individual such reemployment services as are appropriate under Subpart C of this Part 635, and the State agency shall determine that the individual has no reasonable expectation of securing suitable employment in the commuting area, and has obtained suitable employment affording a reasonable expectation of employment of long-term duration, or a bona fide offer of such suitable employment, outside the commuting area and in the area of intended relocation; and

(ii) For purposes of this section, the term "suitable employment" means suitable work as defined in § 635.3(gg) (1) or (2), whichever is applicable to the individual; and

(6) Relocate within a reasonable period, as determined under § 635.43(b), and complete such relocation within a reasonable period of time as determined in accordance with Federal travel regulations and § 635.43(a).

(b) *Job search.* Applications for a relocation allowance and a job search allowance may not be approved concurrently, but the prior payment of a job search allowance shall not

otherwise preclude the payment of a relocation allowance.

§ 635.43 Time of relocation.

(a) *Applicable considerations.* In determining whether an individual's relocation is completed in a reasonable period of time, a State agency, among other factors, shall consider whether:

(1) Suitable housing is available in the area of relocation;

(2) The individual can dispose of the individual's residence;

(3) The individual or a family member is ill; and

(4) A member of the individual's family is attending school and when the member can best be transferred to a school in the area of relocation.

(b) *Time limits.* The reasonable period for actually beginning a relocation move under § 635.42(a)(6) shall expire 182 days after the date of application for a relocation allowance, or 182 days after the conclusion of training approved under Subpart C of this Part 635, or approved under the regulations superseded by thie Part 635.

§ 635.44 Findings required.

The following findings shall be made before final payment of a relocation allowance may be approved:

(a) *Intrastate relocations.* If the area of relocation is in the State where the individual resides, the State agency of that State must make all determinations under this Subpart E.

(b) *Interstate relocations.* If the area of relocation is not in the State where the individual resides:

(1) The State agency of the State where the individual resides must make the determinations under this Subpart E, except as provided in paragraph (b)(2) of this section; and

(2) The State agency of the State of intended relocation must make the determination that the individual has obtained suitable employment affording a reasonable expectation of employment of long-term duration, or a bona fide offer of such suitable employment, in the area of intended relocation, in accordance with § 635.42(a)(5)(i).

§ 635.45 Amount.

(a) *Items allowable.* The amount payable as a relocation allowance shall include the following items:

(1) 90 percent of the travel expenses for the individual and family, if any, from the individual's place of residence to the area of relocation, as determined under § 635.46;

(2) 90 percent of the expense of moving household goods and personal effects of the individual and family, if any, not to exceed 11,000 pounds net weight for an individual with a family, and 5,000 pounds net weight for an individual without a family, between such locations, as determined under § 635.47; and

(3) A lump sum payment, equal to 3 times the individual's average weekly wage, not to exceed $600.

(b) *Reduction.* The amount otherwise payable under paragraphs (a)(1) and (a)(2) of this section shall be reduced by any amount the individual is entitled to be paid or reimbursed for such expenses from any other source.

§ 635.46 Travel allowance.

(a) *Computation.* The amount of travel allowance (including lodging and meals) payable under § 635.45(a)(1) shall be 90 percent of the total costs of each of the following allowable transportation and subsistence items:

(1) *Transportation.* The cost allowable for transportation shall not exceed the lesser of:

(i) The actual cost of transportation for the individual and family, if any, by the most economical public transportation the individual and family reasonably can be expected to take from the individual's old residence to the individual's new residence in the area of relocation; or

(ii) The cost per mile at the prevailing mileage rate authorized under the Federal travel regulations for the usually traveled route from the individual's old residence to the individual's new residence in the area of relocation. No additional mileage shall be payable for family members traveling on the same trip in the same vehicle.

(2) *Lodging and meals.* The cost allowable for lodging and meals for an individual or each member of the individual's family shall not exceed the lesser of:

(i) The actual cost to the individual for lodging and meals while in travel status; or

(ii) 50 percent of the prevailing per diem allowance rate authorized under the Federal travel regulations for the locality to which the relocation is made.

(b) *Separate travel.* If, for good cause, a member or members of an individual's family must travel separately to the individual's new residence, 90 percent of the total costs of such separate travel, computed in accordance with paragraph (a) of this section, shall be included in calculating the total amount the individual is entitled to be paid under this Subpart E. For purposes of this paragraph (b), good cause means such reasons as would justify the family member's inability to relocate with the other members of the individual's family, including but not limited to reasons related to the family member's health, schooling or economic circumstances.

(c) *Limitation.* In no case may the individual be paid a travel allowance for the individual or a member of the individual's family more than once in connection with a single relocation.

§ 635.47 Moving allowance.

(a) *Computation.* The amount of a moving allowance payable under § 635.45(a)(2) shall be 90 percent of the total of the allowable costs under (1), (2), or (3), and 90 percent of the total allowable costs under (4):

(1) *Commercial carrier.* Allowable costs for moving household goods and personal effects of an individual and family, if any, shall not exceed 11,000 pounds net weight for an individual with a family, and 5,000 pounds net weight for an individual without a family, by commercial carrier from the individual's old residence to the individual's new residence in the area of relocation, including reasonable and necessary accessorial charges, by the most economical commercial carrier the individual reasonably can be expected to use. Before undertaking such move, the individual must submit to the State agency an estimate from a commercial carrier as to the cost thereof. Accessorial charges shall include the cost of insuring such goods and effects for their actual value or $10,000, whichever is least, against loss or damage in transit, if a bid from a licensed insurer is obtained by the individual and approved by the State agency before departure. If a State agency finds it is more economical to pay a carrier an extra charge to assume the responsibility of a common carrier for such goods and effects, 90 percent of such extra charge, but not exceeding $50, shall be paid in lieu of the cost of insurance.

(2) *Trailer or rental truck.* (i) *Trailer.* If household goods and personal effects are moved by trailer, the allowable costs shall be:

(A) If the trailer is hauled by private vehicle, the cost per mile for the use of the private vehicle at the prevailing mileage rate authorized under the Federal travel regulations for the usually traveled route from the individual's old residence to the individual's new residence in the area of relocation; and

(B) If the trailer is rented, and of the type customarily used for moving household goods and personal effects, the rental fee for each day reasonably required to complete the move; or

(C) The actual charge if hauling is by commercial carrier.

(ii) *Rental truck.* If household goods and personal effects are moved by rental truck of the type customarily used for moving household goods and personal effects, the allowable costs shall be:

(A) The rental fee for each day reasonably required to complete the move; and

(B) The necessary fuel for such rental truck which is paid by the individual.

(3) *House trailer.* If a house trailer or mobile home was used as the individual's place of residence in the old area and will be so used in the new area, the allowable costs of moving such house trailer or mobile home shall be:

(i) The commercial carrier's charges for moving the house trailer or mobile home;

(ii) Charges for unblocking and reblocking;

(iii) Ferry charges, bridge, road, and tunnel tolls, taxes, fees fixed by a State or local authority for permits to transport the unit in or through its jurisdiction, and retention of necessary flagmen;

(iv) The cost of insuring the house trailer or mobile home, and the personal effects of the individual and family, against loss or damage in transit, in accordance with the provisions in paragraph (a)(1) of this section; and

(v) The cost of disconnecting and connecting utilities limited to normal hookup of gas, electricity and water.

(4) *Temporary storage.* If temporary storage of household goods and personal effects is necessary, the cost of such temporary storage for a period not to exceed 60 days.

(b) *Travel.* Payments under this section shall be in addition to payments for travel expenses for the individual and family, if any, under § 635.45(a)(1), except that the allowable cost for a private vehicle used to haul a trailer may not be paid under this section if any cost with respect to such private vehicle is payable under any other provision of this Subpart E.

§ 635.48 Time and method of payment.

(a) *Determinations.* A State agency promptly shall make and record determinations necessary to assure an individual's entitlement to a relocation allowance at any time, whether before or after a certification covering the individual is made. No relocation allowance may be paid or advanced to an individual until the State agency determines that the individual is covered under a certification. If delay in payment occurs under the preceding sentence, a State agency shall make payment as promptly as possible upon determining that the individual is covered under a certification and is otherwise eligible.

(b) *Travel and moving allowances.* Allowances computed under §§ 635.46 and 635.47 shall be paid as follows:

(1) *Travel.* (i) *Transportation and subsistence.* The amounts estimated under § 635.46 at 90 percent of the lowest allowable costs shall be paid in advance at the time an individual departs from the individual's residence to begin relocation or within 10 days prior thereto. An amount payable for a family member approved for separate travel shall be paid to the individual at the time of such family member's departure or within 10 days prior thereto.

(ii) *Worker evidence.* On completion of a relocation, the individual shall certify on forms furnished by the State agency as to the amount expended daily for lodging and meals. Receipts shall be required for all lodging and purchased transportation expenses incurred by the individual and family, if any, pursuant to the relocation. An adjustment shall be made if the amount of an advance is less or more than the amount to which the individual is entitled under § 635.46.

(2) *Moving.* The amount estimated under § 635.47 at 90 percent of the lowest allowable costs shall be paid:

(i) *Commercial carrier.* (A) If household goods and personal effects are moved by commercial carrier, 90 percent of the amount of the estimate submitted by the individual under § 635.47(a)(1) and approved by the State agency for covering the cost of such move, and 90 percent of the other charges approved by the State agency under § 635.47(a)(1), shall be advanced by check or checks payable to the carrier and insurer, and delivered to the individual at the time of the scheduled shipment or within 10 days prior thereto. On completion of the move, the individual shall promptly submit to the State agency a copy of the bill of lading prepared by the carrier, including a receipt evidencing payment of moving costs. The individual shall with such submittal reimburse the State agency the amount, if any, by which the advance made under this paragraph (b)(2)(i) exceeds 90 percent of the actual moving costs approved by the State agency. The individual shall be paid the difference if the amount advanced was less than 90 percent of the actual moving costs approved by the State agency.

(B) If more economical, a State agency may make direct arrangements for moving and insuring an individual's household goods and personal effects with a carrier and insurer selected by the individual and may make payment of 90 percent of moving and insurance costs directly to the carrier and insurer. No such arrangement shall release a carrier from liability otherwise provided by law or contract for loss or damage to the individual's goods and effects, but the United States shall not be or become liable to either party under any circumstances.

(ii) *Trailer or rental truck.* (A) *Private vehicle with trailer.* If the move is by private vehicle and trailer, the allowable cost for the use of the private vehicle shall be made at the time payment is made under paragraph (b)(1) of this section.

(B) *Rental trailer or rental truck.* If the move is by rental trailer or rental truck:

(*1*) The individual shall submit an estimate of the rental cost from the rental agency; and

(*2*) 90 percent of such estimated rental cost may be advanced by check payable to the order of the individual and the rental agency at the time payment is made under paragraph (b)(1) of this section; and

(*3*) On completion of the move the individual shall submit promptly to the State agency a receipted bill itemizing and evidencing payment of the rental charges for the trailer or truck and fuel costs, and shall reimburse the State agency for the amount, if any, by which the advance made for the trailer or truck exceeds 90 percent of the rental charges approved by the State agency. If the amount of the advance was less than 90 percent of the rental charges, the individual shall be paid the difference.

(iii) *House trailer.* If a house trailer or mobile home is moved by commercial carrier, the individual shall submit to the State agency an estimate of the cost of the move by the commercial carrier. A check for 90 percent of the amount of the estimate, if approved, payable to the individual and the carrier, may be delivered to the individual at the time of the scheduled move or within 10 days prior thereto.

(c) *Lump sum allowance.* The lump sum allowance provided in § 635.45(a)(3) shall be paid when arrangements are completed for relocation of the individual and family, if any, but not more than 10 days before the anticipated date of shipment of the individual's household goods and personal effects.

(d) *Relocation completed.* A relocation is completed when an individual and family, if any, and their household goods and personal effects arrive at the individual's residence in the area of relocation. If no household goods and personal effects are moved, a relocation is completed when the individual and family, if any, arrive in

the area of relocation and establish a residence in the new area. The later arrival of a family member approved for separate travel shall not alter the date a relocation was completed.

Subpart F—Administration by Applicable State Agencies

§ 635.50 Determinations of entitlement; notices to individual.

(a) *Determinations of initial applications for TRA or other TAA.* The State agency whose State law is the applicable State law under § 635.16, or the State agency as provided in § 635.26(d), shall promptly upon the filing of an initial application for TRA or other TAA, determine the individual's entitlement to such TRA, or other TAA under this Part 635, and may accept for such purpose information and findings supplied by another State agency under this Part 635.

(b) *Determinations of subsequent applications for TRA or other TAA.* The State agency promptly shall, upon the filing of an application for payment of TRA or subsistence and transportation under §§ 635.27 and 635.28, with respect to a week, determine whether the individual is eligible for a payment of TRA, or subsistence and transportation, with respect to such week, and, if eligible, the amount of TRA, or subsistence and transportation, for which the individual is eligible. In addition, the State agency promptly shall, upon the filing of a subsequent application for job search allowances (where the total of previous job search allowances paid the individual was less than $600), determine whether the individual is eligible for job search allowances, and, if eligible, the amount of job search allowances for which the individual is eligible.

(c) *Redeterminations.* The provisions of the applicable State law concerning the right to request, or authority to undertake, reconsideration of a determination pertaining to a claim for UI under the applicable State law shall apply to determinations pertaining to all forms of TAA under this Part 635.

(d) *Use of State law.* In making determinations or redeterminations under this section, or in reviewing such determinations or redeterminations under § 635.51, a State agency, a hearing officer, or a court shall apply the regulations in this Part 635 and the substantive provisions of the Act. As to matters committed by the Act and this Part 635 to the applicable State law, a State agency, a hearing officer, or a court shall apply the applicable State law and regulations thereunder, including procedural requirements of such State law or regulations, except so far as such State law or regulations are inconsistent with the Act or this Part 635 or the purpose of the Act or this Part 635.

(e) *Notices to individual.* The State agency shall notify the individual in writing of any determination or redetermination as to entitlement to TAA. Each determination or redetermination shall inform the individual of the reason for the determination or redetermination and of the right to reconsideration or appeal in the same manner as determinations of entitlement to UI are subject to redetermination or apppeal under the applicable State law.

(f) *Promptness.* Full payment of TAA when due shall be made with the greatest promptness that is administratively feasible.

(g) *Procedure.* Except where otherwise required by the Act or this Part 635, the procedures for making and furnishing determinations and written notices of determinations to individuals, shall be consistent with the Secretary's "Standard for Claim Determinations-Separation Information" (*Employment Security Manual*, Part V, sections 6010 *et seq.*)

§ 635.51 Appeals and hearings.

(a) *Applicable State law.* A determination or redetermination under this Part 635 shall be subject to review in the same manner and to the same extent as determinations and redeterminations under the applicable State law, and only in that manner and to that extent. Proceedings for review of a determination or redetermination may be consolidated or joined with proceedings for review of a determination or redetermination under the State law where convenient or necessary. Procedures as to the right of appeal and opportunity for fair hearing shall be consistent with sections 303(a)(1) and (3) of the Social Security Act (42 U.S.C. 503(a)(1) and (3)).

(b) *Appeals promptness.* Appeals under paragraph (a) of this section shall be decided with a degree of promptness meeting the Secretary's "Standard on Appeals Promptness-Unemployment Compensation" (Part 650 of this chapter). Any provisions of the applicable State law for advancement or priority of UI cases on judicial calendars, or otherwise intended to provide for prompt payment of UI when due, shall apply to proceedings involving entitlement to TAA under this Part 635.

§ 635.52 Uniform interpretation and application.

(a) *First rule of construction.* The Act and the implementing regulations in this Part 635 shall be construed liberally so as to carry out the purpose of the Act.

(b) *Second rule of construction.* The Act and the implementing regulations in this Part 635 shall be construed so as to assure insofar as possible the uniform interpretation and application of the Act and this Part 635 throughout the United States.

(c) *Effectuating purpose and rules of construction.* (1) In order to effectuate the purpose of the Act and this Part 635 and to assure uniform interpretation and application of the Act and this Part 635 throughout the United States, a State agency shall forward, not later than 10 days after issuance, to the Department a copy of any judicial or administrative decision ruling on an individual's entitlement to TAA under this Part 635. On request of the Department, a State agency shalll agency shall forward to the Department a copy of any determination or redetermination ruling on an individual's entitlement to TAA under this Part 635.

(2) If the Department believes that a determination, redetermination, or decision is inconsistent with the Department's interpretation of the Act or this Part 635, the Department may at any time notify the State agency of the Department's view. Thereafter, the State agency shall issue a redetermination or appeal if possible, and shall not follow such determination, redetermination, or decision as a precedent; and, in any subsequent proceedings which involve such determination, redetermination, or decision, or wherein such determination, redetermination, or decision is cited as precedent or otherwise relied upon, the State agency shall inform the claims deputy or hearing officer or court of the Department's view and shall make all reasonable efforts, including appeal or other proceedings in an appropriate forum, to obtain modification, limitation, or overruling of the determination, redetermination, or decision.

(3) If the Department believes that a determination, redetermination, or decision is patently and flagrantly violative of the Act or this Part 635, the Department may at any time notify the State agency of the Department's view. If the determination, redetermination, or decision in question denies TAA to an individual, the steps outlined in paragraph (c)(2) of this section shall be followed by the State agency. If the determination, redetermination, or decision in question awards TAA to an individual, the benefits are "due" within

the meaning of section 303(a)(1) of the Social Security Act, 42 U.S.C. § 503(a)(1), and therefore must be paid promptly to the individual. However, the State agency shall take the steps outlined in paragraph (c)(2) of this section, and payments to the individual may be temporarily delayed if redetermination or appeal action is taken not more than one business day following the day on which the first payment otherwise would be issued to the individual; and the redetermination action is taken or appeal is filed to obtain a reversal of the award of TAA and a ruling consistent with the Department's view; and the redetermination action or appeal seeks an expedited redetermination or appeal within not more than two weeks after the redetermination action is taken or the appeal is filed. If redetermination action is not taken or appeal is not filed within the above time limit, or a redetermination or decision is not obtained within the two-week limit, or any redetermination or decision or order is issued which affirms the determination, redetermination, or decision awarding TAA or allows it to stand in whole or in part, the benefits awarded must be paid promptly to the individual.

(4)(i) If any determination, redetermination, or decision, referred to in paragraph (c)(2) or paragraph (c)(3) of this section, is treated as a precedent for any future application for TAA, the Secretary will decide whether the Agreement with the State entered into under the Act and this Part 635 shall be terminated and § 635.59(f) applied.

(ii) In the case of any determination, redetermination, or decision that is not legally warranted under the Act or this Part 635, including any determination, redetermination, or decision referred to in paragraph (c)(1) or paragraph (c)(3) of this section, the Secretary will decide whether the State shall be required to restore the funds of the United States for any sums paid under such a determination, redetermination, or decision, and whether, in the absence of such restoration, the Agreement with the State shall be terminated and § 635.59(f) applied and whether other action shall be taken to recover such sums for the United States.

(5) A State agency may request reconsideration of a notice issued pursuant to paragraph (c)(2) or paragraph (c)(3) of this section, and shall be given an opportunity to present views and arguments if desired.

(6) Concurrence of the Department in a determination, redetermination, or decision shall not be presumed from the absence of a notice issued pursuant to this section.

§ 635.53 Subpoenas.

A State agency may issue subpoenas for attendance of witnesses and production of records on the same terms and conditions as under the State law. Compliance may be enforced on the same terms and conditions as under the State law, or if a State court declines to enforce a subpoena issued under this section, the State agency may petition for an order requiring compliance with such subpoena to the United States District Court within the jurisdiction of which the relevant proceeding under this Part 635 is conducted.

§ 635.54 State agency rulemaking.

A State agency may establish supplemental procedures not inconsistent with the Act or this Part 635 or procedures prescribed by the Department to further effective administration of this Part 635. The exact text of such supplemental procedure or procedures, certified as accurate by a responsible official, employee, or counsel of the State agency, shall be submitted to the Department, on a form supplied by the Department. No supplemental procedure shall be effective unless and until approved by the Department. Approval may be granted on a temporary basis, not to exceed 90 days, in cases of administrative necessity. On reasonable notice to a State agency, approval of a supplemental procedure may be withdrawn at any time. If public notice and opportunity for hearing would be required under a State law for adoption of a similar or analogous procedure involving UI, such public notice and opportunity for hearing shall be afforded by the State agency as to the supplemental procedure.

§ 635.55 Overpayments; penalties for fraud.

(a) *Determination and repayment.* (1) If a State agency or a court of competent jurisdiction determines that any individual has received any payment under the Act and this Part 635 to which the individual was not entitled, including a payment referred to in paragraph (b) or paragraph (c) of this section, such individual shall be liable to repay such amount to the State agency, and the State agency shall recover any such overpayment in accordance with the provisions of this Part 635; except that the State agency may waive the recovery of any such overpayment if the State agency determines, in accordance with the guidelines prescribed in paragraph (a)(2) of this section, that:

(i) The payment was made without fault on the part of such individual; and

(ii) Requiring such repayment would be contrary to equity and good conscience.

(2)(i)(A) In determining whether fault exists for the purposes of paragraph (a)(1)(i) of this section, the following factors shall be considered:

(*1*) Whether a statement or representation of a material nature was made by the individual in connection with the application for TAA that resulted in the overpayment, and whether the individual knew or should have known that the statement or representation was inaccurate.

(*2*) Whether the individual failed or caused another to fail to disclose a material fact, in connection with an application for TAA that resulted in the overpayment, and whether the individual knew or should have known that the fact was material.

(*3*) Whether the individual knew or could have been expected to know that the individual was not entitled to the TAA payment.

(*4*) Whether, for any other reason, the overpayment resulted directly or indirectly, and partially or totally, from any action or omission of the individual or of which the individual had knowledge, and which was erroneous or inaccurate or otherwise wrong.

(*5*) Whether there has been a determination of fraud under paragraph (b) of this section or section 243 of the Act.

(B) In the event of an affirmative finding on any of the foregoing factors, recovery of the overpayment shall not be waived.

(ii)(A) In determining whether equity and good conscience exists for purposes of paragraph (a)(1)(ii) of this section, the following factors shall be considered:

(*1*) Whether the overpayment was the result of a decision on appeal, whether the State agency had given notice to the individual that the case has been appealed further and that the individual may be required to repay the overpayment in the event of a reversal of the appeal decision, and whether recovery of the overpayment will not cause extraordinary and lasting financial hardship to the individual.

(*2*) Whether recovery of the overpayment will not cause extraordinary financial hardship to the individual, and there has been no affirmative finding under paragraph (a)(2)(ii)(A) of this section with respect to such individual and such overpayment.

(B) In the event of an affirmative finding on either of the foregoing factors, recovery of the overpayment shall not be waived. For this purpose, an extraordinary financial hardship shall exist if recovery of the overpayment would result directly in the individual's loss of or inability to obtain minimal necessities of food, medicine, and shelter for a substantial period of time; and an extraordinary and lasting financial hardship shall be extraordinary as described above and may be expected to endure for the foreseeable future.

(C) In applying this hardship test in the case of attempted recovery by repayment, a substantial period of time shall be 30 days, and the foreseeable future shall be at least three months. In applying this hardship test in the case of proposed recoupment from other benefits, a substantial period of time and the foreseeable future shall be the longest potential period of benefit entitlement as seen at the time of the request for a waiver determination. In making financial hardship determinations, the State agency shall take into account all potential income of the individual and the individual's family and all cash resources available or potentially available to the individual and the individual's family in the time period being considered.

(3) Determinations granting or denying waivers of overpayments shall be made only on request for a waiver determination. Such request shall be made on a form approved by the Secretary, which shall be furnished to the individual by the State agency. Notices of determination of overpayments shall include information concerning the waiver provisions of this section.

(4)(1) Unless an overpayment is otherwise recovered, or is waived under paragraph (a) of this section, the State agency shall recover the overpayment by deductions from any sums payable to such individual under:

(A) The Act and this Part 635;

(B) Any Federal unemployment compensation law administered by the State agency; or

(C) Any other Federal law administered by the State agency which provides for the payment of assistance or an allowance with respect to unemployment.

(ii) No single deduction under this paragraph (a)(4) shall exceed 50 percent of the amount otherwise payable to the individual, and when a deduction is made it shall be 50 percent of the amount actually payable.

(b) *Fraud.* If a State agency or a court of competent jurisdiction finds that an individual:

(1) Knowingly has made, or caused another to make, a false statement or representation of a material fact; or

(2) Knowingly has failed, or caused another to fail, to disclose a material fact; and as a result of such false statement or representation, or of such nondisclosure, such individual has received any payment under the Act and this Part 635 to which the individual was not entitled, such individual shall, in addition to any other penalty provided by law, be ineligible for any further payments under the Act and this Part 635.

(c) *Job search and relocation allowances.* (1) If an individual fails, with good cause, to complete a job search or relocation, any payment or portion of a payment made under the Act and Subpart D or Subpart E of this Part 635 to such individual, that is not properly and necessarily expended in attempting to complete such job search or relocation, shall constitute an overpayment.

(2) If an individual fails, without good cause, to complete a job search or relocation, any payment made under the Act and Subpart D or Subpart E of this Part 635 to such individual shall constitute an overpayment.

(3) Such overpayments shall be recovered or waived as provided in paragraph (a) of this section.

(d) *Final determination.* Except for overpayments determined by a court of competent jurisdiction, no repayment may be required, and no deduction may be made, under this section until a determination under paragraph (a) of this section by the State agency has been made, notice of the determination and an opportunity for a fair hearing thereon has been given to the individual concerned, and the determination has become final.

(e) *Deposit.* Any amount repaid to a State agency under this section shall be deposited ino the fund from which payment was made.

(f) *Procedural requirements.* (1) The provisions of paragraphs (c), (e), and (g) of § 635.50 shall apply to determinations and redeterminations made pursuant to this section.

(2) *The provisions of § 635.51 shall apply to determinations and redeterminations made pursuant to this section.*

(g) *Fraud detection and prevention.* Provisions in the procedures of each State with respect to detection and prevention of fraudulent overpayments of TAA shall be, as a minimum, commensurate with the procedures adopted by the State with respect to State unemployment compensation and consistent with the Secretary's "Standard for Fraud and Overpayment Detection" (*Employment Security Manual,* Part V, sections 7510 *et seq.*).

(h) *Debts due the United States.* Notwithstanding any provision of this Part 635, TAA payable to an individual under the Act and this Part 635 shall be applied by the State agency for the recovery by offset of any debt due the United States from the individual, but shall not be applied or used by the State agency in any manner for the payment of any debt of the individual to any State or any other entity or person except as provided in paragraph (i) of this section.

(i) *Child support and alimony.* TRA payable to an individual shall be payable to someone other than the individual if required by State law and Federal law to satisfy the individual's obligations for child support or alimony.

§ 635.56 Inviolate rights to TAA.

Except as specifically provided in this Part 635, the rights of individuals to TAA shall be protected in the same manner and to the same extent as the rights of persons to UI are protected under the applicable State law. Such measures shall include protection of applicants for TAA from waiver, release, assignment, pledge, encumbrance, levy, execution, attachment, and garnishment of their rights to TAA, except as provided in § 635.55. In the same manner and to the same extent, individuals shall be protected from discrimination and obstruction in regard to seeking, applying for, and receiving any right to TAA.

§ 635.57 Recordkeeping; disclosure of information.

(a) *Recordkeeping.* Each State agency will make and maintain records pertaining to the administration of the Act as the Secretary requires, and will make all such records available for inspection, examination and audit by such Federal officials as the Secretary may designate or as may be required by law.

(b) *Disclosure of Information.* Information in records maintained by a State agency in administering the Act shall be kept confidential, and information in such records may be disclosed only in the same manner and to the same extent as information with respect to UI and the entitlement of individuals thereto may be disclosed under the applicable State law. Such information shall not, however, be

disclosed to an employer or any other person except to the extent necessary to obtain information from the employer or other person for the purposes of this Part 635. This provision on the confidentiality of information maintained in the administration of the Act shall not apply, however, to the Department or for the purposes of § 635.55 or paragraph (a) of this section, or in the case of information, reports and studies required pursuant to § 635.61, or where the result would be inconsistent with the Freedom of Information Act (5 U.S.C. § 552), the Privacy Act of 1974 (5 U.S.C. § 552a), or regulations of the Department promulgated thereunder.

§ 635.58 UI.

UI payable to an adversely affected worker shall not be denied or reduced for any week by reason of any right to a payment of TAA under the Act and this Part 635.

§ 635.59 Agreements with State agencies.

(a) *Authority.* Before performing any function or exercising any jurisdiction under the Act and this Part 635, a State or a State agency shall execute an Agreement with the Secretary meeting the requirements of the Act.

(b) *Execution.* An Agreement under paragraph (a) of this section shall be signed on behalf of a State by an authorized official of the State and the signature shall be dated. The authority of the official shall be certified by the Attorney General of the State or counsel for the State agency, unless the Agreement is signed by the Governor of the State. An Agreement will be executed on behalf of the United States by the Secretary.

(c) *Public access to Agreements.* The State agency will make available to any individual or organization a true copy of the Agreement with the agency for inspection and copying. Copies of an Agreement may be furnished on request to any individual or organization upon payment of the same charges, if any, as apply to the furnishing of copies of other records of the State agency.

(d) *Amended Agreement.* A State or State agency shall execute an amended Agreement with the Secretary prior to administering any amendments to the TAA provisions of the Trade Act of 1974.

(e) *Agent of United States.* In making determinations, redeterminations, and in connection with proceedings for review thereof, a State or State agency which has executed an Agreement as provided in this section shall be an agent of the United States and shall carry out fully the purposes of the Act and this Part 635.

(f) *Breach.* If the Secretary finds that a State or State agency has not fulfilled its commitments under its Agreement under this section, section 3302(c)(3) of the Internal Revenue Code of 1954 shall apply. A State or State agency shall receive reasonable notice and opportunity for hearing before a finding is made under section 3302(c)(3) whether there has been a failure to fulfill the commitments under the Agreement.

(g) *Secretary's review of State agency compliance.* The appropriate Regional Administrator shall be initially responsible for the periodic monitoring and reviewing of State and State agency compliance with the Agreement entered into under this section.

§ 635.60 Administration absent State agreement.

In any State in which no Agreement under § 635.59 is in force, the Secretary shall administer the Act and this Part 635 and pay TAA hereunder through appropriate arrangements made by the Department, and for this purpose the Secretary or the Department shall be substituted for the State agency wherever appropriate in this Part 635. Such arrangements shall include the requirement that TAA be administered in accordance with the Act and this Part 635, and the provisions of the appropriate State law except to the extent that such State law is inconsistent with any provision of the Act or this Part 635 or section 303 of the Social Security Act (42 U.S.C. 503) or section 3304(a) of the Internal Revenue Code of 1954 (26 U.S.C. 3304(a)), and shall also include provision for a fair hearing for any individual whose application for TAA is denied. A final determination under this section as to entitlement to TAA shall be subject to review by the courts in the same manner and to the same extent as is provided by section 205(g) of the Social Security Act (42 U.S.C. § 405(g)).

§ 635.61 Information, reports, and studies.

A State agency shall furnish to the Secretary such information and reports and conduct such studies as the Secretary determines are necessasry or appropriate for carrying out the purposes of the Act and this Part 635.

§ 635.62 Transitional procedures.

The procedures for administering the Trade Act of 1974 before and after the amendments made by the Omnibus Budget Reconciliation Act of 1981 are as follows:

(a) *TRA.* The provisions contained in Subpart B of this Part 635 shall apply with respect to the qualifying requirements for TRA to adversely affected workers who are separated on or after October 1, 1981, and were not entitled to receive TRA for any week of unemployment beginning before October 1, 1981. In addition, such provisions shall apply with respect to TRA payable for weeks of unemployment which begin after September 30, 1981, to adversely affected workers who were separated before October 1, 1981. Any adversely affected worker who is receiving or is entitled to receive TRA for any week of unemployment beginning before October 1, 1981, shall be entitled to receive TRA as follows:

(1) *Weeks before October 1, 1981.* With respect to weeks of unemployment beginning before October 1, 1981, eligibility for TRA shall be determined in accordance with the provisions of the law and regulations in effect before the amendments made by the Omnibus Budget Reconciliation Act of 1981.

(2) *Weeks after September 30, 1981.* (i) *Basic weeks (UI exhaustion).* With respect to any week of unemployment beginning after September 30, 1981, for an individual who has exhausted all rights to UI prior to such week, eligibility for TRA shall be determined under Subpart B of this Part 635, except that the maximum amount of basic TRA payable to the individual for any such week of unemployment shall be an amount equal to the product of the amount of TRA payable to the individual for a week of total unemployment (as determined under § 635.13(a)) multiplied by a factor determined by subtracting from fifty-two the sum of:

(A) The number of weeks preceding the first week which begins after September 30, 1981, including all weeks in the individual's first benefit period, and which are within the period covered by the same certification as such week of unemployment, for which the individual was entitled to a payment of TRA or UI (or would have been entitled to a payment of TRA or UI if the individual had applied therefor); and

(B) The number of weeks preceding such first week that are deductible under section 232(d) of the Trade Act of 1974 in effect before the amendments made by the Omnibus Budget Reconciliation Act of 1981.

The amount of TRA payable to an individual under this paragraph (a)(2)(i) shall be subject to adjustment on a week-to-week basis as may be required by § 635.13(b).

(ii) *Basic weeks (UI entitlement).* With respect to any week of unemployment beginning after September 30, 1981, for an individual who still has entitlement

to UI, payment of TRA shall be discontinued until the individual exhausts all rights to UI as provided in § 635.11(a)(5). After exhaustion of all rights to UI, payment of TRA shall be determined under Subpart B of this Part 635, except that the maximum amount of basic TRA payable to the individual for ensuing weeks of unemployment shall be an amount equal to:

(A) the maximum amount of basic TRA as computed under paragraph (a)(2)(i) of this section, *minus*

(B) The total sum of UI to which the individual was entitled (or would have been entitled if the individual had applied therefor) for weeks beginning after September 30, 1981.

(iii) *Additional weeks.* With respect to any week of unemployment beginning after September 30, 1981, for an individual who is in training approved under section 236 of the Trade Act of 1974, and who was receiving TRA for basic or additional weeks beginning before October 1, 1981, the weekly amount of TRA for any additional weeks beginning after September 30, 1981, shall be determined under Subpart B of this Part 635.

(3) *Transitional eligibility period.* (i) *Basic weeks.* Any individual who was eligible for a basic TRA payment for any week beginning before October 1, 1981, shall not be eligible for a basic TRA payment for any week beginning after September 30, 1981, for any week which begins more than 52 weeks after the individual has exhausted all rights to regular compensation in the first benefit period (as provided in § 635.15(a)).

(ii) *Additional weeks.* Any individual who was eligible for a TRA payment for an additional week beginning before October 1, 1981, shall not be eligible for a TRA payment for any additional week beginning after September 30, 1981, unless such additional week begins within:

(A) 26 weeks after the last week of the individual's entitlement to basic TRA, or

(B) 78 weeks after the individual exhausted regular compensation in the first benefit period, whichever occurs first (as provided in § 635.15).

(b) *Training, other reemployment services, and allowances.* (1) With respect to applications for training filed before September 30 1981, the provisions contained in Subpart C of this Part 635 shall apply to determinations regarding the approval of such training made after September 30, 1981.

(2) With respect to applications for transportation and subsistence payments while in training, and job search and relocation allowances, the provisions contained in Subparts C, D and E of this Part 635 shall apply to such applications that are filed after September 30, 1981.

(3) Individuals who have had self-financed training approved prior to October 1, 1981, shall not be reimbursed for training and related expenses incurred while in such training, unless such training is approved under the amended law and this Part 635.

(c) *Fraud and recovery of overpayments.* The provisions contained in this Subpart F with respect to fraud and recovery of overpayments shall take effect on August 13, 1981, and shall apply to all overpayments outstanding on that date or determined on or after that date.

(d) *Required amendments to State law.* Except as provided in this paragraph (d)(2), the provisions of section 2514(a)(2)(D) of the Omnibus Budget Reconciliation Act of 1981 requiring amendment to State laws shall apply to State laws for the purposes of certifications under section 3304(c) of the Internal Revenue Code of 1954 on October 31 of any taxable year after 1981; except that, in any State in which the legislature of that State—

(1) Does not meet in a session which begins after August 13, 1981, and before September 1, 1982, and

(2) If in session on August 13, 1981, and does not remain in session for at least 25 calendar days thereafter, the date of "1981" in this paragraph (d) shall be deemed to be "1982."

§ 635.63 Savings clause.

The amendments made by the Omnibus Budget Reconciliation Act of 1981 shall not abate or otherwise affect entitlement to TAA under the Trade Act of 1974 or any appeal which was pending on October 1, 1981, or on the date of enactment of any such amendment, as applicable, or prevent any appeal from any determination thereunder which did not become final prior to such applicable date if appeal or petition is filed within the time allowed for appeal or petition.

§ 635.64 Termination date.

The Act shall terminate on September 30, 1983, as follows:

(a) No application for TRA, or transportation or subsistence payment while in training approved under Subpart C of this Part 635, shall be approved, and no payment of TRA, or transportation or subsistence, shall be made, for any week which begins after September 30, 1983.

(b) No payment of job search or relocation allowances shall be made after September 30, 1983, unless an application for such allowances was approved, and such job search or relocation was completed, on or before September 30, 1983.

(c) No training under Subpart C of this Part 635 shall be approved unless a determination regarding the approval of such training was made, and such training commenced, on or before September 30, 1983. No payment shall ba authorized for any training costs incurred after September 30, 1983.

Part V

Federal Emergency Management Agency

National Federal Plan for Response to a Catastrophic Earthquake

FEDERAL EMERGENCY MANAGEMENT AGENCY

Preparation of the National Federal Plan for Response to a Catastrophic Earthquake

AGENCY: Federal Emergency Management Agency.

ACTION: Publication of the notice initiating national Federal planning for response to a catastrophic earthquake.

SUMMARY: This notice is intended to initiated planning for National Federal response to a catastrophic earthquake in any part of the country. Focus of the planning is on providing State and local governments with the supplemental support needed to save and protect lives and meet basic human needs during the immediate emergency period following the event. Support available from the Federal Government will be as authorized by individual agency authorities and those programs authorized by the Disaster Relief Act of 1974, Pub. L. 93–288. This planning will not encompass individual Federal agency responsibilities for protecting their own resources and facilities.

All Federal departments and agencies are requested to participate as outlined in this notice, or as their appropriate roles and responsibilities are identified during the planning effort. Until a national Federal plan for response is developed, this notice shall serve as the interim operative plan for response in support of State and local governments affected by a catastrophic earthquake.

DATES: Comments on the notice for planning are encouraged. Such comments will be considered in revision to the planning requirements and in the planning which is undertaken according to this notice. Comments are due within thirty days from date of this notice.

ADDRESS: Send comments to Docket Clerk, Federal Emergency Management Agency, 500 C Street, SW, Washington, D.C. 20472.

FOR FURTHER INFORMATION CONTACT: Ed Sergent, Program Officer, Division of Response Planning and Coordination, Disaster Assistance Programs, State and Local Programs and Support, Federal Emergency Management Agency, 500 C Street, SW, Room 713, Washington, D.C. 20472, telephone (202) 287–0560.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA) has responsibility as the lead agency for managing and coordinating the National Earthquake Hazards Reduction Program (NEHRP), as required under the Earthquake Hazards Reduction Act of 1977. A requirement of the NEHRP is to improve the capability of all levels of government to respond to the effects of a catastrophic earthquake in such a way as to reduce the loss of life and property. In addition, FEMA is responsible for implementation of programs and assistance under the Disaster Relief Act of 1974.

After the destruction caused by the eruption of Mt. St. Helens in May 1980, an ad hoc committee of the National Security Council was formed to conduct a government review of the consequences of and preparation for a similar event of low probability but high damage potential. The probability of various earthquake scenarios in California was reviewed and reported in FEMA Publication M&R–2, January 1981, "An Assessment of the Consequences and Preparations for a Catastrophic California Earthquake Findings and Actions Taken." The overall assessment resulting from this review was that the Nation is essentially unprepared for the catastrophic earthquake that must be expected in California in the next three decades. Current response plans and preparedness measures may be adequate for a "normal" earthquake, but preparations are "woefully inadequate to cope with the damage and casualties from a catastropic earthquake, and with the disruptions in communications, social fabric, and governmental structure that may follow."

The state-of-the-art is such that scientists predict a 2–5% chance per year of an 8.3 Richter magnitude earthquake on the Southern San Andreas Fault (Los Angeles metropolitan area). This fact has become the focus of renewed Congressional concern and intent that a comprehensive national emergency response plan be developed. In addition to the more immediate threat of a catastrophic earthquake event in California, the potential exists for a major catastrophic earthquake in other high-risk, high-population areas of the United States.

In addition to FEMA's responsibilities under the NEHRP, the National Plan of Action for Emergency Mobilization (developed through the efforts of the Emergency Mobilization Preparedness Board Working Group on Earthquakes) assigns responsibility to FEMA for coordinating the development of a Federal plan for response to a catastrophic earthquake in California and its subsequent testing and exercising. While it is important to use California as the basis for the development of the Federal response plan, the plan as described in this notice will be generic and have application to all high-risk, high-population areas of the country.

The framework of the planning has been developed through the efforts of the Subcommittee on Federal Earthquake Response Planning. The Subcommittee was formed under the auspices of the Interagency Coordination Committee of the National Earthquake Hazards Reduction Program. FEMA, as lead agency for managing and coordinating the NEHRP, chairs the Subcommittee. Membership of the Subcommittee includes representatives from: Departments of Defense, Transportation, Agriculture, Interior, Energy, Treasury, Labor, and Health and Human Services, the Veterans Administration, General Services Administration, National Communications System, and the American Red Cross.

The Subcommittee will continue as the coordinating body of the planning effort, and will meet as necessary to resolve issues and provide guidance to the Federal agencies tasked to participate in development of a Federal plan for response to a catastrophic earthquake.

  A. Responsibilities
  B. Emergency Support Functional Assignments
V. Relationship of Planning to Site-Specific (Regional) Plans
VI. Schedule for Plan Development and Exercises
VII. General and Administrative Guidance

I. Purpose and Scope

The purpose of this notice is to initiate Federal action to develop a comprehensive plan that will insure an effective and coordinated Federal response to support State and local governments affected by a catastrophic earthquake. It establishes a framework for a systematic planning approach in that it (1) sets forth the policies and planning assumptions to be used as the basis of the planning effort; (2) describes the concept of operations in general terms; (3) identifies specific emergency support functions required to support State and local response operations; and (4) assigns specific responsibilities to

appropriate Federal agencies for development of functional annexes—for each emergency support function—in support of a basic plan.

The development of the comprehensive Federal plan for response to a catastrophic earthquake will be in two parts. Part I will be a basic plan which consists of the essential portions of the plan, and an executive summary of each functional annex.

Part II of the plan will consist of the basic plan and the complete text of each of the emergency support functional annexes.

Emergency support functional annexes describe the function, responsibilities of the primary and support agencies, concept of operations, coordination and interfaces between agencies, and resource requirements and identification.

The overall basic plan and the executive summaries of each functional annex will be developed by FEMA. The emergency support functional annexes will be developed under the leadership of the Federal agency given primary responsibility for the planning and accomplishment of the assigned emergency function. The primary agency will be supported by other Federal agencies who have the capability to perform some aspect of the function.

II. Federal Government Policies and Planning Assumptions

The national Federal response plan is concerned with supplementing State and local government response to a catastrophic earthquake in any high-risk, high-population area of the country. Other than creating an awareness of the need for planning for the potential impact of a catastrophic earthquake, planning is not intended to encompass Federal agency responsibility for protecting their own resources and facilities.

Over the past ten years vulnerability assessments have been conducted in some of the high-risk, high-population areas. Studies have been completed or are ongoing in Honolulu, Los Angeles, San Francisco, Puget Sound, Anchorage, Salt Lake City, Central U.S., and Boston. These studies identify in broad terms the estimated loss of life and injuries, damage to critical facilities (such as schools and hospitals), and damage to lifelines (such as pipelines, utilities, and communications networks) that can be expected in various projections of magnitude, time of day and year, and intensities of earthquakes. In California, the State Geologist is developing capabilities that identify specific areas where soil conditions may affect existing structures.

The vulnerability assessments will continue to provide State and local planners with important information needed to develop site-specific preparedness and emergency response plans. The fact that these studies have not been completd in all high seismic risk areas should not delay or prevent the development of a Federal response plan to catastrophic earthquakes. Rather, the knowledge and experience gained through efforts such as those ongoing in California will help identify the appropriate requirements for Federal support in any geographic area.

A. Policies

The following Federal Government-wide policies are an initial listing to be modified as necessary during the development of a Federal plan. They will serve as a basis for the development of the basic plan and emergency support functional annexes.

1. The focus of planning will be on providing lifesaving and life-protecting assistance and support to State and local governments during immediate emergency response operations. This planning will set the framework for subsequent planning for other response phases.

2. Federal planning will be predicated on State/local governments being in charge of emergency operations, with Federal assistance as supplemental to State efforts.

3. Certain emergency operations required on Federally-owned property remain the responsibility of the Federal Government and will be carried out in accordance with individual Federal agency plans.

4. Federal agencies will respond under their own authorities and/or mechanisms authorized by Pub. L. 93–288. Upon Presidential declaration of a major disaster, Federal agencies may be reimbursed for functions performed at the direction of FEMA from the fund authorized for such purposes under Pub. L. 93–288. Planning will include establishing funding mechanisms in accordance with the reimbursement procedures spelled out in the Federal Disaster Assistance Regulations (44 CFR Part 205, Subpart I—Reimbursement of Other Federal Agencies). Specific issues will be resolved in the planning process.

5. The coordination of the Federal response to State and local government requests will be under the leadership of a Federal Coordinating Officer (FCO) appointed by the President. The Governor(s) of the affected State(s) will be advised of the designation of the FCO and will be asked to designate a State Coordinating Officer (SCO) as a principal point of contact for the FCO. The FCO and SCO will assure effective and coordinated operating relationships between Federal, State, local, volunteer, and private agencies.

6. This document will serve as an interim operative plan for response by Federal agencies until Part I (the basic plan and executive summaries of the emergency support functional annexes) of the comprehensive Federal emergency response plan is developed.

7. Specific functional assignments will be determined at the National level, with flexibility for differences in assignments contained in existing site-specific plans or in capabilities of agencies in specific areas.

B. Planning Assumptions

The following assumptions are an initial listing to be modified during the evolution of the planning process. They will serve as a framework for the development of the basic plan and emergency support functional annexes.

1. A catastrophic earthquake is a seismic event or series of seismic events that will result in large numbers of deaths and injuries; total destruction of a large percentage of facilities that provide and sustain human needs; overwhelming demand on State and local response resources and mechanisms; severe impact on national security facilities and infrastructures that sustain them; severe long term effect on general economic activity; and severe effect on State, local, and private sector initiatives to begin and sustain initial recovery activities.

2. The earthquake(s) will occur without warning and at a time of day that will produce the maximum number of casualties. Access to and from the damaged areas may be severely restricted for hours and perhaps days. Land line communication and life support systems will be severely disrupted or destroyed, and the maximum possible non-resident (work force and tourist) population will be present in the affected areas.

3. The earthquake(s) will trigger secondary events and effects such as fires, tsunami, landslides, flooding, and release of hazardous materials. Dam failure and aftershocks are also likely to occur following a catastrophic earthquake(s).

4. A catastrophic earthquake will result in an immediate Presidential disaster declaration under the provisions of Pub. L. 93–288 so that Federal involvement in the life-saving and emergency response operations can begin during the first 24 hours after

occurrence. A national emergency would not be declared during the immediate response phase.

5. State and local resources will be inadequate to respond to the effects of a catastrophic earthquake. The Federal Government will respond from both the local geographic area and the entire Nation to save lives and provide basic human needs. Since the entire Federal Government is not normally involved in the immediate response operations, mechanisms and plans for providing necessary lifesaving and life-protecting support are inadequate.

III. Concept of Operations

This section describes the phases of operations that would occur in response to a catastrophic earthquake. As stated previously the primary objective of this planning effort is the development of a Federal plan for the immediate emergency response phase to support State and local governments. The other three phases are also discussed to provide an overview of the total potential Federal involvement in such a disaster, and to illustrate where overlaps in operations and planning may occur. After the immediate emergency response phase plan is completed and tested, the remaining phases could become the objective of future planning requirements.

Also included in this section are discussions on the Federal, State, and local government roles in execution of response, responsibilities for coordination of the Federal response, and notification and activation procedures.

A. Phases of Operations Related to a Catastrophic Earthquake

1. *Immediate Emergency Response.* Period from the onset of the seismic event(s) to approximately 30 days afterward. Typical functions to be performed are generally associated with saving and protecting lives and meeting basic human needs. Functions include but are not limited to: search and rescue; damage reconnaissance and assessment; wildland fire suppression; emergency medical care; mass care; emergency transportation; emergency debris clearance/temporary restoration of essential public facilities and services; communications; emergency repair of critical facilities; distribution of food; public health; logistical support; mortuary services; identification of the dead; technical assistance; welfare inquires; and coordination of the Federal response.

2. *Prediction Response.* Period that would occur 48 or 96 hours before the seismic event(s) and would consist of a series of preparatory actions taken by Federal, State, and local governments that would protect life, minimize effects of the potential event on response personnel and equipment, and facilitate the deployment of resources necessary for immediate emergency response and initial recovery operations.

3. *Initial Recovery.* Period traditionally associated with the Federal response for providing disaster recovery upon Presidential declaration. Usually overlaps the immediate emergency response period beginning several days after the onset of the event and could last up to two years. Typical functions to be performed are associated with the establishment of the Federal mechanism for delivery of disaster assistance provided in Pub. L. 93–288 (public assistance and individual assistance), staffing of Disaster Assistance Centers, and the use of Federal, State, and disaster reservist staff to perform damage survey work.

4. *Long Term Restoration/Recovery.* Period from one to five years after onset of the event, during which time the affected areas would be restored to their normal or an improved state. Federal role in the process would be generally in policy development, through the authority associated with provision of Federal funds and assistance. Federal plans are not in existence except some post-nuclear attack recovery plans that may have partial application.

B. Federal, State, and Local Government Roles

1. The primary responsibility for responding to the immediate emergency needs of the local communities resides with State and local government.

2. Federal response under Pub. L. 93–288 will occur upon a Presidential declaration and be supportive of and not a substitute for State and local government actions. Federal support is provided only when the capacity of the State and local governments has been exceeded.

3. In addition to the Federal assistance provided under Pub. L. 93–288, Federal departments and agencies are responsible for providing direct disaster assistance or support in accordance with their own statutory authority, functions, resources, and capabilities. Federal agencies should consider the potential impact of a catastrophic earthquake on their ability to perform their responsibilities.

4. Immediate Federal response will be focused on the emergency application of resources to prevent or minimize loss of life, alleviate suffering, provide for public health and welfare, and to conduct damage reconnaissance activities that support the early Federal delivery of appropriate assistance and restore damaged life support systems.

C. Coordination of the Federal Response

1. FEMA's primary responsibility in the Federal response is to notify participating Federal agencies of the occurrence of the earthquake, help activate the Federal Government response, deploy and support the FCO, and establish the necessary liaison with the Governor and SCO.

2. The primary responsibility of each Federal agency is to respond to the notification according to the basic plan and implementation of supporting annexes of the comprehensive Federal emergency response plan to a catastrophic earthquake.

3. The FCO role in a disaster is mandated by law as defined in Sections 303 and 304 of the Disaster Relief Act of 1974 (Pub. L. 93–288). These sections require the appointment of an FCO upon declaration of a major disaster and call for the constitution and deployment of emergency support teams to assist the FCO. Authority to appoint the FCO was delegated by the President to the Director of FEMA in Executive Order 12148.

The functions of the FCO are legislatively mandated. The FCO is required to:

—Make an initial appraisal of the types of relief most urgently needed;
—Establish such field offices as the FCO deems necessary;
—Coordinate the administration of relief, including activities of State and local governments and private relief organizations; and
—Take other necessary action to assist local citizens and public officials in promptly obtaining assistance.

4. To accomplish the mandated functions, the FCO and staff will perform or cause to be performed the following functions of coordination:

Situation Assessment. A comprehensive assessment of the disaster to include the magnitude and severity of impact, the capabilities of State and local governments and private agencies to deal with the situation, the types of Federal assistance which may be made available, and the impact on the affected area if Federal assistance is either limited or unavailable.

Communications. Assure that adequate facilities exist to permit effective communication among responding Federal agencies, between Federal and State representatives, and between the FCO and FEMA's Emergency Information and

Coordination Center (EICC) in Washington, D.C.

Program Coordination. Oversee the operation of all Federal, State, and local activities in the affected area and provide one, visible focal point for coordinated response and recovery activities. Assure that assistance is being provided in a timely, efficient, and effective manner, without duplicative or wasteful effort. Make such recommendations as deemed necessary to Federal and State officials in the affected area and, through the Associate Director, State and Local Programs and Support (SLPS), FEMA, to the heads of responding agencies. Establish and maintain close working relationships with the SCO and with private relief and other organizations to assure a comprehensive and coordinated approach in providing assistance to the affected area.

Information. Assure that all releases to, and contacts with, the news media are coordinated. This coordination will not be to censor or otherwise transgress upon agency relationships with the media; but to provide a recognized single, central source of information and to assure that the response and recovery effort is described comprehensively, consistently, and accurately.

Outreach. Work closely with the SCO to assure effective two-way information exchange between the response and recovery effort and the affected public citizens, special interest groups, and community and civic organizations.

Liaison With Elected Officials. Assure that elected officials who represent the citizens in the impacted area are well-informed about the progress of the reponse and recovery effort. The FCO also will provide a central point of contact for questions from elected officials.

Reports. Develop and implement a reporting system to provide a periodic comprehensive overview of response and recovery activities and to display progress toward meeting established goals. Reports will include significant activities of State, local, and private organizations, and will be transmitted to the Associate Director, SLPS, FEMA through the EICC.

After-action Report. Review and report on the coordination of response and recovery effort in the affected area. The report will provide information on the strengths and weaknesses of the response and recovery effort. The report may contain recommendations for changes in legislation, delegations of authority, and procedures, or may simply provide information regarding coordination aspects of the specific incident. The report will be submitted to the Associate Director, SLPS, FEMA for such further action as deemed necessary.

5. For the FCO to coordinate the emergency response actions among Federal agencies and determine if the assigned functions are being accomplished, the Federal agencies will have to supply current information to the FCO on the status of the response effort. Each emergency support functional annex should therefore include procedures and mechanisms to provide this information to the FCO once the Federal response effort begins. In addition, a liaison officer will need to be provided to serve as the representative from the emergency support function to the FCO. This concept will also be followed at the national headquarters level in Washington, D.C.

D. Notification and Activation

A general scheme to be followed in officially notifying appropriate agencies and activating the Federal response will be developed during the planning process and will be outlined in the appropriate sections of the basic plan and functional annexes.

IV. Roles and Reponsibilities

To accomplish the development and performance of the Federal response to a catastrophic earthquake, Federal agencies are assigned primary and/or support roles for the development of necessary planning and participation in accomplishment of the function.

A. Responsibilities

Primary responsibility means that an agency will manage the development of a specific functional annex and the performance of the function. The agency will also serve as the principal point of contact with FEMA concerning the development of the annex, and will assist FEMA in the overall coordination of the complete comprehensive National Federal emergency response plan. Support responsibility means that an agency will assist the primary agency in accomplishment of the planning effort. The primary responsibility has been assigned to the agency with the greatest overall capability, responsibility, or experience in the particular functional area. This is in no way intended to diminish the role or responsibility of agencies assigned in a support capacity. Rather, all agencies must work together, with the primary agency acting as the catalyst, to plan and coordinate the appropriate delivery of support to State and local governments requiring Federal response to a catastrophic earthquake.

Recognizing that agencies may have more than one primary or support role to perform, FEMA will act as a catalyst in the identification of planning priorities and commonalities and assist in resolving problems that could affect the timeliness and quality of the final products.

Completed draft annexes will be submitted to FEMA for review. Based upon this review the primary agency responsible for the function will make any necessary revision to the annexes. FEMA will not assess the annexes on the basis of their technical or operational feasibility but will assure that the responsibilities and interfaces have been coordinated. Because most support activities will be performed under the the authorities and expenditures provided for in Pub. L. 93-288, FEMA has a managerial and oversight role to review annexes in light of the whole planning effort.

In addition to the agencies specifically assigned primary or support roles, all Federal agencies are expected to support the planning effort as required by the primary agency or FEMA. Requirements from other agencies may range from identification of resources and staff support to developing internal procedures for providing such support during the response effort.

B. Emergency Support Functional Assignments

The Emergency Support Functions (ESF) identified below are those where it is expected that Federal support to supplement State and local government response will be required. The functions described are not intended to be all inclusive and will require refinement as the planning process evolves. Other functions may also have to be added as necessary when identified during the planning process. Further, ESF descriptions that appear to overlap or duplicate another function will be resolved to clarify the purpose and intent of the ESF.

During deliberations of the Subcommittee on Federal Earthquake Response Planning, the decision was made to develop functional annexes to a basic plan. This functional approach, in lieu of individual agency planning, was viewed as the means through which the most effective, coordinated Federal response plan could be developed. Consequently, each functional area will involve a number of agencies with resources and capabilities to contribute to the overall planning and implementation effort.

Accordingly, the following ESF assignments shall be used to initiate Federal planning:

1. Damage Reconnaissance and Assessment (ESF 1):

A. Assignments

Primary: Federal Emergency Management Agency.

Support: Department of Agriculture, Department of Defense, Department of Education, Department of Energy, Department of Interior, Department of Transportation, Corps of Engineers, Environmental Protection Agency, General Services Administration, National Aeronautics and Space Administration, Nuclear Regulatory Commission, Veterans' Administration.

B. Description of Function

—Initial estimation of the location and extent of damage and preparation of damage assessment reports.
—Determination of the magnitude and severity of impact on transportation systems, utilities, critical facilities and other community infrastructures necessary for sustaining the population.
—Identification of severely damaged building that have a high potential of trapped/injured victims. (Generally, high rise office buildings as well as large multiple residences. These structures tend to experience more structural damage than single story, single-family residences.)

2. Communications (ESF 2):

A. Assignments

Primary: National Communications System.

Support: Department of Agriculture, Department of Commerce, Department of Defense, Department of Energy, Department of the Interior, Department of Transportation, Federal Communications Commission, Federal Emergency Management Agency, General Services Administration, National Aeronautics and Space Administration.

B. Description of Function

—Establish temporary communications in the disaster area(s) to support the response activities of FEMA and other Federal agencies.
—Provide communication support to State and local government officials.
—Establish communications links from the disaster area(s) to Federal regional and headquarters agencies.
—Use Federally owned and operated assets where commercial services and facilities are inadequate or inoperable.
—Coordinate restoration of private telephone service to highest priority areas.

3. Emergency Medical Care (ESF 3):

A. Assignments

Primary: Department of Health and Human Services.

Support: Department of Defense, American Red Cross, Federal Emergency Management Agency, General Services Administration, Veterans Administration.

B. Description of Function

—Provide medical teams to States to assist them in assessment of the medical situation.
—Casualty collection and triage.
—Emergency treatment of casualties pending evacuation to hospitals.
—Treatment of casualties at Federal hospitals to supplement State, local and private hospital resources.
—Establish communications area to support operations.
—Distribution of Federal medical stocks/other medical and nursing supplies and equipment to supplement State, local government, and private sector medical response operations.
—Provide blood supplies.
—Provide first aid support to mass care shelters.
—Provide temporary morgue capability for accepting severely injured who will or may have expired.
—Create a system for accomplishing the above medical care functions.

4. Search and Rescue (ESF 4):

A. Assignments

Primary: Department of Defense.

Support: Department of Agriculture, Department of the Interior, Department of Transportation, Federal Emergency Management Agency.

B. Description of Function

—Supply aircraft, ships, specialized rescue teams and equipment to supplement State and local efforts to search for and rescue persons in distress on land or at sea.
—Support State and local efforts to evacuate people from hazardous areas and situations.
—Assist State and local efforts to locate and evacuate people isolated because of road closures, or other secondary effects of the disaster, and to rescue trapped persons when resource priorities permit.

5. Wildland Fire Suppression (ESF 5):

A. Assignments

Primary: Department of Agriculture.

Support: Department of Defense, Department of the Interior, Department of Transportation, Federal Emergency Management Agency.

B. Description of Function

—Support State and local wildland fire suppression operations with technical assistance, equipment, supplies, and personnel.
—If available after completion of primary task also support State and local governments in fighting small structural fires.

6. Mass Care (ESF 6):

A. Assignments

Primary: American Red Cross.

Support: Department of Agriculture, Department of Defense, Department of Education, Department of Health and Human Services, Department of the Interior, Federal Emergency Management Agency, General Services Administration, Interstate Commerce Commission, U.S. Postal Service, Veterans Administration.

B. Description of Function

—Management, staffing, and supply of facilities and resources used to shelter, feed, clothe, and provide first aid for individuals and families unable to live in their residences.
—Control of disaster victims living in the facilities

7. Public Health (ESF 7):

A. Assignments

Primary: Department of Health and Human Services.

Support: Department of Agriculture, Department of Transportation, American Red Cross, Federal Emergency Management Agency, General Services Administration, Veterans Administration.

B. Description of Function

Support State and local health officials in the:

Identification and elimination of health hazards.

Prevention of epidemics.

Vector control.

Testing of food and water supplies for contamination or spoilage.

8. Emergency Debris Clearance/ Temporary Restoration of Essential Public Facilities and Services (ESF 8):

A. Assignments

Primary: Corps of Engineers.

Support: Department of Agriculture, Department of Defense, Department of Education, Department of Energy, Department of the Interior, Department of Labor, Department of Transportation, Environmental Protection Agency, Federal Emergency Management

Agency, General Services Administration.

B. Description of Function

Provide technical assistance, personnel, equipment, and contracting services to support State and local governments in performing emergency work essential for the preservation of life and property. Activities include:

Removal of debris from public and private land.

Assessment of and temporary restoration of essential public facilities and services.

Inspection of damaged buildings, roads, bridges, and airfields essential for use in Federal, State, and local government response efforts.

Demolition of damaged structures.

9. Emergency Transportation (Surface, Water, Air) (ESF 9):

A. Assignments

Primary: Department of Transportation.

Support: Department of Agriculture, Department of Defense, Department of the Interior, Federal Emergency Management Agency, General Services Administration, Interstate Commerce Commission, U.S. Postal Service.

B. Description of Function

—Arrange or assist in arranging for the provision of supplemental transportation for use of personnel in damage assessment activities.

—Arrange of assist in arranging for the provision of available Federal transportation for personnel, equipment, and material resources required for conduct of life-saving activities.

—Determine the proper apportionment of available civil transportation and its priority utilization for all categories of available civil transportation and such Federal agency transportation resources as may be available for the several agencies.

—Assessment of the overall operational status of the civil transportation networks including the Federal highway system in, to, and from the disaster area(s).

—Provide the necessary services including personnel and equipment necessary to the control of air and sea traffic in, to, and from the disaster area(s).

—Determine transportation networks best suited for bringing in materials and services.

—Arrange or assist in arranging for the provision of technical support and equipment that could be utilized in emergency repair of critical transportation networks.

—Arrange or assist in arranging for the provision of available civil transportation resources as may be required for prompt and effective response including those services necessary to accomplish the evacuation of elderly, infirmed, injured, or others requiring special transportation considerations.

—Provide Federal transportation community response coordination.

10. Emergency Distribution of Food (ESF 10):

A. Assignments

Primary: Department of Agriculture.

Support: Department of Defense, American Red Cross, Federal Emergency Management Agency, General Services Administration, Veterans Administration.

B. Description of Function

—Secure Federal food stocks and other food resources and transport to mass care facilities to be used to support feeding operations.

11. Logistical Support (ESF 11):

A. Assignments

Primary: General Services Administration.

Support: Department of Agriculture, Department of Defense, Department of Health and Human Services, Department of Interior, Department of Labor, Federal Emergency Management Agency, U.S. Postal Service, Veterans Administration.

B. Description of Function

—Identify existing Federal resources, equipment, and facilities that could be used to supplement State and local resources used in emergency response operations.

—Procurement and allocation of material resources, physical facilities, transportation equipment and maintenance, communication resources, and living facilities/food for Federal response workers and personnel needed to support the emergency response operations of the Federal Government.

—Provide contracting services for use of other Federal agency response organizations performing functions that require contracting out.

—Establish Federal staging area for receipt of Federal response workers, supplies, and equipment.

12. Mortuary Services and Identification of the Dead (ESF 12):

A. Assignments

Primary: Department of Health and Human Services.

Support: Department of Defense, Department of Justice, Federal Emergency Management Agency, General Services Administration, Veterans Administration.

B. Description of Function

—Transporatation, embalming, and temporary storage of human remains recovered during search and rescue efforts and emergency medical care.

—Support to State and local authorities in identification of the dead.

—Support of State and local authorities in general recovery of human remains.

13. Welfare Inquiries (ESF 13):

A. Assignments

Primary: American Red Cross.

Support: Department of Commerce, Department of Health and Human Services, Department of Justice, Federal Emergency Management Agency, General Services Administration, U.S. Postal Service.

B. Description of Function

—Process inquiries from relatives and others concerning health and welfare of disaster victims.

14. Technical Assistance (ESF 14):

A. Assignments

Primary: Federal Emergency Management Agency.

Support: Department of Agriculture, Department of Commerce, Department of Defense, Department of Energy, Department of Health and Human Services, Department of Interior, Department of Labor, Department of Transportation, Corps of Engineers, Environmental Protection Agency, National Communications System, Nuclear Regulatory Commission, Veterans Administration.

B. Description of Function

Serve as a point of contact for the Federal, State and local governments to receive technical assistance and operational support in the:

Identification, cleanup, and disposal of hazardous materials.

Identification of secondary hazards such as dam failure and other effects that threaten health and safety, and recommend actions to cancel the threat.

Disposal of spoiled food stuffs.

Provision of information on possible frequency, severity, and effects of aftershocks.

Identification of ground failures and evaluation of potential hazards from additional ground failures.

Provision of technical assistance to all of the emergency support functional areas during the Federal response to the event.

15. Coordination of Federal Response (ESF 15):

A. Assignments

Primary: Federal Emergency Management Agency.

Support: Department of Agriculture, Department of Commerce, Department of Defense, Department of Education, Department of Energy, Department of Health and Human Services, Department of the Interior, Department of Justice, Department of Labor, Department of Transportation, American Red Cross, Corps of Engineers, Environmental Protection Agency, Federal Communications Commission, General Services Administration, Interstate Commerce Commission, National Aeronautics and Space Administration, National Communications System, Nuclear Regulatory Commission, U.S. Postal Service, Veterans Administration.

B. Description of Function

—Initial appraisal of the types of Federal assistance needed. Complete overall damage assessment report.
—Plans and procedures for the management of the systems needed to facilitate the coordination of Federal assistance including establishment of field office(s) at the disaster site.
—Coordination of Federal agency emergency relief efforts with those of the State and affected local governments.
—Coordination of national volunteer agency disaster relief activities.
—Provide emergency information to decisionmakers responsible for the management of the Federal response.
—Establish emergency support teams to be deployed to the disaster site.
—Coordination of Federal public information to assure that the response and recovery effort is described comprehensively, consistently, and accurately.
—Coordination of requirements of special interest groups, such as congressional staffs and scientific research teams.
—Input to release of information by State and local officials advising the public of actions to take to insure their safety.

V. Relationship of Planning Effort to Site-Specific Regional Plans

This national planning effort is intended to establish the policies and procedures that should be applied throughout the Federal establishment in development of a national Federal emergency response plan to a catastrophic earthquake. At present, there have been developed three site-specific plans under the leadership of FEMA Regions VIII, IX, and X. Other Federal agencies have been involved to one degree or another in these ongoing efforts. In some cases, functional assignments and other relationships may differ from the assignments and relationships addressed in this notice. This should be recognized as the planning process continues and flexibility allowed to recognize constraints that are unique to a particular geographic risk area. These situations will be handled on a case-by-case basis with the goal of keeping the national plan as uniform as possible.

Planning and related issues, concerns, and problems that have been identified in the development of the existing site-specific plans should now become not only the responsibility of the FEMA regional staffs, and other Federal regional or field offices, but also the concerns of the headquarters level in such respective Federal agency.

VI. Schedule for Plan Development and Exercises

Realizing that extensive effort will be required to develop a plan to provide support for life-saving, life-protecting functions, the following schedule for plan development and testing has been established based on realistic expectations. The schedule covers a two-year timeframe which projects initiation of the planning in March 1983—upon notification of the requirement in the Federal Register—and continues through full-scale exercise of the plan in April 1985. The schedule as established will also satisfy the requirements of the assignments in the National Plan of Action for Emergency Mobilization, which requires development and exercise of a national response plan.

Other Federal government planning and exercising requirements have been taken into consideration as known at the time the schedule was developed. Although there may be adjustments necessary in the schedule to accomplish a well developed and coordinated plan, it should serve as a guide for accomplishments. The Subcommittee on Federal Earthquake Response Planning will consider adjustments and resolve conflicts with other priority requirements as they occur.

SCHEDULE FOR PLANS DEVELOPMENT AND EXERCISES

Responsible	Product/activity	Timeframe
FEMA, all Agencies.	Begin preparation of draft emergency support functional annexes.	Mar. 1983.
FEMA, all Agencies.	Complete first draft of emergency support functional annexes.	Oct. 1983.
FEMA, Subcommittee.	Complete review of 1st draft basic plan/functional annexes for coverage of responsibilities/interfaces.	Nov. 1983.
FEMA, Subcommittee.	Initiate development of headquarters feasibility exercise.	Nov. 1983.
FEMA, Subcommittee.	Complete revised, final draft of basic plan and functional annexes.	Jan. 1984.
FEMA, Subcommittee.	Draft executive summaries of emergency support functional annexes.	Feb. 1984.
FEMA	Incorporate planning guidance, basic plan, functional annex executive summaries into Part I of comprehensive Federal emergency response plan.	Feb. 1984.
FEMA	Incorporate basic plan and complete version of supporting annexes into Part II of comprehensive National Federal emergency response plan.	Mar. 1984.
FEMA, all Agencies.	Conduct headquarters feasibility exercise.	May 1984.
FEMA	Complete after-action report	June 1984.
FEMA, all Agencies.	Revise Parts I & II of Comprehensive plan to incorporate improvements identified by exercise.	Aug. 1984.
FEMA, Subcommittee.	Initiate development of headquarters/field feasibility exercise of comprehensive plan and California site-specific plan.	Aug. 1984.
FEMA, all Agencies.	Conduct headquarters/field feasibility exercise.	Apr. 1985.

VII. General and Administrative Guidance

Through the efforts of the Subcommittee on Federal Earthquake Response Planning, a planning guide was developed from which this notice has been extracted. FEMA intends to publish and maintain the planning guide for plan development. It will be provided to the agencies involved in the planning process and will be changed and updated as necessary to insure that the most complete and current information is available to those involved in development of Federal plans.

Included in the planning guide will be a proposed format for the national Federal plan and the supporting functional annexes. As developed, guidance will also be provided on the administrative processes involved in the planning, mechanisms established for liaison between agencies, administrative support and information requirements, and guidelines for plan accomplishment, revisions, and review.

Approved for the Federal Emergency Management Agency.

Dated: February 25, 1983.

Leo M. Thomas,

Executive Deputy Director.

DEPARTMENT OF LABOR

Mine Safety and Health Administration

30 CFR Part 37

Alternate Product Approval Procedure

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice of availability of preproposal draft.

SUMMARY: The Mine Safety and Health Administration (MSHA) has developed a preproposal draft of a new Part 37, Alternate Product Approval Procedure. The proposal would provide an expedited application procedure for manufacturers of mining equipment which have certain design characteristics and features. MSHA seeks comments on the preproposal draft from all interested parties. Copies of the draft may be obtained by contacting the Agency.

DATES: Comments must be received by May 3, 1983.

ADDRESSES: Send comments to the Office of Standards, Regulations, and Variances, MSHA, Room 631, Ballston Towers #3, 4015 Wilson Boulevard, Arlington, Virginia 22203.

FOR FURTHER INFORMATION CONTACT: Patricia W. Silvey, Acting Director, Office of Standards, Regulations, and Variances, MSHA (703) 235–1910.

SUPPLEMENTARY INFORMATION: Under the Federal Mine Safety and Health Act of 1977 (Pub. L. 91–173 as amended by Pub. L. 95–164), MSHA is required to approve certain products for use in underground mines. MSHA's current regulations in 30 CFR Parts 15 through 36 govern the process through which manufacturers may obtain MSHA approval of a product for use underground. The alternate procedure contained in the preproposal draft would permit applicants to certify that the technical requirements specified for the product by MSHA have been met. This procedure would permit applicants or independent laboratories to conduct the necessary testing. Applicants' use of the proposed procedure would also involve testing the product according to test procedures specified by MSHA, implementing a quality control procedure accepted by MSHA, consent to MSHA quality control audits at the factory, and random "off the shelf" product examinations conducted by MSHA. This new procedure would be an alternative to the existing application procedures, which manufacturers could continue to use if they so choose.

To implement the alternate procedure, MSHA, would develop appendices to Part 37 for products which require MSHA approval. These appendices would specify the design characteristics and features a product would be required to have in order to be considered under the proposed alternate procedure. Concurrent with the development of this proposal, MSHA has developed a draft appendix consistent with Part 22 for portable, battery-powered, intrinsically safe methane-indicating detectors. The draft appendix is included with the preproposal draft of Part 37 so that commenters may see the relationship of proposed Part 37 and an appendix. The draft appendix, however, is not the subject of this rulemaking.

Copies of the preproposal draft of Part 37 and the draft appendix have been mailed to persons and organizations who have expressed an interest in this rulemaking. All other interested persons and organizations may obtain copies of the documents by submitting a request to the address provided above.

Dated: March 1, 1983.

Ford B. Ford,

Assistant Secretary for Mine Safety and Health.

Part VII

Department of the Interior

Office of Surface Mining Reclamation and Enforcement

Surface Coal Mining and Reclamation Operations; Permanent Regulatory Program Experimental Practices; Final Rule

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 785

Surface Coal Mining and Reclamation Operations; Permanent Regulatory Program Experimental Practices

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Final rule.

SUMMARY: The final rule adopted by the Office of Surface Mining Reclamation and Enforcement (OSM) for experimental practices will provide that an operator may obtain a variance from the environmental protection performance standards of Subchapter K of the permanent program regulations for an experimental practice after submitting an application which contains the information asked for by the rule, complying with the public notice requirements of Subchapter G of the permanent program regulations and receiving approval from the regulatory authority based on certain findings set out in the rule and concurrence from the Director of OSM.

Section 711 of the Surface Mining Control and Reclamation Act of 1977 (Act), provides authorization for variances in individual cases on an experimental basis from the environmental protection performance standards promulgated under Sections 515 and 516 of the Act. The objective of such departures, as authorized by the regulatory authority with the concurrence of the Director, is to encourage advances in mining and reclamation practices or to allow alternative postmining land uses.

EFFECTIVE DATE: April 4, 1983.

FOR FURTHER INFORMATION CONTACT: Raymond E. Aufmuth, Division of Engineering Analysis, Office of Surface Mining, U.S. Department of the Interior, 1951 Constitution Avenue, NW., Washington, D.C. 20240; 202–343–5245.

SUPPLEMENTARY INFORMATION:

I. Background.
II. Discussion of Comments and Rule Adopted.
III. Procedural Matters.

I. Background

Section 711 of the Surface Mining Control and Reclamation Act of 1977 (Act), 30 U.S.C. 1201 *et seq.*, provides authorization for variances in individual cases on an experimental basis from the environmental protection performance standards promulgated under Sections 515 and 516 of the Act. The objective of such departures, as authorized by the regulatory authority with the concurrence of the Director, is to encourage advances in mining and reclamation practices or to allow alternative postmining land uses.

OSM encourages industry and State regulatory authority participation in the experimental practices program. OSM is willing to work with industry and State regulatory authorities to develop innovative and beneficial experimental practice proposals.

On March 19, 1982 (47 FR 12082), OSM proposed to amend 30 CFR 785.13 of the permanent program regulations in order to clarify certain subsections and to eliminate unnecessary requirements for operators. The proposal also called for consultation with the U.S. Department of Agriculture prior to approval of an experimental practice on prime farmlands in accordance with Section 510(d) of the Act and for simple notification of the regulatory authority by an operator prior to the implementation of minor revisions to an experimental practices permit. A public hearing was held on April 9, 1982. However, the proceeding was adjourned because no member of the public appeared to give oral testimony. The comment period remained open until August 25, 1982 and later was reopened from September 7, 1982 through September 10, 1982.

During the comment period, OSM received comments from 40 sources representing industry, trade associations, environmental groups, and Federal and State agencies. After analyzing the recommendations made by the various commenters, OSM has decided to adopt the rule as proposed with certain modifications which are set out below.

II. Discussion of Comments and Rule Adopted

A. Section 785.13(a) General Requirements

In response to comments, this paragraph has been revised by including language to clarify that an experimental practice variance is part of an approved surface coal mining and reclamation operation permit or permit revision and that it may be for experimental or research purposes, or to allow an alternative postmining land use. In addition, language has been inserted stating that the approved permit or permit revision must meet the requirements of Subchapter G of 30 CFR Chapter VII. In the proposal this reference appeared in § 785.13(b) which deals with the special information operators must provide in their applications for an experimental practice variance. However, the processing and application requirements of Subchapter G apply to the entire section and therefore reference to them has been placed in the more appropriate provision.

Several commenters expressed concern that issuance of an experimental practice permit would only be possible during the initial application process for a surface mining and reclamation operation permit. OSM believes that an application for an experimental practice may be submitted at any time during the life of a mining operation. The experimental practice application may be made when submitting the original permit application or, at a later time, as a permit revision application.

A commenter felt that the proposed rule was not consistent with the Congressional intent for Section 711 of the Act and that OSM was mistaken if it assumed that the goal of the provision was to obtain economic advantages for operators. Instead, the commenter saw the goal of Section 711 as improving environmental protection over the standards of Sections 515 and 516.

The language of the provision clearly states that the variances are to be approved in order to encourage advances in technology or to allow alternative postmining land uses. However, such approvals may not be given unless certain conditions are met. Therefore, while an experimental practice could lead to improvements in environmental protection, it could also result in a technological improvement. In both cases, in order to be approved, the experimental practice must be potentially more or at least as environmentally protective as the environmental protection performance standards which were promulgated pursuant to Sections 515 and 516 of the Act and from which a variance is being sought.

Several commenters objected to language in the proposal which suggested that the variances would be from performance standards of the Act. OSM has rejected this comment. The performance standards of Subchapter K of 30 CFR Chapter VII are merely an extension of the standards of Sections 515 and 516 of the Act. Thus, to provide a variance from these standards it is also necessary to recognize that the variance could also be to the standards of the Act. The legislative history of this provision demonstrates that Congress contemplated that the experimental practices section would be used in just such a manner. The revised rule does not change the meaning of the

regulations, but merely clarifies it. (See 44 FR 15080, March 13, 1979.) Section 711 of the Act provides for departures from any of the environmental protection performance standards "promulgated under" Sections 515 and 516 of the Act. The departures, thus, may be granted to any rules that are published pursuant to the authorities of Sections 515 and 516 and which include the requirements set out in those sections.

One commenter suggested that experimental practices should be separated from "regulatory variances" because they imply the use of unproven techniques which involve a degree of risk and significant returns if successful. OSM recognizes that frequently cost savings and other benefits can be realized by new practices without obtaining a variance from the performance standards as provided in the experimental practice rule. It is only when a variance from the regulatory standards is necessary that the special approval granted under this rule is required.

B. *Section 785.13(b) Application Requirements*

Section 785.13(b) sets forth information that shall be provided by an operator in a permit application for an experimental practice. Among other things, this information shall include a description of the variances from performance standards that are being requested, show how use of the practice will encourage advances in mining or reclamation technology or allow alternative postmining land uses on an experimental basis, provide assurances that the practice is potentially more or at least as environmentally protective as required under Subchapter K and set out the monitoring efforts which the operator shall undertake. In the case of the monitoring efforts, the data collected shall be reliable and sufficient to enable the regulatory authority and OSM to evaluate the effectiveness of the experimental practice and to identify at the earliest possible time potential risk to the environment and public health and safety which may be caused by the experimental practice.

One commenter recommended retaining § 785.13(b) of the previous rule as being the only language seeking to encourage the use of experimental practices. OSM has not included this paragraph in the final rule because it is unnecessary. However, § 785.13(a) has been revised to state the purposes of experimental practices.

Two commenters believed that any provisions in the rule which went beyond the requirements of Section 711 of the Act should be deleted. These comments are rejected. Section 201(c)(2) of the Act provides the Secretary with authority to promulgate such rules and regulations as may be necessary to carry out its purpose. 30 U.S.C. 1211(c)(2). As the District Court found in *In re: Permanent Surface Mining Reclamation Litigation,* Civ. No. 79–1144, Slip op. at 5–8 (D.D.C. February 26, 1980), "An agency's regulations may cover items not specifically delineated in a statute so long as the regulations conform to an Act's purposes and policies." In promulgating this rule, OSM believes that the requirements of § 785.13 are appropriate to carry out the purposes of Section 711 specifically, and the Act in general.

Several commenters were confused as to whether the rule would require a separate experimental practice permit application or whether the request would be part of the surface mining operation permit application. OSM believes that the information required for approval of an experimental practice is in addition to that required for a surface coal mining and reclamation operation permit application. This imformation can be submitted with the general permit application or separately as a revision to the permit. OSM considers that the language changes which were made to § 785.13(a), and discussed above, are sufficient to clarify the relationship of an experimental practice variance to the general permit for the operation.

Several commenters stated that under the Act both the permit applicant and regulatory authority have the responsibility to assure that an approved practice is not larger or more numerous than necessary to determine its effectiveness and economic feasibility. The commenter disagreed with OSM's proposal not to require an operator to demonstrate in its permit application that the proposed variances are not larger or more numerous than necessary to determine its effectiveness and economic feasibility. The commenter believed that it was incumbent upon the operator, who had the data and self-interest in expanding the scope or duration of the variance, to establish the need for the magnitude and scope of the proposal. The commenter also believed that there must come a point when the regulatory authority would conclude that sufficient experimentation had taken place on a new technology or alternative postmining land use so that additional experimentation would not be permissible under the Act. By contrast, another commenter recommended deleting as redundant the proposed § 785.13(d)(3) finding by the regulatory authority concerning the size and number of the experimental practices.

OSM rejects both of these recommendations. OSM believes the Act requires the regulatory authority to make a specific finding as to the size and number of the experimental practice to determine its effectiveness and economic feasibility. Under this final rule, the regulatory authority and the Director must evaluate the proposed experimental practice to make the necessary findings. Information necessary to determine that the experimental practice is not larger or more numerous than necessary will generally be readily available to the regulatory authority.

One commenter endorsed the elaboration of information to be provided by the applicant concerning the nature of the proposed experimental practice. The commenter recommended revising proposed § 785.13(b)(1) to read "a description of the performance standards for which variances are requested." This change has been adopted.

One commenter was concerned that OSM's reference in § 785.13(b)(2) and (d)(1) in the proposal to "postmining land use" as a possible experimental practice could be interpreted to mean that whenever an operator proposed an alternative postmining land use in its surface mining permit application, such would have to be couched as an experimental practice. The commenter's fear is unfounded. An operator need apply for an experimental practice only when it is necessary to obtain a variance from the environmental protection performance standards.

Two commenters objected to the deletion of an application requirement showing the necessity for obtaining a variance from the performance standards. According to one of the commenters, without such a showing experimental practices could become a way to circumvent the requirements of not only Sections 515(b)(2) and 515(c) of the Act, but also those of Section 511 relating to procedures for surface mining permit revisions.

For two reasons OSM has not required information as to whether the ends sought through the experimental practice could not be otherwise attained under the regulatory program. First, OSM believes that the intent of Section 711 is to encourage advances in technology and alternative postmining land uses. Thus, even if an end product could be obtained through the existing regulatory program, improved procedures for attaining that goal could possibly also be developed through the

experimental practices program. Second, OSM is of the opinion that during review by the regulatory authorities and the Director, those experimental practices which should not be approved because they are larger or more numerous than necessary or do not meet the other criteria will be identified. Finally, OSM considers that the language of the final rule makes it clear that the permit revision requirements of Section 511 of the Act and Subchapter G of 30 CFR Chapter VII apply to experimental practices.

Two commenters recommended including "economic advantage" among the purposes for conducting experimental practices noted in § 785.13(b)(2) and (d)(1). In support of their recommendation, the commenters cited language from the preamble of the proposed rule which said that experimental practices could lead to economic benefits.

OSM has not adopted this suggestion because the two advantages listed in the rule are in keeping with those provided for in Section 711 of the Act. However, OSM believes to the extent such information aids in showing that the proposed practice encourages technological advances in mining, an operator may supplement his permit application with information demonstrating the economic benefits of the proposal.

One commenter objected to the monitoring requirement which would enable the regulatory authority and the Director to evaluate the effectiveness of the practice. The commenter believed that this was not required by the Act, that it would be extremely expensive and that the same purpose could be accomplished by other monitoring requirements. The recommendation to delete this requirement is rejected because OSM thinks that such data will enable the regulatory authority and the Director to evaluate the effectiveness of an experimental practice for purposes of allowing further experimental practices and possibly changing existing regulatory standards and is also needed to identify potential risks to the environment. Furthermore, the monitoring requirements provided under other rules may not be sufficient for activities covered by this rule. Since an experimental practice is conducted pursuant to a variance from promulgated performance standards, it must be more closely observed than standard mining practices. As for any additional expenses incurred due to monitoring, OSM believes that these may well be offset by economic advantages obtained as a result of successful experimental practices. Finally, OSM considers it has sufficient authority under the Act to require the monitoring data.

Two commenters recommended deleting language in proposed § 785.13(b)(4) referring to monitoring "during and after the operation involved." Instead, they thought that the regulatory authority should set the monitoring requirement in the experimental practice permit. The commenters wished to do away with open-ended monitoring requirements after the experimental practice was completed.

OSM rejects this suggestion in part because the degree of monitoring being specified follows the Act which provides for the experimental practice potentially to be "more or at least as environmentally protective, *during and after* mining operations" [emphasis added] as the promulgated performance standards. In order to ensure that this mandate is followed, a monitoring program both before and after the operation may be necessary. However, OSM agrees that the extent and scope of required monitoring should be determined and established in the experimental practices permit. For this reason the language has been revised by not adopting the proposed phrase "during and after the operation involved" in the first sentence of § 785.13(b)(4). Instead, the phrase "during and after mining" has been added to § 785.13(b)(4)(ii). This will assure that postmining monitoring need only be conducted if necessary to identify the risk to the environment and public health and safety during and after mining. Whether monitoring after mining may be required to meet this objective can be determined within the context of the individual experimental practices permit.

One commenter thought that the proposed language in § 785.13(b)(4)(i) would create a major loophole to compliance with the performance standards by deleting the previous requirement for a monitoring program to evaluate and compare experimental practices. Another commenter believed the proposal was in direct conflict with the Section 711 limitation on experimental practices to be "not larger or more numerous than necessary" to determine their effectiveness and economic feasibility. According to that commenter, unless the monitoring data were given in a form to enable comparison with other experimental practices, the regulatory authority or Director might approve practices more numerous than necessary or approve one already shown to be ineffective or infeasible.

OSM rejects these comments because the regulatory authority and the Director will have sufficient information from the experimental practice permit application to evaluate a given experimental practice on its own merit as well as in comparison with other similar experiments. Under this provision, reviewers are provided with data as to the effectiveness of the practice. Likewise, under § 785.13(b)(1), all performance standards for which variances are requested are identified, thus providing reviewers with a basis for comparison if and when necessary.

Several commenters opposed the proposed rule's requirement for operators to provide information in the permit application concerning the mitigative measures which would be taken in the event the experimental practice failed to meet its objectives. This was unacceptable to the commenters because they believed that experimental practices must be limited to situations where the worst case situation will not fall below the Subchapter K standards in environmental and public health and safety protection.

OSM has reviewed the legislative history for Section 711 and does not agree that experimental practices need be evaluated based upon the worst case possible if the practices were to fail. OSM believes the commenter's position is internally inconsistent. On the one hand it asserts that mitigative measures are inappropriate because the Subchapter K performance standards are minimum criteria which the operation must meet even under the worst possible circumstances if the experimental practice fails. On the other hand, the commenter recognizes that, in fact, an experimental practice may carry with it a risk of failure in which the Subchapter K performance standards cannot be met. In such a situation, the commenter urges that mitigative measures are insufficient because affirmative remedial measures are required. OSM is of the opinion that an experimental practice is exactly that, "experimental," and carries with it a certain level of uncertainty of success. However, OSM agrees with the commenters that, if additional measures are required to make the findings under § 785.13(d) (2) and (4) that the experimental practice is potentially more or at least as environmentally protective as the standards of Subchapter K and that equivalent protection is afforded the public health and safety, then the regulatory authority

and the Director have the responsibility to require under § 785.13(f), that such measures be incorporated in the experimental practice. Accordingly, the proposed requirement to specifically identify mitigative measures in the experimental practice application has not been adopted in the final rule.

C. *Section 785.13(c) Public Notice*

Under this paragraph an operator and the regulatory authority shall comply with the public notice requirements of proposed 30 CFR 773.13, as set forth in Volume III of OSM's "Final Environmental Impact Statement OSM–EIS–1: Supplement." (The use of proposed sections is discussed under "Procedural Matters.") This means that specific reference to a proposed experimental practice shall appear in the newspaper advertisement and in the notificaion to Federal, State and local government agencies with jurisdiction over or an interest in the proposed operation that are required by proposed § 773.13.

One commenter questioned requiring a newspaper advertisement in all cases when experimental practices permit applications are made. The commenter believed there were times when the proposed experimental practice would not change the surface mining permit at all. OSM rejects this comment because, at a minimum, an experimental practice will result in a variance from the applicable performance standards.

Another commenter was concerned that, as proposed, § 785.13(c) applied only to initial permit applications, and, therefore, permit revisions would not be subject to the same degree of public notice and participation. The commenter thought that the requirements of 30 CFR 786.11 applied only to initial permit applications.

The commenter is referred to 30 CFR 788.12(b)(2) which stated that *significant* alterations to a permit had to meet the same notice requirements as the initial application. Under the preferred alternative in Volume III of "Final Environmental Impact Statement OSM EIS–1: Supplement" for permit revisions, OSM would retain this requirement. See proposed 30 CFR 774.13 as set forth in OSM EIS–1: Supplement.

D. *Section 785.13(d) Approval Requirements*

Section 785.13(d) requires the regulatory authority to find in writing that the proposed experimental practice will encourage advances in technology or allow an alternative postmining land use; is potentially more or at least as environmentally protective during and after mining operations as the promulgated standards of Subchapter K; is not larger or its operations more numerous than necessary to determine its effectiveness and economic feasibility; and does not reduce the protection afforded public health and safety below that provided by standards promulgated under Subchapter K. Once the regulatory authority has made its findings, the Director will review them along with the permit application to reach a decision on concurrence.

Several commenters were concerned that there would be delays in the issuance of approvals for experimental practices due to confusion over the order of review between the regulatory authority and the Director. Others wanted it clear that the State regulatory authorities had the lead in initially reviewing and determining the merits of a proposal. In order to lessen the possibility of delay in approvals or confusion about the order of review, OSM has written the final rule so that it is clear that the Director will not concur in an application until after the regulatory authority has made its specific findings.

One commenter recommended that the rule should provide explicit recognition that the statutory principle of "* * * better than or equivalent environmental protection * * *" contemplates a balancing of various environmental effects and standards with emphasis on the final product. OSM believes that no revision to the rule is necessary. The level of environmental protection provided by each experimental practice must be compared to the minimum level of environmental protection provided under the regulatory standards of Subchapter K. No change is necessary to provide emphasis in the final product.

One commenter objected to the deletion in the proposed rule of the requirement conditioning approval of an experimental practice upon the imposition of enforceable alternative environmental protection performance standards in the event the specific variance is departed from or the experiment fails. The same commenter, however, objected to the provision requiring the operator to include potential mitigative measures in the permit application for the experimental practice. As indicated above, OSM has deleted both provisions from the final rule. As revised, the standard for approval of the experimental practice will be the statutory standard. Potential mitigative measures may be included in the experimental practice approval as appropriate and considered by the regulatory authority and the Director in evaluating whether the statutory standard is met. Regardless of whether mitigative measures are prescribed in advance, if a failure of the experimental practice leads to a degradation of the environment, the Director and the regulatory authority will have the responsibility to order measures to ensure protection of the environment and public health and safety.

The same commenter thought that the revised language in § 785.13(d)(4) was vague regarding the "promulgated standards" below which the experimental practice could not fall with respect to health, safety and environmental protection.

The commenter believed that specific references to standards required by Subchapter K and the regulatory authority's program should be included. OSM has accepted the commenter's suggestion with respect to Subchapter K and has revised paragraph (d)(4) accordingly. OSM has not, however, included reference to the standards of the regulatory program, since a State, under Section 505 of the Act, may include standards more stringent than the standards of Subchapter K. Departures from such requirements only require an experimental practice permit when they would also result in a variance to the Subchapter K standards.

E. Section 785.13(e) Consultation With USDA

Section 785.13(e) requires consultation with the U.S. Department of Agriculture, Soil Conservation Service (SCS), prior to granting variances from the special environmental performance standards for prime farmlands in keeping with the provisions of Section 510(d)(1) of the Act. Under 30 CFR 785.17, the Secretary of Agriculture has assigned these responsibilities to the SCS.

One commenter endorsed this provision provided that no deviation from the prime farmlands productivity requirements would be allowed. OSM agrees that Section 711 of the Act allows variances only from the environmental protection performance standards established by Sections 515 and 516 of the Act. Thus an experimental practice can be approved which provides a variance from the prime farmland soil reconstruction standards of Section 515(b)(7) of the Act. However, variances are not allowed from the productivity standards established separately under Sections 510(d) and 519(c)(2) of the Act. A conforming reference to Sections 515 and 516 of the Act has been included in § 785.13(e).

Another commenter recommended deleting the new requirement as duplicative of requirements found at 30

CFR 785.17 for prime farmlands. This comment is rejected. Section 785.17 deals with permit requirements for prime farmlands and does not cover the variances from performance standards allowed by Section 711 of the Act.

F. Section 785.13(f) Monitoring/ Additional Requirements

Section 785.13(f) will require that anyone undertaking an approved experimental practice shall conduct the periodic monitoring, recording and reporting program set forth in the application as well as fulfill any additional steps the regulatory authority or the Director may require to ensure protection of the public health and safety and the environment.

One commenter recommended deleting proposed § 785.13(f) as being redundant with the monitoring requirements of paragraph 785.13(b)(4). OSM has rejected this suggestion because new § 785.13(f) serves a different purpose than the referenced paragraph. Section 785.13(b)(4) concerns information which an operation must provide in an application for an experimental practice. On the other hand, § 785.13(f) indicates that the operator shall perform monitoring activities as well as any other requirements the regulatory authority or the Director may specify. OSM has adopted the word change recommended by another commenter in order to make it clear that the paragraph involves two distinct requirements.

G. Section 785.13 (g) and (h) Permit Review/Revision Requirements

Proposed §§ 785.13 (g)(1) and (g)(2) are adopted as new §§ 785.13 (g) and (h). Section 785.13(g) will require each experimental practice to be reviewed by the regulatory authority at a frequency set forth in the approved permit, but no less than every two and a half years. Two and a half years will generally correspond to the midterm of the permit. After any such review, the regulatory authority may require modifications of the practice which are necessary to ensure that the operation fully protects the environment and public health and safety. OSM has made clear that the administrative and judicial review provisions attendant to permits also apply to modifications of experimental practices. Under § 785.13(h), in the event an operator wishes to revise an approved experimental practice, it will be necessary first to submit an application for a permit revision subject to the requirements of Subchapter G.

One commenter argued that there was no statutory authority justifying the proposed yearly review of experimental practices. While OSM has modified its review proposal as described above, it rejects the general assertion that establishing a review procedure is somehow outside the scope of its authority. The Act provides OSM with ample authority to promulgate those rules it believes are necessary to carry out the purposes of the Act.

Several commenters objected to the proposed annual review of each experimental practice. Some felt that the data accumulated from one year could be inadequate to determine the effectiveness of the practice. Also, they thought that the frequent review with possibilities for unlimited modification by the regulatory authority could act as a disincentive to participation in the program and could be unnecessarily burdensome to the regulatory authority as well. The commenters recommended having the review period determined by the regulatory authority on a case-by-case basis so as to take into account the specific nature and location of the practice and the parties involved. Some commenters thought it was better not to have the review set by an arbitrary schedule. They believed that State regulatory authorities wishing to have more frequent reviews would be able to establish this in their State programs. OSM agrees with the thrust of these comments and has written the final rule so that the review period shall be set by the regulatory authority in the approved permit, but shall be no less frequent than every two and one half years. OSM believes this provision will give the regulatory authorities sufficient flexibility to establish an appropriate review process without creating unnecessary burden.

Another commenter objected to the proposed rule because he felt the review should be of the entire permit and not just the experimental "practice." The commenter was also concerned that citizen participation was being deleted. OSM considers § 785.13(g) to include review of the experimental practices and any directly related provisions of the permit. The regulatory authority need not review unrelated aspects of the permit at the same time. Review of other aspects of the entire permit is governed by 30 CFR 788.11. (See also proposed 30 CFR 774.11 as set forth in OSM EIS–1: Supplement.) OSM has also revised paragraph 785.13(g) to assure public participation when modifications occur in accordance with the administrative and judicial review provisions of proposed 30 CFR Part 775, as set forth in OSM EIS–1: Supplement.

One State commenter found the language of proposed § 785.13(g) (1) and (2) to be inconsistent. The commenter thought it was necessary to have language in each paragraph making it clear that it is necessary to obtain the approval of the regulatory authority for any permit modifications. OSM agrees with the observation of the commenter and has rewritten both paragraphs accordingly.

In the proposed rule, OSM distinguished between major and minor revisions to the experimental practice approval. Under proposed § 785.13(g)(2), prior to the implementation of a minor revision, an operator would have only needed to provide the regulatory authority with written notice. In the case of a major revision, approval by the regulatory authority and the Director would have been necessary before implementation. Much discussion with respect to the major/minor dichotomy and who should retain responsibility for approval was generated as a result of OSM's proposal.

Two commenters wanted the term "major" and "minor" revisions to be defined. Others thought that simple notice to the regulatory authority in all cases was sufficient. A third commenter believed that while the regulatory authority should retain control over major revisions, the full permitting process should not be necessary. One State commenter preferred to see the regulatory authority provide written approval. Another State commenter wanted the role of the Director to be limited in the approval process. A different State wished to require regulatory authority approval in all instances. Two commenters thought there should be a deadline within which a regulatory authority must act or be deemed to have approved the revision. Another commenter made the point that any revision to an experimental practice may be significant and, therefore, there was no basis for distinctions concerning the significance of revisions.

OSM has decided not to adopt the major/minor distinction. Instead the final rule, in § 785.13(h), requires processing and approval by the regulatory authority consistent with the provisions of the proposed new rule for permit revisions, § 774.13, as set forth in OSM EIS–1: Supplement. Revisions that propose significant alterations to the experimental practice must also be subject to notice, hearing and public participation requirements and concurrence by the Director. OSM believes this comports with Section 511(a)(2) of the Act requiring that revisions which propose significant alterations in the permit be subject to notice and hearing requirements. Non-significant revisions may be handled

more expeditiously. Under Subchapter G, such applications must be processed within a reasonable time. However, no specific time limit has been included in the final rule.

H. Miscellaneous Recommendations

One commenter recommended several new provisions. One of these would require a regulatory authority to designate contact persons on its technical staff for monitoring experimental practices who would be immediately notified by an operator in the event problems developed in the course of an experiment. The proposed provision would also authorize the issuance of a notice of violation only if an experimental practice plan were not followed or if appropriate action as required by the regulatory authority were not taken.

OSM believes that regulatory authorities will set up appropriate contact arrangements and therefore specific directions to this effect are not warranted in this rulemaking. With respect to the issuance of notices of violation, the experimental practice variance becomes part of the surface mining permit and, if followed, would not lead to the issuance of a notice of violation or a cessation order with regard to those standards from which a variance was granted.

The same commenter proposed including provisions which would identify what constitutes a successful experimental practice; would require a regulatory authority to notify all operators in the State of a practice that was deemed successful; would permit the practice's use on a case-by-case basis; and would require the Director to circulate to the State regulatory authorities technical memoranda informing them of practices deemed to be successful.

OSM has not adopted any of these suggestions in this rulemaking, because it believes that whether an experimental practice is completely or partially successful will be apparent. As for how dissemination of the new information will be accomplished within a State, OSM believes that those decisions are within the prerogative of the regulatory authority. Since an experimental practice permit is issued to allow a variance from performance standards, it will be necessary to revise regulations before widespread use of a successful practice can occur. Merely circulating notices or technical memoranda would not be sufficient.

Several commenters raised questions about the bonding requirements that apply to experimental practices. One believed that small and medium sized operations had little inducement to provide an investigator with areas for experimental research, if those locations might not qualify for bond release as quickly as conventionally reclaimed areas. Moreover, the commenter felt that operators could not be required to rework failed experimental plots at added cost. To counter these perceived problems, the commenter suggested lessening the performance bond requirements for areas where experimentation was taking place and having the organization sponsoring the research assume some or all of the liability of any performance bond. A Federal agency suggested, as a way of promoting cooperation between research organizations and mine operators, providing early release from reclamation bonds for specific areas dedicated to reclamation research and demonstration of reclamation technology. The commenter thought that research areas would seldom encompass an entire permitted area, and therefore the incremental release could occur provided the area otherwise qualified for such status. At the recent oversight hearings of the House Subcommittee on Energy and the Environment, a mining industry spokesman testified that under the proposed rule there was at least one issue which remained an obstacle to enhancing reclamation technology. The witness said there was no statutory provision for establishing designated postmining land use research and demonstration areas on bonded surface mining lands. According to the spokesman, Section 711 was seen by the regulatory authorities as applying to alternative design work and engineering practices. Therefore, research groups (universities and government agencies) had to assume responsibility for the long term performance bonds. The witness recommended that Section 711 be expanded or a new provision enacted to encourage research groups and operators to participate in revegetation research.

Bonding amounts and length of liability are governed by Sections 509 and 519 of the Act and 30 CFR Parts 800–809. No provision is included in the Act for waiver of bonding requirements for experimental or research requirements. However, the bond amount can include consideration of the provisions of the experimental practice. As for whether Section 711 of the Act can be expanded to cover revegetation research not considered an experimental practice, such action is outside the scope of this rulemaking.

One commenter thought that simply preparing an environmental assessment on the experimental practice rulemaking did not meet the requirements of the National Environmental Policy Act of 1969, as amended (NEPA), 42 U.S.C. 4321 *et seq.*, or Section 702(d) of the Act.

The Office has prepared an environmental impact statement which analyzes the impacts on the quality of the human environment resulting from changes to the permanent program regulations.

III. Procedural Matters

For convenience, certain references in the final rule are to proposed section numbers that have not been finalized. If such sections are not adopted as proposed, conforming technical amendments will be issued.

Executive Order 12291 and the Regulatory Flexibility Act

The Department of the Interior has determined that this document is not a major rule under E.O. 12291 and certifies that this document will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*).

National Environmental Policy Act

OSM has analyzed the impacts of these final rules in the final Environmental Impact Statement OSM EIS–1: Supplement according to Section 102(2)(C) of the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4332(2)(C)). The final supplement is available in OSM's Administrative Record in Room 5315, 1100 L Street, NW., Washington, D.C., or by mailing a request to Mark Boster, Chief, Branch of Environmental Analysis, Room 134, Interior South Building, U.S. Department of the Interior, Washington, DC 20240. This preamble serves as the record of decision under NEPA. This final rule adopts the preferred alternative published in Volume III of the EIS which is analyzed in the EIS, with minor editorial changes.

Paperwork Reduction Act

The information collection requirements contained in § 785.13 have been approved by the Office of Management and Budget under 44 U.S.C. 3507 and assigned clearance number 1029–0040. The information is being collected by the regulatory authority in determining whether the applicant meets the applicable performance standards for experimental practices mining activities. This information will be used to give the regulatory authority a sufficient baseline upon which to assess the impact of the proposed

operation during the permanent regulatory program. The obligation to respond is mandatory.

List of Subjects in 30 CFR Part 785

Coal mining, Environmental protection, Reporting and recordkeeping requirements, Surface mining.

For the reasons set forth in the preamble, Part 785 of Chapter VII, Title 30, of the Code of Federal Regulations is amended as set forth herein.

Dated: February 28, 1983.

William P. Pendley,

Acting Assistant Secretary, Energy and Minerals.

PART 785—REQUIREMENTS FOR PERMITS FOR SPECIAL CATEGORIES OF MINING

1. Section 785.13 is revised to read as follows:

§ 785.13 Experimental practices mining.

(a) Experimental practices provide a variance from environmental protection performance standards of the Act, of Subchapter K of this chapter, and the regulatory program for experimental or research purposes, or to allow an alternative postmining land use, and may be undertaken if they are approved by the regulatory authority and the Director and if they are incorporated in a permit or permit revision issued in accordance with the requirements of Subchapter G of this chapter.

(b) An application for an experimental practice shall contain descriptions, maps, plans, and data which show—

(1) The nature of the experimental practice, including a description of the performance standards for which variances are requested, the duration of the experimental practice, and any special monitoring which will be conducted;

(2) How use of the experimental practice encourages advances in mining and reclamation technology or allows a postmining land use for industrial, commercial, residential, or public use (including recreation facilities) on an experimental basis;

(3) That the experimental practice—

(i) Is potentially more, or at least as, environmentally protective, during and after mining operations, as would otherwise be required by standards promulgated under Subchapter K of this chapter; and

(ii) Will not reduce the protection afforded public health and safety below that provided by the requirements of Subchapter K of this chapter; and

(4) That the applicant will conduct monitoring of the effects of the experimental practice. The monitoring program shall ensure the collection, analysis, and reporting of reliable data that are sufficient to enable the regulatory authority and the Director to—

(i) Evaluate the effectiveness of the experimental practice; and

(ii) Identify, at the earliest possible time, potential risk to the environment and public health and safety which may be caused by the experimental practice during and after mining.

(c) Applications for experimental practices shall comply with the public notice requirements of § 773.13 of this chapter.

(d) No application for an experimental practice under this section shall be approved until the regulatory authority first finds in writing and the Director then concurs that—

(1) The experimental practice encourages advances in mining and reclamation technology or allows a postmining land use for industrial, commercial, residential, or public use (including recreational facilities) on an experimental basis;

(2) The experimental practice is potentially more, or at least as, environmentally protective, during and after mining operations, as would otherwise be required by standards promulgated under Subchapter K of this chapter;

(3) The mining operations approved for a particular land-use or other purpose are not larger or more numerous than necessary to determine the effectiveness and economic feasibility of the experimental practice; and

(4) The experimental practice does not reduce the protection afforded public health and safety below that provided by standards promulgated under Subchapter K of this chapter.

(e) Experimental practices granting variances from the special environmental protection performance standards of Sections 515 and 516 of the Act applicable to prime farmlands shall be approved only after consultation with the U.S. Department of Agriculture, Soil Conservation Service.

(f) Each person undertaking an experimental practice shall conduct the periodic monitoring, recording and reporting program set forth in the application, and shall satisfy such additional requirements as the regulatory authority or the Director may impose to ensure protection of the public health and safety and the environment.

(g) Each experimental practice shall be reviewed by the regulatory authority at a frequeny set forth in the approved permit, but no less frequently than every 2½ years. After review, the regulatory authority may require such reasonable modifications of the experimental practice as are necessary to ensure that the activities fully protect the environment and the public health and safety. Copies of the decision of the regulatory authority shall be sent to the permittee and shall be subject to the provisions for administrative and judicial review of Part 775 of this chapter.

(h) Revisions or modifications to an experimental practice shall be processed in accordance with the requirements of § 774.13 of this chapter and approved by the regulatory authority. Any revisions which propose significant alterations in the experimental practice shall, at a minimum, be subject to notice, hearing, and public participation requirements of § 773.13 of this chapter and concurrence by the Director.

Revisions that do not propose significant alterations in the experimental practice shall not require concurrence by the Director.

(30 U.S.C. 1201 *et seq.*)

Department of the Interior

Office of Surface Mining Reclamation and Enforcement

Surface Coal Mining and Reclamation Operations; Permanent Regulatory Program; Training, Examination, and Certification of Blasters; Final Rule

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Parts 816, 817, and 850

Surface Coal Mining and Reclamation Operations; Permanent Regulatory Program; Training, Examination, and Certification of Blasters

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Final rule.

SUMMARY: The Office of Surface Mining Reclamation and Enforcement (OSM) is issuing final rules that delegate responsibility for the development and implementation of blaster certification programs to regulatory authorities with permanent regulatory programs. This is being done to accommodate the States' desire to develop and implement their own blaster certification programs. Additional amendments have been adopted to ensure that blasts are conducted only by certified blasters.

EFFECTIVE DATE: April 14, 1983.

FOR FURTHER INFORMATION CONTACT: Arthur Anderson, Office of Surface Mining, U.S. Department of the Interior, 1951 Constitution Ave., NW., Washington, D.C. 20240; 202–343–5954.

SUPPLEMENTARY INFORMATION:

I. Background
II. Rules Adopted and Responses to Public Comments on Proposed Rules
III. Procedural Matters

I. Background

Section 515(b)(15)(D) of the Surface Mining Control and Reclamation Act of 1977, Public Law 95–87, 30 U.S.C. 1201 *et seq.* (the Act), requires that all blasting operations be conducted by trained and competent persons as certified by the regulatory authority. Section 719 of the Act directs that regulations be promulgated which require "the training, examination, and certification of persons engaging in or directly responsible for blasting or use of explosives in surface coal mining operations." Section 719 also states that such regulations may be promulgated by the "Secretary of the Interior (or the approved State regulatory authority as provided for in Section 503 of the Act)." Final regulations to implement those sections were published at 45 FR 82004–82100 (December 12, 1980). Previous proposals were published at 43 FR 41634 (September 18, 1978) and at 44 FR 36318 (June 20, 1979).

In the December 12, 1980, rules adopting the old blaster certification program OSM interpreted Section 719 of the Act as providing statutory authority to promulgate rules for a comprehensive national program to train, examine, and certify "blasters-in-charge," a regulatory term not found in the Act (45 FR 82092–94). Section 719 of the Act also allows approved State regulatory authorities to develop and implement blaster certification programs.

On January 29, 1981, the Secretary of the Interior ordered that all regulations which were excessive, burdensome, or counterproductive be identified and asked States and industry to recommend sections to be revised. OSM, in compliance with the administrative mandate to simplify and remove excessive regulatory burdens, reproposed rules governing training, examination, and certification of blasters in surface operations of coal mines. The reproposed rules were published on March 24, 1982 (47 FR 12779).

II. Rules Adopted and Responses to Public Comments on Proposed Rules

OSM today is issuing final rules within which a State with an approved State regulatory program can implement and design its own blaster certification program.

The rules adopted today require regulatory authorities to ensure that all blasting operations are conducted by qualified and trained blasters. Under the rules adopted today each State must choose and develop the method of training, examining, and certifying blasters which best meets local needs within the regulatory framework adopted herein. In States with Federal programs, OSM must assume the responsibility to develop such programs.

In the rules adopted today, the training of blasters is mandatory. A State may mandate blaster training at specified schools, conduct courses based on curriculum developed under its guidance, or choose to require all applicants to demonstrate and/or document that they have received training in some other way prior to examination or certification. The State may impose retraining or choose to find another method to ensure continued blaster competence. Initial evaluation of competence by written exam is mandated by these rules and must reflect certain subject areas. It will, however, be left to the State to develop and implement the exam. The State regulatory authority must also review and verify the practical field experience of persons seeking blaster certification. Each State may build additional procedures, conditions and criteria into its program as long as the program satisfies the basic requirements cited.

OSM received comments from industry, citizens and State regulatory authorities discussing the proposed amendments. Many commenters agreed with the concept of State responsibility for blaster training, examination and certification in lieu of the national program previously proposed. All comments received have been considered and incorporated into the rules as indicated.

General Comments on Part 850

OSM had specifically solicited comments on whether it could promulgate National standards for blaster certification. Some commenters believed that OSM had correctly proposed to allow exclusive State jurisdiction over blaster training examinations and certification. One noted "that States are capable of formulating effective and appropriate state blaster certification programs." Other commenters believed it is beyond the authority of OSM to issue any regulations governing blaster certification and that each State must be responsible for developing provisions implementing a blaster certification program in its State program.

OSM believes that the provisions of a training, examination and certification program can best be developed at the State level based on a general National programmatic rule.

OSM's authority to issue regulations establishing the framework for State blaster certification is incident to Sections 503(a)(1), 515(b)(15)(d), and 719 of the Act, among other sections. States will have responsibility to develop specific provisions. Subchapter M will ensure consistency and provide a yardstick by which OSM can approve State programs and conduct oversight.

A commenter objected to OSM's interpretation of Section 719 of the Act, which allows each State to develop its own program and procedures governing blaster training, examination and certification. This commenter preferred a standardized, nationally uniform program. The commenter pointed out that in the initial years since the statute has been passed, no State has implemented an acceptable blaster certification program.

OSM believes that Section 719 of the Act, especially when read in conjunction with Section 102 of the Act provides ample authority for these regulations. In considering whether to develop a national exam and training program, OSM requested comments from the coal-producing States who would otherwise bear the burden of this task. Most States preferred to take the initiative in this area. Some States raised concerns over funding, but nevertheless preferred to be given the opportunity to take control

over this aspect of the progam. This concept will allow training to be adapted to local blasting techniques. Practices used in local mines and under particular local geologic conditions may be designed to emphasize local and regional characteristics. Moreover, since the publication of the December 12, 1980, final rule, at least one State (West Virginia) has developed blaster certification exams, and other States in cooperation with West Virginia have given consideration to training programs and facilities. States such as Alabama, Pennsylvania, Oklahoma and Kentucky already have programs which, with certain modification to course content and/or procedures, could be used to implement the blaster certification concept.

A commenter asserted that proposed §§ 850.13, 850.14, and 850.15 exceed OSM's authority because they set work practice standards and procedures better left to the State's discretion. OSM believes that the criteria established in §§ 850.13, 850.14 and 850.15 serve to standardize subject areas and program procedures, allow the industry to more easily tailor design courses to this purpose and enhance the likelihood of reciprocity between States. These are not work practice standards. Based on these reasons, OSM has chosen to retain the minimum criteria, with minor changes as noted elsewhere.

Section 850.1 Scope.

New § 850.1 specified that 30 CFR Part 850 sets requirements and procedures applicable to the development of regulatory programs for the training, examination, and certification of persons engaging in or directly responsible for the use of explosives in surface coal mining operations.

Section 850.5 Definition.

OSM has adopted a definition of "blaster" similar to the one proposed. "Blaster" is defined as a person certified to be directly responsible for the use of explosives in surface coal mining operations. The proposed words "for blasting" which would have modified the words "use of explosives" have not been adopted. The words could have created the misimpression that handling of explosives in surface coal mining operations for non-blasting purposes need not be supervised by a certified blaster. Non-blasting aspects of explosives use such as transportation and storage are to be conducted under the supervision of a blaster.

Commenters were concerned that OSM's proposal would have required that all persons "engaging in" blasting be trained and certified in all topics of blasting. These commenters felt it was unnecessary for all individuals who are involved with explosives such as those receiving explosives or drilling holes, to be certified. They pointed out that "the man who loads the holes most often is not the man who designs the holes." The commenter recommended a two part certification: (1) Office personnel, and (2) field personnel.

In the rules adopted today OSM has clarified its intent. Surface mining operations using explosives must be conducted under the direction of a "certified blaster." The rule does not mandate that all personnel "engaging in" blasting operations be certified as blasters. The blasting crew member or members responsible solely for receiving, drilling, loading, or transporting explosives would report to and be controlled and trained by the "certified blaster." Only individuals responsible for the conduct of blasting operations must be certified. Section 850.13(a)(2) specifically refers to and requires training for non-certified employees working in a blasting crew. It requires that these persons work under and receive direction and training from the certified person. OSM has not accepted the commenter's suggestion that certification be divided because a responsible blaster needs to know both office and field blasting operations to ensure the successful achievement of the requirements of the Act.

A commenter suggested that the proposed definition of blaster might conflict with the present United Mine Workers of America definition of a "supervisor." The commenter believed that the phrase "engaging in" put the blasters into the category of "classified work" which would prevent supervisors from serving as "blasters." The comment proposed the alternative of "direct responsibility for" rather than "engaging in" the work of blasting.

OSM has adopted the recommendation as proposed. In proposing the definition OSM did not intend to include or exclude anyone from union coverage, not to alter employee-union relations. For each mine, however, at least one person must be directly responsible for the use of explosives at any time. That person must be a certified blaster and must be present at each blast. Such a person may engage in, as well as be directly responsible for, the use of explosives. Persons who merely "engage in" the use of explosives without the responsibility for their use need not be certified. Similarly, some supervisory personnel may not be *directly* responsible for the use of explosives, even though some of the people they supervise may engage in blasting operations. These persons need not be certified either. But all persons who are directly responsible for the use of explosives must be certified. At some operations the person who is directly responsible may design as well as drill and load or perform other functions. These persons are required to be certified.

Corresponding changes have been made to §§ 850.12(b) and 850.13(b) to include the phrase "responsible for" the use of explosives rather than "engaging in."

Section 850.11 Applicability.

As proposed, the applicability section would have specified that part 850 applies to regulatory authorities responsible for enforcing a permanent surface coal mining regulatory program. OSM believes this section is redundant and has not adopted it.

Section 850.12 Responsibility.

Section 850.12(a) requires regulatory authorities to promulgate rules governing the training, examination, and certification of blasters in surface coal mining operations. States are to submit rules governing blaster certification to OSM for approval as a State program provisions under 30 CFR Parts 731 and 732.

Section 850.12(b) requires each regulatory authority with an approved regulatory program to submit a program for the examination and certification of persons responsible for the use of explosives in surface coal mining operations within 12 months of State program approval or implementation of a Federal program or within 12 months after the effective date of these rules, whichever is later.

A State regulatory authority objected to OSM's delegation of the responsibility for blaster training, examination and certification to the States because of the financial and programmatic burden this places on the State regulatory authority. This State criticized the existing funding levels as inadequate to produce a training and certification program. The commenter did not object to taking program responsibility, but objected to lack of specific programmatic guidance and funding.

OSM proposed to change its earlier emphasis on a national training program and exam, based on comments from the majority of coal-producing States which preferred to take responsibility for the program. OSM expects to work with the States to provide grant assistance and technical assistance to States in developing or reviewing blaster

certification methods and examinations. Although this final rule mandates that applicants for certification be experienced and trained, it does not necessarily require States to establish training facilities and courses as was required under the previous rule. Rather it allows the use of other courses covering the topics required by the rule.

In the proposed rules, OSM had requested comments regarding the time frame for implementing blaster certification programs. Commenters objected to the proposal that all blasters in a State be certified within six months after a blaster certification program is adopted for the State. A State regulatory authority recommended 24 months rather than 12 months for program development. OSM has decided to adopt the 12 month period in § 850.12(b) for program development and a further 12-month period for the certification of all blasters. OSM believes that 12 months to obtain program approval is adequate for program development. Program approval will have to include a valid exam as well as all of the other program elements. However, the new rule contains a provision under which OSM may approve an extension of the 12-month period if a State demonstrates good cause. An extension is not considered appropriate to delay implementation of a program, but will be approved only where unforeseen complications or other circumstances warrant.

OSM concurs with the recommendation of several commenters that a longer period for certification be allowed. Accordingly a twelve month period has been adopted. However, because the requirement is a condition on blasting, it is properly imposed on operators and is incorporated as a performance standard into Subchapter K, as §§ 816.61(c) and 817.61(c), described below.

An operator suggested that OSM require that State regulatory personnel administrating the blaster certification program be certified.

OSM is placing the responsibility on the regulatory authority to determine qualifications of the personnel responsible for implementing the certification program and does not believe it necessary to prescribe the manner in which this is to be done.

OSM had solicited comments on the issue of whether a State blaster certification program should be applied on Federal lands in a State. One State regulatory authority commented that it should apply its approved certification program only to lands under its area of jurisdiction, and leave the applicability of the certification program on Federal lands to the Secretary's discretion.

OSM believes that in a State with a cooperative agreement an approved State certification program should apply to blasting on Federal lands within the State. Because many mining operations may involve coal both on non-Federal and Federal lands, and because other State regulations apply on Federal lands it is appropriate to require the certification of blasters only by one regulatory authority. This, however, will be pursued on a case-by-case basis under specific cooperative agreements. OSM will promulgate rules at a later date governing certification of blasters for operations on Federal lands in States without cooperative agreements. At a minimum, OSM will recognize certificates issued under an approved State program for operations on Federal lands within the particular State.

Commenters further endorsed reciprocity among States in order to facilitate blasters working in more than one State.

OSM endorses the concept of State reciprocity. This should be facilitated by the State program review and approval process, under which all States with approved programs must conform with the rules adopted today and the Act. It is expected that the individual States will work out the details of mutual acceptance under licensing procedures.

Section 850.13 Training.

Section 850.13 (a) requires the regulatory authority to adopt procedures to ensure that prospective blasters receive training, including but not limited to technical aspects of blasting operations and the requirements of State and Federal laws governing the storage, transportation and use of explosives. The rule also requires that all uncertified persons in blasting crews receive direction and on-the-job training from those certified as blasters. This ensures that workers involved in the use of explosives receive direction from trained persons who are knowledgeable in the proper use and handling of explosives.

OSM's proposed rule would have required that "blasters" receive training. A commenter suggested adding the word "certified" to modify "blaster" in the requirement for blasters to receive training. The commenter noted that under the definition a blaster must be certified. In proposing the rule, OSM did not intend to require those already certified to be trained. Rather, the intent was that the requirement apply to those who seek to become certified.

OSM has amended § 850.13 (a) (1) to require training by those who seek to become certified. As suggested by other commenters a further provision has been added at § 850.15 (c) (1) which allows a regulatory authority to require retraining for continued licensing. This is discussed below.

A commenter recommended deletion of "storage and transportation of explosives" from the training requirements of § 850.13 and the exam requirements of § 850.14. The commenter asserted that this requirement was not authorized by the Act.

The Act requires that the use of explosives be under the direction of a certified blaster. OSM interprets "use of" to include transportation and storage. Since the blaster directs the receipt, storage and movement of explosives it is essential that he must be trained in the proper methods of storage and transportation.

OSM does not intend to govern the facets of explosives use regulated by other Federal or State agencies, but rather to ensure that as a condition of certification a blaster is knowledgeable of all these aspects. Accordingly, the rule governing storage and transportation of explosives has been adopted without change.

A commenter objected to the proposed requirement of "on-the-job training" in § 850.13 (a) (2) because it appeared to duplicate MSHA's requirement with respect to health and safety.

OSM recognizes that MSHA, as well as OSM, requires on-the-job training of those involved in the use of explosives in underground mines. MSHA's requirements for non-certified persons assisting blasters will also include health and safety matters. OSM's on-the-job training requirements include technical aspects of the use of explosives that are not necessarily covered by MSHA's rules.

Section 850.13 (b) requires training courses to be available and sets forth specific subjects to be included in training courses. Rather than have a separate list of subjects for training in § 850.13 and another list of subjects to be included in an exam in § 850.14 as was proposed, OSM has consolidated them into one list of subjects for both purposes. These subjects include:

—Explosives, including—
  —Selection of the type of explosives to be used;
  —Determination of the properties of explosives which will produce desired results at an acceptable level of risk; and
  —Handling, transportation, and storage.

- Blast designs, including—
  —Geologic and topographic considerations;
  —Design of a blast hole, with critical dimensions;
  —Pattern design, field layout, and timing of blast holes; and
  —Field applications.
- Loading blastholes, including priming and boostering.
- Initiation systems and blasting machines.
- Blasting vibrations, airblast, and flyrock, including—
  —Monitoring techniques, and
  —Methods to control adverse affects.
- Secondary blasting applications.
- Current Federal and State rules applicable to the use of explosives.
- Blast records.
- Schedules.
- Preblasting surveys, including—
  —Availability,
  —Coverage, and
  —Use of in-blast design.
- Blast-plan requirements.
- Certification and training.
- Signs, warning signals, and site control.
- Unpredictable hazards, including—
  —Lighting.
  —Stray currents, and
  —Radio waves.

Commenters supported the list of topics included in § 850.13(b), and recommended including some additional topics as a refinement to the list. The proposed additions are discussed as follows:

Powder factor. OSM recognizes powder factor as a significant component of blast design. However, this calculation is only one facet of blast design and not an aspect requiring extra emphasis. The study of powder factors will be included in topics such as the properties of explosives, geology and the intensity of ground movement required. Those factors vary from site to site.

Misfires. The training and testing for subjects such as blast design, initiation systems, and loading techniques will cover prevention of misfires from such occurrences as cutoffs and improper priming. The methods for handling misfires after they occur has been added to the list of unpredictable hazards and has been included in the list of required topics.

Delay systems. The commenter suggested added emphasis on "delay systems" in the requirement for initiation systems. Concepts such as blast patterns, blasting machines, initiation systems and ground vibration mitigation include application of delay blasting techniques. OSM believes that singling out delay systems for additional emphasis is not necessary since blasting delay techniques will certainly be included in any course on these topics.

Preblast surveys, signs, warnings and site control. The commenter suggested that these items be included on the list of topics to be studied. OSM accepts this comment and has included these items on the list.

Commenters recommended deleting the requirement in proposed § 850.13(b)(9) to train blasters in the "chemical and physical properties of explosives," stating that only the basic properties have to be known. OSM agrees that a detailed knowledge of the chemical properties is unnecessary and in the corresponding provision of the final rule, § 850.13(b)(1) includes training in the selection of explosives and a knowledge of the relevant properties of explosives to produce desired results at an acceptable level of risk. This would require a general knowledge of the properties of most explosive materials such as specific gravity, water resistance and detonating velocity, as well as the hazard and dangers associated with specific types of explosive materials.

A commenter suggested separating unpredictable hazards from effects of blasting such as flyrock and ground vibration, in the list of training subjects. The commenter also recommended use of the term "nonpredictable" rather than "unanticipated" hazards, since they are in fact, anticipated hazards, which cannot always be predicted. OSM has separated these topics, and they are included in §§ 850.13 (b)(5) and (b)(14). The term "unpredictable" has been adopted.

Commenters believed that the language of § 850.13(b) would allow the use of self-study programs or slide shows without instructors familiar with the subject manner. These commenters were concerned that the subject matter could not adequately be taught without the use of instructors and the ability to obtain answers to questions or exchange ideas.

OSM agrees with the commenter that instructors probably provide a more adequate educational approach than do packaged materials. However, OSM also believes that some of the required subjects might be covered through these materials and therefore believes that the regulatory authorities should be allowed to determine the training method for each subject. No program will be approved until OSM is satisfied that the requirements of these rules will be met.

A commenter noted the apparent overlap between OSM and the Mine Safety and Health Administration (MSHA) training programs. MSHA training may serve to fulfill some of the requirements for blaster training under § 850.13 and contribute to the overall certification process. MSHA training also applies to underground miners and underground blasting operations not covered by OSM's rules. The commenter encouraged future cooperative efforts between OSM and MSHA in training matters. OSM will explore this possibility.

Commenters were concerned that the rule requiring training placed the burden on regulatory authorities and relieved OSM and operators of any such responsibility.

OSM does not intend for the regulatory authority to be solely responsible for training. The rule requires that regulatory authorities ensure that "blasters receive training." The regulatory authority may choose to accept outside courses, require combinations of MSHA and industry courses or provide its own training. The object is that persons are trained before they become certified; the methods and degree of regulatory authority involvement will vary from State to State.

Section 850.14 Examinations.

Section 850.14 requires the regulatory authority to examine candidates for blaster certification. Regulatory authorities must verify the competence of persons responsible for the use of explosives in surface coal mining operations using written examinations covering technical aspects of blasting, State and Federal laws governing the storage, use and transportation of explosives. The regulatory authority must also verify practical field experience of the candidates. The level of field experience must demonstrate that the candidate possesses practical knowledge of blasting techniques, understands the hazards involved in the use of explosives and has otherwise exhibited a pattern of conduct consistent with the acceptance of responsibility for blasting operations.

Furthermore, the rule requires regulatory authorities to examine prospective blasters in the subjects listed in § 850.13(b).

Commenters requested that OSM allow the demonstration of competence to be accomplished by methods other than written examination. They observed "there are very competent miners that can barely write their own name."

Preparation of blasting designs, understanding of explosives specifications, the use of safety

brochures and the submission of records require the ability to read, write and perform basic mathematic functions. OSM therefore believes that the blaster, as a person responsible for complying with laws, designs and records, and for controlling the adverse effects of blasting, must demonstrate a written ability to communicate in the subject area. In previous rules OSM had also adopted the requirement of a written exam in order to evaluate the blasters' ability to use explosives as well as in order to ensure at least a minimal readying ability

Commenters suggested adjusting the emphasis on blaster certification to allow more credit for work experience or perhaps "grandfathering" blasters with more than five years of experience. The rules adopted today require a written exam, coupled with practical field experience. The amount of emphasis or weighting placed on either part is not specified. There is, however, no provision for "grandfathering" or exemption from the written exam. Regulatory authorities may find it useful to augment the written exam with oral or practical exams for specific topics. OSM believes, however, that a written exam represents the minimum allowable demonstration of ability.

A commenter suggested that OSM emphasize the concept of practical field experience, and recommended that a provision be added requiring 2 years of field experience as part of the qualifications. Other commenters believed that the requirement for practical field experience was not necessary to be a trained and competent blaster, rather that competence should be based solely upon tests. OSM recognizes the value of practical field experience and has adopted it as part of the qualifications for candidates, in § 850.14(a)(2). OSM intends that States include minimum experience criteria in their acceptance of candidates for certification. OSM has reconsidered this requirement and believes that adequate latitude is provided to State regulatory authorities to emphasize or deemphasize practical experience within limits. In some blasting operations practical work experience may be more important than the ability to provide textbook solutions. Those States which already have blaster certification programs have generally required established minimum experience levels. OSM supports the evaluation of experience as part of a blaster certification program.

Section 850.15 Certification requirements.

Section 850.15(a) requires the regulatory authority to certify, for fixed periods, candidates who are found to be competent and to have the necessary experience to accept responsibility for blasting operations in surface coal mining operations.

Section 850.15(b) provides procedures for suspension and revocation of blasters' certifications. Suspension or revocation may and, upon a finding of willful conduct, must occur when, after notice and hearing, certain conditions are found to exist. Notice and hearing may be provided after suspension only if it would not be practicable to provide it before. The conditions are:

(i) Noncompliance with any order of the regulatory authority.

(ii) Unlawful use in the work place of, or current addiction to, alcohol, narcotics, or other dangerous drugs.

(iii) Violation of any provision of the State or Federal explosives laws or regulations.

(iv) Providing false information or a misrepresentation to obtain certification.

Section 850.15(c) allows the regulatory authority to impose additional educational or other requirements for the maintenance of certification. Section 850.15(d) requires the regulatory authority to adopt regulations which require blasters to take precautions to protect their certificates from loss, theft, or unauthorized duplication, and to require immediate reporting of any loss, theft or duplication.

Section 850.15(e) requires regulatory authorities to impose certain conditions for maintaining certificates. Three minimum conditions are stated: (1) That blasters immediately exhibit certificates to authorized representatives of OSM or the regulatory authority on request; (2) blaster certificates are not transferrable or assignable; and (3) blasters cannot delegate their responsibility to anyone who is not a certified blaster.

OSM had proposed to require that certification be for a fixed period. A commenter did not like the concept of a "fixed period" and noted that other certified persons such as doctors and lawyers have licenses which remain valid indefinitely. Other commenters felt that OSM's proposal did not go far enough; they suggested a mandatory retraining requirement as well.

In some professions licensing is conducted on a recurring basis (often yearly) and other professions require extensive retraining or continuing education to continue practice. Renewal provisions vary, but they are generally less stringent than initial certification. OSM believes that a one time certification would simplify the process, but in so doing would miss the important opportunity to weed out those who are unable to continue to conduct blasts effectively and safely. Therefore OSM has retained the concept of certificates lasting "for a fixed period," and endorses the concept of periodic retraining and/or continuing education in order to assure continuing compliance with competence requirements. OSM has not, however, adopted mandatory retraining requirements.

A commenter suggested that a provision be added for recertification after revocation in § 850.15. Such a provision is not necessary. An individual is not precluded from applying anew to be certified under § 850.15(a) even after his or her certificate is revoked. However, the reasons for the earlier revocation could act as a bar to future certification.

A commenter recommended deletion of proposed § 850.15(b)(1)(v) that would have allowed prevention or suspension of a certification for "other good cause." The commenter asserted that the provision did not add beneficial details to the reasons for suspension and revocation of a blaster's certification and was ambiguous. OSM concurs with this recommendation and has not adopted proposed § 850.15(b)(1)(v). It is believed that remaining §§ 850.15(b)(1)(i)–(iv), especially paragraph (i) allowing suspension for noncompliance with orders of the regulatory authority, provide adequate grounds for action.

A commenter described the provisions for suspension and revocation of certificates under § 850.15 as not rigorous enough, explaining that infractions of the laws governing the use of explosives are very serious and warrant specified action. The commenter suggested changing the discretion afforded in § 850.15(b) in suspending or revoking a blaster's certificate to mandatory action. Other commenters believed that sanctions should be placed on basic qualifying criteria and that certain actions be consistent with Section 518 of the Act with respect to penalties, opting for terms such as "willful" and "flagrant" violation rather then minor or unknown occurrences. OSM believes that suspension or revocation is appropriate if a violation is willful, but does not believe that suspension should be mandatory in all cases. OSM has accepted this suggestion in part, and has adopted stronger language in this provision.

Another commenter requested addition of a provision which would mandate suspension at the request of an operator. The concept of an operator

causing the suspension of the certificate of one of its employees has not been incorporated because the actual decision to suspend should be retained by regulatory authority; employer-employee differences should be resolved in other forums.

Sections 816.61 and 817.61 (Proposed § 850.16).

OSM had proposed in § 850.16 to require regulatory programs to ensure that: (1) The blast is to be fired only under the direction of a certified blaster; (2) no person is to be permitted to detonate explosives unless another person is present; and (3) persons responsible for blasting operations at a blasting site are to be familiar with the blasting plan and site-specific performance standards to be attained. While OSM has decided to adopt variants of these requirements, they have been adopted in §§ 816.61(c) and 817.61(c) because they pertain to conduct at the blasting site and are not components of a certification program.

A commenter suggested deletion of proposed § 850.16 because it was viewed as redundant with the requirements of §§ 816.61 through 816.68. These requirements add specifics not included in the performance standards set forth in §§ 816.61 through 816.68 and 817.61 through 817.68 and therefore are not redundant.

New §§ 816.61(c)(1) and 817.61(c)(1) requires that no later than 12 months after a blaster certification program for a State has been approved by OSM, all blasting operations in that State must be conducted under the direction of a certified blaster. The time frame was inserted for two reasons. First OSM recognizes that it will take time for blaster certification programs to be approved. Second, even after the approval of the blaster certification program, a reasonable time has to be provided for blasters to get certified. Twelve additional months is considered sufficient. Prior to the time a blaster certification program for a State has been approved under 30 CFR Chapter VII, Subchapter, C, OSM is requiring that all blasting operations have to be conducted by competent experienced persons who understand the hazards involved. This is a continuation of previous §§ 816.61(c) and 817.61(c).

A commenter recommended inserting "personal" in proposed § 850.16(a) to modify the word "direction." This would require the physical presence of the certified blaster to give the direction to the shot firer. OSM has adopted the substance of this suggestion in §§ 816.61(c)(3) and 817.61(c)(3) to require the presence of the certified blaster when the blast is detonated.

A commenter recommended that the provision in proposed § 850.15(c)(1) requiring a blaster to carry a valid certificate be reconsidered to allow that such certificates be on file in the mine office. OSM concurs with this recommendation, and has adopted language such that the certificate need not be carried by the blaster. However, proof of credentials should be readily available. Therefore, new §§816.61(c)(2) and 817.61(c)(2) require the blaster to either carry a valid certificate or have a copy of his or her certificate on file at the permit site.

Commenters objected to the provisions of proposed § 850.16(b), because the presence of more than one person would be dangerous. The commenters stated that only one person is necessary to detonate explosives. OSM disagrees. OSM's performance standards require (1) access control within the blast area, (2) blast recordkeeping, (3) warning and all clear signals and (4) assessing the blast site after the blast for hazards. OSM believes that all of these duties cannot be adequately performed by one person. Also, in the event one person is required to leave the site or is incapacitated, another person should be available to ensure that the proper procedures are followed. The intent of the rule is not to crowd the blast area with onlookers, but to protect the blaster and other people entering the mine site, and to ensure compliance with other performance standards as listed above. Therefore, a provision has been incorporated into §§ 816.61(c)(3) and 817.61(c)(3) which requires the presence of a blaster and at least one other person at the firing of each blast. OSM believes that the rule as written provides necessary backup responsibility and safety precautions.

IV. Procedural Matters

Executive Order 12291

The Department of the Interior (DOI) has examined these proposed rules according to the criteria of Executive Order 12291 (February 17, 1981). OSM has determined that this is not a major rule and does not require a regulatory impact analysis because it will impose only minor costs on the coal industry and coal consumers.

OSM received one comment from a State regulatory authority questioning how it could conclude that only minor costs will be imposed by the blaster certification program without soliciting the opinion of industry on the costs. OSM must consider the incremental impact of adopting the proposal or allowing the previous final rule to remain in effect. Under Executive Order 12291 (February 17, 1981), OSM is required to assess the costs imposed by a proposed rule and to determine whether a regulatory impact analysis is required. After its own examination OSM has determined that this rule does not meet the criteria of a major rule.

Regulatory Flexibility Act

The DOI has also determined, pursuant to the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, that these rules will not have significant economic impacts on a substantial number of small entities.

One commenter noted that OSM's proposed rule would require blaster certification, which had not been effectively required before, and questioned how that could "ease the regulatory burden on small coal operations in Appalachia." Under the rules in effect on the date of proposal all blasters would have eventually been required to obtain a certificate under a national testing program. Under the rules adopted today, State certificates, based on a State's specific requirements will be accepted. Because the requirements will be more localized, OSM expects that small entities, especially those in Appalachia, will be able to acquire certified blasters at less cost. In any case OSM believes it has properly concluded that the impacts of the proposal on small operations will not be "significant."

Paperwork Reduction Act

The information collection requirement contained in 30 CFR Part 850 has been approved by the Office of Management and Budget under 44 U.S.C. 3507 and assigned clearance number 1029–0080. This approval is being codified under § 850.10.

The information required by 30 CFR Part 850 will be used by the regulatory authority in monitoring the implementation of the blaster certification programs.

National Environmental Policy Act

OSM has analyzed the impacts of these final rules in the Final Environmental Impact Statement OSM EIS–1: Supplement according to Section 102(2)(C) of the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4332(2)(C)). The final supplement is available in OSM's Administrative Record in Room 5315, 1100 L Street, NW., Washington, D.C., or by mail request to Mark Boster, Chief, Branch of Environmental Analysis, Room 134, Interior South Building, U.S. Department

of the Interior, Washington, DC 20240. This preamble serves as the record of decision under NEPA. This rule adopts the preferred alternative published in Volume III of the EIS which is analyzed in the EIS.

Agency Approval

Section 516(a) requires that, with regard to rules directed toward the surface effects of underground mining, OSM must obtain written concurrence from the head of the department which administers the Federal Mine Safety and Health Act of 1977, the successor to the Federal Coal Mine Health and Safety Act of 1969. OSM has obtained the written concurrence of the Assistant Secretary for Mine Safety and Health, U.S. Department of Labor.

List of Subjects

30 CFR Part 816

Coal mining, Environmental protection, Reporting requirements, Surface mining.

30 CFR Part 817

Coal mining, Environmental protection, Reporting requirements, Underground mining.

30 CFR Part 850

Explosives, Mining, Safety, Surface mining, Training program.

For the reasons stated above, 30 CFR Parts 816, 817 and 850 are amended as follows:

Dated: February 28, 1983.

William P. Pendley,

Acting Assistant Secretary for Energy and Minerals.

PART 816—PERMANENT PROGRAM PERFORMANCE STANDARDS—SURFACE MINING ACTIVITIES

1. Paragraph (c) of § 816.61 is revised to read as follows:

§ 816.61 Use of explosives: General requirements.

* * * * *

(c) *Blasters.* (1) No later than 12 months after the blaster certification program for a State required by Part 850 of this chapter has been approved under the procedures of Subchapter C of this chapter, all blasting operations in that State shall be conducted under the direction of a certified blaster. Before that time, all such blasting operations in that State shall be conducted by competent, experienced persons who understand the hazards involved.

(2) Certificates of blaster certification shall be carried by blasters or shall be on file at the permit area during blasting operations.

(3) A blaster and at least one other person shall be present at the firing of a blast.

(4) Persons responsible for blasting operations at a blasting site shall be familiar with the blasting plan and site-specific performance standards.

PART 817—PERMANENT PROGRAM PERFORMANCE STANDARDS—UNDERGROUND MINING ACTIVITIES

2. Paragraph (c) of § 817.61 is revised to read as follows:

§ 817.61 Use of explosives: General requirements.

* * * * *

(c) *Blasters.* (1) No later than 12 months after the blaster certification program for a State required by Part 850 of this chapter has been approved under the procedures of Subchapter C of this chapter, all surface blasting operations incident to underground mining in that State shall be conducted under the direction of a certified blaster. Before that time, all such blasting operations in that State shall be conducted by competent, experienced persons who understand the hazards involved.

(2) Certificates of blaster certification shall be carried by blasters or shall be on file at the permit area during blasting operations.

(3) A blaster and at least one other person shall be present at the firing of a blast.

(4) Persons responsible for blasting operations at a blasting site shall be familiar with the blasting plan and site-specific performance standards.

* * * * *

3. Subchapter M is revised to read as follows:

SUBCHAPTER M—TRAINING, EXAMINATION, AND CERTIFICATION OF BLASTERS

PART 850—PERMANENT REGULATORY PROGRAM REQUIREMENTS

Sec.

850.1 Scope.
850.5 Definition.
850.10 Information collection.
850.12 Responsibility.
850.13 Training.
850.14 Examination.
850.15 Certification.

Authority: Pub. L. 95–87, 30 U.S.C. 1201 *et seq.*

§ 850.1 Scope.

This part establishes the requirements and the procedures applicable to the development of regulatory programs for training, examination, and certification of persons engaging in or directly responsible for the use of explosives in surface coal mining operations.

§ 850.5 Definition.

As used in this part—

Blaster means a person directly responsible for the use of explosives in surface coal mining operations who is certified under this part.

§ 850.10 Information collection.

The information collection requirements contained in this part have been approved by the Office of Management and Budget under 44 U.S.C. 3507 and assigned clearance number 1029–0060. The information is being collected to meet the requirements of Sections 503, 515, and 719 of Pub. L. 95–87. This information will be used by the regulatory authority to assist in implementing the blaster certification program. The obligation to respond is mandatory.

§ 850.12 Responsibility.

(a) The regulatory authority is responsible for promulgating rules governing the training, examination, certification and enforcement of a blaster certification program for surface coal mining operations. When the regulatory authority is a State, the State shall submit these rules to the for approval under Parts 731 and 732 of this chapter.

(b) The regulatory authority shall develop and adopt a program to examine and certify all persons who are directly responsible for the use of explosives in a surface coal mining operation within 12 months after approval of a State program or implementation of a Federal program or within 12 months after the publication date of this rule, whichever is later. The Director may approve an extension of the 12-month period upon a demonstration of good cause.

§ 850.13 Training.

(a) The regulatory authority shall establish procedures which require that—

(1) Persons seeking to become certified as blasters receive training including, but not limited to, the technical aspects of blasting operations and State and Federal laws governing the storage, transportation, and use of explosives; and

(2) Persons who are not certified and who are assigned to a blasting crew or assist in the use of explosives receive direction and on-the-job training from a blaster.

(b) The regulatory authority shall ensure that courses are available to train persons responsible for the use of

explosives in surface coal mining operations. The courses shall provide training and discuss practical applications of—

(1) Explosives, including—

(i) Selection of the type of explosive to be used;

(ii) Determination of the properties of explosives which will produce desired results at an acceptable level of risk; and

(iii) Handling, transportation, and storage;

(2) Blast designs, including—

(i) Geologic and topographic considerations;

(ii) Design of a blast hole, with critical dimensions;

(iii) Pattern design, field layout, and timing of blast holes; and

(iv) Field applications;

(3) Loading blastholes, including priming and boostering;

(4) Initiation systems and blasting machines;

(5) Blasting vibrations, airblast, and flyrock, including—

(i) Monitoring techniques, and

(ii) Methods to control adverse affects;

(6) Secondary blasting applications;

(7) Current Federal and State rules applicable to the use of explosives;

(8) Blast records;

(9) Schedules;

(10) Preblasting surveys, including—

(i) Availability,

(ii) Coverage, and

(iii) Use of in-blast design;

(11) Blast-plan requirements;

(12) Certification and training;

(13) Signs, warning signals, and site control;

(14) Unpredictable hazards, including—

(i) Lightning,

(ii) Stray currents,

(iii) Radio waves, and

(iv) Misfires.

§ 850.14 Examination.

(a) The regulatory authority shall ensure that candidates for blaster certification are examined by reviewing and verifying the—

(1) Competence of persons directly responsible for the use of explosives in surface coal mining operations through a written examination in technical aspects of blasting and State and Federal laws governing the storage, use, and transportation of explosives; and

(2) Practical field experience of the candidates as necessary to qualify a person to accept the responsibility for blasting operations in surface coal mining operations. Such experience shall demonstrate that the candidate possesses practical knowledge of blasting techniques, understands the hazards involved in the use of explosives, and otherwise has exhibited a pattern of conduct consistent with the acceptance of responsibility for blasting operations.

(b) Applicants for blaster certification shall be examined, at a minimum, in the topics set forth in § 850.13(b).

§ 850.15 Certification.

(a) *Issuance of certification.* The regulatory authority shall certify for a fixed period those candidates examined and found to be competent and to have the necessary experience to accept responsibility for blasting operations in surface coal mining operations.

(b) *Suspension and revocation.* (1) The regulatory authority, when practicable, following written notice and opportunity for a hearing, may, and upon a finding of willful conduct, shall suspend or revoke the certification of a blaster during the term of the certification or take other necessary action for any of the following reasons:

(i) Noncompliance with any order of the regulatory authority.

(ii) Unlawful use in the work place of, or current addiction to, alcohol, narcotics, or other dangerous drugs.

(iii) Violation of any provision of the State or Federal explosives laws or regulations.

(iv) Providing false information or a misrepresentation to obtain certification.

(2) If advance notice and opportunity for hearing cannot be provided, an opportunity for a hearing shall be provided as soon as practical following the suspension, revocation, or other adverse action.

(3) Upon notice of a revocation, the blaster shall immediately surrender to the regulatory authority the revoked certificate.

(c) *Recertification.* The regulatory authority may require the periodic reexamination, training, or other demonstration of continued blaster competency.

(d) *Protection of Certification.* Certified blasters shall take every reasonable precaution to protect their certificates from loss, theft, or unauthorized duplication. Any such occurrence shall be reported immediately to the certifying authority.

(e) *Conditions.* The regulatory authority shall specify conditions for maintaining certification which shall include the following:

(1) A blaster shall immediately exhibit his or her certificate to any authorized representative of the regulatory authority or the Office upon request.

(2) Blasters' certifications shall not be assigned or transferred.

(3) Blasters shall not delegate their responsibility to any individual who is not a certified blaster.

Part IX

Tennessee Valley Authority

Intergovernmental Review of Tennessee Valley Authority Programs and Activities; Proposed Regulation

TENNESSEE VALLEY AUTHORITY

18 CFR Part 1311

Intergovernmental Review of Tennessee Valley Authority; Programs and Activities

AGENCY: Tennessee Valley Authority.

ACTION: Notice of proposed rulemaking.

SUMMARY: These proposed regulations would implement Executive Order No. 12372 ("Intergovernmental Review of Federal Progams") and the Intergovernmental Cooperation Act of 1968 and would assist TVA in carrying out its responsibilities under the TVA Act. They apply to Federal financial assistance and direct Federal development programs and activities of TVA. Executive Order No. 12372, and these proposed regulations, are intended to replace the intergovernmental consultation system developed under Office of Management and Budget (OMB) Circular A-95.

DATE: Comments must be received on or before April 4, 1983.

ADDRESS: Interested persons should submit comments to: Richard L. Morgan, Manager, Economic and Community Development, Tennessee Valley Authority, 201 Summer Place Building, Knoxville, Tennessee 37902.

FOR FURTHER INFORMATION CONTACT: Richard Ginn, 615-632-6605.

SUPPLEMENTARY INFORMATION:

Background

For many years, consultation between State and local officials and Federal agencies concerning Federal programs and activities has taken place through an elaborate regulatory and organizational framework created under OMB Circular A-95. The A-95 system required State and local governments to follow prescribed review procedures and to review specified Federal programs, regardless of the circumstances affecting particular State and local governments. The system also required review of Federal programs by State and local agencies without regard to the priorities of their elected leadership. TVA used this system to supplement the many other opportunities TVA provides for involvement in TVA decisionmaking and thought that it strengthened TVA's relationship with the States of the Tennessee Valley region.

These regulations and the order's coordination process are not intended to displace the many other ways TVA coordinates its activities. TVA makes a concerted effort to ensure that its activities are coordinated with and reviewed by the citizens and State and local officials of the Tennessee Valley region.

The meetings of TVA's Board of Directors are open to the public, and the public, including any State or local officials present, is encouraged to discuss matters of interest with the Board. In addition to the 22 regularly scheduled Board meetings held at different locations throughout the Tennessee Valley, the Board held 6 townhall-type listening sessions in the Valley during 1982. TVA also conducts public meetings on matters of general interest. In 1982, 76 such meetings were held in the Valley. The TVA region is divided into districts and an administrator appointed for each district whose job it is to act as TVA's local liaison with State and local officials and the pubic. TVA also has toll-free "Citizen Action Lines" to take questions from and provide answers to callers. Last Year, TVA responded to 60,666 calls.

In addition to these opportunities for providing comments on TVA programs and activities, all of TVA's major activities which have a significant impact on the quality of the human environment are coordinated under TVA's procedures implementing the National Environmental Policy Act. NEPA coordination includes a specific request for comments from State and local officials whose jurisdictions are affected by the proposal. For example, all of TVA's major construction projects, whether funded with appropriations or by the TVA power program, are reviewed under the NEPA process.

On July 14, 1982, President Reagan signed Executive Order No. 12372, "Intergovermental Review of Federal Programs." The Executive order is reproduced as Attachment A to the OMB notice published in the January 24 **Federal Register** (48 FR 3075-76 (1983)). The order directs the revocation of circular A-95, and provides for a new intergovernmental consultation system that is consistent with the President's policies concerning federalism and regulatory relief. Under the order, States and localities will take the initiative for establishing review procedures and priorities. State and local elected officials, not the Federal Government, will determine, within the scope of the order and the Intergovernmental Cooperation Act, which Federal programs and activities to review and the procedures by which the review will take place.

When State and local elected officials bring their concerns to a Federal agency's attention through this process, the agency will have to make efforts to accommodate the concerns, and, if it does not accommodate them, explain why not. This "accommodate or explain" provision gives greater weight to State and local views than circular A-95 did and is consistent with TVA's existing policy of close cooperation and consultation with State and local officials.

As to some Federal agencies, the federally required procedures for consultation under circular A-95 created a substantial regulatory burden. The Executive order's system of consultation will significantly reduce that burden. In contrast to the A-95 system, which relied heavily on Clearinghouses, planning organizations, and other bodies which are not elected by the jurisdictions they serve, the order, consistent with the President's federalism policy, emphasizes the role of elected State and local officials.

OMB Guidance to States

In order to assist States as they begin their work in implementing the order, OMB wrote to each State concerning the establishment of an official State process. This letter is reproduced as Attachment B to the OMB notice published in the January 27 **Federal Register** (48 FR 3929 (1983)). This letter explains the role of the "single point of contact." A "single point of contact" is the one office or official in a State that transmits the result of the State review and coordination with recommendations that may differ from the proposal to TVA and other Federal agencies and to which TVA directs official communications (*e.g.*, explanations of nonaccommodation) to the State *under the order*. A State may have as few or as many entities as it chooses to perform review and coordination and to conduct discussions under the order with TVA. However, there should be only one point of contact to officially transmit recommendations for change to Federal agencies under the order. It is up to the State whether the single point of contact plays a substantive role with respect to the State's views, or simply acts as a focal point for official communications.

It is also worth emphasizing that States are not required to adopt an official State process at all. However, after final rules implementing the order become effective (they will be published on or about April 30, 1983), the existing Federal A-95 consultation system will no longer be in effect. Other existing TVA consultation and coordination processes are not affected by these proposed procedures, and TVA will continue to seek State and local

officials' and the public's views on the entire range of TVA's programs and activities under these other processes.

OMB will have general government-wide oversight responsibility for the implementation of the order, but will not attempt to exercise any day-to-day, operational control of agency actions. Nor will OMB act as a forum for "appeals of agency actions by non-Federal parties."

Development of Proposed Regulations

The Executive order mandates the implementation of final regulations by April 30, 1983. It will not be possible to have an adequate comment period and meet this deadline if a 30-day delay between the publication date of the final regulations and their effective date is observed. Consequently, TVA proposes to make the final regulations effective immediately upon publication on April 30. There would be no further rulemaking with respect to the Executive order.

As a matter of style, the proposed regulations use the present tense when describing TVA's obligations. For example, when the proposed regulation says that TVA "provides the State with a timely explanation," the provision requires TVA to do so.

In order to provide consistency among the various Federal agencies in their dealings with the States under the order, the agencies and OMB worked together to the extent feasible to arrive at common policy decisions and common regulatory language. This should assist the State in developing its procedures under the order for communicating with the various Federal agencies.

Removal of Procedures Implementing OMB Circular A–95

In connection with these proposed regulations, TVA is proposing to remove its existing procedures implementing former OMB Circular A–95 published at 42 FR 30,959–61 (1977). Executive Order No. 12372 directed OMB to revoke the circular itself, and the OMB directive revoking the circular told Federal agencies to leave their A–95 regulations or procedures in place only until new regulations implementing the order were published on or about April 30, 1983.

Executive Order 12291, Regulatory Flexibility Act and Paperwork Reduction

TVA has determined that this is not a major rule under Executive Order 12291. The proposed rule would simplify consultation with TVA and allow State and local governments to establish cost-effective consultation procedures. For this reason, TVA believes that any economic impact the regulation has will be positive. It is unlikely that its economic impacts will be significant, in any case. Consequently, TVA certifies, under the Regulatory Flexibility Act, that this rule would not have a substantial economic impact on a significant number of small entities. This proposed rule is not subject to section 3504(h) of the Paperwork Reduction Act, since it would not require the collection or retention of information.

Section-by-Section Analysis

Section 1311.1 What is the purpose of these regulations?

This section briefly states the purpose of the regulations, which is to implement Executive Order No. 12372 and the Intergovernmental Cooperation Act, foster an improved system of intergovernmental consultation, and assist TVA in carrying out its responsibilities under the TVA Act. Paragraph (c) states the important point that the order, and these regulations, are intended only to improve TVA's internal management of its consultation with State and local governments. Neither the order nor these regulations are intended to create any right of judicial review of TVA's action.

Section 1311.2 What definitions apply to these regulations?

This section defines several terms used frequently in the proposed regulations. "Order" means Executive Order No. 12372. "State" means any of the 50 States, the District of Columbia, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, the U.S. Virgin Islands, Guam, American Samoa, or the trust territory of the Pacific Islands. The definition of "State" means that the District of Columbia, Puerto Rico, and the other jurisdictions mentioned may create an official consultation process and consult with Federal agencies on the same basis as each of the 50 States. Several other terms appearing in the order are not defined in this section, but are used in the regulations in a way that makes their operational meaning clear (*e.g.*, accommodate and explain in § 1311.7).

Section 1311.3 What programs and activities of TVA are subject to these regulations?

Paragraph (a) provides that TVA will publish a **Federal Register** notice, in conjunction with the publication of its final Executive Order No. 12372 regulations, listing the programs and activities that are subject to the regulations. Updated lists will be published when necessary in order to let States know which of TVA's programs and activities they may choose to cover.

The attachment to this preamble contains a list of those Federal financial assistance and direct Federal development programs and activities that TVA proposes to exclude from coverage under these regulations. The reason for each proposed exclusion is also listed. TVA seeks comments on the proposed exclusions. After promulgation of the final rules, if TVA wants to exclude new or additional programs or activities from coverage under the regulations, it will publish a **Federal Register** notice requesting comment on the proposed exclusions.

At this time, States should assume that all TVA's other Federal financial assistance and direct Federal development programs will be subject to the regulations. Of course, activities and programs that clearly are neither Federal financial assistance nor direct Federal development (*e.g.*, procurement or TVA's power program) are not subject to the order or the Intergovernmental Cooperation Act. Despite this, TVA does intend to coordinate its power-program construction activities with a State's single point of contact as a matter of policy if the State desires. As more fully explained in the exclusion attachment, TVA already widely coordinates these activities and will continue to do so. Also, the order and these regulations do not apply to proposed regulations, legislation, or budget formulation.

Even if a program or activity is excluded from the consultation system established by the order, State and local officials would still have an opportunity to have their views considered by TVA. The order's consultation system is only one of many opportunities TVA provides for State and local officials to inform TVA of their views on TVA programs and activities. Moreover, any official or member of the public has the opportunity to address the TVA Board at its Board meetings which are open to the public. There also are other statutory requirements for coordination with which TVA complies, such as the coordination process established under the National Environmental Policy Act.

Paragraph (b) simply states that TVA, to the extent permitted by law, will use a State's official process to determine official views of State and local officials. This commitment extends only to programs and activities subject to these procedures that a State has selected for coverage under § 1311.5 of these regulations. If at any time a State believes that TVA has not made appropriate use of the official State process, the State is invited to raise this directly with TVA's General Manager.

Section 1311.4 [Reserved].

Section 1311.5 What procedures apply to a State's choice of programs?

States may choose to consult with TVA under the order concerning any of TVA's Federal financial assistance and direct Federal development programs and activities that TVA's Federal Register notice lists as subject to the regulations. However, these regulations do not require States to consult with TVA concerning any particular program or activity.

TVA emphasizes that the choice of whether to cover a particular Federal financial assistance or direct Federal development program or activity listed in TVA's Federal Register notice is entirely up to each State. While TVA will be happy to discuss with States the most effective ways of carrying out consultation concerning these programs and activities, TVA will not attempt to constrain the State's discretion with respect to program selection.

Paragraph (a) of this section sets out a purely administrative requirement pertaining to program selection. The State should notify TVA of the programs and activities it chooses to cover. When it first establishes its official process, the State can meet this requirement by sending to OMB, along with other information required to establish the process, a list of the Federal programs and activities it wishes to cover. OMB will inform each Federal agency of the program and activities of each that the State has chosen to cover. Subsequently, the State should send all program coverage information (additions, deletions, other changes) directly to TVA.

Paragraph (b) provides that, once a State has established a process and made its program selections known to TVA, TVA will use the State's process concerning the programs and activities selected by the State as soon as feasible. While TVA will make every effort to use the State's process, there may be situations, on individual programs or projects, where TVA may not be able to do so for a time. TVA will make determinations concerning when to begin using the State's official process on a case-by-case basis and will let the States know when it will start to use the State process.

Paragraph (c) provides that TVA may establish deadlines by which States should inform TVA of changes in their program selection choices. A State may add or delete a program or activity from those it wishes to cover under the order at any time. However, in order for meaningful consultation to occur under the regulations, TVA may need a certain amount of "lead time" before it can adapt its procedures to the changed circumstances. For this reason, TVA may find it necessary to establish deadlines for program selection changes. These deadlines would simply be notifications to the States that, for example, if they wished to have consultation under the order begin with respect to a particular program on a given date, they would have to inform TVA of their program selection change a certain time (*e.g.*, 30 days, 45 days) prior to that date.

Section 1311.6 How does TVA give States an opportunity to comment on proposed financial assistance and direct development?

Paragraph (a) points out that the order would apply not only to comments prepared pursuant to the official State process but also to comments formulated by local elected officials to whom the State's consultation role has been delegated in specific instances. Section 3(a) of the order permits States to delegate, to local elected officials in specific instances, the review, coordination, and communication with Federal agencies that normally take place under the State process. This means that States may choose not only which programs and activities to cover but also who within the State has the opporutinity to carry out the consultation. States have complete discretion concerning delegation of their consultation role.

For example, a State could delegate to a single mayor the State's consultation role with respect to a project occurring in his or her city. The State could delegate all consultation under a particular program to officials of the local governments whose jurisdictions are affected by projects under the program. The State could delegate its consultation role for a particular program to local elected officials in cities above 250,000 population but not to local officials in smaller jurisdictions, or vice versa. In any case of delegation, the local official to whom the State's consultation role is delegated stands in the shoes of the official State process with respect to the order's consultation process. For example, efforts by TVA to reach a negotiated solution with the local official will be pursued directly with the official, not with the State itself.

The local official to whom the State's consultation role had been delegated would not send his or her comment directly to TVA under the order's process. Rather, the official would send the comment to TVA through the State single point of contact. TVA would work with the local official in attempting to reach an accommodation, but, if efforts at accommodation were unsuccessful, TVA would explain the nonaccommodation to the single point of contact as well as to the local official. Routing the delegated comment through the State single point of contact would alert TVA to the fact that the local official's comments should be dealt with under these procedures and make unnecessary a separate communication from the State to TVA informing TVA that the comment was an official comment of the State.

Section 2(b) of the order requires Federal agencies to communicate with State and local elected officials as early in the program planning cycle as is reasonably feasible to explain specific plans and actions. Paragraph (b) incorporates this provision of the order into these procedures. What the requirement means is TVA makes an effort to ensure that information on proposed actions or decisions of TVA is available to the States in sufficient time to be able to contribute meaningfully to TVA's decisionmaking process. For example, TVA would make sure that the State learned of a proposed Federal development project in time to make a meaningful response.

Paragraph (c) states that, as a general rule, States choosing to cover a particular program or activity will have at least 30 days (45 days in the case of interstate situations) to comment on proposed Federal financial assistance or direct Federal development activities before TVA commits itself to a given course of action. TVA, on a case-by-case basis, may allow a shorter period for comment if unusual circumstances make the shorter period necessary. Among the kinds of unusual circumstances that might necessitate a shorter comment period are, for example, an emergency or a statutory deadline. Paragraph (c) also provides that TVA may establish deadlines or timeframes for comment on particular actions.

Paragraph (d) makes an important point with respect to the way that communications between States and TVA would work under the order's process. Under the order, a State may organize the mechanics of its consultation process any way it chooses. However, in order to ensure that communications between TVA and the official State process flow efficiently, TVA strongly encourages States to establish a "single point of contact" for State communications with Federal agencies under the order's process. Channeling communications from the States to Federal agencies and from agencies back to the States through

a single point has obvious benefits from the point of view of administrative simplicity. In addition, it will enable TVA to know which communications to treat as official under the regulations. TVA needs a means of separating the letters from State and local elected officials to which it will respond through normal correspondence channels from those letters to which it will respond under the provisions of these regulations. States' use of a single point of contact will permit TVA to make this necessary administrative distinction. In the absence of a State process, or with respect to a program that a State has not selected for coverage, the provisions of the order and these procedures will not apply, however.

As stated earlier, issuance of these procedures is not intended to displace the many other opportunities TVA provides for the public and State and local officials to communicate their views on TVA programs and activities. These opportunities extend to all of TVA's activities, including its power program activities, and are not limited to just Federal financial assistance and direct Federal development programs. To the extent the State desires to use the formal Executive order process to communicate its views on TVA's Federal financial assistance and direct Federal development activities and programs, these regulations provide it the opportunity of doing so. The choice is the State's.

In order to assist TVA in responding to a State's comments under the order and to make any comments as meaningful as possible, TVA encourages the States to take into account in their comments any statutory or regulatory requirements or criteria which apply to the proposed activity, to indicate the magnitude of the State's concerns, and to reconcile any differences of opinion among State agencies or State and local officials to the extent feasible.

Section 1311.7 How does TVA make efforts to accommodate State and local concerns?

Paragraph (a) provides that when a State comments to TVA under the order and these regulations, TVA has three choices. First, TVA can accept the State's comments (*i.e.*, do as the State recommends). Second, TVA can reach a mutually agreeable solution with the State. This solution could differ from the original State position on the matter. Third, if TVA cannot accept the State's comments or reach a mutually agreeable solution, TVA will give the State a timely, simple explanation of TVA's reasons for not doing so. While TVA is not required to accept the State's comments or to begin discussions towards another solution, TVA does have an obligation under these procedures to provide a simple explanation of its decision.

Normally, the explanation could take any form which adequately communicates TVA's reasons for its decision to the State. A telephone call, a meeting, or a letter would perform this function. TVA has the discretion to choose the most appropriate mode of communicating the explanation in each case. TVA will, however, always respond in writing to any correspondence from a Governor.

Subdivision (a)(3)(iii) spells out the role of the single point of contact in receiving explanations from TVA. TVA will direct all such explanations to the single point of contact in each State that has one. Where accommodation discussions have occurred between TVA and another party in the State, the other party will also be provided such explanation.

Subparagraph (b)(1) provides that a nonaccommodation explanation will state that TVA will not implement its decision until 10 days after the explanation is provided to the single point of contact, except as provided in subparagraph (b)(2). This waiting period is intended to permit States to respond to TVA in cases of nonaccommodation before the program or activity is commenced. In a case in which TVA has provided a verbal explanation of a decision to the single point of contact, and the Governor subsequently has requested a written explanation, the 10-day period will start to run from the date of the original explanation to the single point of contact.

Subparagraph (b)(2) recognizes that there will be some situations in which TVA cannot observe the 10-day waiting period. These unusual circumstances could include, for example, a statutory deadline or an emergency that may make it infeasible for TVA to wait 10 days before implementing its decision. In a situation where TVA cannot observe the waiting period, the General Manager will review the decision before the nonaccommodation explanation is made and before TVA implements the decision. The nonaccommodation explanation will include TVA's reasons for determining that the 10-day waiting period is not feasible.

Section 1311.8 What are TVA's obligations in interstate situations?

In some cases, action taken by TVA in Federal financial assistance and direct Federal development programs may have an impact on interstate areas. In these situations, TVA has certain additional obligations. First, TVA will identify its direct Federal development of Federal financial assistance actions or decisions that have an impact on interstate areas. Having done so, TVA will, as provided in paragraph (b), notify the potentially affected States, whether or not they have established an official State process under the order. Except in unusual circumstances, TVA will provide the affected States an opportunity for comment of at least 45 days before TVA commits itself to a course of action. The increase in the minimum comment period from 30 to 45 days in interstate situations allows extra time for States to coordinate among themselves before providing views to TVA.

TVA, obviously, cannot require States to coordinate with each other on proposed Federal assistance or direct development having an impact on an interstate area. However, TVA strongly encourages each affected State to share its comments with and obtain the views of other affected States, using the other State's single point of contact, if there is one, or an appropriate State official if there is not a single point of contact. TVA encourages States to reconcile differences where they exist so that the States can present TVA with a unified position. If the affected States provide TVA with conflicting recommendations, TVA will attempt to reconcile such conflicts before making a decision.

Section 1311.9 [Reserved].

Section 1311.10 May TVA waive any provision of these regulations?

This section allows TVA to waive any provision of these regulations in an emergency. TVA expects to use this provision sparingly, since TVA's policy is to carry out the order as fully as it can.

Attachment—List of Proposed Exclusions

TVA proposes to exclude the below listed categories of Federal financial assistance and direct Federal development activities from coverage under these procedures:

1. Agreements involving minor land uses—TVA's experience has been that these kinds of actions normally do not have a significant impact on area and community planning or on the physical environment.

2. Transfer or acquisition of land or landrights except transfers or acquisitions for major industrial, recreation or commercial developments—It has been TVA's experience that these kinds of actions normally do not have a significant impact on area or community planning.

3. Minor research or demonstration projects with State and local agencies or

private organizations—TVA's experience has been that these kinds of activities normally do not have a significant impact on area or community planning.

4. Technical and planning assistance activities—TVA's experience has been that these kinds of activities do not have a significant impact on area or community planning.

5. Approvals under section 26a of the TVA Act of minor structures, boat docks, or shoreline facilities—TVA's experience has been that these kinds of activities normally do not have a significant impact on area or community planning.

6. TVA's power program—TVA's power program is self-financing and does not use appropriated funds. It is neither a Federal financial assistance program nor a direct Federal development activity and, accordingly, not subject to the Executive order or these regulations. TVA presently coordinates with State and local governments all power program construction activities for which an environmental impact statement is prepared under TVA's NEPA procedures or which significantly affect the governmental responsibilities of a State or local government (those power-construction activities which would place potential demands on or impact State or local services such as police and fire protection, health care, sewage treatment, solid waste disposal, and transportation. TVA intends to continue to coordinate such activities and will include coordination with the State single point of contact if a State desires.

W. F. Willis,

General Manager.

List of Subjects in 18 CFR Part 1311

Intergovernmental relations.

It is proposed to amend Title 18 of the Code of Federal Regulations by adding Part 1311 as follows:

PART 1311—INTERGOVERNMENTAL REVIEW OF TENNESSEE VALLEY AUTHORITY FEDERAL FINANCIAL ASSISTANCE AND DIRECT FEDERAL DEVELOPMENT PROGRAMS

Sec.

1311.1 What is the purpose of these regulations?
1311.2 What definitions apply to these regulations?
1311.3 What programs and activities of TVA are subject to these regulations?
1311.4 [Reserved]
1311.5 What procedures apply to a State's choice of programs under the order?
1311.6 How does TVA give States an opportunity to comment on proposed Federal financial assistance and direct Federal development?
1311.7 How does TVA make efforts to accommodate State and local concerns?
1311.8 What are TVA's obligations in interstate situations?
1311.9 [Reserved]
1311.10 May TVA waive any provision of these regulations?

Authority: Tennessee Valley Authority Act of 1933, 48 Stat 58, *as amended*, 16 U.S.C. 831–831dd (1976; Supp. V, 1981); section 401(b) of the Intergovernmental Cooperation Act, 42 U.S.C. 4231(b) (1976); Executive Order No. 12372.

§ 1311.1 What is the purpose of these regulations?

(a) The regulations implement Executive Order No. 12372, issued July 14, 1982, titled "Intergovernmental Review of Federal Programs" and the Intergovernmental Cooperation Act and are intended to assist TVA in carrying out its responsibilities under the TVA Act.

(b) Executive Order No. 12372 is intended to foster an intergovernmental partnership and a strengthened federalism by relying on State and local processes for State and local government coordination and review of proposed Federal financial assistance and direct Federal development.

(c) The order and these regulations are intended only to improve the internal management of TVA. Neither the order nor these regulations are intended to create any right or benefit enforceable at law by a party against TVA.

§ 1311.2 What definitions apply to these regulations?

"TVA" means the Tennessee Valley Authority.

"Order" means Executive Order No. 12372, issued July 14, 1982, and titled "Intergovernmental Review of Federal Programs."

"State" means any of the 50 States, the District of Columbia, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, Guam, American Samoa, the U.S. Virgin Islands, or the Trust Territory of the Pacific Islands.

§ 1311.3 What programs and activities of TVA are subject to these regulations?

(a) TVA publishes in the **Federal Register** a list of TVA's programs and activities that are subject to these regulations. Except where specifically excluded, TVA's Federal financial assistance and direct Federal development programs and activities are subject to these regulations.

(b) With respect to programs and activities that are subject to these regulations and that a State chooses to cover under § 1311.5 of this part, TVA, to the extent permitted by law, uses the official State process to determine official views of State and local elected officials. TVA will utilize other means to respond to any substantive comments it receives on any of its other programs and activities.

§ 1311.4 [Reserved]

§ 1311.5 What procedures apply to a State's choice of programs under the order?

(a) Each State that adopts a process under the order notifies TVA of TVA's Federal financial assistance and Federal direct development programs that the State chooses to cover under the order.

(b) TVA uses a State's process under the order as soon as feasible, depending on individual programs and projects, after the State notifies TVA of its program choices.

(c) States may change their program choices under the order at any time. TVA may establish deadlines by which States are required to inform TVA of changes in their program choices.

§ 1311.6 How does TVA give States an opportunity to comment on proposed Federal financial assistance and direct Federal development?

(a) This section applies to all comments received from a State pursuant to an official process it has established under the order, including comments where the State has delegated to local elected officials the review, coordination, and communication with TVA. This section and the order's process supplement TVA's many other coordination processes and do not replace such processes.

(b) With respect to programs and activities that are subject to the order and these procedures and that a State chooses to cover under § 1311.5 of this Part, TVA, to the extent permitted by law, communicates with State and local elected officials as early in a program planning cycle as is reasonably feasible to explain specific plans and actions.

(c) Except in unusual circumstances, TVA gives States at least 30 days to comment on any proposed Federal financial assistance or direct Federal development (see § 1311.8 of this Part for comment periods pertaining to interstate situations); and TVA may establish deadlines for States to complete their review of TVA programs and projects and submit their comments to TVA.

(d) TVA responds as provided in these regulations to all comments from a State that are provided through a State

office or official that acts as a single point of contact under the order between the State and all Federal agencies.

§ 1311.7 How does TVA make efforts to accommodate State and local concerns?

(a) If a State provides comments to TVA in accordance with § 1311.6(d) of this Part, TVA:

(1) Accepts the State's comments;

(2) Reaches a mutually agreeable solution with the State; or

(3) (i) Provides the State with a timely explanation of the basis for TVA's decision;

(ii) TVA always responds in writing to correspondence from Governors.

(iii) If the State has designated a State office or official as a single point of contact between the State and all Federal agencies, TVA provides any explanation under paragraph (a)(3) of this section to that office or official as well as to any local official who acted for the State on the proposed action.

(b) In any explanation under subparagraph (a)(3) of this section, TVA informs the State that:

(1) TVA will not implement its decision for 10 days after the explanation is provided; or

(2) The General Manager has reviewed the decision and determined that, because of unusual circumstances, the 10-day waiting period should be waived.

§ 1311.8 What are TVA's obligations in interstate situations?

TVA is responsible for:

(a) Identifying proposed TVA Federal financial assistance and TVA direct Federal development that have an impact on interstate areas;

(b) Notifying the affected States, including States that have not adopted a process under the order; and

(c) Except in unusual circumstances, providing the affected States an opportunity of at least 45 days to comment.

§ 1311.9 [Reserved]

§ 1311.10 May TVA waive any provision of these regulations?

In an emergency, TVA may waive any provision of these regulations.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Rules and Regulations

Federal Register
Vol. 48, No. 45
Monday, March 7, 1983

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

8 CFR Part 235

Inspections of Persons Applying for Admission; U.S. Citizen Identification Card Discontinued

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Final rule.

SUMMARY: This final rule discontinues authorization for issuing the U.S. Citizen Identification Card (Form I–197). Cards presently in circulation will remain valid, but there is no provision for replacement cards. The card is not required by law and discontinuing its issuance will result in saving of Service resources.

EFFECTIVE DATE: April 7, 1983.

FOR FURTHER INFORMATION CONTACT:
For General Information: Stanley J. Kieszkiel, Acting Instructions Officer, 425 I Street NW., Washington, D.C. 20536, Telephone: (202) 633–3048
For Specific Information: Daniel J. Stephan, Immigration Inspector, 425 I Street NW., Washington, D.C. 20536, Telephone: (202) 633–2075.

SUPPLEMENTARY INFORMATION: On November 4, 1982, at 47 FR 49974, the Service published a proposed rule in the **Federal Register** to discontinue issuing Form I–197, the U.S. Citizen Identification Card, and the related application, Form I–196. The thirty-day comment period ended December 6, 1982.

This final rule discontinues the U.S. Identification Card, Form I–197, and it will no longer be issued. Identification cards in circulation will remain valid, but there will be no provision for replacing them. The intent of this rule is to maximize available Service resources. Form I–197 is not a required document and it was issued simply as a convenience. With the limited Service resources to process applications and petitions involving documents and actions required by law, it is impractical and wasteful to continue funding for a document of convenience. A fee study conducted in early 1982 revealed that Service processing cost per card was $11.40. The projected 2-year savings, based on FY '82 applications and modest anticipated increases for FY '83, was $831,000.00. This dollar estimate, however, may actually be somewhat greater because costs for issuing replacement cards were not included in the projection. The impact on U.S. citizens who apply for the card, primarily new U.S. citizens and those who speak little or no English, will be limited because the rule is not retroactive (previously issued cards remain in effect), and alternative documents, such as the U.S. passport, serve the same purpose.

There were five comments in response to the published proposal. Three came from private citizens and two from INS field officers.

Comments against abolishing the U.S. Citizen Identification Card included:

1. The card is an "invaluable tool" in the inspection of U.S. Citizens who speak little or no English and absence of the card would cause inspectional delays.

2. The cost of inspectional delays would overshadow projected savings.

3. Loss of the card is a violation of a citizen's "right to free movement".

4. Alternative documents that could be used in place of Form I–197 are not as convenient, and are more susceptible to fraudulent use and counterfeiting.

The primary concern was with those applicants for admission who claim U.S. citizenship, but who speak little or no English. The U.S. Citizen Identification Card has provided a means by which an applicant could quickly establish to the satisfaction of the inspecting officer that he or she is a U.S. citizen. Without the card, future applicants for admission would presumably have greater difficulty proving their claim to U.S. citizenship, and this could delay their inspection. In some instances, U.S. citizens would be unable to establish eligibility to enter the U.S., and would have to seek other means of proving the citizenship claim.

Initially, some delays may occur; however, there are overriding factors which must be considered: First, since cards in circulation remain in effect, the impact would be far less than predicted. It would be limited, generally, to new citizens. Once it was clear to this group that alternate documents are available and can be used to establish citizenship, their compliance in using alternate documents will further reduce the possibility of inspectional delays.

Secondly, the impact will be limited because many Service officers are fluent in Spanish and can readily determine both true and false claims to U.S. citizenship by means of the verbal inspection, whether or not documents are presented.

More importantly, although the impact of inspectional delays may be a factor in the decision, it is not the central issue. The issue is whether or not the Immigration and Naturalization Service, with resources already strained in providing essential services to the public, should continue to devote resources to issue a document not required under any section of law. Savings projected for the next two years would be substantial. Cost savings is an important consideration, but it is also noted that improvement of service to the public, by devoting resources where needed most, is in line with INS management objectives to increase overall efficiency. When a negative impact is limited to relatively few, management must opt for the greatest good. Executive Order 12291 of February 17, 1981 reads, in part: "* * * agencies shall set regulatory priorities with the aim of maximizing the aggregate net benefits to society".

One commenter stated that abolishing the card would be "counter-productive—both as to expense and manpower". This argument makes the same presumption as discussed above, i.e., the number of inspectional delays will be high. Delays are translated into dollars, and the commenter asserts that the cost to the government in inspector time will exceed the projected savings by abolishment of the card. As indicated previously, there are factors which will serve to reduce the likelihood and frequency of delays.

A private agency commented that, in reference to abolishment of the card, "To our U.S. citizen clients its importance is as great as the I–551 is to

a Legal Permanent Resident". The commenter further asserted that community members might, with abolishment of the card, challenge the Immigration and Naturalization Service in court, "if a citizen's rights are violated to free movement".

Any violation of a citizen's rights is subject to due process, including court challenges. But free movement is not jeopardized by abolishing the card. It is not a required document under any section of U.S. law. The burden of establishing to the satisfaction of the inspecting officer that an applicant for admission to the U.S. is eligible to enter as a citizen rests with the applicant. The fact that a convenient way of so doing is removed does not alter the burden of proof or the citizen's right to enter the U.S. after he or she has satisfied that burden. Nor is a citizen's rights violated when he or she fails to prove citizenship as required under the law. It is true that some delays and inconvenience may result initially, but their number should be limited by the common sense of the citizens affected and the judgment of officers involved. In no way will abolishment of the card affect any citizen's *right* to enter the U.S. once he or she has proven citizenship. At most, it will have a limited effect on convenient access to an acceptable document which demonstrates U.S. citizenship.

Four of the five commenters expressed their concern that alternative documents are not as convenient as the wallet-sized Form I–197, and are more susceptible to fraudulent use (primarily impersonation) and counterfeiting.

The statement that the U.S. Citizen Identification Card is less susceptible to fraudulent use is only partially true. The Service has intercepted, on a fairly regular basis, counterfeit and photo-substituted forms I–197. Although fewer cards have been intercepted than counterfeit birth certificates, it is obvious there are far fewer cards in circulation than birth certificates. Much like the birth certificate, there are no security checkpoints on the Form I–197. This may further explain why fewer are intercepted, and invalidates the argument that the card is "the most foolproof indicia of US. Citizenship."

Irrespective of the frequency with which documents are used fraudulently, the question is whether or not other documents may be used in place of the card. Every alternate document that is routinely used as proof of U.S. citizenship was promulgated by federal and state laws long before the ID card came into being, i.e., U.S. passports, naturalization certificates, and State birth certificates. The likelihood of fraudulent use of these documents may have a bearing on law enforcement capabilities, (e.g., detection of counterfeit documents or imposters) but it has no bearing on the citizen's use of acceptable documents in place of the identification card, other than convenience.

In accordance with 5 U.S.C. 605(b), the Commissioner of the Immigration and Naturalization Service certifies that this rule, if promulgated, will not have a significant economic impact on a substantial number of small entities.

This rule will not be a major rule as defined in Section 1(b) of E.O. 12291.

List of Subjects in 8 CFR Part 235

Aliens, Immigration, Inspections, U.S. citizens.

Accordingly, Chapter I of Title 8 of the Code of Federal Regulations is amended as follows:

PART 235—INSPECTION OF PERSONS APPLYING FOR ADMISSION

Section 235.10 is revised to read as follows:

§ 235.10 U.S. Citizen Identification Card.

(a) *General.* The U.S. Citizen Identification Card, Form I–197, is no longer issued by the Service but valid existing cards will continue to be acceptable documentation of U.S. citizenship. Possession of the identification card is not mandatory for any purpose. A U.S. Citizen Identification Card remains the property of the United States. Because the identification card is no longer issued, there are no provisions for replacement cards.

(b) *Surrender and voidance*—(1) *Institution of proceeding under section 236, 242 or 342 of the Act.* A U.S. citizen identification card must be surrendered provisionally to a Service office upon notification by the district director that a proceeding under section 236, 242 or 342 of the Act is being instituted against the person to whom the card was issued. The card shall be returned to the person if the final order in the proceeding does not result in voiding the card under this paragraph. A U.S. Citizen Identification Card is automatically void if the person to whom it was issued is determined to be an alien in a proceeding conducted under section 236 or 242 of the Act, or if a certificate, document, or record relating to that person is cancelled under section 342 of the Act.

(2) *Investigation of validity of identification card.* A U.S. Citizen Identification Card must be surrendered provisionally upon notification by a district director that the validity of the card is being investigated. The card shall be returned to the person who surrendered it if the investigation does not result in a determination adverse to his or her claim to be a United States citizen. When an investigation results in a tentative determination adverse to the applicant's claim to be a United States citizen, the applicant shall be notified by certified mail directed to his or her last known address. The notification shall inform the applicant of the basis for the determination and of the intention of the district director to declare the card void unless within 30 days the applicant objects and demands an opportunity to see and rebut the adverse evidence. Any rebuttal, explanation, or evidence presented by the applicant must be included in the record of proceeding. The determination whether the applicant is a United States citizen must be based on the entire record and the applicant shall be notified of the determination. If it is determined that the applicant is not a U.S. citizen, the applicant shall be notified of the reasons, and the card deemed void. There is no appeal from the district director's decision.

(3) *Admission of alienage.* A U.S. Citizen Identification Card is void if the person to whom it was issued admits in a statement signed before an immigration officer that he or she is an alien and consents to the voidance of the card. Upon signing the statement the card must be surrendered to the immigration officer.

(4) *Surrender of void card.* A void U.S. Citizen Identification Card which has not been returned to the Service must be surrendered without delay to an immigration officer or to the issuing office of the Service.

(c) *U.S. Citizen Identification Card previously issued on Form I–179.* A valid U.S. Citizen Identification Card issued on Form I–179 continues to be valid subject to the provisions of this section.

(Sec. 103, 66 Stat. 173; 8 U.S.C. 1103. Interpret or apply secs. 101, 212, 213, 221, 234, 235, 236, 237, 238, 242, 66 Stat. 166, as amended, 182, as amended, 188, 191, as amended, 198, 200, 201, 202, 206, as amended; 8 U.S.C 1101, 1182, 1183, 1201, 1224, 1225, 1226, 1227, 1228, 1252)

Dated: February 25, 1983.

Doris M. Meissner,

Executive Associate Commissioner, Immigration and Naturalization Service.

[FR Doc. 83-6798 3-4-83; 8:45 am]

BILLING CODE 4410-10-M

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

9 CFR Parts 112 and 113

[Docket No. 82-095]

Viruses, Serums, Toxins, and Analogous Products; Revision of Autogenous Biologics Requirements

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: This amendment revises the requirements for autogenous biologics. Restrictions regarding these products are removed to permit recommendations for use in herds or flocks other than the one from which the organisms were isolated. Experience has shown that organisms from one herd or flock can be effectively used to prepare autogenous biologics to combat the diseases at other locations. Samples furnished for Veterinary Services testing are increased for serials authorized to be prepared in large quantities. The time for initiating preparation of a product is increased to 12 months from date of isolation. Maximum expiration date is increased to 18 months from harvest. Observation periods for purity and safety tests are increased to correspond to other licensed products, although shipment will continue to be permitted before tests are concluded.

EFFECTIVE DATE: This amendment becomes effective March 1, 1983.

FOR FURTHER INFORMATION CONTACT: Dr. David A. Espeseth, Senior Staff Veterinarian, Veterinary Biologics Staff, USDA, APHIS, VS, Room 829, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301-436-8245.

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

This final rule contains no new or amended recordkeeping, reporting, or application requirement of any type of information collection requirement subject to the Paperwork Reduction Act of 1980.

Executive Order 12291

This final rule has been reviewed under USDA procedures established in Secretary's Memorandum No. 1512-1 to implement Executive Order 12291 and has been classified as a "Nonmajor Rule."

The final rule will not have a significant effect on the economy and will not result in a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of the United States-based enterprises to compete with foreign-based enterprises, in domestic or export markets. These revisions will reduce regulatory requirements.

Certification Under the Regulatory Flexibility Act

Dr. Harry C. Mussman, Administrator of the Animal and Plant Health Inspection Service, has determined that this action will not result in an adverse economic impact on a substantial number of small entities. Small entities are defined as independently owned firms not dominant in the field of veterinary biologics manufacturing. This action will result in a beneficial effect to licensed producers of autogenous biologics by enabling production of larger serials to be used over larger geographical areas.

Background

Current regulations restrict the volume of a serial of an autogenous biologic to 100,000 doses for poultry and 1,000 doses for other animals (9 CFR 113.98). The regulations also state that autogenous biologics must be made using isolates from the herd or flock in which the biologic will be used and prohibit label recommendations for use of the product in a herd or flock which is different from the one where the isolates were obtained (9 CFR 113.98 and 112.7).

This amendment provides a mechanism for allowing the use of autogenous biologics in herds or flocks which are different from those where the isolate was obtained. It also deletes the prohibition against labels recommending such use in different herds or flocks. Experience has shown that organisms from one herd or flock can be effectively used to prepare autogenous biologics to combat the diseases at other locations.

The 100,000 and 1,000 dose limitation for autogenous biologics are deleted since more doses might be needed if the product is used at additional locations. For similar reasons, this amendment extends the expiration dating of autogenous biologics from 6 months to 18 months. The maximum period permitted for use of a culture is extended from the current period of 30 days to 12 months since such longer period is necessary if cultures are used to make product to be used at more than one location.

Finally, in light of the other changes being proposed, this amendment adds a provision in 9 CFR 113.3 of the regulations which specifically provides for the sampling of autogenous biologics other than bacterins. This amendment also reduces the number of samples required if a serial of autogenous vaccine does not exceed 50 containers.

Comments Received

On July 16, 1982, a notice of proposed rulemaking was published in the Federal Register at 47 FR 31004 discussing this revision and soliciting comments.

Responses were received from one professional organization, seven licensed biologics producers (one currently licensed to produce an autogenous biologic), one private diagnostic laboratory, and one member of a university staff.

All except three responses gave unqualified approval. The university staff member approved but objected to possible use of live organisms. Products consisting of live organisms are prohibited in the first paragraph of 9 CFR 113.98, which has not been revised. Two licensed manufacturers, neither of which produce autogenous biologics, objected to revisions removing serial size limits and extending time for preparation and use. The objections were based on the premise that products meant for "emergency use" need not be produced in great amounts and should be used in a relatively short period of time. However, it is the Department's opinion that to continue the present restrictions on autogenous products would constitute an overly restrictive view of "emergency use" since such products may be needed in situations which are other than acute emergencies in a single herd. This has been effectively controlled in the past by requiring special authorization from the Deputy Administrator when large quantities are prepared, extended use of a culture is requested, or expiration dating is increased. This type of special authorization will continue to be required where extended use of an autogenous biologic is requested. State authorities' concurrence will be an additional factor in preventing improper application of such products where more extensive need is demonstrated.

After due consideration of all relevant matters, including the proposal set forth in the above notice and under authority in the Virus-Serum-Toxin Act of March 4, 1913 (21 U.S.C. 151-159), the amendment of Parts 112 and 113, Subchapter E, Chapter I, Title 9 of the Code of Federal Regulations, as published in the above notice, is hereby adopted as follows:

List of Subjects

9 CFR Part 112

Animal biologics, Exports, Imports, Labeling, Packaging and containers, Transportation.

9 CFR Part 113

Animal biologics.

PART 112—PACKAGING AND LABELING

Section 112.7 (g) is revised to read:

§ 112.7 Special additional requirements.

* * * * *

(g) In the case of autogenous biologics, labels shall include the recommended dose, the number of repeat doses, if any, and the interval recommended between doses; *Provided,* That the label shall not show:

(1) The identity of the herd or flock from which the culture was isolated; or

(2) The name(s) of the person(s) responsible for making the isolations.

* * * * *

PART 113—STANDARD REQUIREMENTS

Section 113.3(b) (2) and (10) are revised to read:

§ 113.3 Sampling of biological products.

* * * * *

(b) * * *

(2) *Bacterins and bacterin-toxoids.* (i) Twelve samples of single-fraction bacterins and bacterin-toxoids.

(ii) Thirteen samples of double-fraction bacterins and bacterin-toxoids.

(iii) Fourteen samples of triple-fraction bacterins and bacterin-toxoids.

(iv) Fifteen samples of bacterins and bacterin-toxoids containing more than three fractions.

* * * * *

(10) *Autogenous biologics.* Two samples from each serial of autogenous biologics shall be selected; *Provided,* That, if the serial exceeds 50 containers, 12 samples shall be selected.

* * * * *

Section 113.98(a)(2), (b), and (c) are revised to read:

§ 113.98 Autogenous biologics.

(a) * * *

(2) Under normal circumstances, isolates from one herd or flock shall not be used to prepare an autogenous biologic for another herd or flock. However, the Deputy Administrator may authorize preparation of an autogenous biologic for use in adjacent herds or flocks which are considered to be at risk. The Deputy Administrator may authorize preparation of an autogenous biologic for use in other herds or flocks (not adjacent) which he considers to be at risk, with written concurrence from proper State authorities.

* * * * *

(b) Unless otherwise authorized by the Deputy Administrator, each serial of an autogenous biologic shall be subject to the following restrictions:

(1) Autogenous biologics shall be prepared for emergency use only. Organisms shall not be used for production more than 12 months from isolation.

(2) The expiration date shall not exceed 18 months from harvest.

(c) *Testing Requirements.* Final container samples of completed product from each serial and subserial shall be tested for purity as prescribed in § 113.26, and for safety as prescribed in § 113.33(b) or § 113.38 except that:

(1) Serials which are satisfactory after the third day observation of purity test cultures and safety test animals may be released for shipment to the customer and the tests continued throughout the required period; and

(2) Serials released on the basis of satisfactory results of third day observations shall be immediately recalled if evidence of contamination occurs in test cultures or if any of the safety test animals sicken or die during the observation period. (37 Stat. 832–833 (21 U.S.C. 151–158))

Done at Washington, D.C., this 1st day of March 1983.

K. R. Hook,

Acting Deputy Administrator, Veterinary Services.

BILLING CODE 3410-34-M

DEPARTMENT OF THE TREASURY

Comptroller of the Currency

12 CFR Part 29

[Docket No. 83-10]

Adjustable-Rate Mortgages

AGENCY: Office of the Comptroller of the Currency, Treasury.

ACTION: Final rule.

SUMMARY: The Office of the Comptroller of the Currency (Office) is revising its adjustable-rate mortgage (ARM) regulation (12 CFR Part 29). The revisions increase the flexibility of national banks to design ARM instruments by eliminating: (1) Limits on the frequency of payment and interest rate adjustments and (2) limits on the magnitude of interest rate adjustments. The revised regulation removes the negative amortization cap and the requirement that the monthly payment be reset at a fully amortizing level at least once every five years. Instead, the revised regulation requires that the monthly payment be reset at a level sufficient to begin reducing the outstanding debt no later than during the 21st year. The revised regulation eliminates the reporting requirement associated with payment-capped mortgage plans. The revised regulation retains (1) the requirement that changes in the ARM interest rate be tied to changes in an interest rate index and (2) most of the existing disclosure requirements. The revised regulation is expected to increase the flow of bank funds into home mortgage lending.

EFFECTIVE DATE: March 7, 1983.

FOR FURTHER INFORMATION CONTACT: David Nebhut, Financial Economist, Economic and Policy Analysis Division, (202) 447–1924, Francis S. Path, Attorney, or Jerome L. Edelstein, Attorney, Legal Advisory Services Division, (202) 447–1880, or Judith Naiman, Industry and Public Affairs, (202) 447–0934, Office of the Comptroller of the Currency, Washington, D.C. 20219.

SUPPLEMENTARY INFORMATION:

Special Analyses

The Secretary of the Treasury has expressly exempted this regulation from the requirement of preparing a regulatory flexibility analysis because it will not have a significant economic impact on a substantial number of small entities. The revised regulation is expected to result in an increased flow of bank funds into home mortgage lending and will eliminate the reporting requirement associated with payment-capped mortgage plans. Any costs incurred by small banks as a result of the revisions are likely to result from adjustments in computer programs and employee training. Those costs are expected to be minimal.

The Office of the Comptroller of the Currency has determined that the regulation does not constitute a major rule within the meaning of Executive Order 12291. Accordingly, a regulatory impact analysis will not be prepared on the grounds that the revision (1) will not have an annual effect on the economy of $100 million or more, (2) will not result in a major increase in the cost of bank operations or government supervision nor is it likely to generate substantially higher payments for borrowers, and (3) will not have a significant adverse effect on competition, employment,

investment, productivity, innovation, or competition with foreign-based entities.

Two modifications of the regulation are the removal of the caps on interest rate adjustments and the removal of the limit on negative amortization. The March 27, 1982 ARM regulation permitted interest rate increases in excess of the periodic caps to be carried over to future time periods. Therefore, the removal of the interest rate caps should have a small effect on the overall amount that a borrower will pay over the life of the mortgage. The Office emphasizes that the removal of interest rate caps from the regulation does not preclude the imposition of caps by lenders. Lenders may choose to design instruments with interest rate caps in order to limit their credit risk.

The likely effect of the removal of the limit on negative amortization is more complicated to evaluate, but the Office believes that the removal of the limit will not substantially increase the borrower's cost of a loan relative to the amount actually borrowed. Negative amortization, in effect, means that the lender is advancing a portion of the interest due in a given month to the borrower. Therefore, higher payments on a loan that has had higher amortization are analogous to higher payments required to repay a larger principal balance. Further, increasing the amount of permissible negative amortization will facilitate the offering of adjustable-rate mortgages with reduced monthly payments early in the loan term.

Overall, the revision of the regulation will enhance the competitive position of national banks by permitting them to develop ARM instruments that are responsive to borrower needs.

Background and Analysis

On March 27, 1981 the Office adopted a final rule establishing a framework within which national banks may make or purchase mortgage instruments that are responsive to changing interest rates and to bank deposit structures. (46 FR 16932). Technical amendments to that regulation were made in April 1982. (47 FR 13775, April 1, 1982). The ARM regulation provided sufficient flexibility to accommodate most adjustable-rate mortgage lending programs then in existence. To promote continued innovation and experimentation, section 29.9 of the rule permitted national banks to submit for review by the Office of the Comptroller of the Currency adjustable-rate mortgage plans that offer borrowers sufficient protection against payment volatility and provide for timely repayment of the loan but do not necessarily conform to all of the limitations imposed by the regulation.

Under § 29.9, the Office has permitted approximately 40 national banks to offer adjustable-rate mortgages that incorporate features not authorized by the ARM regulation. Most of the nonconforming ARM programs contain no caps on interest rates or on negative amortization and some use interest rate indexes not authorized by the Office's regulation.

The ARM rule issued in 1981 was an interim measure intended to smooth the transition from a market involving almost exclusively level-payment, fixed-rate mortgage loans to a market with a varity of flexible mortgage instruments. The movement from standard fixed-rate mortgages to a variety of alternative mortgage instruments including ARMs, shared-appreciation mortgages, and mortgages designed to accelerate repayment of principal has occurred rapidly.

Several factors have been responsible for the rapid changes in the mortgage market. One factor is the increased flexibility under which other mortgage lenders operate. In April 1981 the Federal Home Loan Bank Bank Board (FHLBB) issued a regulation permitting federally chartered savings and loan associations to offer a wide variety of adjustable mortgage loan instruments. (46 FR 24148). In July 1981 the National Credit Union Administration issued a similar regulation governing ARM lending by federally chartered credit unions, and the FHLBB amended its regulation to permit graduated-payment adjustable mortgage loans (46 FR 38669 and 46 FR 37285). In August 1982 the FHLBB replaced its several regulations governing alternative mortgage lending by federally chartered savings and loan associations with a single regulation that broadly authorizes such institutions to make a variety of alternative mortgage loans. (47 FR 36612). A number of states now permit state-chartered financial institutions to make ARMs that are more flexible than those permitted by the Office's regulation. Most recently, Title VIII of Pub. L. 97–320, the Garn-St Germain Depository Institutions Act of 1982 (DIA), enacted in October 1982, authorized state-chartered financial institutions to offer any alternative mortgage loans that similar federally chartered institutions are authorized to offer. (The Office amended 12 CFR Part 29 in December 1982 to apply the ARM regulation to state-chartered banks. (47 FR 55911).)

A second factor contributing to the development of the ARM market has been the creation of a secondary market in adjustable-rate mortgages. In June 1981 the Federal National Mortgage Association (FNMA) announced plans to purchase eight different types of ARMs. In early 1982 FNMA announced plans to purchase graduated-payment versions of three of its ARM plans. Of FNMA's eleven plans, only two are consistent with the Office's March 27, 1981 ARM regulation. The Office has permitted national banks to offer seven of the nonconforming FNMA plans under § 29.9 of the March 27, 1981 ARM regulation.

On June 2, 1982 the Office published, in the **Federal Register**, proposed changes in the adjustable-rate mortgage regulation. (47 FR 23944). Key differences between that proposal and the March 27, 1981 ARM regulation are described below.

(1) The regulation (as amended in April 1982) limited banks to five interest rate indexes. The proposed regulation would permit banks to use as an interest rate index any interest rate that was readily available to and verifiable by borrowers, and was beyond the control of the bank.

(2) The regulation prohibited interest rate adjustments that occurred more frequently than once every six months. The proposal did not include that prohibition.

(3) The regulation limited the magnitude of interest rate adjustments to not more than one percentage point per six-month period between rate adjustments and to not more than five percentage points at any single rate adjustment. The proposal did not include those limitations.

(4) The proposal did not include the requirement that any periodic or aggregate limits on interest rate changes apply to both increases and decreases.

(5) The regulation limited negative amortization to one percent of the outstanding loan balance at the beginning of any fixed-payment period times the number of six-month periods between payment adjustments. It also required that payments be reset at a fully amortizing level at least once every five years. The proposal replaced those limitations with a requirement that the payment be set at a level sufficient to begin reducing the outstanding loan principal no later than during the 21st year of the loan term and to amortize the entire principal of the loan without a substantial balloon payment by the end of the 30th year.

(6) The regulation prohibited the charging of fees for interest rate or payment adjustments and permitted prepayment fees only up until 30 days before the first rate adjustment on an

ARM. The proposal did not include those restrictions.

(7) The proposal included modifications of the disclosure requirements of the March 27, 1981 regulation. Those modifications were designed to reflect the increased flexibility offered under the proposed regulation.

General Summary of Comments

The Office received 82 comment letters in response to the proposed revisions to 12 CFR Part 29. Letters were received from national and state-chartered banks, other mortgage lenders, a law firm, trade associations, a labor organization, state regulatory officials, community and consumer groups, and individuals.

The majority of commenters supported the proposed revisions to the regulation. The view was expressed that the increased flexibility permitted by the proposed revisions would enable national banks to compete effectively with other mortgage lenders. Opposing the revisions were those who voiced concern that the increased flexibility to design programs would add to borrower confusion and hamper their ability to shop for the most appropriate loan. They were concerned that the regulation would provide insufficient borrower protections and could raise the cost of housing. Opponents were further concerned that the regulation could have particularly unfavorable consequences for women and minorities seeking housing credit.

Specific Provision of the Revised Regulation

Definition

(a) *Scope of Definition.* The final rule retains the definition in the March 27, 1981 regulation. An ARM is defined as any loan made to finance or refinance the purchase of and secured by a lien on a one- to four-family dwelling that permits the lender to adjust the interest rate periodically.

Although the proposed revision did not change the definition of an ARM, the Office received a number of comments regarding what types of loans should be included under this regulation. Some stated that commercial mortgages or nonpurchase-money loans secured by real estate should be exempted; others felt that such loans should be included. Some argued that the regulation should apply only to owner-occupied dwellings; others felt that mortgages on investment properties and nonpurchase-money mortgages should be included in the regulation.

In most cases a bank's position on the scope of the definition reflected applicable state law. Banks in states with restrictions on nonpurchase-money adjustable-rate loans secured by real estate expressed a desire for the Office's preemption of state law to be extended to such loans. Conversely, banks making such loans without state-imposed restrictions desired a limited definition.

The regulation is intended to improve the availability of mortgage funds for purchasing residential property and to assure that borrowers are provided with information regarding the operation of their loans. It is not the Office's intent to regulate adjustable-rate loans made for other purposes and, therefore, the Office has retained the limited definition. The Office recognizes the concerns of banks subject to limits on adjustable-rate lending and is considering whether to act to expand the power of national banks to make nonpurchase-money loans secured by real estate regardless of any state-law limitations.

(b) *Clarification of Definition.* Refinancing includes any situation where there is a remaining balance on an outstanding mortgage loan and where the bank is issuing a new ARM loan which will in some manner supersede or relate to the outstanding mortgage loan. Refinancing includes situations where: (1) All or part of the ARM loan proceeds are used to pay off an original purchase-money mortgage loan, (2) an existing purchase-money mortgage loan is consolidated with the new mortgage loan to form a consolidated ARM loan, regardless of how the proceeds of any new advance are used, or (3) a second lien loan results in a recasting of the terms of the existing purchase-money loan. These examples are not an all-inclusive list.

An example of a situation that does not fall under the refinancing definition of Part 29 is when the purchase-money mortgage has been paid off and the homeowner is applying for a new loan secured by a lien on the existing dwelling.

The definition does not include mortgage loans made to a builder or real estate developer when the builder or real estate developer intends to resell the structure as soon as the construction is completed. Such a loan is made to finance the working capital needs of a construction business rather than the purchase of a dwelling. The expected source of repayment is the contemplated sale of the finished houses. If a loan to an individual is made solely to finance construction and is not made to finance the purchase of the newly constructed dwelling on a permanent basis, the loan would not be subject to the ARM regulation. This requires that the permanent, *i.e.*, purchase, financing be undertaken by either the construction lender or by some other financially responsible lender under a binding commitment entered into as of the time the construction financing commences. If such a binding take-out commitment is present, the construction phase of the financing is outside the scope of this regulation.

Interest Rate Index

(a) *Choice of Index.* The revised regulation adopts the provision of the proposed regulation and permits a national bank to use as an interest rate index any interest rate (or moving average thereof) that is readily available to and verifiable by borrowers and is beyond the control of the bank.

A majority of banks commenting on the proposal favored the expanded index choice. Several commenters, however, objected to the requirement that the interest rate index be beyond the control of the lender. They stated that the profitability of a bank's mortgage portfolio could be assured only if the bank were free to set the interest rate on an ARM entirely at its discretion.

The Office recognizes the desire of some banks to change interest rates on ARMs without reference to an external interest rate index. The Office believes, however, that the indexation requirement will serve to assure borrowers that interest rate changes on ARMs reflect credit market conditions and will thereby promote the acceptance of ARMs. The Office further believes that banks will be able to find an acceptable interest rate index among those permitted by the revised regulation.

Other commenters favored a uniform ARM index. Several community groups stated that the lack of a uniform index would make comparison shopping difficult. A number of banks also objected to the lack of a uniform index on the grounds that it would hinder the development of a single, widely accepted ARM instrument.

The Office believes that a broad choice of indexes is necessary if banks are to design ARM programs responsive to their own objectives and to their customers' needs. As banks' costs of funds become increasingly sensitive to market interest rates, banks will have to develop mortgage portfolios consistent with their funding strategies. Such strategies can vary across banks. Further, to the extent that banks act as mortgage bankers and originate loans for resale in the secondary market, they

will find it necessary to design instruments that meet the varied demands of secondary market investors. Finally, it would be incorrect to assume that a single interest rate index would serve the needs of all borrowers. Some homebuyers may prefer a longer term, more stable interest rate index; others may be willing to assume the risk of greater interest rate fluctuations.

(b) *Determination of the Initial Index Value.* The Office's March 27, 1981 ARM regulation required that the initial index value be determined at the date of loan closing. That requirement was amended in April 1982 to permit a bank to establish the initial index value either on the date of loan closing or on the date the bank made a binding commitment to lend at a specified initial interest rate. The proposed revision to the regulation would have required that the initial index value be determined at the time the lender committed to the initial interest rate on an ARM.

Several commenters expressed concern that that requirement could limit national banks' ability to sell ARMs on the secondary market. They stated that the typical secondary market forward commitment to purchase an ARM specifies a yield to be earned until the first rate adjustment and a spread over the interest rate index to be earned thereafter. Therefore, an ARM that was consistent with the proposed regulation would have to be sold at a discount if the value of the interest rate index increased between the time a bank obtained a secondary market commitment and the time it committed to the initial rate on an ARM to a homebuyer. Conversely, if the interest rate index decreased, the loan would be sold at a premium. The commenters argued that such uncertainty could raise the cost of ARMs to borrowers.

The revised regulation removes the requirement that the initial interest rate index be the most recently available value either at loan closing or when a bank commits to the initial interest rate on an adjustable-rate mortgage. Consequently, banks have total flexibility in determining the initial index value on an ARM.

The danger of not specifying when the initial index is to be determined is that a bank could select an index value that would enable it to attract borrowers with an unrealistically low initial interest rate. Borrowers might then be unprepared for what could be a sizable rate increase) unrelated to changes in current market rates— at the first rate adjustment. The Office emphasizes that this flexibility should not be used to attract borrowers by offering a short-term bargain rate of interest.

The revised regulation replaces the requirement of the March 27, 1981 regulation that changes in the interest rate index result in basis-point-for-basis-point changes in the interest rate with a requirement that the relationship between the interest rate index and the interest rate on an ARM be specified in the loan documents. This change will enable banks to express interest rates as a fraction or multiple of the interest rate index. The revised regulation also replaces the requirement that rate changes be based on the most recently available index value as of the date when borrowers are notified of impending interest rate changes with a requirement that the new interest rate be based on the most recently available index value at either the notification date or the interest rate change date, whichever is earlier. This revision will enable ARM rates to reflect changes in market interest rates more quickly.

Rules Relating to Interest Rate Changes

Although the revised regulation removes most of the restrictions on interest rate changes, it requires that interest rate changes be made in accordance with rules specified in the loan documents. Such rules must cover the method used to determine the index values to which interest rate changes will be tied and the manner in which changes in the index will be translated into changes in the interest rate (*i.e.*, whether changes in the index will result in equal basis-point changes in the interest rate or whether they will be linked in some other manner). The frequency of interest rate changes and the method for implementing rate changes (*i.e.*, through changes in the monthly payment, changes in the outstanding balance, or both) must also be stated in the loan documents. Additionally, the loan documents must specify any other rules regarding rate changes that the bank might impose, such as rules regarding rounding, limits on the magnitude of rate changes, carryover of changes in excess of such limits, and mandatory and optional interest rate adjustments.

The majority of comments generally favored the removal of restrictions on interest rate adjustments. Banks requested maximum flexibility in designing ARM instruments and stated that the marketplace would determine rate change frequencies and magnitudes.

Several commenters also stated that removing the requirement that increases and decreases be symmetrical would facilitate the design of ARMs that offer a discounted initial interest rate and contain provisions for phasing out the initial discount. Under the March 27, 1981 ARM regulation, national banks making such loans were required to originate the loan at the undiscounted interest rate and to provide a separate agreement that specified the provisions of the discount. The revised regulation eliminates the need for a separate agreement by permitting national banks to establish in the loan documents provisions for phasing out any such discount. The Office emphasizes the requirement that banks making such arrangements clearly disclose the nature of the interest rate discount and the relationship between the interest rate index and the interest rate for the remainder of the loan term.

Finally, a number of commenters stated that the March 27, 1981 regulation's rules regarding required and permitted interest rate changes (which were retained in the proposed revision) could be confusing and misleading in light of the proposal's increased flexibility regarding interest rate changes. To eliminate the confusion created by these provisions, the subsection, "Required and Permitted Rate Changes", has been deleted from the revised regulation. Banks may establish rules regarding mandatory and permitted rate changes that they consider appropriate.

Those who opposed the proposed changes in the rate-change rules stated that frequent rate changes would be disruptive and could cause serious budgeting problems for households, especially during periods of rapidly rising interest rates. Banks also stated that changing interest rates more frequently than once every six months would greatly increase the cost of administering ARMs. Other commenters opposed the removal of limits on the size of interest rate changes, arguing that the lack of such limits would make ARM loans too expensive. The Office emphasizes that the removal of these requirements does not prohibit banks from establishing limits on the frequency and magnitude of interest rate changes.

Amortization Requirements

The final regulation retains the proposal's requirement that installment payments be required for an adjustable-rate mortgage loan that are sufficient to reduce the outstanding principal and accrued interest on the loan beginning no later than during the twenty-first year and are sufficient to amortize the loan without a substantial balloon payment within thirty years. The Office believes this provision is necessary to assure that adjustable-rate mortgage loans comply with the amortization and maturity requirements of 12 U.S.C. 371

and 12 CFR 7.2125. However, under Title IV of the DIA, which, as of April 14, 1983, removes statutory restrictions on amortization and maturity, the Office is reviewing the current restrictions governing the maturity and amortization of real estate loans. Until new regulations are promulgated, the restrictions on amortization and maturity of ARM loans will remain in effect. Banks should be aware of such possible changes when designing ARM programs and documents.

Under Title VIII of the DIA, state-chartered banks may make ARM loans subject to the requirements of Part 29. For such banks, the requirement that ARM loans mature within 30 years is replaced with a requirement that the maturity period on ARM loans made by state-chartered banks conform to the requirements of state law.

The Office received many comments regarding the amortization and maturity requirements of the proposed revision of Part 29. Eight commenters expressed the view that amortization should be required prior to the twenty-first year. Alternative suggestions included requiring amortization after five years, ten years, or twelve years. The Office emphasizes that the provision that the loan need not be made fully amortizing until the twenty-first year does not require banks to wait until the twenty-first year to begin amortization of principal. The Office believes the provision gives national banks the flexibility to provide loans on terms that are appropriate to each borrower's circumstances.

Six commenters, including four banks, opposed permitting any negative amortization. Another commenter, a labor organization, expressed the view that negative amortization was based on assumptions that could be erroneous. The assumptions, the commenter stated, were that borrowers' earnings will increase to meet their increased debt obligations over time, that real estate values will rise as rapidly as unpaid interest will compound, and that interest rates will remain level or decline. The commenters opposed to negative amortization also thought that significant amounts of negative amortization could have a detrimental impact on future retirees. The Office recognizes the validity of such concerns and stresses that the regulation does not require the accrual of negative amortization for twenty-one years. Banks and borrowers must determine loan terms best suited for individual cases. Further, the flexibility permitted to various types of lending institutions will enable borrowers to shop for the loan terms best suited to their current needs and expectations.

Several commenters were concerned that the provisions regarding negative amortization could lead to redlining—discrimination in residential mortgage lending based on the location of the dwelling. Lenders are reminded that any loans made pursuant to this regulation must comport with laws prohibiting housing discrimination.

Others felt that unlimited negative amortization would create safety and soundness problems by causing the amount of the loan to far exceed the value of the underlying collateral. The Office will, of course, continue to review the procedures and decisions of bank loan departments and will act to ensure that any unsafe and unsound practices are corrected.

The view that there should be no restraints on negative amortization was supported by more than twenty commenters. Another commenter thought that amortization should only be required in the twenty-fourth year. It is the opinion of the Office, however, that the proposed amortization requirement is necessary to comply with 12 U.S.C. 371 and 12 CFR 7.2125 which set forth the amortization and maturity requirements for real estate loans made by national banks. As previously noted, these requirements are currently under review as part of a general review of national banks' real estate lending powers.

Nine commenters were concerned about the lack of a definition of the term "substantial balloon payment". The revised regulation states that amortization must begin in the twenty-first year so that the loans can be paid off in thirty years without a substantial balloon payment. This term must be construed in light of the provision of 12 U.S.C. 371 which provides that "installment payments shall be required which are sufficient to amortize *the entire principal of the loan* within a period of not more than thirty years" (emphasis added). While the Office does not believe that *de minimis* variations between the regular monthly payment of principal and the final payment violate the spirit of 12 U.S.C. 371 and 12 CFR 7.2125, any such variations should be easily affordable to the average homeowner without refinancing.

Fees

The revised regulation adopts the provision of the proposed regulation and does not prohibit fees for interest rate or payment adjustments. It also expands the authority of national banks to charge fees for prepayments. Lenders that plan to charge such fees are required to disclose how such fees will be determined.

Comments on permitting fees for rate and payment adjustments were mixed. A number of bankers opposed the charging of fees for rate adjustments on the grounds that making such adjustments is a normal part of their operations and that a charge for adjustments is implicit in the interest rate on an ARM. It was also argued that such fees could impose added burdens on borrowers when increases occur and similarly diminish the benefits of decreases.

Comments on the expanded authority to charge prepayment fees were also mixed. The argument was made by many that because an adjustable-rate mortgage can ensure that the loan rate is close to market rates, there is no reason for charging prepayment fees. On the other hand, some banks noted that permitting prepayment fees would encourage the development of ARMs with relatively slow-moving interest rate indexes and long adjustment periods.

Commenters were nearly unanimous in the view that prepayment fees should not be permitted when principal is repaid ahead of schedule because of features of the loan that govern payment changes. Such features include limits on decreases in the monthly payments and graduated-payment schedules that apply regardless of interest rate movements. There was similar opposition to permitting fees when a borrower makes a greater-than-required payment to avoid negative amortization. Accordingly, language has been added clarifying that prepayment fees are not permitted in such cases.

Disclosure

The ARM regulation reflects the Office's belief that the fundamental interests of both borrowers and lenders are best served by permitting lenders to compete freely in designing and pricing ARMs that will efficiently meet borrower demands. The efficient operation of the marketplace, however, requires that both buyers and sellers be well-informed about the transactions and fully understand the contractual agreements. A wide variety of mortgage instruments, including ARMs, presents borrowers with complex and unfamiliar borrowing options which may be difficult to evaluate. Lacking adequate disclosure, many borrowers contemplating an ARM may find it difficult to make an informed decision, thus interfering with the efficient functioning of the market to the detriment of individual borrowers and lenders.

To address this concern the regulation complements the flexibility of the permitted ARM instruments with relatively comprehensive borrower disclosure requirements. Disclosures serve the two-fold purpose of educating borrowers about the nature of ARMs and equipping them to shop for the appropriate mortgage instrument.

The revised regulation retains most of the disclosure requirements of the March 27, 1981 ARM regulation. The revision also includes several additional disclosure requirements reflecting the increased flexibility provided banks by the revised regulation. Differences between the disclosure requirements of the March 27, 1981 ARM regulation and the revised regulation are listed below.

(1) The revised regulation requires lenders to state, if appropriate, that the initial monthly payment differs from the fully amortizing payment.

(2) Because the revised regulation grants lenders broad authority to charge fees related to interest rate adjustments, payment adjustments, and prepayment, the revised regulation requires lenders to disclose on what basis such fees will be charged.

(3) The required example has been revised to accommodate ARM programs which do not tie interest rate changes basis-point-for-basis-point to index changes and to clarify that the example should show the payment schedule for the entire loan term.

(4) The revised regulation replaces the requirement that banks provide prior notice of interest rate changes with a requirement that notice of interest rate changes be sent to borrowers on the first business day after the implementation of any interest rate change and, if the interest rate change is accompanied by a payment change, at least 25 days before a payment at the new level is due.

(5) The revised regulation requires that for payment changes not accompanied by an interest rate change (*e.g.*, payment changes that result from a limit on negative amortization or a predetermined schedule of payment changes) the bank provide borrowers with a payment-adjustment notification at least 25 days before a payment at the new level is due.

(6) The revised regulation includes an explanation of banks' options regarding the required disclosure for short-term demand or balloon mortgages.

(7) The revised regulation does not include a model disclosure form.

(a) *Initial ARM Disclosure.* Comments on the proposed revision's required initial disclosure were generally favorable. A number of banks requested that the Office provide a model disclosure form. The Office reiterates its view that, in light of the increased flexibility inherent in the revised regulation, a single model form is inappropriate. The Office does, however, encourage banks to consider modifying the model form provided with the March 27, 1981 ARM regulation.

Several comments were received regarding the March 27, 1981 regulation's specification of an interest rate scenario for the required hypothetical example. (The proposed revision did not include such a specification.) Those opposed to the specification of an interest rate scenario argued that it could give borrowers an unrealistic impression of the performance of the loan over its life. Those in favor of an example based on a specified interest rate scenario emphasized the need for a common basis of comparison.

The Office has decided to retain the interest rate scenario specified in the March 27, 1981 regulation. Banks may provide additional examples showing both interest rate increases and decreases to aid potential borrowers in understanding the nature of their ARM program.

The proposed revision to Part 29 included a provision requiring banks using a cost-of-funds index to disclose that, because of the gradual elimination of deposit rate ceilings, the index would be likely to have an upward bias, regardless of movements in market interest rates. In light of banks' recently expanded authority to pay market rates for a variety of consumer deposit instruments, the Office has decided that such a disclosure is unnecessary.

(b) *Notification of Interest Rate and Payment Changes.* The majority of commenters agreed that it is important to notify borrowers when the interest rate or payment on an ARM changes. Some, however, suggested expanding the notification period from 30–45 days before a rate change to 15–60 days before a change. Other comments made the point that the requirement implies that by the time a rate change is implemented, the index upon which the change will be based is two months old. Two commenters expressed the view that notification of rate changes should be required only when an interest rate change will result in a payment change.

To enable banks to reduce the lag between the determination of the index value and implementation of an interest rate change, the Office has amended the notification requirement. The revised regulation requires that notification of a rate change be sent to the borrower not later than on the first business day following the implementation of an interest rate change and, if a payment change will accompany the interest rate change, at least 25 days before a payment at the new level is due. The revision offers banks wishing to provide such notices in accordance with the March 27, 1981 ARM regulation the flexibility to do so. In most cases, banks will be able to provide a single notice of an interest rate and payment change.

A number of banks requested clarification about when separate payment change notices are required. The proposal stated that such notices would be required when a payment change occurred at a different interval than an interest rate change. The revised regulation in § 29.7(c) clarifies that a separate notice is required only when a payment changes for a reason other than an interest rate change.

(c) *Disclosure for Short-term Demand and Balloon Mortgages.* Most commenters agreed with the disclosure requirements for short-term balloon and demand mortgages. Some, however, stated that the required language is too extreme. The Office emphasizes its concern that borrowers using short-term demand or balloon mortgages be fully informed of the possibility that they will have to seek a new source of financing at then-current market rates when such loans mature or are called. The disclosure requirement, therefore, has been retained. When appropriate, however, banks may add language that indicates that they will consider refinancing short-term demand or balloon loans.

Transition Period

Section 29.9 of the March 27, 1981 ARM regulation provided national banks the opportunity to offer ARM loans that do not conform to the limitations imposed by the rule if such loans contain meaningful limitations on the volatility of payment changes and provided for timely repayment of the loans. Some of the programs permitted under section 29.9 do not conform to the amortization requirement of the revised regulation. To avoid disrupting such banks' mortgage lending programs, the revised rule provides for a 120-day transition period during which those national banks may continue to make loans or binding commitments to lend in accordance with previously authorized programs. At the expiration of the transition period, those banks will be required to bring their programs into conformity with the revised regulation.

Assumption

The Office has deleted the section of the ARM regulation that preempted state-law prohibitions on the

enforcement of due-on-sale clauses. Section 341 of the DIA has rendered such provisions unnecessary by providing a statutory preemption of state laws prohibiting the enforcement of due-on-sale clauses by lenders and their assignees or transferees.

Applicability of Part 29 to Nonfederally Chartered Commercial Banks

Title VIII of the Depository Institutions Act of 1982 permits state-chartered banks to engage in adjustable-rate mortgage transactions under the regulations of this Office. Certain provisions of the regulation, however, are inapplicable to, and have been modified for the use of, state-chartered banks. The Office has made the following determinations regarding the applicability of the revised ARM regulation to state-chartered banks.

Section 29.2, which provides authority for national banks to make ARM loans, is inapplicable to state-chartered banks. State-chartered banks draw their authority from Title VIII of the DIA as reflected in § 29.9 of this regulation.

Section 29.5(a), which requires that no later than during the twenty-first year installment payments which are sufficient to amortize the entire debt of the loan without a substantial balloon payment by the end of the thirtieth year be made, is inapplicable to state-chartered banks. The specification of the thirtieth year is a result of the provisions of 12 U.S.C. 371 and 12 CFR 7.2125 requiring that real estate loans by national banks be fully repaid within thirty years. These provisions do not apply to state-chartered banks. For this reason, section 29.5(b), which replaces the thirty-year requirement with a requirement that the maturity period of an ARM loan conform to the requirements of state law, has been included.

Section 29.8, which establishes a transition period for banks with programs that do not conform to the revised regulation, is also inapplicable to state banks. Under Title VIII of the DIA, state-chartered banks may continue to make ARM loans under the provisions of state law which may not conform to 12 CFR Part 29. Consequently, no transition period is necessary.

Finally, the Office clarifies that 12 CFR Part 29 applies to the making or purchasing of loans secured by liens on mobile homes, even when such loans are characterized as "credit sales". National and state-chartered banks should read the term "loan" as "credit sale" whenever appropriate.

List of Subjects in 12 CFR Part 29

National banks, Mortgages.

Accordingly, for the reasons set forth above, Part 29 is revised as follows:

PART 29—ADJUSTMENT-RATE MORTGAGES

Sec.
29.1 Definition.
29.2 General rule.
29.3 Index.
29.4 Rate changes.
29.5 Amortization requirements.
29.6 Prepayment fees.
29.7 Disclosure.
29.8 Transition rule.
29.9 Nonfederally chartered commercial banks.

Authority: 12 U.S.C. 1 *et seq;* 12 U.S.C. 93a; and 12 U.S.C. 371.

§ 29.1 Definition.

An adjustable-rate mortgage loan is any loan made to finance or refinance the purchase of and secured by a lien on a one- to four-family dwelling, including a condominium unit, cooperative housing unit, or a mobile home, where such loan is made pursuant to an agreement intended to enable the lender to adjust the rate of interest from time to time. Adjustable-rate mortgage loans include loan agreements where the note and/or other loan documents expressly provide for adjusting the interest rate at periodic intervals. They also include fixed-rate mortgage loan agreements that implicitly permit rate adjustment by having the note mature on demand or at the end of an interval shorter than the term of the amortization schedule unless the bank has clearly made no promise to refinance the loan (when demand is made or at maturity) and has made the disclosure specified in § 29.7(d) of this part.

§ 29.2 General rule.

National banks and their subsidiaries may make, sell, purchase, participate, or otherwise deal in adjustable-rate mortgage loans only if they conform to the conditions and limitations contained in this Part. National banks and their subsidiaries may make, sell, purchase, participate, or otherwise deal in adjustable-rate mortgage loans pursuant to this Part without regard to any limitations that otherwise would be imposed on adjustable-rate mortgage lending by the laws of any State, the District of Columbia, Puerto Rico, the Virgin Islands, American Samoa, or Guam, which limitations are hereby expressly preempted.

§ 29.3 Index.

Changes in the interest rate charged on an adjustable-rate mortgage loan shall be linked to changes in the index specified in the loan documents. A bank may use as an interest rate index any measure of market rates of interest that is readily available to and verifiable by the borrower and is beyond the control of the bank. The index for an adjustable-rate mortgage loan shall be either single values of the chosen measure or a moving average of the chosen measure calculated over a specified period.

§ 29.4 Rate changes.

Interest rate changes on an adjustable-rate mortgage shall be based on the most recently available index value as of either the date a notification of an impending interest rate change is sent to a borrower, or the date that an interest rate change is implemented, whichever is earlier. Such changes shall be made in accordance with rules specified in the loan documents including, but not limited to, rules governing the determination of index values upon which interest rate changes will be based, the relationship between the interest rate index and the interest rate on the loan, the frequency of interest rate changes, and the implementation of interest rate changes. If appropriate, the loan documents shall include rules covering such items as periodic or aggregate limits on the magnitude of interest rate changes, minimum increments of interest rate changes, procedures for rounding the interest rate, and provisions for carryover of untaken interest rate changes to subsequent adjustment periods.

§ 29.5 Amortization requirements.

In order for an adjustable-rate mortgage loan to be considered in compliance with any amortization requirements imposed by law, regulation, or ruling, installment payments shall be required that are sufficient to reduce the outstanding debt on the loan beginning no later than during the twenty-first year; and (a) In the case of national banks are sufficient to amortize the entire debt of the loan without a substantial balloon payment by the end of the thirtieth year; and (b) in the case of nonfederally chartered commercial banks are sufficient to amortize the entire debt of the loan without a substantial balloon payment by the end of any maximum loan term permitted by state law.

§ 29.6 Prepayment fees.

Banks offering or purchasing adjustable-rate mortgage loans may impose fees for prepayments regardless of any state-law prohibitions of, or

limitations on, such fees, which prohibitions or limitations are expressly preempted. For the purposes of this Part, prepayments shall not include: (a) Principal payments that would fully amortize the loan over the remaining loan term; or (b) principal payments in excess of those necessary to retire the outstanding debt over the remaining loan term at the then-current interest rate that are made in accordance with rules governing the determination of monthly payments contained in the loan documents.

§ 29.7 Disclosure.

(a) A bank offering adjustable-rate mortgage loans shall disclose in writing on the earlier of the date on which the bank first provides written information concerning adjustable-rate mortgage loans available from the bank or provides a loan application form to the prospective adjustable-rate mortgage borrower, the following items:

(1) The fact that the interest rate may change and a brief description of the general nature of an adjustable-rate mortgage loan;

(2) The index used and the name of at least one readily available source in which it is published;

(3) A 10-year historical series (or if a 10-year series of the index does not exist the longest available series) updated at least annually showing the values of the index on at least a semiannual basis, presented in a table. The table should show either single values of the measure of interest rates or an average of single values, consistent with the bank's adjustable-rate mortgage loan program;

(4) The frequency with which the interest rate and payment levels will be adjusted;

(5) A statement, if appropriate, that the initial monthly payment may differ from the fully amortizing payment and the effect of this difference on the loan's amortization schedule;

(6) Any rules relating to changes in the interest rate, installment payment amount, and/or increases in the outstanding loan balance;

(7) A description of the method by which interest rate changes will be implemented, including, if appropriate, an explanation of negative amortization and balloon payments;

(8) A statement, if appropriate, of the rules or conditions relating to refinancing of short-term and demand mortgage loans, prepayment, and assumption;

(9) A statement, if appropriate, that fees will be charged by the bank and/or any other persons in connection with the adjustable-rate mortgage loan, including fees due at loan closing;

(10) A statement, if appropriate, that fees will be charged for interest rate or payment adjustments or for prepayments of principal and a statement of when such fees will be charged and how they will be calculated;

(11) A schedule of the dollar amounts of the installment payments (principal and interest) and the outstanding loan balance at each payment adjustment date on the adjustable-rate mortgage loan assuming an initial loan balance of $10,000. The initial interest rate should be a commitment rate offered by the bank within the preceding 12-month period. The example should be based on interest rate index increases of one percentage point per six months for the first five years of the loan term and a constant interest rate index thereafter and should cover the entire loan term.

(b) Not later than one business day after an interest rate change is implemented, and, if such interest rate change is accompanied by a payment change, at least 25 days before a payment at the new level is due, the bank shall notify the borower in writing of the following items:

(1) The current and prior interest rate;

(2) The index values upon which the current and prior interest rates are based;

(3) The extent to which the bank has foregone any increase in the mortgage interest rate;

(4) The monthly payment due after implementation of the interest rate adjustment and/or other contractual effects of the rate change;

(5) The amount of the monthly payment, if different from that given in response to item 4, that would be required to fully amortize the loan at the new interest rate over the remainder of the loan term;

(6) A statement, if appropriate, that a prepayment fee will be charged if the borrower chooses to prepay the loan.

(c) If under the bank's adjustable-rate mortgage program, a payment change may occur for reasons other than an interest rate change including, but not limited to, a limit on negative amortization, at least 25 days before any such payment change may take effect, the bank shall notify the borrower in writing of the following items:

(1) An explanation of the circumstances that have led to such a payment change;

(2) The monthly payment due after implementation of the payment adjustment;

(3) The amount of the monthly payment, if different from that given in response to item 2, that would be required to fully amortize the loan at the new interest rate over the remainder of the loan term;

(4) A statement, if appropriate, that a prepayment fee will be charged if the borrower chooses to prepay the loan.

(d) For the purposes of this subsection the following definitions apply: a short-term mortgage loan is any loan to finance or refinance the purchase of, and secured by a lien on, a one- to four-family dwelling that is payable either without any interim amortization of the loan or at the end of a term that, including any terms for which the bank has promised to refinance the loan, is shorter than the term of the amortization schedule; a demand mortgage loan is any loan to finance or refinance the purchase of, and secured by a lien on, a one- to four-family dwelling that is payable on demand. A bank making short-term or demand mortgage loans shall include the following notice displayed prominently and in capital letters in or affixed to the loan application form and in or affixed to the loan note:

THIS LOAN IS PAYABLE IN FULL [ON DEMAND *or* (specify date or circumstances)]. [AT MATURITY *or* IF PAYMENT IS DEMANDED *or* (upon the specified date or circumstances)] YOU MUST REPAY THE ENTIRE PRINCIPAL BALANCE OF THE LOAN AND UNPAID INTEREST THEN DUE. THE BANK IS UNDER NO OBLIGATION TO REFINANCE THE LOAN AT THAT TIME. YOU WILL, THEREFORE, BE REQUIRED TO MAKE PAYMENT OUT OF OTHER ASSETS THAT YOU MAY OWN, OR YOU WILL HAVE TO FIND A LENDER, WHICH MAY BE THE BANK YOU HAVE THIS LOAN WITH, WILLING TO LEND YOU THE MONEY. IF YOU REFINANCE THIS LOAN AT MATURITY, YOU MAY HAVE TO PAY SOME OR ALL OF THE CLOSING COSTS NORMALLY ASSOCIATED WITH A NEW LOAN EVEN IF YOU OBTAIN REFINANCING FROM THE SAME BANK.

The bank should choose the appropriate alternative language in brackets and supply any applicable information where there is a blank. To clarify the statement, the bank may insert "[the borrower]" after each occurrence of the word "you" or the name of the bank, in brackets, after each occurrence of the word "bank". The bank may also add an additional sentence or paragraph that further explains or clarifies the loan terms and may state that the bank will consider an application to refinance the balloon payment at the time payment is due on the same basis as all other new mortgage loan applications. Fixed-rate short-term loans and fixed-rate demand loans for which this notice has been

properly given will not be characterized as adjustable-rate mortgage loans.

(e) At the date on which the initial interest rate on an adjustable-rate mortgage loan is determined, the bank shall inform the borrower of the initial index value on which the initial interest rate will be based. This initial index value shall be included in the note that the borrower signs. The borrower must be given a copy of that note no later than at loan closing.

§ 29.8 Transition rule.

If on the effective date of this rule a national bank has already made a loan or a binding commitment to lend under an adjustable-rate mortgage loan program which would violate any of the provisions of this Part, the national bank may continue to make loans or binding commitments to lend under the program for 120 days from the effective date of this rule before the program must be brought into conformity with all of the provisions of this Part.

§ 29.9 Nonfederally chartered commercial banks.

Under authority granted by Pub. L. 97–320, the Garn-St Germain Depository Institutions Act of 1982, nonfederally chartered commercial banks may make adjustable-rate mortgages in accordance with the following provisions of this Part: §§29.1, 29.3, 29.4, 29.5, 29.6, and 29.7.

Dated: February 11, 1983.

C. T. Conover,

Comptroller of the Currency.

BILLING CODE 4810-33-M

FEDERAL DEPOSIT INSURANCE CORPORATION

12 CFR Part 308

Rules of Practice and Procedures

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Final rule.

SUMMARY: FDIC is amending its regulations to incorporate certain provisions of the Garn-St Germain Depository Institutions Act of 1982. These provisions explicitly give FDIC authority to compromise, modify, or remit certain civil money penalties and provide for removal of a management official for any violation of the Depository Institution Management Interlocks Act.

EFFECTIVE DATE: March 7, 1983.

FOR FURTHER INFORMATION CONTACT: James L. Meador, Senior Attorney, Legal Division, Federal Deposit Insurance Corporation, 550–17th Street, N.W., Washington, D.C. 20429 (202) 389–4171.

SUPPLEMENTARY INFORMATION: The Garn-St Germain Depository Institutions Act of 1982 (the "Act") (Pub. L. No. 97–320; 96 Stat. 1469 (effective October 15, 1982)) includes eight titles containing 97 sections amending the Federal Deposit Insurance Act (the "FDI Act") and other financial institution regulatory legislation. In pertinent part, section 424 of the Act amends the FDI Act with respect to the assessment of civil money penalties for violations of any final order issued under subsection (b) or (c) of section 8 of the FDI Act and for violations of 23A and 22(h) of the Federal Reserve Act (12 U.S.C. 371c and 375b), and section 106(b)(2)(F)(i) of the Bank Holding Company Act Amendments of 1970 (12 U.S.C. § 1972(2)(F)(i)). The amendments state that FDIC has authority to remit or modify, as well as compromise, such civil money penalties.

Section 427 of the Act amends section 8(e) of the FDI Act to provide for removal from office of any director or officer of an insured bank who has committed any violation of the Depository Institutions Management Interlocks Act (12 U.S.C. 3201, *et seq.*). In contrast to the other grounds for removal, removal is permitted for such violations without agency determination that the management official's illegal conduct has caused or will probably cause the insured bank to suffer "substantial financial loss or damage," or has caused serious prejudice to the depositors' interests, or that the official has received any financial gain from the violations, and that the violation involved personal dishonesty or demonstrated "willful disregard" for the safety or soundness of the bank.

Regulatory Factors

The requirements of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) are inoperative here because the amendments do not affect the recordkeeping or reporting burdens on any insured bank or other person.

The amendments are rules of FDIC practice and procedure. Public notice and procedure on them are impracticable and unnecessary because the Act became effective on October 15, 1982, and FDIC has no discretion other than to modify its rules of practice and procedure to reflect the current status of the law. Therefore, in accordance with the Administrative Procedure Act (5 U.S.C. 553), the Board of Directors suspends the requirements for notice of proposed rulemaking and public comment and delayed effective date.

Although the rules apply in adminstrative proceedings involving civil money penalties or removal of management officials, the substantive basis for such actions lies in public law. The amendments are merely rules of agency practice and procedure which govern during the adjudicative process.

List of Subjects in 12 CFR Part 308

Adminstrative practice and procedure, Penalties, Cease-and-desist orders, Directors, officers, employees, Termination of deposit insurance, Removal of management official.

PART 308—RULES OF PRACTICE AND PROCEDURES

Part 308 of Chapter III of Title 12 of the Code of Federal Regulations is amended as follows:

1. The authority citation for Part 308 reads as follows:

Authority: Sec. 2(9), Pub. L. No. 797, 64 Stat. 881 (12 U.S.C. 1819); sec. 18, Pub. L. No. 94–29, 89 Stat. 155 (15 U.S.C. 78w); sec. 801, Pub. L. No. 95–630, 92 Stat. 3641 (12 U.S.C. 1972); sec. 203 Pub. L. No. 90–481, 94 Stat. 2325 (5 U.S.C. 504).

2. Section 308.40 is amended by adding a new paragraph (d) to read as follows:

§ 308.40 Grounds for removal or prohibition.

* * * * *

(d) The Board may issue and serve upon any director or officer of an insured nonmember bank a written notice of its intention to remove the individual from office in such bank when the Board determines that the individual has committed any violation of the Depository Institution Management Interlocks Act.

§ 308.71 [Amended]

3. Section 308.71 is amended by removing the word "reduce" in the ultimate sentence and inserting in its place the words "compromise, modify, or remit".

By order of the Board of Directors on February 28, 1983.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

BILLING CODE 6714-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 82-NM-33-AD; Amdt. 39-4579]

Airworthiness Directives; Aerospatiale (SUD) Caravelle SE-210 Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adds a new airworthiness directive (AD) applicable to Aerospatiale (SUD) Caravelle SE-210 airplanes which requires inspections of certain structural components to detect cracks/corrosion damage and repairs or replacement where necessary. This action was prompted by notification by the cognizant civil air authority that certain unsafe conditions may exist or develop which compromise the structural integrity of the wing and landing gear.

DATES: Effective April 11, 1983.

ADDRESSES: The service bulletins specified in this AD may be obtained upon request to Societe Nationale Industrielle Aerospatiale, 316 Route de Bayonne, 31060 Toulouse Cedex 03, France, Attention: M. Roger Adam, or may be examined at the address shown below.

FOR FURTHER INFORMATION CONTACT: Mr. Harold N. Wantiez, Foreign Aircraft Certification Branch, ANM-150S, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington, telephone (206) 767-2530. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an airworthiness directive which required inspections for cracks/corrosion damage on wing and landing gear components of Aerospatiale (SUD) Caravelle SE-210 airplanes was published in the **Federal Register** (47 FR 23175) on May 27, 1982. The Director Generale de L'Aviation Civile (DGAC) has classified certain Aerospatiale (SUD) service bulletins mandatory which require the previously mentioned inspections/repairs or replacements in order to correct unsafe conditions which exist or may develop on Caravelle airplanes currently in operation.

Interested parties have been afforded an opportunity to participate in the making of this amendment. The one U.S. Caravelle operator stated that SUD Service Bulletin 57-40 gives the inspection interval for the L_1 and L_4 wing fittings to be the periods between major inspections for airplanes operating at a maximum takeoff weight of 52 tons or less. This operator recommends predicating the inspection interval required by the rule upon the FAA approved maintenance schedule in lieu of the NPRM proposed inspection interval of 4,000 hours time in service for all Caravelle airplanes regardless of maximum takeoff weight. The FAA concurs with the operator's comment and has revised the rule accordingly. No other comments were received. It is estimated that no airplanes will be immediately affected by this AD since the one known active operator is complying with all of the service bulletins. After a review of all of the available data including the above comments, the FAA has determined that safety in the public interest requires the adoption of the rule with the changes previously noted.

Aviation safety, Aircraft.

Adoption of the Amendment

PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new airworthiness directive:

Aerospatiale (formerly SUD): Applies to all Caravelle SE-210 Models III and VIR airplanes, certificated in all categories.

1. To prevent structural failures, accomplish the following within the time in service or number of flights specified in each paragraph below after the effective date of this AD, unless already accomplished.

A. Compliance required in accordance with SUD Service Bulletin 32-86, Revision 7, and/or in accordance with SUD Service Bulletin 32-106, Revision 4, as noted:

(1) Replace P/N 210.41.10.011-01 main landing gear hinge shaft aft end screws with P/N 210.41.10.100-01 screws (Service Bulletin 32-86) or with P/N 210.41.10.652-01 screws and 210.41.10.648-01 plugs (Service Bulletin 32-106) within the next 500 landings.

(2) Inspect P/N 210.41.10.100-01 screws in accordance with Service Bulletin 32-86 within the next 500 landings or within 8,000 total landings, whichever occurs later, and thereafter at intervals not to exceed 5,000 landings.

(3) Inspect P/N 210.41.10.652-01 screws in accordance with Service Bulletin 32-106 within the next 500 landings or within 10,000 total landings, whichever occurs later, and thereafter at intervals not to exceed 5,000 landings.

B. Compliance required in accordance with SUD Service Bulletin No. 57-40, Revision 10;

(1) Inspect the lower wing center junction fitting L_3 and L_4 bores for corrosion, ovalization, or cracks within the next 200 hours time in service or within 15,000 hours total time in service, whichever occurs later, and thereafter at intervals not to exceed 10,500 hours time in service for airplanes with a maximum takeoff weight of 52 tons or less and 4,000 hours time in service for airplanes with a maximum takeoff weight of over 52 tons.

(2) Inspect the lower wing center junction fitting L_1, L_2, and L_4 bores for corrosion, ovalization, or cracks within the next 200 hours time in service or within 16,000 hours total time in service, whichever occurs later, and thereafter at intervals not to exceed 8,000 hours time in service.

(3) Repair or replace fittings per the service bulletin instructions.

C. Inspect wing rib 44 upper cap fittings within the next 200 landings in accordance with SUD Service Bulletin 57-47, Revision 6. If no cracks are found, reinspect at intervals not to exceed 2,000 landings thereafter. If cracks are found, repair as necessary per the service bulletin and reinspect at intervals not to exceed 1,000 landings thereafter.

2. Alternate means of compliance which provide an equivalent level of safety may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

3. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of inspections and/or modifications required by this AD.

The manufacturer's specifications and procedures identified and described in this directive are incorporated herein and made a part hereof pursuant to 5 U.S.C. 552 (a) (1).

This amendment becomes effective April 11, 1983.

(Secs. 313 (a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354 (a), 1421, and 1423); Sec. 6 (c), Department of Transportation Act (49 U.S.C. 1655 (c)); and 14 CFR 11.89).

Note.—For the reasons discussed earlier in the preamble, the FAA has determined that this regulation is not considered to be major under Executive Order 12291 or significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). It is further certified under the criteria of the Regulatory Flexibility Act that this rule will not have a significant economic effect on a substantial number of small entities since it involves few, if any, small entities. A final evaluation has been prepared for this regulation and has been placed in the docket. A copy of it may be obtained by contacting the person identified under the caption "**FOR FURTHER INFORMATION CONTACT.**"

Issued in Seattle, Washington on February 24, 1983.

Charles R. Foster,

Director, Northwest Mountain Region.

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 82-NM-120-AD; Amdt. 39-4590]

Airworthiness Directives; British Aerospace Model HS/DH/BH 125 Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This document amends an existing Airworthiness Directive (AD) Amendment 39-3789, which requires repetitive inspections and rework or replacement of the bridge casting for the nose landing gear drag stay assembly on British Aerospace Model HS/DH/BH 125 airplanes. Since the issuance of the AD, the manufacturer has determined there is a need to clarify and expand the inspection instructions and accordingly has issued a revision to the applicable service bulletin. The AD is therefore being amended to include this revision.

DATE: Effective March 16, 1983.

ADDRESSES: The service bulletin specified in this Airworthiness Directive may be obtained upon request to British Aerospace, Inc., Librarian, Box 17414, Dulles International Airport, Washington, D.C. 20041, or may be examined at the address shown below.

FOR FURTHER INFORMATION CONTACT: Mr. Sulmo Mariano, Foreign Aircraft Certification Branch, ANM-150S, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington, telephone (206) 767-2530. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: AD 80-12-05, Revision 1, Amendment 39-3789, requires repetitive inspections of the bridge casting on the nose landing gear drag assembly. This AD was previously amended to extend certain inspection intervals; it is now being amended to specify Revision 3 to Service Bulletin 32-184 which contains specific instructions for the inspection of an alternate bridge casting (modification 252677).

This airplane model is manufactured in the United Kingdom and type certificated in the United States under the provisions of Section 21.29 of the Federal Aviation Regulations and the applicable airworthiness bilateral agreement.

Since this condition is likely to exist or develop on airplanes of this model registered in the United States, the FAA has determined that an AD is necessary which amends AD 80-12-05, Amendment 39-4390 (47 FR 23696, June 1, 1982), to include the latest revision of British Aerospace Aircraft Group, Service Bulletin No. 32-184.

Further, since a situation exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

Adoption of the Amendment

PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by further amending AD 80-12-05, Amendment 39-3789 (45 FR 37179, June 2, 1980), as amended by Amendment 39-4390 (47 FR 23696, June 1, 1982) as follows:

1. In paragraph (c) replace "August 10, 1978 (Revision 1)" with "Revision 3, dated June 24, 1982."

2. Add a new paragraph (f) after paragraph (e) to read as follows: "Alternate means of compliance which provide an equivalent level of safety may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region."

The manufacturer's specifications and procedures identified and described in this directive are incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1).

This amendment becomes effective March 16, 1983.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c) Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89)

Note.—The FAA has determined that this regulation is an emergency regulation that is not major under Section 8 of Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation or analysis is not required). A copy of it, when filed, may be obtained by contacting the person identified under the caption "FOR FURTHER INFORMATION CONTACT."

Issued in Seattle, Washington on February 24, 1983.

Charles R. Foster,

Director, Northwest Mountain Region.

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 83-CE-6-AD; Amendment 39-4581]

Airworthiness Directives; Piper Model PA-38-112 Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new Airworthiness Directive (AD), applicable to Piper Model PA-38-112 airplanes which supersedes AD 80-11-09. The new AD requires replacement of all the main landing gear attach bolts. Failure of these bolts and resulting loss of the main landing gear have caused accidents. This action will provide stronger clamping action and increase the strength of the main landing gear attachment to the fuselage.

DATES: Effective date: March 14, 1983.

Compliance: Required within the next 50 hours time-in-service after the effective date of this AD.

ADDRESSES: Piper Aircraft Corporation Service Bulletin No. 673A, dated October 20, 1982, may be obtained from Piper Aircraft Corporation, 820 East Bald Eagle Street, Lock Haven, Pennsylvania 17745. A copy of this information is also contained in the Rules Docket, Office of the Regional Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: C. Kallis, Airframe Section, ANE-172, New York Aircraft Certification Office, 181 South Franklin Avenue, Room 202, Valley Stream, New York 11581; Telephone 516-791-6221.

SUPPLEMENTARY INFORMATION: Loose, bent and cracked main landing gear attachment bolts were experienced on Piper Model PA-38-112 airplanes. These occurrences were attributed to the improper clamping action of the bolt installations. To assure proper clamping attachment of the landing gear struts, AD 80-11-09 (Amendment 39-3779) 45 FR 35308 was issued which changed the AN-5-13A bolts to bolts of shorter length to assure proper clamp up.

Although AD 80-11-09 has reduced the incidents of landing gear bolt

failures, the FAA continues to receive reports of loose, bent and cracked bolts. To prevent this condition, Piper Aircraft Corporation published Service Bulletin No. 673A dated October 20, 1982, which recommends changing the AN–5 bolts to stronger NAS–145 bolts. In addition, the FAA has received reports of bent or damaged AN 7–17A bolts which attach the inboard end of the main landing gear strut. If not removed from service, such bolts may compromise the integrity of the main landing gear attachment to the fuselage.

Since the FAA has determined that the unsafe condition described herein is likely to exist or develop in other airplanes of the same type design, an AD is being issued, superseding AD 80–11–09, which requires mandatory installation of the NAS–145 bolts and replacement of the AN 7–17A bolts with new AN 7–17A bolts, installed with proper torque, on Piper Model PA–38–112 airplanes. Because an emergency condition exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impractical and contrary to the public interest, and good cause exists for making this amendment effective in less than 30 days.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new AD.

Piper: Applies to Model PA–38–112 (Serial Nos. 38–78A0001 thru 38–82A0110) airplanes certificated in any category.

Compliance: Required as indicated unless already accomplished.

To prevent possible bending, cracking or loosening of the main landing gear attachment bolts, accomplish following:

(a) Within the next 50 hours time-in-service after the effective date of this AD:

(1) Replace the (4) landing gear AN 5 attachment bolts and AN 960 washers with (4) NAS 145–22 bolts and (4) MS20002–C5 washers, in accordance with the *Instructions* section of Piper Service Bulletin 673A dated October 20, 1982, and

(2) Replace the (2) AN 7–17A bolts which attach the inboard ends of the main landing gear legs with new AN 7–17A bolts and torque to 450–500 inch-pounds or 37–41 foot-pounds.

(b) Airplanes may be flown in accordance with FAR 21.197 to a location where this AD may be accomplished.

(c) Upon submittal of substantiating data by an owner or operator through an FAA Maintenance Inspector, the Manager, New York Aircraft Certification Office, FAA (see address below) may adjust the compliance time specified in this AD.

(d) An equivalent method of compliance with this AD may be used, if approved, by the Manager, New York Aircraft Certification Office, FAA, 181 South Franklin Avenue, Room 202, Valley Stream, New York 11581.

This amendment supersedes AD 80–11–09, Amendment 39–3779.

This amendment becomes effective on March 14, 1983.

(Secs. 313(a), 601 and 603 of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421 and 1423); Sec. 6(c) Department of Transportation Act (49 U.S.C. 1655(c)); Sec. 11.89 of the Federal Aviation Regulations (14 CFR Sec. 11.89))

Note.—The FAA has determined that this regulation is an emergency regulation that is not major under Section 8 of Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required). A copy of it, when filed, may be obtained by contacting the Rules Docket under the caption "ADDRESSES" at the location identified.

Issued in Kansas City, Missouri, on February 24, 1983.

John E. Shaw,

Acting Director, Central Region.

[FR Doc. 83–5474 Filed 3–4–83; 8:45 am]

BILLING CODE 4910–13–M

---

14 CFR Part 71

[Airspace Docket No. 83–ASO–11]

Alteration of Control Zone; Mobile, Alabama

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: This amendment alters the Brookley Airport Control Zone, Mobile, Alabama, by revising the coordinates of the airport and changing the hours during which the zone is effective. Brookley Airport Traffic Control Tower has extended its hours of operation from 0800 to 1900 hours local time to 0700 to 1900 hours local time. It is necessary to revise the effective hours of the control zone to coincide with the new hours of the control tower.

DATES: Effective date: 0901 G.mt., April 14, 1983. Comments must be received on or before April 1, 1983.

ADDRESSES: Send comments on the rule in triplicate to: Federal Aviation Administration, Manager, Airspace and Procedures Branch, ASO–530, Air Traffic Division, P.O. Box 20636, Atlanta, Georgia 30320.

The official docket may be examined in the Office of the Regional Counsel, Room 652, 3400 Norman Berry Drive, East Point, Georgia 30344, telephone: (404) 763–7646.

FOR FURTHER INFORMATION CONTACT: Donald Ross, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone (404) 763–7646.

SUPPLEMENTARY INFORMATION:

Request for Comments on the Rule

Although this action is in the form of a final rule, which involves revising the geographical coordinates of Brookley Airport and extending the effective hours of the control zone by one hour and was not preceded by notice and public procedure, comments are invited on the rule. When the comment period ends, the FAA will use the comments submitted, together with other available information, to review the regulation. After the review, if the FAA finds that changes are appropriate, it will initiate rulemaking proceedings to amend the regulation. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in evaluating the effects of the rule and determining whether additional rulemaking is needed. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy aspects of the rule that might suggest the need to modify the rule.

The Rule

The purpose of this amendment to § 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is to properly reflect the geographical coordinates of Brookley Airport and extend the effective hours of the control zone to coincide with the new operating hours of the Brookley Airport Traffic Control Tower. Section 71.171 of Part 71 of the Federal Aviation Regulations was republished in Advisory Circular AC 70–3A dated January 3, 1983. Under the circumstances presented, the FAA concludes that there is a need for a regulation to list the correct coordinates of the airport and revise the effective hours of the control zone. The adjustments are so minor and nonsubstantive, I find that notice or public procedure under 5 U.S.C. 553(b) is unnecessary.

List of Subjects in 14 CFR Part 71

Aviation safety, Airspace, Control zone.

Adoption of the Amendment

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, § 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) (as amended) is further amended, effective 0901 GMT, April 14, 1983, as follows:

Mobile Brookley Airport, AL [Amended]

By deleting the words, ". . . (lat. 30°37'08.5" N., long. 88°03'57.2" W.) . . . and ". . . 0900 . . .", and substituting for them the words, ". . . (Lat. 30°36'27" N., Long. 88°04'23" W.) . . ." and ". . . 0700 . . .". (Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69)

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in East Point, Georgia, on February 22, 1983.

George R. LaCaille,

Acting Director, Southern Region.

[FR Doc. 83-6062 Filed 3-4-83; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 97

[Docket No. 23549; Amdt. No. 1237]

Air Traffic and General Operating Rules; Standard Instrument Approach Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: An effective date for each SIAP is specified in the amendatory provisions.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

For Examination—

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue, SW., Washington, D.C. 20591;

2. The FAA Regional Office of the region in which the affected airport is located; or

3. The Flight Inspection Field Office which originated the SIAP.

For Purchase—

Individual SIAP copies may be obtained from:

1. FAA Public Information Center (APA–430), FAA Headquarters Building, 800 Independence Avenue, SW., Washington, D.C. 20591; or

2. The FAA Regional Office of the region in which the affected airport is located.

By Subscription—

Copies of all SIAPs, mailed once every 2 weeks, are for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

FOR FURTHER INFORMATION CONTACT: Donald K. Funai, Flight Procedures and Airspace Branch (AFO–730), Aircraft Programs Division, Office of Flight Operations, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone (202) 426–8277.

SUPPLEMENTARY INFORMATION: This amendment to Part 97 of the Federal Aviation Regulations (14 CFR Part 97) prescribes new, amended, suspended, or revoked Standard Instrument Approach Procedures (SIAPs). The complete regulatory description of each SIAP is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C 552(a), 1 CFR Part 51, and § 97.20 of the Federal Aviation Regulations (FARs). The applicable FAA Forms are identified as FAA Forms 8260–3, 8260–4 and 8260–5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the Federal Register expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form document is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

This amendment to Part 97 is effective on the date of publication and contains separate SIAPs which have compliance dates stated as effective dates based on related changes in the National Airspace System or the application of new or revised criteria. Some SIAP amendments may have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for some SIAP amendments may require making them effective in less than 30 days. For the remaining SIAPs, an effective date at east 30 days after publication is provided.

Further, the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERPs). In developing these SIAPs, the TERPs criteria were applied to the conditions existing or anticipated at the effected airports. Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs is unnecessary, impracticable, or contrary to the public interest and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

BILLING CODE 4910-13-M

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 210

[Release Nos. 33-6452; 34-19542; 35-22862; IC-13047; FR-10; S7-947]

Qualifications and Reports of Accountants; Amendment of Rules Regarding Accountants' Independence

AGENCY: Securities and Exchange Commission.

ACTION: Final rules.

SUMMARY: The Securities and Exchange Commission announces the adoption of revisions to § 210.2-01(b) which redefine the term "member" (as the term is used in that section) and clarify the Rule's intent in certain minor respects. Appropriate changes are made in the Commission's published independence interpretations to conform such interpretations to the more limited application of § 210.2-01(b) resulting from the revised definition of the term "member".

EFFECTIVE DATE: April 6, 1983, with earlier implementation permitted.

FOR FURTHER INFORMATION CONTACT: Clarence M. Staubs (202-272-2130), Office of the Chief Accountant, Securities and Exchange Commission, Washington, D.C. 20549.

SUPPLEMENTARY INFORMATION: The Commission announces the adoption of an amendment to 17 CFR 210.2-01(b) which redefines the term "member", as used in that rule, and thereby removes certain non-managerial professional employees of accounting firms from the Rule's application. In addition, certain minor changes have been made to clarify the intent of the Rule, and the related published independence interpretations [1] have been appropriately deleted or revised to conform to the requirements of the amended Rule.

Discussion

On October 14, 1982, the Commission published for comment [2] proposed amendments to 17 CFR 210.2-01(b), which would revise the definition of the term "member", as used in that rule, and make minor clarification changes in that rule.

The principal effect of the changes is to remove from the application of § 210.2-01 any non-managerial, professional employee not involved in providing professional services to the subject client or any of its affiliates. However, a professional employee having managerial responsibilities and located in the engagement office or an office of the firm which participates in a significant portion of the audit, as well as all partners, shareholders and other principals in the accounting firm continue to be subject to the requirements of § 210.2-01. The term "member", as defined prior to the changes effected by these amendments, encompassed all professional employees located in an office of the firm participating in a significant portion of the audit. The Commission has concluded that the previous definition of "member" was unnecessarily broad.

The amendments also clarify the Rule's provisions about the effect on a firm's independence when a former officer or employee of an audit client becomes an employee of or principal in the accounting firm. Prior to these amendments, the Rule was unclear as to whether the exception in the Rule applied to a person who became a principal in the firm. The revision to the Rule in that respect codifies an administrative practice which permitted such associations without an impairment of independence.

Twelve letters were received in response to the Commission's invitation to comment on the proposed changes. Eleven of the letters were from accounting firms or professional associations of accountants. The other letter was from a company which has securities registered with the Commission. All commentators favored the proposed changes. However, several respondents expressed the view that the Commission should reconsider certain of its independence interpretations, especially those dealing with the employer/employee relationships between the relatives of a "member" and audit clients of the member's firm.

One commentator opposed application of the Commission's independence requirements to all professional employees involved in providing professional services to a client. That commentator and two others objected to including managerial, professional employees who are not involved in providing services to the subject audit client in the definition of "member". No changes in the Rule have been made in response to these comments because the Commission believes that the perception of independence demands application of these requirements to all such employees.

This action of the Commission removes certain nonmanagerial, professional employees from application of the Commission's independence requirements. Except as set forth in the "Codification Update" section below, the Commission's published interpretations (including those regarding both dependent and nondependent relatives) remain in effect. The Commission's staff expects to review the existing independence interpretations regarding the impact of the activities of family members and former partners on the independence of a "member", as defined in § 210.2-01(b), in the near future.

Codification Update

The "Codification of Financial Reporting Policies" announced in Financial Reporting Release No. 1 (April 15, 1982) (47 FR 21028) is updated to:

1. Add the following subcaption at the end of § 602.01:

FRR 10

2. Include the second and third paragraphs of the "Discussion" section of this release.

3. Revise the introductory paragraph to § 602.02.d to read: Rule 2-01(b) states that, "* * * an accountant will be considered not independent with respect to any person or any of its parents, its subsidiaries, or other affiliates * * * with which, during the period of his professional engagement to examine the financial statements being reported on, at the date of his report or during the period covered by the financial statements, he, or his firm, or a member of his firm was connected as a promoter, underwriter, voting trustee, director, officer, or employee. A firm's independence will not be deemed to be affected adversely where a former officer or employee of a particular person is employed by or becomes a partner, shareholder or other principal in the firm and such individual has completely disassociated himself from the person and its affiliates and does not participate in auditing financial statements of the person or its affiliates covering any period of his employment by the person."

4. Revise the conclusion in Example 8 in § 602.02.d to add the following sentence:

---

[1] *See*, Section 602 of the Codification of Financial Reporting Policies, announced by the Commission in Financial Reporting Release No. 1 (April 15, 1982) (47 FR 21028.)

[2] *See*, Securities Act Release No. 33-6430 (47 FR 47209).

A professional employee of an accounting firm, acting individually or otherwise, may not enter into any arrangement or relationship with an audit client of his or her employer involving an activity which, if engaged in as an employee of the accounting firm, would adversely affect the firm's independence.

5. Delete Example 10 in § 602.02.h, and renumber Example Nos. 11, 12 and 13 as Nos. 10, 11 and 12, respectively.

This Codification is a separate publication issued by the Commission. It will not be published in the Federal Register/Code of Federal Regulations System.

List of Subjects in 17 CFR Part 210

Accounting, Reporting requirements, Securities, Utilities.

Text of Final Rules

Chapter II of Title 17 of the Code of Federal Regulations is amended as follows:

PART 210—FORM AND CONTENT OF AND REQUIREMENTS FOR FINANCIAL STATEMENTS, SECURITIES ACT OF 1933, SECURITIES EXCHANGE ACT OF 1934, PUBLIC UTILITY HOLDING COMPANY ACT OF 1935, INVESTMENT COMPANY ACT OF 1940, AND ENERGY POLICY AND CONSERVATION ACT OF 1975

1. By revising paragraph (b) of § 210.2–01 to read as follows:

§ 210–2–01 Qualifications of accounts.

* * * * *

[b] The Commission will not recognize any certified public accountant or public accountant as independent who is not in fact independent. For example, an accountant will be considered not independent with respect to any person or any of its parents, its subsidiaries, or other affiliates [1] in which, during the period of his professional engagement to examine the financial statements being reported on or at the date of his report, he, his firm, or a member of his firm had, or was committed to acquire, any direct financial interest or any material indirect financial interest; [2] with which, during the period of his professional engagement to examine the financial statements being reported on, at the date of his report or during the period covered by the financial statements, he, his firm, or a member of his firm was connected as a promoter, underwriter, voting trustee, director, officer, or employee. A firm's independence will not be deemed to be affected adversely where a former officer or employee of a particular person is employed by or becomes a partner, shareholder or other principal in the firm and such individual has completely disassociated himself from the person and its affiliates and does not participate in auditing financial statements of the person or its affiliates covering any period of his employment by the person. For the purposes of § 210.2–01(b), the term "member" means [i] all partners, shareholders, and other principals in the firm, [ii] any professional employee involved in providing any professional service to the person, its parents, subsidiaries, or other affiliates, and [iii] any professional employee having managerial responsibilities and located in [the engagement office] or other office of the firm which participates in a significant portion of the audit.

17 CFR Part 279

[Release No. IA–840]

Amendments to Investment Adviser Requirements Concerning the Application for Registration

AGENCY: Securities and Exchange Commission.

ACTION: Permanent adoption of amendments to form.

SUMMARY: The Commission is adopting on a final basis certain temporary amendments relating to the registration requirements under the Investment Advisers Act of 1940. The amendments simplify the registration requirements for investment advisers subject to registration by deleting certain items from the investment adviser registration form.

EFFECTIVE DATES: April 6, 1983.

FOR FURTHER INFORMATION CONTACT: Arthur E. Dinerman, Esq., Office of Regulatory Policy, Division of Investment Management, Securities and Exchange Commission, 450 Fifth Street, NW., Stop 5–2, Washington, D.C. 20549, (202) 272–3021.

SUPPLEMENTARY INFORMATION: The Commission is announcing the permanent adoption of certain temporary amendments to Part I of Form ADV [17 CFR 279.1], the investment adviser registration form.[1] The temporary amendments were adopted on May 14, 1982 to simplify the form by deleting certain items from it.[2] Specifically, the temporary amendments, which were to have been in effect until March 31, 1983, deleted Items 5(b), 7(b), 13(b), 15(i), 15(iii), 16(i) and 16(iii) from Part I of Form ADV. In its release adopting the temporary amendments, the Commission invited public comments as to whether the temporary amendments should be made permanent.

The Commission received two letters in response to its invitation for comments. One letter supported adoption of the amendments and urged that the temporary amendments be made permanent. The other letter urged retention of Item 13(b), stating that the item would enable the Commission and interested persons to determine whether an applicant is permitted under Section 208 of the Advisers Act [15 U.S.C. 80b–8]

[1] It should be noted that the changes to Form ADV which are the subject of this action relate only to Part I of Form ADV and not to Part II of the form which contains the information required to be furnished to clients and prospective clients under Rule 204–3 [17 CFR 275.204–3], the "brochure rule". In a recent decision in the District Court of the Eastern District of New York *(SEC v. Christopher Lowe,* 82 Civ. 1616, February 2, 1983) the court denied injunctive relief to the Commission on its claim that the defendants violated the antifraud provisions of Section 206 of the Advisers Act by failing to disclose to subscribers of their investment advisory newsletters that Lowe had been criminally convicted of misappropriating client funds and that he had been barred by the Commission from the investment advisory business. The court concluded that the Commission's authority to require disclosure derives from Section 204 of the Advisers Act and that no Commission rule under that section requires such disclosure of past misconduct to clients and prospective clients. The Commission wishes to emphasize that its action today should not be taken as any indication of its views with respect to the court's conclusions regarding the inter-relationship, if any, of the requirements of the brochure rule with the disclosure obligations which are imposed on investment advisers by virtue of the anti-fraud provisions contained in Section 206 of the Advisers Act [15 U.S.C. 80b–6]. The Commission has not determined whether to appeal those portions of the court's decision denying the relief sought by the Commission. The Commission notes, moreover, that paragraph (c) of Rule 204–3 [17 CFR 275.204–3(c)] specifically provides that nothing in that rule shall relieve an investment adviser from any obligation pursuant to, among other things, any provisions of the Advisers Act to disclose any information to clients or prospective clients not specifically required under the brochure rule. An investment adviser is required under Section 206 of the Advisers Act to disclose all material facts to clients and prospective clients. *See, SEC v. Capital Gains Research Bureau, Inc.,* 375 U.S. 180 (1963).

[2] Release No. IA–696, May 14, 1982 [47 FR 22505, May 25, 1982 and 47 FR 29652, July 8, 1982].

to use the term "investment counsel" as descriptive of its business. Item 13(b) asked whether a substantial part of the applicant's investment advisory business consists of rendering "investment supervisory services." Section 208(c) of the Advisers Act prohibits an adviser from using the term "investment counsel" unless his or its principal business consists of acting as investment adviser and a substantial part of his or its business consists of rendering "investment supervisory services." It is true that Item 13(b) was intended to elicit a response that would have a bearing on whether an investment adviser could properly use the term "investment counsel." However, as stated in Release No. IA-805, Item 13(b) partially duplicated another item of Form ADV. Moreover, whether or not an adviser may properly use the term "investment counsel" is dependent on the actual facts and may not be determined solely on the basis of responses to a form. Accordingly, the Commission does not believe that its ability to make such determinations will be impaired by deletion of Item 13(b).

For the reasons discussed in Release No. IA-805, the Commission has determined to adopt the amendments on a permanent basis. The Commission has determined that the information contained in the deleted items, although generally useful to the Commission in its understanding of the investment advisory industry, is not sufficiently important to justify the costs of continued use of the items.

List of Subjects in 17 CFR Part 279

Investment advisers, Reporting requirements, Securities.

Text of Amendment

The Commission hereby amends Part 279 of Chapter II of Title 17 of the Code of Federal Regulations as follows:

PART 279—FORMS PRESCRIBED UNDER THE INVESTMENT ADVISERS ACT OF 1940

By amending Part I of Form ADV required by § 279.1 as follows:

(i) Item 5 of Part I is amended by deleting part (b) in its entirety and by deleting the designation "(a)".

(ii) Item 7 of Part I is amended by deleting part (b) in its entirety and by deleting the designation "(a)".

(iii) Item 13 of Part I is amended by deleting part (b) in its entirety and by deleting the designation "(a)".

(iv) Item 15 of Part I is amended by deleting parts (i) and (iii) in their entirety and by deleting the designation "(ii)".

(v) Item 16 of Part I is amended by deleting parts (i) and (iii) in their entirety and by deleting the designation "(ii)".

Statutory Authority

The Commission amends Form ADV pursuant to the authority contained in Sections 203, 204 and 211(a) of the Act [15 U.S.C. 80b-3, 80b-4 and 80b-11(a)].

Dated: February 28, 1983.

By the Commission.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

DEPARTMENT OF JUSTICE

Office of the Attorney General

28 CFR Part 0

[Order No. 1002-83]

Organization of the Department of Justice

AGENCY: Department of Justice.

ACTION: Final rule.

SUMMARY: Revisions to Subparts H, I and K of Part 0 of 28 CFR, Organization of the Department of Justice, to reflect the transfer of the Consumer Affairs Section from the Antitrust Division to the Civil Division and the transfer of certain civil litigation arising under the Immigration and Nationality Act and related laws from the Criminal Division to the Civil Division.

EFFECTIVE DATE: February 23, 1983.

FOR FURTHER INFORMATION CONTACT: J. Paul McGrath, Assistant Attorney General, Civil Division, U.S. Department of Justice, 10th and Constitution Avenue, N.W., Room 3143, Washington, D.C. 20530. Telephone: (202) 633-3301.

SUPPLEMENTARY INFORMATION: This order is not a rule within the meaning of either Executive Order 12291 section 1(a) or the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*

List of Subjects in 28 CFR Part 0

Government employees, Organization of functions (Government agencies) and Authority delegations (Government agencies).

PART 0—[AMENDED]

By virtue of the authority vested in me as Attorney General by 5 U.S.C. 301 and 28 U.S.C. 509 and 510, Part 0 of Title 28 of the Code of Federal Regulations is hereby amended as follows:

§0.40 [Amended]

1. In § 0.40 of Subpart H, Antitrust Division, paragraph (j) is removed.

§0.41 [Amended]

2. In § 0.41 of Subpart H, Antitrust Division, paragraph (b) is removed.

3. In § 0.41 of Subpart H, Antitrust Division, paragraphs (c), (d), (e), (f) and (g) are redesignated as paragraphs (b), (c), (d), (e) and (f) respectively.

4. In § 0.41, paragraph (g), redesignated as paragraph (f) is amended by changing "paragraphs (a) through (f)" to "paragraphs (a) through (e)" and by removing the words "and judgments rendered upon review of Federal Trade Commission orders by courts of appeals."

5. In § 0.41 of Subpart H, Antitrust Division, paragraph (h) is removed.

6. In § 0.41 of Subpart H, Antitrust Division, paragraph (i) is redesignated as paragraph (g).

§0.45 [Amended]

7. A new § 0.45(j) is added to Subpart I, Civil Division, to read as follows:

* * * * *

(j) Consumer Litigation—All civil and criminal litigation and grand jury proceedings arising under the Federal Food, Drug and Cosmetic Act (21 U.S.C. 301 et seq.), the Federal Hazardous Substances Act (15 U.S.C. 1261 *et seq.*), the Fair Packaging and Labeling Act (15 U.S.C. 1451 *et seq.*), the Automobile Information Disclosure Act (15 U.S.C. 1231 *et seq.*), the odometer requirements section and the fuel economy labeling section of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 1981 *et seq.*), the Federal Cigarette Labeling and Advertising Act (15 U.S.C. 1331 *et seq.*), the Poison Prevention Packaging Act of 1970 (15 U.S.C. 1471 *et seq.*), the Federal Caustic Poison Act (15 U.S.C. 401 note), the Consumer Credit Protection Act (15 U.S.C. 1611, 1681q and 1681r), the Wool Products Labeling Act of 1939 (15 U.S.C. 68), the Fur Products Labeling Act (15 U.S.C. 69), the Textile Fiber Products Identification Act (15 U.S.C. 70 *et seq.*), the Consumer Product Safety Act (15 U.S.C. 2051 *et seq.*), the Flammable Fabrics Act (15 U.S.C. 1191 *et seq.*), the Refrigerator Safety Device Act (15 U.S.C. 1211 *et seq.*), Title I of the Magnuson-Moss Warranty—Federal Trade Commission Improvement Act (15 U.S.C. 2301 *et seq.*), the Federal Trade Commission Act (15 U.S.C. 41 *et seq.*), and Section 11(1) of the Clayton Act (15 U.S.C. 21(1)) relating to violations of orders issued by the Federal Trade Commission. Upon appropriate certification by the Federal Trade Commission, the institution of criminal

proceedings, under the Federal Trade Commission Act (15 U.S.C. 56(b)), the determination whether the Attorney General will commence, defend or intervene in civil proceedings under the Federal Trade Commission Act (15 U.S.C. 56(a)), and the determination under the Consumer Product Safety Act (15 U.S.C. 2076(b)(7)), whether the Attorney General will initiate, prosecute, defend or appeal an action relating to the Consumer Product Safety Commission.

To effect the transfer of certain civil litigation arising under the Immigration and Nationality Act and related laws from Assistant Attorney General, Criminal Division, to the Assistant Attorney General, Civil Division, by virtue of the authority vested in me as Attorney General by 5 U.S.C. 301 and 28 U.S.C 509 and 510, Part 0 of Title 28 of the Code of Federal Regulations is hereby amended as follows:

§ 0.45 [Amended]

1. Add a new paragraph (k) to 28 CFR 0.45 to read:

* * * * *

(k) All civil litigation arising under the passport, visa and immigration and nationality laws and related investigations and other appropriate inquiries pursuant to all the power and authority of the Attorney General to enforce the Immigration and Nationality Act and all other laws relating to the immigration and naturalization of aliens except all civil litigation, investigations, and advice with respect to forfeitures, return of property actions, Nazi war criminals identified in 8 U.S.C. 1182(a)(33), 1251(a)(19) and civil actions seeking exclusively equitable relief which relate to national security within the jurisdiction of the Criminal Division under § 0.55 (d), (f), (i) and § 0.61(d).

§ 0.55 [Amended]

2. Revise § 0.55(d) to clarify the initial clause and to qualify the words "the Immigration and Nationality Act."

* * * * *

(d) Forfeiture or civil penalty actions (including petitions for remission or mitigation of forfeitures and civil penalties, offer in compromise and related proceedings) under the Federal Aviation Act of 1958, the Contraband Transportation Act, the Copyrights Act, the customs laws (except those assigned to the Civil Division which involve sections 592, 704(i)(2) or 734(i)(2) of the Tariff Act of 1930), the Export Control Act of 1949, the Federal Alcohol Administration Act, the Federal Seed Act, the Gold Reserve Act of 1934, the Hours of Service Act, the Animal Welfare Act, the Immigration and Nationality Act (except civil penalty actions and petitions and offers related thereto) the neutrality laws, laws relating to cigarettes, liquor, narcotics and dangerous drugs, other controlled substances, gambling, war materials, pre-Columbian artifacts, coinage, and firearms, locomotive inspection (45 U.S.C. 22, 23, 28–36), the Organized Crime Control Act of 1970, prison-made goods (18 U.S.C. 1761–1762), the Safety Appliance Act, standard barrels (15 U.S.C. 231–242), the Sugar Act of 1948, and the Twenty-Eight Hour Law.

* * * * *

3. Revise § 0.55(f) to read:

* * * * *

(f) All criminal litigation and related investigations and inquiries pursuant to all the power and authority of the Attorney General to enforce the Immigration and Nationality Act and all other laws relating to the immigration and naturalization of aliens; all advice to the Attorney General with respect to the exercise of his parole authority under 8 U.S.C. 1182(d)(5) concerning aliens who are excludable under 8 U.S.C. 1182(a)(23), (28), (29), or (33); and all civil litigation with respect to the individuals identified in 8 U.S.C. 1182(a)(33), 1251(a)(19).

* * * * *

4. Revise § 0.55(i) to read:

* * * * *

(i) All civil proceedings seeking exclusively equitable relief against Criminal Division activities including criminal investigations, prosecutions and other criminal justice activities (including without limitation, applications for writs of habeas corpus not challenging exclusion, deportation or detention under the immigration laws and coram nobis), except that any proceeding may be conducted, handled, or supervised by another division by agreement between the head of such division and the Assistant Attorney General in charge of the Criminal Division.

28 CFR Part 0

[Order No. 1003–83]

Delegation of the Attorney General's Authority With Respect to Export Trade Certificates of Review

AGENCY: Department of Justice.

ACTION: Final Rule.

SUMMARY: This rule delegates all of the Attorney General's functions with respect to determinations concerning export trade certificates of review to the Assistant Attorney General for Antitrust. It also delegates to the Assistant Attorney General for Antitrust the authority to defend the Secretary of Commerce and the Attorney General, or their delegates, in actions brought before federal district courts and courts of appeals to set aside a determination with respect to export trade certificates of review.

EFFECTIVE DATE: February 23, 1983.

FOR FURTHER INFORMATION CONTACT: Stuart M. Chemtob, Attorney, Foreign Commerce Section, Antitrust Division, Department of Justice, Washington, D.C. 20530. Tel. (202) 633–3718.

SUPPLEMENTARY INFORMATION: This order deals with agency management. It is not required to be and has not been published in proposed form for comment under 5 U.S.C. 553(b). It is not a rule within the meaning of or subject to the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.* Likewise, it is not a rule within the meaning of or subject to Executive Order No. 12291 ("Federal Regulation").

List of Subjects in 28 CFR Part 0

Government employees, Organization and functions (Government Agencies), Authority delegations (Government Agencies).

PART 0—[AMENDED]

Accordingly, by virtue of the authority vested in me as Attorney General by 28 U.S.C. 510, it is hereby ordered as follows:

1. A new paragraph (k) is added to 28 CFR 0.40 to read as follows:

§ 0.40 General functions.

* * * * *

(k) As the delegate of the Attorney General, performance of all functions which the Attorney General is required or authorized to perform by Title III of Pub. L. 97–290 (15 U.S.C. 4011–4021) with respect to export trade certificates of review.

2. A new paragraph (j) is added to 28 CFR 0.41 to read as follows:

§ 0.41 Special functions.

* * * * *

(j) Defending the Secretary of Commerce and the Attorney General, or their delegates, in actions to set aside a determination with respect to export trade certificates of review under Section 305(a) of Pub. L. 97–290 (15 U.S.C. 4015(a)).

Dated: February 23, 1983.

[Order No. 1001-83]

Redelegation of Authority To Operate and Maintain Buildings

AGENCY: Department of Justice.

ACTION: Final rule.

SUMMARY: The Administrator of the General Services Administration has delegated to the Attorney General the authority to operate and maintain the Main Justice Building and the J. Edgar Hoover Building. This order redelegates the operation and maintenance authority over these buildings, and any future such authority as delegated to the Attorney General by the General Services Administration, to the Assistant Attorney General for Administration.

EFFECTIVE DATE: February 28, 1983.

FOR FURTHER INFORMATION CONTACT: Kenneth L. McElroy, Assistant Director for Facilities Management, Administrative Services Staff, Justice Management Division, Department of Justice, Room 6312, 10th and Constitution Avenue, NW., Washington, D.C. 20530 ((202) 633-4405).

SUPPLEMENTARY INFORMATION: This order deals with agency management. Therefore, it is not required to be and has not been published in proposed form for comment. This order is not a rule within the meaning of either Executive Order No. 12291 or of the Regulatory Flexibility Act, 5 U.S.C. 601 et seq.

BILLING CODE 4410-01-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 944

Removal of Conditions of Approval of the Utah Permanent Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Final rule.

SUMMARY: This document amends 30 CFR Part 944 to remove two of the Secretary's conditions of approval of the Utah permanent regulatory program under the Surface Mining Control and Reclamation Act of 1977 (SMCRA or the Act). Utah submitted provisions to OSM on December 8, 1982, intended to satisfy the two conditions of approval. OSM has reviewed these amendments and determined they satisfy the Secretary's conditions.

EFFECTIVE DATE: March 7, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. Arthur W. Abbs, Chief, Division of State Program Assistance, Office of Surface Mining Reclamation and Enforcement, 1951 Constitution Avenue, NW., Washington, D.C. 20240, Telephone: (202) 343-5351.

SUPPLEMENTARY INFORMATION: On March 3, 1980, the State of Utah submitted to the Department of the Interior its proposed permanent regulatory program under SMCRA.

On October 3, 1980, following a review of the proposed program as outlined in 30 CFR Part 732, the Secretary approved in part and disapproved in part the proposed program. Notice of that decision and the Secretary's findings were published in the **Federal Register** on October 24, 1980 (45 FR 70481-70510). The State of Utah resubmitted the program for approval by the Secretary on December 23, 1980. The resubmitted program included those portions of the initial submission not approved by the Secretary on October 3, 1980. After thoroughly reviewing the program resubmission and providing an opportunity for the public to comment, the Secretary of the Interior determined that the Utah program, including the resubmission did, with minor exceptions, meet the Federal permanent program regulations. Accordingly, the Secretary of the Interior conditionally approved the Utah program subject to the correction of twelve minor deficiencies. The approval was effective upon publication of the notice of conditional approval in the January 21, 1981 **Federal Register** (46 FR 5899-5915).

Information pertinent to the general background, revision, modifications, and amendments to the proposed permanent program submission as well as the Secretary's findings, the disposition of comments and a detailed explanation of the conditions of approval of the Utah program can be found in the January 21, 1981 **Federal Register** (46 FR 5899-5915).

In accepting the Secretary's conditional approval, Utah agreed to satisfy conditions "a"-"e" by December 1, 1981, and conditions "f"-"l" by July 1, 1981.

Subsequently, Utah requested an extension of the deadline to meet conditions "f", "g", and "h" until January 1, 1982. On October 30, 1981 (46 FR 54070), OSM announced the Secretary's decision to approve the extension.

Upon the State's request the deadline for the State to meet condition "f" was further extended to September 1, 1982, and the deadline for the State to meet condition "h" to January 1, 1983 (47 FR 234155-234156, May 27, 1982).

On June 29, 1981, Utah submitted statutory and regulatory revisions intended to satisfy conditions "a"-"e", "g" and "i"-"l".

On June 22, 1982 (47 FR 26827-26831), the Assistant Secretary for Energy and Minerals announced his decision to remove conditions "a"-"e", "j" "l" and to grant Utah until September 1, 1982, to submit modifications to satisfy conditions "g", "i" and "k". In the June 22, 1982 notice, the Assistant Secretary also announced his decision to impose a new condition "m" requiring the State to correct by January 1, 1983, a deficiency

in the State program which had come to OSM's attention.

On August 26, 1982, Utah adopted and submitted to OSM regulatory modifications intended to satisfy conditions "f", "g", "l" and "k". Following OSM's review of these amendments as outlined in 30 CFR 732, the Secretary removed conditions "f", "g", "l" and "k" (47 FR 55672, December 13, 1982).

On December 8, 1982, Utah submitted amendments to satisfy conditions "h" and "m". On December 30, 1982, OSM announced receipt of these amendments in the **Federal Register** (47 FR 58303–58305) and invited public comment through January 31, 1983, on the adequacy of the provisions submitted in satisfying conditions "h" and "m". A public hearing scheduled for January 25, 1983, was cancelled, as no one indicated an interest in presenting testimony at the hearing.

Secretary's Determinations

Following are the Secretary's findings on the amendments submitted by Utah on December 3, 1982 to meet conditions "h" and "m".

1. Condition "h" of the Secretary's approval of Utah's program stipulates that Utah must submit to the Secretary by January 1, 1983, copies of fully enacted regulations specifying that underdrains are required in all valley fills unless a waiver is granted with an experimental practice approved by OSM, in accordance with UMC 817.72(b)/SMC 816.72(b) and specifying lifts for valley fills will not be greater than four feet, or less, if required by the regulatory authority in UMC 817.72(c)/SMC 816.72(c) consistent with 30 CFR 817.72(c) or otherwise amends its program to accomplish the same result.

Utah has amended UMC 817.72/SMC 816.72 subpart (b) to require that the underdrain requirement is not waived except with the approval of the Director of OSM after a demonstration that the waiver qualifies under the requirements for experimental practice set forth under UMC/SMC 785. Also UMC 817.72(c) and SMC 816.72(c) have been modified to require that spoil shall be hauled or conveyed and placed in a controlled manner and concurrently compacted as specified by the Division in lifts no greater than four feet or less, unless approved by the Director of the Office of Surface Mining as an experimental practice in accordance with UMC 785.13. The Secretary has determined that these amended provisions satisfy condition "h" of his approval of Utah's program.

2. Condition "m" of the Secretary's approval of Utah's program stipulates that Utah must submit copies of fully enacted regulations deleting the provision at UMC/SMC 785.19(c) which allows a waiver of the requirements of subsections (d) and (e) of UMC/SMC 785.19 and of UMC/SMC 822 or otherwise amends its program to be consistent with 30 CFR 785.19 (c) and (d).

Utah has submitted an amended version of UMC/SMC 785.19(c)(3)(ii) which provides that if the Division makes a finding that the area of the alluvial valley floor to be affected is insignificant to farming it may waive all or any of the requirements of paragraphs (d) and (e) of section 785.19 and of section 822 provided any waiver granted shall not negate the requirements necessary for the protection of essential hydrologic functions.

With respect to the Federal requirements for insuring that the surface mining operation does not materially damage the quantity or quality of water, Judge Thomas Flannery ruled (In re: Permanent Surface Mining Regulation Litigation, Civil No. 79–114–D.D.C. May 16, 1980) that the material damage requirements only apply to alluvial valley floors that are significant to farming. Hence, although OSM's regulations do not explicitly allow a waiver to the material damage requirements at 30 CFR Parts 785 and 822, under Judge Flannery's decision the regulatory authority cannot require an operator to comply with those requirements if a determination has been made that the alluvial valley floor is insignificant to farming. Regardless of the regulatory authority's determination with respect to the alluvial valley floor's significance to farming, the permit applicant must submit adequate information and analysis to allow the regulatory authority to determine that the operation will preserve the essential hydrologic functions of the alluvial valley floor, and must comply with the performance standards at 30 CFR Part 822 relative to the protection of the essential hydrologic function of the alluvial valley floor.

As stated above, Utah's amended version of UMC/SMC 785.19(c)(3)(ii) allows the Division to waive any or all of the requirements of UMC/SMC section 785.19 and 822 except the requirements pertaining to the protection of essential hydrologic functions if the Division finds that the area of the alluvial valley floor to be affected is not significant to farming.

OSM has determined that Utah's waiver provision at UMC/SMC 785.19(c)(3)(ii) is consistent with the Federal rules as interpreted by the Court. Thus, the Secretary removes condition "m".

Public Comment

The Bureau of Mines commented that Utah's underdrain requirement at UMC 817.72(b)(4)/SMC 816.72(b)(4) may be impossible to meet. This provision requires that underdrains for valley fills shall consist of nondegradeable, nonacid, or toxic-forming rock such as natural sand and gravel, sandstone, limestone, or other durable rock that will be free of coal, clay, or shale. This requirement is virtually identical to OSM's provision at 30 CFR 817.72(b)(4). Thus, the Secretary finds the State's provision consistent with the Federal standard.

The National Park Service (NPS) stated that Utah's amended regulations at UMC 817.72/SMC 816.72 appear to contain an internal contradiction. Specifically, NPS commented that paragraph (b)(3) of this section which specifies that "Underdrains * * * will be free of coal, clay or shale" contradicts paragraph (b)(4) which precludes the use of shale as a predominant type of fill material. OSM has determined that NPS may be confusing the allowable fill material with the allowable construction material for the underdrain itself. OSM has determined that the State's requirements for underdrains and its procedures for placement of excess spoil in valley fills are consistent with the Federal rules at 30 CFR 817.72.

The Soil Conservation Service, the Bureau of Land Management and the Fish and Wildlife Service commented that they had reviewed the amended provisions of UMC/SMC 785.19 and UMC 817. 72/SMC 816.72 and had no objections to the State's revised rules.

Removal of Conditions

Accordingly, 30 CFR Part 944 is hereby amended to indicate approval of the provisions submitted by the State on December 8, 1982, and removal of the two remaining conditions of the Secretary's approval of Utah's program, conditions "h" and "m".

Additional Determinations

1. *Compliance with the National Environmental Policy Act.* The Secretary has determined that, pursuant to Section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

2. *Executive Order No. 12291 and the Regulatory Flexibililty Act.* On August 28, 1981, the Office of Management and Budget (OMB) granted OSM an exemption from Sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of a Regulatory Impact Analysis and regulatory review by OMB.

The Department of the Interior has determined that this rule will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule does not impose any new requirements; rather, it ensures that existing requirements established by SMCRA and the Federal rules will be met by the State.

3. *Paperwork Reduction Act.* This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C 3507.

On February 16, 1983, the Environmental Protection Agency transmitted its written concurrence on the December 8, 1982, Utah program amendments.

List of Subjects in 30 CFR Part 944

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

Accordingly, Part 944 of Title 30 is amended as set forth herein.

Dated: February 28, 1983.

William P. Pendley,

Acting Assistant Secretary for Energy and Minerals.

PART 944—UTAH

§ 944.11 [Removed]

1. 30 CFR 944.11 is removed.

2. 30 CFR 944.15 is amended by adding paragraph (d) to read as follows:

§ 944.15 Approval of amendments to State regulatory program.

* * * * *

(d) The amendments to the following sections were adopted.

November 30, 1982, are approved effective March 7, 1983.

(i) SMC 816.72/UMC 817.72 subparts (b) and (c).

(ii) UMC/SMC 785.19 subpart (c)(3)(ii).

BILLING CODE 4310-05-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 81

[A-10-FRL 2299-8]

Designation of Areas for Air Quality Planning Purposes: Washington

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: By this notice, EPA redesignates Port Angeles, Washington, from "nonattainment" for the secondary National Ambient Air Quality Standards for total suspended particulates (TSP) to "attainment." This redesignation is based on documentation submitted by the Department of Ecology pursuant to section 107(d) of the Clean Air Act. The data indicates that the Port Angeles area has been attaining secondary TSP standards since 1979 and thus qualifies for an attainment designation.

EFFECTIVE DATE: This action is effective on May 6, 1983 unless notice is received before April 6, 1983 that someone wishes to submit adverse or critical comments. If such notice is received, EPA will open a formal 30-day comment period on this action.

ADDRESSES: Copies of the materials submitted to EPA may be examined during normal business hours at:

Central Docket Section (10A-82-21), West Tower Lobby, Gallery I, Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460

Air Programs Branch, Environmental Protection Agency, 1200 Sixth Avenue, Seattle, Washington 98101

State of Washington, Department of Ecology, 4224 Sixth Avenue, SE, Rowe Six, Building #4, Lacey, Washington 98504

Copy of State Submittal may be Examined at: The Office of the Federal Register, 1100 L Street, NW, Room 8401, Washington, D.C. 20460.

Comments Should be Addressed to: Laurie M. Kral, Air Programs Branch, Environmental Protection Agency, 1200 Sixth Avenue, Seattle, Washington 98101.

FOR FURTHER INFORMATION CONTACT: Michael J. Schultz, Air Programs Branch, Environmental Protection Agency, 1200 Sixth Avenue, Seattle, Washington 98101, Telephone: (206) 442-1985, FTS: 399-1985.

SUPPLEMENTARY INFORMATION: On March 3, 1978, EPA designated, pursuant to the requirements of Section 107(d) of the Clean Air Act (as amended), all areas of the country as "attainment," "nonattainment," or "unclassifiable" in terms of meeting National Ambient Air Quality Standards. At that time, Port Angeles, Washington, was designated "nonattainment" for secondary TSP standards.

On December 7, 1982, the State of Washington Department of Ecology (DOE) submitted a request for EPA to redesignate Port Angeles to "attainment" for TSP. The State submittal described area source dust controls that were implemented and contained documentation that no TSP standards have been violated in Port Angeles since 1979. With more than two years of data showing attainment of standards, EPA is redesignating the Port Angeles area to "attainment."

The public should be advised that this action will be effective on May 6, 1983. However, if notice is received within 30 days that someone wishes to submit adverse or critical comments on any or all of the revisions approved herein, the action on those revisions will be withdrawn and two subsequent notices will be published before the effective date. One notice will withdraw the final action on those revisions and another will begin a new rulemaking by announcing a proposal of the action on those revisions and establishing a comment period.

Under section 307(b)(1) of the Clean Air Act, petition for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by May 6, 1983. This action may not be challenged later in civil proceedings to enforce its requirements (See section 307(b)(2) of the Clean Air Act).

Pursuant to the provisions of 5 U.S.C. 605(b), the Administrator has certified that area redesignations under section 107 of the Clean Air Act will not have a significant impact on a substantial number of small entities (46 FR 8709; January 27, 1981). This action constitutes a redesignation under Section 107 within the terms of the January 27, 1981 certification.

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

(Secs. 107 and 301(a) of the Clean Air Act (42 U.S.C. 7407 and 7601(a))

List of Subjects in 40 CFR Part 81

Air pollution control, National parks, Wilderness areas.

Dated: February 16, 1983.

Anne M. Gorsuch,

Administrator.

PART 81—[AMENDED]

Part 81 of Chapter I, Title 40 Code of Federal Regulations is amended as follows:

Subpart C—Section 107 Attainment Status Designations

In § 81.348, the table for Total Suspended Particulate is revised as follows:

§ 81.348 Washington.

WASHINGTON—TSP

Designated area	Does not meet primary standards	Does not meet secondary standards	Cannot be classified	Better than national standards
Seattle—that area including the north portion of the Duwamish industrial area, and extending to the southern boundary of the CBD.	X			
Seattle—an area of the Duwamish Valley extending approximately 2½ miles further south than the above area.		X		
Renton		X		
Kent		X		
Tacoma—that area including the Tide Flats industrial area, east end of the CBD and the north end of South Tacoma Way corridor.	X			
Port Angeles—small area of the CBD				X

BILLING CODE 6560-50-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 64

List of Communities Eligible for the Sale of Insurance Under the National Flood Insurance Program

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: This rule lists communities participating in the National Flood Insurance Program (NFIP). These communities have applied to the program and have agreed to enact certain flood plain management measures. The communities' participation in the program authorizes the sale of flood insurance to owners of property located in the communities listed.

EFFECTIVE DATE: The date listed in the fourth column of the table.

ADDRESSES: Flood insurance policies for property located in the communities listed can be obtained from any licensed property insurance agent or broker serving the eligible community, or from the National Flood Insurance Program (NFIP) at: P.O. Box 3429, Bethesda, Maryland 20034, Phone: (800) 638–8620.

FOR FURTHER INFORMATION CONTACT: Mr. Richard E. Sanderson, Chief, Natural Hazards Division (202) 287–0270, 500 C Street Southwest, Donohoe Building, Room 505, Washington, DC 20472.

SUPPLEMENTARY INFORMATION: The National Flood Insurance Program (NFIP), enables property owners to purchase flood insurance at rates made reasonable through a Federal subsidy. In return, communities agree to adopt and administer local flood plain management measures aimed at protecting lives and new construction from future flooding. Since the communities on the attached list have recently entered the NFIP, subsidized flood insurance is now available for property in the community.

In addition, the Director of the Federal Emergency Management Agency has identified the special flood hazard areas in some of these communities by publishing a Flood Hazard Boundary Map. The date of the flood map, if one has been published, is indicated in the sixth column of the table. In the communities listed where a flood map has been published, Section 102 of the Flood Disaster Protection Act of 1973, as amended, requires the purchase of flood insurance as a condition of Federal or federally related financial assistance for acquisition or construction of buildings in the special flood hazard area shown on the map.

The Director finds that delayed effective dates would be contrary to the public interest. The Director also finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary.

The Catalog of Domestic Assistance Number for this program is 83.100 "Flood Insurance." This program is subject to procedures set out in OMB Circular A–95.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, State and Local Programs and Support, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule, if promulgated will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice stating the community's status in the NFIP and imposes no new requirements or regulations on participating communities.

List of Subjects in 44 CFR Part 64

Flood insurance, Flood plains.

PART 64—[AMENDED]

Section 64.6 is amended by adding in alphabetical sequence new entries to the table.

In each entry, a complete chronology of effective dates appears for each listed community. The entry reads as follows:

§ 64.6 List of eligible communities.

State and county	Location	Community No.	Effective dates of authorization/cancellation of sale of flood insurance in community	Special flood hazard area identified
Louisiana: Tangipahoa Parish	Unincorporated areas	220006B	February 2, 1983, suspension withdrawn	Jan. 17, 1975 and Nov. 29, 1977.
Maryland: Kent	Betterton, town of	240069A	do	Jan. 24, 1975.
Michigan:				
Calhoun	Bedford, township of	260052B	do	Aug. 16, 1974 and Aug. 6, 1976.
LeeLanau	Elmwood, township of	260113C	do	Mar. 5, 1976, Sept. 28, 1979 and Sept. 20, 1974.
Antrim	Milton, township of	260637B	do	July 8, 1977.
Oakland	Charter Twp. of Waterford	260264B	do	Aug. 16, 1974 and June 4, 1976.

State and county	Location	Community No.	Effective dates of authorization/cancellation of sale of flood insurance in community	Special flood hazard area identified
Mississippi: Rankin	Richland, city of	[illegible]	do.	Apr. 28, 1978.
Missouri: Charlton	Brunswick, city of	290074B	do.	Mar. 29, 1974 and Jan. 16, 1976.
New Jersey:				
Cape May	Lower, township of	3401538	do.	July 19, 1974.
Sussex	Sussex, borough of	3404578	do.	June 14, 1974 and Mar. 5, 1976.
Ohio:				
Jefferson	Brilliant, village of	[illegible]	do.	Jan. 9, 1974 and May 28, 1976.
Licking	Pataskala, village of	[illegible]	do.	Oct. 8, 1976.
Oklahoma: Grady	Alex, town of	400063A	do.	Nov. 26, 1976.
Pennsylvania: Blair	Snyder, township of	421393B	do.	Jan. 10, 1975 and Dec. 23, 1977.
Rhode Island: Newport	Newport, city of	445403C	do.	July 1, 1974, Nov. 21, 1975 and June 17, 1970.
New York: Allegany	Alfred, town of	360019A	do.	June 18, 1976.
New Jersey:				
Camden	Clementon, borough of	340130A	do.	Feb. 6, 1976.
Salem	Pittsgrove, township of	340421A	do.	Dec. 3, 1976.
New York: Nassau	Laurel Hollow, village of	[illegible]	May 6, 1975, emergency; Jan. 6, 1983, regular; Jan. 6, 1983, suspended; Feb. 4, 1983, reinstated.	June 28, 1974 and July 9, 1976.
Mississippi: Humphreys	Unincorporated areas	[illegible]	Jan. 14, 1974, emergency; Jan. 19, 1983, regular; Jan. 19, 1983, suspended; Feb. 9, 1983, reinstated.	Apr. 14, 1976.
New York: Montgomery	Palatine Bridge, village of	360454B	Dec. 24, 1975, emergency; Nov. 17, 1982, regular; Nov. 17, 1982, suspended; Feb. 9, 1983, reinstated.	Feb. 15, 1974 and June 18, 1976.
New Jersey: Cumberland	Vineland, city of	3401768	Dec. 17, 1971, emergency; July 5, 1982, regular; July 5, 1982, suspended; Feb. 11, 1983, reinstated.	May 4, 1973 and July 22, 1977.
New Mexico: Chaves	Unincorporated areas	3501258	Feb. 2, 1983, emergency; Feb. 2, 1983, regular.	June 13, 1978.
Arkansas: Union	do.	050205A	Feb. 7, 1983, emergency	Dec. 13, 1977.
Oklahoma:				
Ottawa	Commerce, city of	400156	do.	June 4, 1976.
Johnston	Milburn, town of	400306	do.	
Arkansas: Ashley	Unincorporated areas	0500308	Feb. 7, 1983, emergency; Feb. 7, 1983, regular.	Nov. 15, 1977 and Nov. 17, 1982.
Colorado: Phillips	Lamar, city of	0801468	Apr. 8, 1975, emergency; Nov. 17, 1982, regular; Nov. 17, 1982, suspended; Feb. 11, 1983, reinstated.	Mar. 22, 1974 and Aug. 13, 1976.
Arkansas: Van Buren	Unincorporated areas	[illegible]	Feb. 8, 1983, emergency	Do.
Pennsylvania: Northumberland	McEwensville, borough of	421935	Feb. 14, 1983, emergency	Dec. 27, 1974.
Utah: Salt Lake	West Valley City, city of	[illegible]	do.	Do.
Oklahoma: Custer	Butler, town of	[illegible]	Feb. 15, 1983, emergency	Nov. 5, 1976.

(National Flood Insurance Act of 1968 (title XIII of the Housing and Urban Development Act of 1968); effective Jan. 28, 1969 (33 FR 17804, Nov. 28, 1968), as amended, 42 U.S.C. 4001–4128; Executive Order 12127, 44 FR 19367; and delegation of authority to the Associate Director, State and Local Programs and Support)

49 CFR Part 1135

[Ex Parte No. 326 (Sub-3); Ex Parte No. 290 (Sub-2)]

Railroad Cost Recovery Procedures; Regulations Governing the Transfer of General Increases From Master Tariffs Into the Individual Tariffs of Railroads or Rail Ratemaking Organizations

AGENCY: Interstate Commerce Commission.

ACTION: Rule related notice; extension of time.

SUMMARY: The Commission is extending the time period under 49 U.S.C. 10762 (d)(2) and 49 CFR 1300.32 for rail carriers and their agents to transfer into basic tariffs the quarterly cost recovery increases taken pursuant to Ex Parte No. 290 (Sub-No. 2) (46 FR 22594, April 20, 1981) and published in master tariffs. The extension applies only where these increases are published in single, cumulative master tariffs on a yearly basis. The time period in this situation is being extended until the second year following the end of the third quarter of each year in which such an increase is effective. The Commission is granting the extension to allow rail carriers to have the benefit of the entire two-year statutory time period so that the carriers can continue to publish these increases in a single tariff on a yearly basis.

EFFECTIVE DATE: April 6, 1983.

Proposed Rules

Federal Register
Vol. 48, No. 45
Monday, March 7, 1983

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

SMALL BUSINESS ADMINISTRATION

13 CFR Part 121

Definition of Small Business for Preferential Treatment in Purchase of Special Salvage Timber Sales (SSTS)

AGENCY: Small Business Administration.

ACTION: Notice of proposed rulemaking.

SUMMARY: A notice was published in the Federal Register of August 23, 1982, proposing a change to the size standard for the eligibility of small business concerns for preferential award of special salvage timber sales (SSTS). Based on comments received, on that proposal, the Small Business Administration (SBA) hereby proposes that: (1) A significant portion of the logging of an SSTS timber sale sold through preferential bidding to a logger, must be performed by the employees of the purchaser, and (2) that a manufacturer who is preferentially awarded an SSTS sale, must perform a significant portion of log manufacture with its own employees but may subcontract the logging to concerns that are eligible for the preferrential award of an SSTS sale.

DATE: Comments are invited on or before April 6, 1983.

ADDRESS: Address comments to: Andrew Canellas, Director, Office of Industry Analysis, Small Business Administration, 1441 "L" Street NW., Washington, D.C. 20416.

FOR FURTHER INFORMATION CONTACT: Joseph E. Kernan, Director, Office of Natural Resource Sales Assistance, Small Business Administration, 1441 "L" Street NW., Washington, D.C. 20419, Telephone: (202) 653–6078.

SUPPLEMENTARY INFORMATION:

General

In connection with sale of Government-owned special salvage timber designated by the U.S. Forest Service (USFS) as SSTS, by regulation, a small business is a concern that:

(1) Is primarily engaged in the logging or forest products industry;

(2) Is independently owned and operated;

(3) Is not dominant in its field of operations; and

(4) Together with its affiliates, its number of employees has not exceeded 25 persons during any pay period for the past 12 months.

(5) Other regulatory restrictions are also applicable depending upon the eventual use to be made of timber. (See 13 C.F.R. 121.3–9(c) (1), (2) and (3).

The SBA/USFS joint SSTS program is separate and distinct from the regular small business set-aside program involving USFS timber.

On August 23, 1982 (47 FR 36851), SBA published a proposed rule change to the size standard definition of a small business concern for eligibility for preferential award of an SSTS sale. Interested parties were given 60 days in which to submit comments.

Intent of Rule Change

Individuals or concerns qualifying as a small business under the current SBA size standard for purchase of SSTS timber, have been purchasing SSTS set-aside sales and in some cases have been subcontracting all or significant portions of the contractual tasks and obligations to concerns that are larger than the SSTS size standard. For example, SBA has received and analyzed complaints that involved sixteen SSTS sales in one State, alleging the purchaser did not use any of its employees on the sale. Some subcontractors on the sales have had less than 25 employees, other subcontractors have had more than 25 employees. The objective of the program is to provide salvage timber for preferential bidding and logging by SSTS qualified concerns. The intent of this proposed rule change is to require that: a significant portion of the logging of an SSTS timber sale sold through preferential bidding to a logger, must be performed by the employees of the purchaser; and that a manufacturer who is preferentially awarded an SSTS sale must perform a significant portion of log manufacture with its own employees but may subcontract the logging to concerns that are eligible for the preferential award of an SSTS sale. The rule change will define and limit the conditions under which subcontractors may be used for harvest of SSTS timber, thereby more adequately responding to small business logging and manufacturing firms. It will also eliminate the obtaining of contracts under the program by brokers who do not participate in the actual performance of the contracts.

The subcontractor problem was mentioned in a recent General Accounting Office Report (GAO/CED/82–88 of June 23, 1982). One recommendation in that report stated:

Strengthen the special salvage timber sale program regulations to prevent small timber companies from acting as brokers or agents for large companies. This might be achieved by requiring purchasers to perform some or all of the logging on such sales.

Summary of Comments

Most comments received, in response to the initial proposed rule, supported the SSTS program and the 25-employee criteria. There were concerns expressed, however about some aspects of the proposal. Several respondents pointed out that in some instances it may be necessary to subcontract an element of logging. The proposed policy provides that a significant portion of the logging operation, exclusive of hauling, be performed by employees of the purchaser of the SSTS sale. Where the logger does not ordinarily perform lesser portions of the logging operation or lacks special equipment to meet contract logging requirements, operation of the SSTS program will permit the purchaser of an SSTS sale to subcontract to concerns eligible for preferential award of an SSTS sale.

Some respondents expressed concern that wood products manufacturers with less than 25 employees usually do not perform their own logging. Several manufacturers suggested that the size standard require that the employees of the purchaser of a preferentially awarded SSTS sale be involved in either the logging or manufacturing of the SSTS timber. The second proposed rule provides that a manufacturer who is preferentially awarded an SSTS sale, must perform a significant portion of log manufacture with its own employees, but may only subcontract the logging to concerns that are eligible for the preferential award of an SSTS sale.

SBA hereby certifies that the proposed rule does not constitute a major rule for the purpose of Executive Order 12291. In addition, this proposed

rule will not have a significant economic impact on a substantial number of small entities for the purpose of the Regulatory Flexibility Act. In this regard, the regulation will merely clarify that: (1) The SSTS program is intended to benefit small businesses; (2) that small businesses are required to perform SSTS contracts which they are awarded; and (3) that the program is not intended to permit large businesses to benefit as a result of subcontracts. Thus there will be no adverse impact upon small entities as a result of this regulation.

Small business.

PART 121—SMALL BUSINESS SIZE STANDARDS

Accordingly, pursuant to sec. 5(b)(6) of the Small Business Act, 15 U.S.C. 634(b)(6), 13 CFR 121.3–9 is proposed to be amended as follows:

* * * * *

1. Paragraph (c)(2) would be amended by adding the following new paragraph:

§ 121.3–9 [Amended]

(c) * * *
(2) * * *

(iii) It agrees that as an eligible logger, it will accomplish a significant portion of the logging operation, exclusive of hauling, with its own employees. Significant logging of timber means using its own employees to accomplish two or more of the following elements: (A) Felling and bucking, (B) yarding, (C) loading. It further agrees that such SSTS sale logging elements not accomplished with its own employees will be subcontracted only to concerns eligible for preferential award of an SSTS sale.

(2) Paragraph (c)(3) is amended by revising paragraph (ii) and adding (iii) to read as follows:

(c) * * *
(3) * * *

(ii) It agrees that it will manufacture a significant portion of the logs with its own employees. Manufacture of logs means, at the minimum, a breakdown of the log into the rough cut of the finished product. This provision assumes that the successful bidder will remain a small business until the products have been manufactured. Accordingly, if, after acquiring the set-aside sale the bidder is purchased by, becomes controlled by, or merged with a large business, so much of such timber (or sawlogs therefrom) as is necessary shall be sold to one or more small businesses for compliance with the 30 percent (50 percent in Alaska) restriction. Any concern which self-certifies as a small business concern for the purpose of award under a small business set-aside sale of Government timber is expected to maintain evidence that it did so in good faith. Accordingly, such a concern will have to maintain for a period of 3 years the name, address, and size status of each concern to whom the timber or sawlogs were sold or disposed, and the log species, grades, and volumes involved. Such concern, and any subsequent small business concern that acquires the sawlogs, also shall require its small business purchasers to maintain similar records for a period of 3 years. Further, if the timber purchased is not to be resold in the form of sawlogs but is to be manufactured into lumber or timbers by a concern other than the bidder, the bidder must maintain records to show the name, address, and size status of the concern manufacturing the sawlogs into lumber or timbers.

(iii) It further agrees that it will accomplish the logging of the SSTS timber, exclusive of hauling, with its own employees, or will subcontract such logging only to concerns eligible for preferential award of an SSTS sale.

13 CFR Part 108

Loans to State and Local Development Companies

AGENCY: Small Business Administration.

ACTION: Proposed rulemaking.

SUMMARY: SBA proposes to amend 13 CFR 108.503–4(c) to limit SBA participation with tax-exempt financing under the program authorized by section 503 of the Small Business Investment Act, 15 U.S.C. 697. Under the proposed rule, SBA would participate in the financing of a project which is also financed by tax-exempt obligations provided the repayment of the proceeds of SBA guaranteed financing is not subordinate to the repayment of the tax-exempt financing. This amendment would be in accordance with existing Federal policy which prohibits Federal agencies from directly or indirectly providing a guarantee to tax-exempt obligations.

DATE: Comments must be received on or before May 6, 1983.

FOR FURTHER INFORMATION CONTACT: William Hogbin, Chief, Development Company Branch, Office of Lender Relations and Certification, Small Business Administration, 1441 L Street, N.W., Washington, D.C. 20416, telephone (202) 653–6423.

SUPPLEMENTARY INFORMATION: In a typical financing arrangement pursuant to section 503 of the Small Business Investment Act, an amount of money generally not to exceed 40 percent of the cost of a fixed assets project is made available to a small business by a certified development company. That money comes from the proceeds of the sale of a development company debenture, the timely payment of the interest and principal of which is guaranteed to the purchaser by SBA. Ten percent of the cost of the project is generally made available by the development company. The remaining 50 percent of the cost of the business project is supplied by another source.

Pertinent legislative history of the Small Business Investment Act contains the following language with regard to tax-exempt financing and SBA's 503 Certified Development Company Program:

> SBA should not disapprove the guarantee of any debenture or any loan made with the proceeds of a debenture issue, solely because the proceeds would be used in a project whose other sources of financing include, or are collateralized by, tax-exempt industrial revenue or development bonds.

SBA responded to this instruction by publishing regulations which provide in part that loans made by Certified Development Companies with the proceeds of debentures guaranteed by SBA pursuant to Section 503 may be subordinated to other financing for the project which may be from tax-exempt obligations.

Subsequently, SBA has determined that the regulation is not consistent with a Government-wide policy which precludes the guarantee of tax-exempt obligations, directly or indirectly. Therefore, SBA is proposing that in the section 503 Program, Certified Development Companies may finance projects with the proceeds of SBA guaranteed debentures and tax-exempt obligations only if the latter are on a parity level or subordinated to the repayment of the former. The proposed rule will affect only those small concerns receiving assistance under the program which propose to obtain the non-Federal portion of their financing through the issuance of obligations the income of which is exempt from Federal income taxes. Such small concerns thus

remain eligible for program assistance within the proposed rule, but that assistance would be made available on different terms than under present SBA regulations.

For purposes of the Regulatory Flexibility Act, this proposed rule, if promulgated in final form, will not have a significant economic impact on a substantial number of small business concerns. Our own estimate, based upon this Agency's experience with the program to date, and budgetary resources available for the program, indicates that no more than 1,100 loans for a total of $250 million will be made to small business concerns pursuant to the entire section 503 program in Fiscal Year 1983. Of the 1,100 potential small business recipients, no more than 100 would be affected by this rule.

In addition, this rule, if published in final form, would not constitute a major rule for the purposes of E.O. 12291.

Finally, this proposed rule, if promulgated in final form would not impose any special reporting or recordkeeping requirements on the small businesses that avail themselves of this assistance.

PART 108—[AMENDED]

Accordingly, pursuant to authority contained in section 308(c) of the Small Business Investment Act of 1958, 15 U.S.C. 687(c), 13 CFR Part 108 is amended as follows:

Section 108.503–4(c) is revised to read.

§ 108.503–4 Financing.

(a) * * *

(b) * * *

(c) *Participation with tax-exempt obligations.* A 503 company may use 503 debenture proceeds to make loans for projects also financed through obligations the income of which is exempt from Federal income taxes: *Provided, however,* That loans made from 503 debenture proceeds may not be subordinated to loans made from the proceeds of such tax-exempt obligations.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 82-ANM-23]

Transition Area Rifle, Colorado

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to establish a 700 transition area to provide controlled airspace for aircraft executing a new NDB/DME instrument approach to Garfield County Airport, Rifle, Colorado. The intended effect of this action is to ensure segregation of aircraft using approach procedures in instrument weather conditions and other aircraft operating in visual weather conditions.

DATES: Comments must be received before May 5, 1983.

ADDRESSES: Send comments to: Manager, Airspace & Procedures Branch, ANM–530, Federal Aviation Administration, Northwest Mountain Region, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

The official docket may be examined in the Regional Counsel Office and an informal docket may be examined in the Airspace & Procedures Office at the same address.

FOR FURTHER INFORMATION CONTACT: Ted Melland, Airspace & Procedures Specialist, ANM–533. The telephone number is (206) 433–1640.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made; "Comments to Airspace Docket No. 82–ANM–23." The postcard will be date/time stamped and returned to the commenter. All Communications received before May 5, 1983 will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in light of comments received. All comments submitted will be available for examination by interested persons.

Availability of NPRMs

Any person may obtain a copy of this Notice of Proposed Rulemaking by submitting a request to the Airspace & Procedures Office at the address previously listed. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11–2, which describes the application procedure.

The Proposal

PART 71—[AMENDED]

The FAA is considering an amendment to § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) because development of an NDB/DME approach procedure requires a transition area 700 feet above ground level to contain the new procedure within controlled airspace.

List of Subjects in 14 CFR Part 71

Transition areas, Aviation safety.

The Proposed Amendment

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) by establishing the following transition area:

Rifle, Colorado [New]

That airspace extending upward from 700 feet above the surface within a 6.5 mile radius of Garfield County Airport (Latitude 39°31'40"N., Longitude 107°43'25"W.); and that airspace extending upward from 1200 feet above the surface bounded by a line beginning at Latitude 39°19'30"N., Longitude 108°00'00"W.; Latitude 39°43'30"N., Longitude 108°00'00"W.; to Latitude 30°50'00"N., Longitude 107°04'15"W.; to Latitude 39°25'30"N, Longitude 107°04'15"W.; thence to point of beginning, excluding that portion which overlies the Eagle, Colorado transition area.

(Sec. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); [Sec 6 (c), Department of Transportation Act (49 U.S.C. 1655(c)); [Sec. 11.65 of the Federal Aviation Regulations (14 CFR 11.65)).

Note.—The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory

Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Seattle, Washington on February 24, 1983.

Charles R. Foster,

Director, Northwest Mountain Region.

[Airspace Docket No. 82-ANM-22]

Alteration of Transition Area Lewistown, Montana

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to alter the 1200 foot transition area at Lewistown, Montana, to provide additional controlled airspace for the 10 mile DME arc northwest to the VOR Runway 7 approach. This additional controlled airspace will also accommodate fuel conserving routes between Havre City and Lewistown, Montana; and reduce pilot/controller workload.

DATES: Comments must be received on or before May 5, 1983.

ADDRESS: Send comments on the proposal to: Manager, Airspace & Procedures Branch, ANM-530, Federal Aviation Administration, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

The official docket may be examined in the Regional Counsel Office and an informal docket may be examined in the Airspace & Procedures Branch at the same address.

FOR FURTHER INFORMATION CONTACT: Kathy Paul, Airspace Technician, ANM-535. The telephone number is (206) 433-1640.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons may participate in the proposed rulemaking by submitting such written data, views, or arguments as they may desire. Communications should identify the airspace docket number and be submitted to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 82-ANM-22." The postcard will be date/time stamped and returned to the commenter. All communications received before May 5, 1983, will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in light of comments received. All comments submitted will be available for examination by interested persons.

Availability of NPRMs

Any person may obtain a copy of this Notice of Proposed Rulemaking by submitting a request to the Airspace & Procedures Office at the address previously listed. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2, which describes the application procedure.

The Proposal

The FAA is considering an amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the 1200 foot transition area located at Lewistown, Montana. This proposal is necessary to provide additional controlled airspace for aircraft operating to the Lewistown, Montana Airport.

BILLING CODE 4910-13-M

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 270

[Release No. IC-13048; File No. S7-962]

Exemptive Relief for Separate Accounts To Impose a Deferred Sales Load on Variable Annuity Contracts Participating in Such Accounts and To Deduct From Such Contracts in Certain Instances an Annual Fee for Administrative Services That Is Not Prorated

AGENCY: Securities and Exchange Commission.

ACTION: Proposed rule.

SUMMARY: The Commission is proposing for comment another in a series of proposals that would provide registered insurance company separate accounts with exemptive relief from various provisions of the Investment Company Act of 1940 with respect to variable annuity contracts participating in such accounts. The proposed rule would codify the standards that the Commission has developed in processing individual applications filed by separate accounts and related persons seeking exemptive relief to the extent necessary to permit them to impose a deferred sales load on such contracts. The proposed rule would also provide relief for separate accounts to permit them to deduct from the value of any variable annuity contract, upon total redemption of the contract before the last day of the year, the full annual fee for administrative services that otherwise would have been deducted on that day. If adopted, the proposed rule would eliminate the need for separate

accounts and related persons to file individual applications and obtain individual orders in connection with these matters. The Commission is also proposing related technical amendments to one of the general rules under the Act.

DATE: Comments must be received by April 29, 1983.

ADDRESS: Comments should be submitted in triplicate to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, D.C. 20549. Comment letters should refer to File No. S7–962. All comments will be available for public inspection and copying in the Commission's Public Reference Room, 450 Fifth Street NW., Washington, D.C. 20549.

FOR FURTHER INFORMATION CONTACT: Thomas P. Lemke, Special Counsel (202) 272–2061, or Mary K. Crook, Attorney (202) 272–3010, Division of Investment Management, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549.

SUPPLEMENTARY INFORMATION: The Securities and Exchange Commission ("Commission") today is publishing for public comment proposed rule 6c–8 under the Investment Company Act of 1940 [15 U.S.C 80a–1 et seq.] ("Act"), another in a series of proposals that would codify existing standards that the Commission has developed in connection with certain types of exemptive applications filed by registered insurance company separate accounts (sometimes referred to as "separate accounts" or "applicants") [1] that offer or sell variable annuity contracts.[2] The exemptions would also be available for any depositor of or underwriter for such accounts ("related persons," and, together with separate accounts, sometimes referred to as "applicants"). Proposed rule 6c–8 would codify the standards that the Commission has developed with respect to applications filed by separate accounts and related persons seeking exemptive relief from various provisions of the Act to the extent necessary to permit them to impose a "deferred sales load" [3] on variable annuity contracts participating in such accounts. The proposed rule would also provide relief to the extent necessary to permit separate accounts to deduct from the value of any variable annuity contract, upon total redemption of the contract on other than the last day of the year, the full annual fee for administrative services that otherwise would have been deducted on that day. The proposed rule is one of several rules which the Commission has proposed codifying the standards that it has developed in connection with certain types of applications filed by separate accounts for so-called "start-up" exemptive relief and for other relief under the Act.[4] Finally, the Commission is also proposing related technical amendments to rule 0–1(e) [17 CFR 270.0–1(e)] of its General Rules and Regulations under the Act.

Background

Section 6(c) of the Act [15 U.S.C. 80a–6(c)] broadly authorizes the Commission to grant exemptions from the Act "if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of * * * [the Act]." Pursuant to that provision a number of separate accounts and related persons have sought exemptive relief from various provisions of the Act prior to offering their variable annuity contracts to the public. Frequently, the underlying legal issues are resolved in the initial exemptive applications and subsequent applications typically do not raise novel issues of law or fact. Therefore, the Commission generally grants such subsequent applications on a routine basis provided that applicants satisfy certain conditions which the Commission's experience has indicated as appropriate in light of the standards for relief prescribed by section 6(c).

The Commission now believes that it would be appropriate to propose rule 6c–8, which would codify generally the standards that the Commission has developed in connection with applications filed by separate accounts and related persons seeking exemptive relief from the Act to the extent necessary to permit them to impose a deferred sales load on contracts and to permit them to deduct a full annual fee for administrative services under certain circumstances. If adopted, the rule should benefit existing and future securityholders by eliminating certain expenses and delays presently incurred in obtaining individually certain routine orders of the Commission and should benefit the Commission by reducing the amount of staff time devoted to routine applications. A complete discussion of the proposed rule is set forth below.

Discussion

1. *Deferred Sales Load Relief.* Since 1979, a substantial number of separate accounts and related persons have filed exemptive applications seeking relief from various provisions of the Act to the extent necessary to permit them to impose a deferred sales load on variable annuity contracts participating in such accounts.[5] Unlike the more traditional "front-end" sales load—a sales load which is deducted from a securityholder's purchase payments before they are invested in a separate account—a deferred sales load is a sales load that is deducted when part or all of a securityholder's interest in a separate account is redeemed from the separate account or is converted to an annuity [collectively, "redemption or annuitization"]. In some cases the deferred sales load is reduced or eliminated entirely if redemption or annuitization does not occur before a specified period of time. This is commonly referred to as a "contingent" deferred sales load. The proposed rule is intended to provide exemptive relief to

---

[1] Section 2(a)(37) of the Act [15 U.S.C. 80a–2(a)(37)] defines "separate account" to mean "an account established and maintained by an insurance company pursuant to the laws of any state or territory of the United States, or of Canada or any province thereof, under which income, gains and losses, whether or not realized, from assets allocated to such account, are in accordance with the applicable contract, credited to or charged against such account without regard to other income, gains, or losses of the insurance company." A substantially identical definition of "separate account," as that term is used in various rules and regulations under the Act, is contained in rule 0–1(e)(1) under the Act [17 CFR 270.0–1(e)(1)]. The term "insurance company" is defined in section 2(a)(17) of the Act [15 U.S.C. 80a–2 (a)(17)]. A separate account may be registered under the Act either as a unit investment trust ("trust account") or as an open-end management company ("management account").

[2] As used herein, the term "variable annuity contract" includes any variable accumulation or annuity contract, any portion thereof, or any participation therein pursuant to which the value of the contract, either prior or subsequent to annuitization, or both, varies according to the income, gains, or losses of the separate account in which the contract participates. The Commission is proposing to add this definition to rule 0–1(e)(e) of the General Rules and Regulations under the Act (*see* discussion *infra*).

[3] Paragraph (a) of the proposed rule defines the term "deferred sales load" as any sales load, including a contingent deferred sales load, that is deducted upon redemption or annuitization of amounts representing all or a portion of a securityholder's interest in a registered separate account. *See* notes 5 and 6 and accompanying discussion, *infra*.

[4] *See* Investment Company Act Rel. No. 12675 (Sept. 20, 1982) [47 FR 42344, Sept. 27, 1982] (proposed rule 11a–2); Investment Company Act Rel. No. 12745 (Oct. 18, 1982) [47 FR 47860, Oct. 28, 1982] (proposed rule 6c–7 and proposed amended rule 14a–2).

[5] The first contingent deferred sales load application was filed on behalf of the MFS Variable Account of Nationwide Life Insurance Company. A notice of this filing was issued on January 15, 1979 (Investment Company Act Rel. No. 10557) [44 FR 4067, Jan. 19, 1979] and an order was issued on February 12, 1979 (Investment Company Act Rel. No. 10590).

the extent necessary to permit the imposition of either of these types of sales loads (*see* note 3, *supra*), and the discussion below relating to a deferred sales load is intended to apply to both types of sales loads.[6]

Applicants seeking individual exemptive relief in order to impose a deferred sales load typically request relief from two categories of the Act's provisions. First, they seek an exemption from section 2(a)(35) of the Act [15 U.S.C. 80a–2(a)(35)], which defines the term "sales load" for purposes of the Act,[7] and from several other relevant provisions of the Act.[8] Relief is necessary because the literal language of these provisions contemplates that any sales load imposed on a security of a registered investment company be a front-end sales load, and the deduction of a sales load upon redemption or annuitization is inconsistent with these provisions.

Second, applicants typically seek an exemption from section 2(a)(32) of the Act [15 U.S.C. 80a–2(a)(32)], which defines the term "redeemable security" for purposes of the Act,[9] and from various other provisions of the Act relating to redeemable securities.[10] These provisions generally require that upon redemption a security-holder must receive his proportionate share of the separate account's assets.

Typically, applicants argue in effect that a deferred sales load is intended to reimburse a company for the same expenses for which the more traditional front-end sales load is used, *i.e.*, sales and distribution. A deferred sales load would seem to impose no greater burden on an investor than a front-end load of the same amount. It can also be argued, as many applicants have, that a deferred sales load is more advantageous to investors than a front-end sales load, because the amount of investors' money available for investment is not reduced as in the case of a front-end sales load. On the basis of these considerations, the Commission has routinely granted the requested exemptions. In light of this experience, the Commission now believes it would be appropriate to adopt a rule codifying this relief, and, accordingly, it is proposing to do so in rule 6c–8, as discussed *infra*.

2. *Relief for Deduction in Certain Instances of an Annual Fee for Administrative Services that is Not Prorated.* Many separate accounts deduct a fixed-dollar fee each year from the value of variable annuity contracts participating in such accounts in order to compensate them for the expenses associated with the annual administration of such contracts (the "annual fee"). The timing of the imposition of the annual fee varies among contracts. Under some contracts, the fee is assessed prospectively, *i.e.*, on the first day of the year in order to cover expenses expected to be incurred during that year. Under other contracts, the fee is assessed retrospectively, *i.e.*, on the last day of the year in order to cover expenses incurred during that year.[11]

In the case of the latter type of fee, a number of separate accounts and related persons have filed applications with the Commission seeking exemptive relief from various provisions of the Act to the extent necessary to permit them to deduct, upon total redemption of a contract on other than the last day of the year, the full annual fee for administrative services that otherwise would have been deducted on that day. In such instances, relief from the provisions of the Act relating to redeemable securities is necessary because, as discussed above (*see* notes 9 and 10 and accompanying text, *supra*), these provisions require that upon redemption a securityholder must receive his proportionate share of the assets of the separate account, and the imposition of an administrative fee that is not prorated is inconsistent with this requirement.[12]

In support of the requested relief, applicants typically have argued that many of the annual administrative expenses they incur are of a fixed nature and therefore are incurred regardless of whether services are provided for part or all of a year. In addition, applicants point out that relief to impose a fee that is not prorated is appropriate because they incur a variety of administrative expenses in connection with a total redemption in addition to the fixed expenses noted above. Again, the Commission has found these arguments persuasive and routinely granted the requested relief, and it now seems appropriate to eliminate the need for such routine applications by codifying the relief in proposed rule 6c–8.

Proposed Rule and Related Technical Amendments

1. *Proposed Rule 6c–8.* Paragraph (a) of proposed rule 6c–8 defines the term deferred sales load (*see* note 3 *supra*). Paragraph (b) of proposed rule exempts any registered separate account, and any depositor of or principal underwriter for such account, from various provisions of the Act relating to sales load and redeemable securities to the extent necessary to permit them to impose a deferred sales load on variable annuity contracts participating in such account. This relief is conditioned in two respects. First, paragraph (b)(1)

---

[6] It should be noted that the Commission believes it would be misleading to characterize a contract subject to either of these types of sales loads as a "no-load" contract. Moreover, the Commission believes that it would be misleading for sales literature or a prospectus to characterize a deferred sales load as "contingent" when imposition of the sales load, or at least part of it, is not subject to any contingency.

[7] Section 2(a)(35) defines the term sales load as "the difference between the price of a security to the public and the portion of the proceeds from its sale which is received and invested or held for investment by the issuer * * *," less certain administrative and other fees not properly chargeable to sales or promotional activities.

[8] In addition to requesting relief from section 2(a)(35), trust accounts and other persons seek relief from section 26(a)(2)(C) of the Act [15 U.S.C. 80a–26(a)(2)(C)]. Furthermore, separate accounts issuing periodic payment plan certificates (*see* section 2(a)(27) of the Act [15 U.S.C. 80a–2(a)(27)]) seek relief from the provisions of section 27(c)(2) [15 U.S.C. 80a–27(c)(2)], which makes applicable to such persons the requirements of section 26(a). It has been the Commission's position that a variable annuity contract is a periodic payment plan certificate for purposes of section 27 if it is permitted to be paid for with more than one purchase payment. Sections 26(a)(2)(C) and 27(c)(2), in pertinent part, concern payments to the depositor of or principal underwriter for a separate account of certain other persons and would, in the absence of exemptive relief, prohibit the imposition of a deferred sales load, although they do not preclude the imposition of a front-end sales load.

[9] Section 2(a)(32) defines the term redeemable security as "any security, other than short-term paper, under the terms of which the holder, upon its presentation to the issuer or to a person designated by the issuer, is entitled (whether absolutely or only out of surplus) to receive approximately his proportionate share of the issuer's current net assets, or the cash equivalent thereof."

[10] In addition to section 2(a)(32), applicants seek exemptive relief from sections 22(c), 27(c)(1), and 27(d) of the Act [15 U.S.C. 80a–22(c), 80a–27(c)(1), and 80a–27(d)] and rule 22c–1 under the Act [17 CFR 270.22c–1], which require generally that upon redemption a securityholder must receive his proportionate share of the separate account's assets. Absent exemptive relief, these provisions would prohibit the imposition of a deferred sales load.

[11] The relevant year for either a prospective or retrospective fee may be a calendar year, wherein the fee is deducted from the interest of all securityholders on the same day each year, or a contract year, wherein the fee is deducted from the interest of each securityholder on a day each year that typically corresponds to the anniversary of the day the particular securityholder's initial purchase payment was received by the separate account.

[12] Proposed rule 6c–8 would not eliminate the need for applicants to obtain the exemptive relief from section 26(a)(2)(C) or section 27(c)(2) of the Act necessary to permit the deduction of the annual fee, irrespective of whether it is prorated, from the assets of the separate account. *See generally Variable Annuity Life Insurance Company of America*, 39 SEC 660, 702–703 (1960). The Commission will shortly consider another start-up rule intended to codify this relief. Because that rule will not involve the redeemability provisions of the Act, however, the Commission believes that the annual fee relief relating to redemptions is more properly included in proposed Rule 6c–8.

provides that the amount of any such sales load imposed, when combined with any sales load previously paid on any such contract, shall not exceed 9 percent of purchase payments made for such contract to date.[13] This condition is analogous to the requirement of section 27(a)(1) of the Act [15 U.S.C. 80a–27(a)(1)] [14] that any sales load imposed on a periodic payment plan certificate not exceed 9 percent of total purchase payments to be made thereon, and reflects the terms of Commission orders in this area.

Second, paragraph (b)(2) provides that the terms of any offer to exchange another contract for the contract for which proposed rule 6c–8 provides exemptive relief must be in compliance with the requirements of paragraph (d) or (e) of proposed rule 11a–2.[15] This condition is necessary because use of a deferred sales load presents the possibility of certain abuses which are addressed by conditions in proposed rule 11a–2.[16]

Paragraph (c) of the proposed rule exempts any registered separate account, and any depositor of or principal underwriter for such account, from various provisions of the Act relating to redeemable securities to the extent necessary to permit them to deduct from the value of any variable annuity contract participating in such account, upon total redemption of the contract on other than the last day of the year, the full annual fee for administrative services that otherwise would have been deducted on that date.[17]

As proposed, rule 6c–8 would provide deferred sales load relief only for investment companies that are insurance company separate accounts offering variable annuity contracts. Only one non-separate account has requested the exemptive relief necessary to use a deferred sales load.[18] The Commission specifically requests comments on whether, and under what conditions, the proposed rule should be expanded to include deferred sales load relief for securities of investment companies that are not separate accounts.

2. *Proposed Technical Amendments to Rule 0–1(e).* Rule 0–1 of the General Rules and Regulations under the Act defines various terms used in certain of those rules. Rule 0–1(e) defines the term "separate account" and sets forth conditions for availability of exemptive relief for separate accounts pursuant to these rules. The Commission is proposing to amend rule 0–1(e) to include rule 6c–8 as one of the rules listed therein.

In addition, the Commission is proposing to amend rule 0–1(e) to include therein a definition of the term "variable annuity contract" as used in the rules under the Act. This definition, which would be added to paragraph (1) of the rule and would be applicable to all existing and future rules relating to variable annuity contracts, would codify the existing interpretation of that term.

Investment companies, Reporting requirements, Securities.

Text of Proposed Rule 6c–8 and Proposed Amendments to Rule 0–1(e)

It is proposed that Part 270 of Chapter II of Title 17 of the Code of Federal Regulations be amended as follows:

PART 270—RULES AND REGULATIONS, INVESTMENT COMPANY ACT OF 1940

1. By revising paragraphs (e), (e)(1), and (e)(2) of § 270.0–1 to read as follows:

§ 270.0–1 Definition of terms used in this part.

* * * * * *

(e) Definition of separate account and variable annuity contract and conditions for availability of exemption under §§ 270.6c–6, 270.6c–8, 270.14a–2, 270.15a–3, 270.16a–1, 270.22d–3, 270.22e–1, 270.27a–1, 270.27a–2, 270.27a–3, 270.c–1, and 270.32a–2 of this chapter.

(1) As used in the Rules and Regulations prescribed by the Commission pursuant to the Investment Company Act of 1940, unless otherwise specified or the context otherwise requires the term "separate account" shall mean an account established and maintained by an insurance company pursuant to the laws of any state or territory of the United States, or of Canada or any province thereof, under which income, gains and losses, whether or not realized, from assets allocated to such account, are, in accordance with the applicable contract, credit to or charged against such account without regard to other income, gains or losses of the insurance company and the term "variable annuity contract" shall mean any accumulation or annuity contract, any portion thereof, or any participation therein pursuant to which the value of the contract, either prior or subsequent to annuitization, or both, varies according to the income, gains or losses of the separate account in which the contract participates.

(2) As conditions to the availability of exemptive rules 6c–6, 6c–8, 14a–2, 15a–3, 16a–1, 22d–3, 22e–1, 27a–1, 27a–2, 27a–3, 27c–1, and 32a–2, the separate account shall be legally segregated, the assets of the separate account shall, at the time during the year that adjustments in the reserves are made, have a value at least equal to the reserves and other contract liabilities with respect to such account, and at all other times, shall have a value approximately equal to or in excess of such reserves and liabilities; and that portion of such assets having a value equal to or approximately equal to, such reserves and contract liabilities shall not be chargeable with liabilities arising out of any other business which the insurance company may conduct.

2. By adding § 270.6c–8 to read as follows:

---

[13] In this regard, the proposed rule, does not provide an exemption from any provision of the Act which may limit the rate of sales load to be imposed on a contract to less than 9 percent, such as section 12(d)(1)(F) of the Act [15 U.S.C. 80a–12(d)(1)(F)], nor does it provide relief from any other applicable limitation that, for example, may be imposed on members of the National Association of Securities Dealers.

[14] Section 27(a)(1) of the Act provides that:

It shall be unlawful for any registered investment company issuing periodic payment plan certificates, or for any depositor or underwriter for such company to sell any such certificate, if—

(1) The sales load on such certificate exceeds 9 per centum of the total payments to be made thereon * * *.

[15] *See* Investment Company Act Rel. No. 12675 (Sept. 20, 1982) [47 FR 42344, Sept. 27, 1982].

[16] For purposes of the following explanation, the "acquired contract" is the contract for which proposed rule 6c–8 would provide exemptive relief while the "exchanged contract" is the predecessor contract which has been exchanged for the acquired contract. Incorporation of paragraph (d) of proposed rule 11a–2 requires the "tacking" of time for the purpose of calculating the amount of any deferred sales load if the exchanged security was subject to a deferred sales load, *i.e.*, the sales load must be calculated both as if the owner of the acquired contract had been the owner of that contract from the date on which he became the owner of the exchanged contract and as if purchase payments made for the exchanged contract had been made for the acquired contract on the date on which they were made for the exchanged contract. Incorporation of paragraph (e) of proposed rule 11a–2 requires that if a front-end sales load was paid on the exchanged contract, then any deferred sales load imposed on the acquired contract may not be imposed on purchase payments made for the exchanged contract or appreciation attributable to purchase payments made for the exchanged contract that are transferred in connection with the exchange. This condition is basically intended to avoid the possibility of an investor being assessed two sales loads on the same purchase payments.

[17] It must be emphasized that the proposed rule's exemptive relief is limited to the deduction of a customary annual administrative fee and is not intended to provide relief for the imposition of an additional withdrawal or redemption charge.

[18] *See* Application of E. F. Hutton Investment Series, Inc., Investment Company Act Rel. No. 12079 (Dec. 4, 1981) [46 FR 60703, Dec. 11, 1981] (notice); Investment Company Act Rel. No. 12135 (Jan. 4, 1982) (order).

§ 270.6c–8 Exemptions for registered separate accounts to impose a deferred sales load and to deduct certain administrative charges.

(a) As used in this section "Deferred sales load" shall mean any sales load, including a contingent deferred sales load, that is deducted upon redemption or annuitization of amounts representing all or a portion of a securityholder's interest in a registered separate account.

(b) A registered separate account, and any depositor of or principal underwriter for such account, shall be exempt from the provisions of sections 2(a)(32), 2(a)(35), 22(c), 26(a)(2)(C), 27(c)(1), 27(c)(2), and 27(d) of the Act [15 U.S.C. 80a–2(a)(32), 80a–2(a)(35) 80a–22(c), 80a–26(a)(2)(C), 80a–27(c)(1), 80a–27(c)(2), and 80a–27(d), respectively] and rule 22c–1 under the Act [17 CFR 270.22c–1] to the extent necessary to permit them to impose a deferred sales load on any variable annuity contract participating in such account, *Provided*, That:

(1) The amount of any such sales load imposed, when added to any sales load previously paid on such contract, shall not exceed 9 percent of purchase payments made to date for such contract; and

(2) The terms of any offer to exchange another contract for the contract are in compliance with the requirements of paragraph (d) or (e) of [proposed] rule 11a–2.

(c) A registered separate account, and any depositor of or principal underwriter for such account, shall be exempt from sections 2(a)(32), 22(c), 27(c)(1), and 27(d) of the Act [15 U.S.C. 80a–2(a)(32), 80a–22(c) 80a–27(c)(1), and 80a–27(d), respectively] and rule 22c–1 under the Act [17 CFR 270.22c–1] to the extent necessary to permit them to deduct from the value of any variable annuity contract participating in such account, upon total redemption of the contract prior to the last day of the year, the full annual fee for administrative services that otherwise would have been deducted on that date.

Statutory Authority

Proposed rule 6c–8 is promulgated pursuant to the provisions of sections 6(c) and 38(a) of the Act [15 U.S.C. 80a–6(c) and 80a–37(a)]. The proposed amendments to rule 0–1(e) [17 CFR 270.0–1(e)] are promulgated pursuant to the provisions of section 38(a) of the Act [15 U.S.C. 80a–37(a)].

Regulatory Flexibility Act Certification

Pursuant to section 605(b) of the Regulatory Flexibility Act, the Chairman of the Commission has certified that the rule proposed herein will not, if promulgated, have a significant economic impact on a substantial number of small entities. This certification, including the reasons therefor, is attached to this release.

Paperwork Reduction Act

The proposed rule is not subject to the Act because it does not impose an information collection requirement.

By the Commission.

Dated: February 28, 1983.

George A. Fitzsimmons,

Secretary.

Regulatory Flexibility Act Certification

I, John S. R. Shad, Chairman of the Securities and Exchange Commission, hereby certify pursuant to 5 U.S.C. 605(b) that proposed rule 6c–8 under the Investment Company Act of 1940, if adopted, will not have a significant economic impact on a substantial number of small entities. The reason for the certification is that there are few, if any, registered insurance company separate accounts that qualify as "small entities" as that has been defined in the Commission's rules. Moreover, the reduction in costs to such separate accounts, if any, resulting from the proposed rule's elimination of their need to file certain exemptive applications will not have a significant economic impact on any such separate accounts.

Dated: February 28, 1983.

John S. R. Shad,

Chairman.

Technical Amendments to Rules, Forms and Schedules

AGENCY: Securities and Exchange Commission.

ACTION: Proposed rulemaking.

SUMMARY: The Commission today is publishing for comment actions relating to various rules, forms and schedules under the Securities Act of 1933 and the Securities Exchange Act of 1934. Such actions clearify certain language and correct technical omissions and errata.

DATE: Comments must be received on or before March 25, 1983.

ADDRESSES: Comments should be submitted in triplicate to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. Comment letters should refer to File No. S7–961. All comments received will be available for public inspection and copying in the Commission's Public Reference Room, 450 Fifth Street, N.W., Washington, D.C. 20549.

FOR FURTHER INFORMATION CONTACT: V. Gerard Comizio, (202) 272–2589, Office of Disclosure Policy, Division of Corporation Finance, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549.

SUPPLEMENTARY INFORMATION: The Securities and Exchange Commission is publishing for comment proposed technical actions relating to various rules, forms and schedules under the Securities Act of 1933 (the "Securities Act") (15 U.S.C. 77a et seq. (1976 and Supp. IV 1980)) and the Securities Exchange Act of 1934 (the "Exchange Act") (15 U.S.C. 78a et seq. (1976 and Supp. IV 1980)). The following rules, forms and schedules are affected by these amendments: Items 401, 503 and 601 of Regulation S–K (17 CFR 229); Securities Act Industry Guides 4 and 5 (17 CFR 229.801); Securities Act Rules 134, 175, 432 and 494 (17 CFR 230); Securities Act Forms C–2 (17 CFR 239.4), D–1 (17 CFR 239.6), D–1A (17 CFR 239.7), S–1 (17 CFR 239.11), S–2 (17 CFR 239.12), S–3 (17 CFR 239.13), S–8 (17 CFR 239.16), S–14 (17 CFR 239.23) and S–15 (17 CFR 239.29); Exchange Act Rules 3b–6, 13a–13 and 13e–3 (17 CFR 240); and Exchange Act Forms 8–K (17 CFR 249.308) and 10–K (17 CFR 249.310).

I. Background and Introduction

Over the past year, the Commission has adopted several amendments to its rules, forms and schedules under both the Securities Act and the Exchange Act. In particular, Release No. 33–6383 [1] (the "Integrated Disclosure Release") announced a comprehensive revision to the rules, forms and schedules governing the registration of securities under the Securities Act and numerous conforming changes to the rules, forms and schedules under the Exchange Act. The following proposals are intended to correct technical omissions and errata and to clarify certain language.

This release describes the general nature of the technical changes which are proposed today and the reasons therefor in order to provide a framework for understanding the proposed text of the technical amendments set forth below. Attention is directed to the text of the proposals for a more complete understanding.

II. Synopsis

The following amendments are proposed to be made to the various

[1] Release No. 33–6383 (March 3, 1982) (47 FR 11380, March 16, 1982).

rules, forms and schedules under both the Securities Act and the Exchange Act:

1. Instruction 3 to paragraph (b) of Item 401 of Regulation S–K, regarding information about executive officers and directors, is proposed to be revised for purposes of clarification. Currently, Instruction 3 specifically permits registrants relying on General Instruction G of Form 10–K to omit the information regarding executive officers elicited by Item 401(b) from their proxy statement only when such information is included in Part I of their Form 10–K. The staff, however, has interpreted that Instruction to permit omission of all the information regarding executive officers required to be disclosed by any paragraph of Item 401. Accordingly, Instruction 3 is proposed to be amended to codify such interpretation.

2. Paragraph (d) of Item 503 of Regulation S–K, regarding disclosure of the ratio of earnings to fixed charges, is proposed to be amended to clarify how earnings and fixed charges should be computed by clarifying the treatment of preferred stock dividend requirements of majority-owned subsidiaries and fifty-percent-owned persons, guarantees of debt of less than fifty-percent-owned persons; and any allowance for funds used during construction by public utilities.

3. Paragraph (b)(8) of Item 601 of Regulation S–K, Opinion re tax matters, is proposed to be amended to clarify that requirement. Currently, this paragraph requires that an opinion of counsel or a revenue ruling from the Internal Revenue Service be filed as an exhibit in certain cases. This requirement may be satisfied by an opinion of an independent public or certified public accountant. The Commission proposes to amend paragraph (b)(8) accordingly.

4. Securities Act Industry Guide 5, Preparation of registration statements relating to interests in real estate limited partnerships, is proposed to be amended to rescind Item 18, Capitalization. That item requires disclosure in accordance with Forms S–1 and S–11 and such forms no longer require a capitalization table.

5. Paragraph (b)(2) of Securities Act Rule 175, Liability for certain statements by issuers, is proposed to be amended to insert references to Item 9 of Form 20–F (17 CFR 249.220f) and Rule 3–20(c) of Regulation S–X (17 CFR 210.3–20(c)) that were inadvertently omitted from Release No. 33–6444, supplemental disclosure of oil and gas producing activities.[2]

6. Paragraph (e) of Securities Act Rule 494, Newspaper prospectuses, is proposed to be revised to change the reference to § 230.428 in paragraph (e) to Item 502(d) of Regulation S–K.

7. The rescission of three seldom used Securities Act registration forms was announced in the Integrated Disclosure Release; implementing language relating to this rescission is proposed. These forms are: Form C–2, for certain types of certificates of interest in securities; Form D–1, for certificates of deposit; and Form D–1A, for certificates of deposit issued by issuers of securities called for deposit.

8. Item 12(a) of Form S–2, Incorporation of certain information by reference, is proposed to be amended to clarify certain language. The Item permits registrants to incorporate by reference those portions of their annual or quarterly reports to security holders that are specifically set forth in paragraphs (a)(3) and (a)(4) of Item 12. The proposed amendment makes clear that the registrant, if it wishes, may incorporate its entire annual or quarterly report to security holders in lieu of the specified portions thereof.

9. Item 12(b) of Form S–2 is proposed to be amended to make clear that those documents listed in paragraphs (a) (1) and (2) of Item 12 are required to be incorporated by reference into the registration statement in their entirety. Registrants are permitted to state that those portions of their annual or quarterly reports to security holders not specifically required to be incorporated by paragraphs (a) (3) and (4) of Item 12 are not part of the registration statement.[3]

10. General Instruction A.(1)(a) to Form S–8 is proposed to be revised to refer to the definition of "employee benefit plan" which is now in Rule 405 of Regulation C.

11. Note 1 to General Instruction C of Form S–8 is proposed to be revised to clarify that registrants may add additional persons, who have acquired or will acquire registered securities pursuant to the plan, to the list of selling shareholders after the effective date of a reoffer prospectus, by means of a propectus filed pursuant to Rule 424(c). Currently, the Form indicates that such persons must be added to the list of selling shareholders by means of a post-effective amendment.

12. The Instruction to Item 5 of Form S–8, securities to be offered and employees who may participate in the plan, is proposed to be amended to delete the definition of executive officer. Such definition is now in Rule 405 of Regulation C.

13. Item 15 of Form S–8, incorporation of certain documents by reference, is proposed to be amended to clarify that only those documents filed pursuant to paragraphs (a) and (c) of Section 13 of the Exchange Act, rather than all of Section 13, are required to be incorporated by reference into the registration statement. Such amendments would conform the requirements of Form S–8 to the requirements of Form S–3 in this regard.

14. The signature provision of Form S–8 is proposed to be revised to reflect prevailing practice that, where interests in an employee benefit plan are being registered, the signature required with respect to the plan is that of any person who is authorized to sign on the plan's behalf.

15. Paragraph (c)(1) of Exchange Act Rule 13a–13, Quarterly reports on Form 10–Q, is proposed to be revised to amend the reference to Item 12, paragraph (a)(1)(i) of § 229.20 to Item 302(a)(5)(i) of Regulation S–K.

16. Instruction 2(a) to paragraph (e) of Exchange Act Rule 13e–3, Going private transactions by certain issuers or their affiliates, is proposed to be revised to set forth the specific items of summary information which must be included in a Schedule 13e–3. Such amendment is required to be made because of the rescission of Guide 59 and would conform the summary information required by Schedule 13e–3 to that required by Schedule 13e–4.

17. Item 7 of Exchange Act Form 8–K is proposed to be revised in accordance with amendments previously made to that Item in Release No. 33–6405, Revisions to Securities Act Industry Guide 5.[4] Such amendments were inadvertently rescinded by Release No. 33–6413, instructions for the presentation and preparation of pro forma financial information and requirements for financial statements of businesses acquired or to be acquired.[5]

18. General Instruction I to Form 10–K, regarding registrants filing on Form S–18, is proposed to be amended in order to conform the listing of certain

---

[2] Release No. 33–6444 (December 15, 1982) (47 FR 57911, December 29, 1982). The same amendment is proposed to be made to paragraph (b)(2) of Exchange Act Rule 3b–6, Liability for certain statements by issuers.

It should be noted that the revisions to Rules 175 and 3b–6 which were adopted in Release No. 33–6444 are available for those registrants who comply with the revised rules for supplemental oil and gas disclosure prior to their mandatory effectiveness for fiscal years beginning on or after December 15, 1982.

[3] The same amendment is proposed to be made to Item 12(b) of Form S–18.

[4] Release No. 33–6405 (June 3, 1982) (47 FR 25120 June 10, 1982).

[5] Release No. 33–6413 (June 24, 1982) (47 FR 29892, July 9, 1982).

specified item numbers of Form S–18 with the revised Form. Form S–18 was amended in June 1982,[6] and such changes were not made at that time.

19. Finally, the following rules, forms and schedules are proposed to be amended to correct typographical errors that were made in the Integrated Disclosure release:

a. Instruction 3 to Paragraph (b) of Item 401 of Regulation S–K;

b. Paragraph (b)(25) of Item 601 of Regulation S–K;

c. Paragraphs 1 and 11 of Securities Act Industry Guide 4;

d. Paragraph (a)(14)(ii) of Securities Act Rule 134;

e. Securities Act Rule 432;

f. Paragraph (b) of Item 16 of Securities Act Form S–1;

g. Paragraph (a)(3)(i) of Item 12 of Securities Act Form S–2;

h. Paragraph (b) of Item 11 of Securities Act Form S–3;

i. The heading of Part II of Securities Act Form S–14.

III. Request for Comment

Any interested person wishing to submit written comments on the proposed amendments, as well as on any other technical changes, is requested to do so. The Commission also solicits comment as to whether the proposed amendments would have an adverse effect on competition. Comments on this inquiry will be considered by the Commission in complying with its responsibilities under Section 23(a)(2) of the Exchange Act.

List of Subjects in 17 CFR 229, 230, 239, 240 and 249

Reporting and recordkeeping requirements, Securities.

IV. Text of Proposals

(Attention—The text of the following amendment use ► ◄ arrows to indicate additions and [ ] brackets to indicate deletions.)

In accordance with the foregoing, it is proposed to amend Title 17, Chapter II, of the Code of Federal Regulations as follows:

PART 229—STANDARD INSTRUCTIONS FOR FILING FORMS UNDER SECURITIES ACT OF 1933 AND SECURITIES EXCHANGE ACT OF 1934—REGULATION S–K

1. By revising Instruction 3 to Paragraph (b) in § 229.401 to read as follows:

§ 229.401 (Item 401) Directors and executive officers.

* * * * *

Instructions to Paragraph (b) of Item 401.

* * * * *

3. The information regarding executive officers called for by this [paragraph (b)] ►Item◄ need not be furnished in proxy or information statements prepared in accordance with Schedule 14A under the Exchange Act (§ 240.14a–101 of this chapter) by those registrants relying on General Instruction G of Form 10–K under the Exchange Act (§ 249.310 of this chapter), *Provided,* That such information is furnished in a separate item captioned "Executive officers of the registrant," and included in Part ►III◄ [I] of the registrant's annual report on Form 10–K.

* * * * *

2. By revising paragraphs (d)(3)(i), (3)(v), (4)(i) and the first sentence of (4)(ii) and adding a new paragraph (d)(3)(vi) to § 229.503 to read as follows:

§ 229.503 (Item 503) Summary information, risk factors and ratio of earnings to fixed charges.

* * * * *

(d) Ratio of earnings to fixed charges.

* * * * *

(3) * * *

(i) Add to pretax income the amount of fixed charges computed pursuant to paragraph (d)(4) of this section, ►adjusted to exclude (A) the amount of any ◄ interest capitalized during the period ►and (B) the actual amount of any preferred stock dividend requirements of majority-owned subsidiaries and fifty-percent-owned persons which were included in such fixed charges amount but not deducted in the determination of pretax income.◄ [shall be excluded from the fixed charge amount.]

* * * * *

(v) Registrants other than public utilities may add to earnings the amount of previously capitalized interest amortized during the period. [In the case of]

►(vi)◄ A registrant which is a rate-regulated public utility [interest charges] shall not ►reduce fixed charges (see paragraph (4) below)◄ [be reduced] by any allowance for funds used during construction, ►but rather, shall include◄ [the "borrowed-funds" component of] any such allowance [shall be included in earnings.] ►in the determination of earnings under this paragraph.◄

(4)(i) The term "fixed charges" shall mean the total of (A) interest, whether expensed or capitalized; (B) amortization of debt expense and discount or premium relating to any indebtedness, whether expensed or capitalized; (C) such portion of rental expense as can be demonstrated to be representative of the interest factor in the particular case; and (D) preferred stock dividend requirements of majority-owned subsidiaries ►and fifty-percent-owned persons,◄ excluding in all cases items which would be or are eliminated in consolidation.

(ii) If the registrant is a guarantor of debt of ►a less than fifty-percent-owned person or of ◄ an unaffiliated person (such as a supplier), the amount of fixed charges associated with such debt should not be included in the computation of the ratio unless the registrant has been required to satisfy the guarantee or it is probable that the registrant will be required to honor the guarantee and the amount can reasonably be estimated.

* * * * *

3. By revising the first sentence of paragraph (b)(8) and by adding a period after the word "filed" and capitalizing the word "Where" in paragraph (b)(25) in § 229.601 to read as follows:

§ 229.601 (Item 601) Exhibits.

* * * * *

(b) *Description of exhibits.*

* * * * *

(8) *Opinion re tax matters*—For filings on Form S–11 under the Securities Act (§ 239.18) or those to which Securities Act Industry Guide 5 applies, an opinion of counsel ►or of an independent public or certified public accountant◄ or, in lieu thereof, a revenue ruling from the Internal Revenue Service, supporting the tax matters and consequences to the shareholders as described in the filing when such tax matters are material to the transaction for which the registration statement is being filed.

* * * * *

(25) *Power of attorney*—If any name is signed to the registration statement or report pursuant to a power of attorney, manually signed copies of such power of attorney shall be filed.

* * * * *

§ 220.801 [Amended]

4. By amending Securities Act Industry Guide 4 in § 229.801 to revise subparagraph 1 of Item 1 and Item 11 to read as follows (Securities Act Industry Guide 4 does not appear in the Code of Federal Regulations):

Guide 4. Prospectus Relating to Interests in Oil and Gas Programs.

1. * * *

---

[6] Release No. 33–6406 (June 4, 1982) (47 FR 28136, June 10, 1982).

(1) Terms of Offering: State the title and general nature of the securities (interests in the proposed program) being offered; the maximum aggregate amount of the offering; the minimum aggregate amount necessary to initiate the program; the disposition of the funds raised if they are not sufficient for that purpose; the minimum subscription price; the period of the offering; any provisions for additional assessments; and a brief description of the proposed method of distribution, inlcuding the amount of any commission to be paid. If funds received from investors are not to be held in trust or in special account pending expenditure in the program, appropriate disclosures should be set forth including when appropriate reference to exposure to claims of creditors of the custodian of the funds.

The tabular presentation specified in Item ►501(c)(7) of Regulation S–K (§ 229.501(c)(7))◄ [501(g)] may be omitted;

* * * * *

11. *Management.* ►Furnish the information◄ [Include the disclosures] required by Items 401 through 403 of Regulation S–K ►(§§ 229.401 through 403)◄ as to [, respectively,] the management and operating companies.

* * * * *

5. By amending Securities Act Industry Guide 5 in § 229.801 to delete paragraph 18 and to renumber paragraphs 19 through 21 as paragraphs 18 through 20 (Securities Act Industry Guide 5 does not appear in the Code of Federal Regulations).

PART 230—GENERAL RULES AND REGULATIONS, SECURITIES ACT OF 1933

6. By revising paragraph (a)(14)(ii) in § 230.134 to read as follows:

§ 230.134 Communications not deemed a prospectus.

* * * * *

(a) * * *

(14) * * *

(ii) For the purpose of paragraph ►(a)(14)(i)◄ [(14)(a)(i)] of this section, the term "nationally recognized statistical rating organization" shall have the same meaning as used in Rule 15c–3–1(c)(2)(vi)(F) under the Securities Exchange Act of 1934 (17 CFR 240.15c3–1(c)(2)(vi)(F).

* * * * *

7. By revising paragraph (b)(2) introductory text and paragraph (b)(2)(i) in § 230.175 to read as follows:

§ 230.175 Liability for certain statements by issuers.

* * * * *

(b) * * *

(2) Information which is disclosed in a document filed with the Commission, in Part I of a quarterly report on Form 10–Q (§ 249.308a of this chapter) or in an annual report to shareholders meeting the requirements of Rules 14a–3 (b) and (c) or 14c–3 (a) and (b) under the Securities Exchange Act of 1934 (§§ 240.14a–3 (b) and (c) or 240.14a–3 (a) and (b) of this chapter) and which relates to (i) the effects of changing prices on the business enterprise, presented voluntarily or pursuant to Item 303 of Regulation S–K (§ 229.303 of this chapter) ►or Item 9 of Form 20–F (§ 249.220f of this chapter)◄, "Management's discussion and analysis of financial condition and results of operations," or Item 302 of Regulation S–K (§ 229.302 of this chapter), "Supplementary financial information," or Rule 3–20(c) of Regulation S–X (§ 210.3–20(c) of this chapter), or

* * * * *

8. By revising § 230.432 to read as follows:

§ 230.432 Additional information required to be included in prospectuses relating to tender offers.

Notwithstanding the provisions * * * not otherwise required to be included therein, required by Rule 14d–6 ►(e)(1)◄ [(c)(1)] (§ 240.14d–6 ►(e)(1)◄ [(c)(1)] of this chapter) to be included in all such tender offers, requests or invitations, published or sent or given to the holders of such securities.

9. By revising paragraph (e) in § 230.494 to read as follows:

§ 230.494 Newspaper prospectuses.

* * * * *

(e) If the registrant or any of the underwriters knows or has reasonable grounds to believe that it is intended to stabilize the price of any security to facilitate the offering of the registered security, there shall be placed in the newspaper prospectus, in capital letters, the statement required by ►Item 502(d) of Regulation S–K (§ 229.502(d) of this chapter)◄ [§ 230.426] to be included in the full prospectus.

* * * * *

PART 239—FORMS PRESCRIBED UNDER THE SECURITIES ACT OF 1933

§ 239.4 [Amended]

10. By removing § 239.4, Form C–2, for certain types of certificates of interest in securities.

§ 239.6 [Amended]

11. By removing Form D–1, for certificates of deposit, in § 239.6.

§ 239.7 [Amended]

12. By removing Form D–1A, for certificates of deposit issued by issuer of securities called for deposit, in § 239.7.

13. By amending Item 16 of Form S–1 in § 239.11 to revise paragraph (b) to read as follows (Form S–1 does not appear in the Code of Federal Regulations):

§ 239.11 Form S–1 [Amended]

* * * * *

Item 16. Exhibits and Financial Statement Schedules.

* * * * *

(b) Furnish the financial statement schedules required by Regulation S–X (17 CFR Part 210) and Item 11 ►(e)◄ [(a)(5)] of this Form. These schedules shall be lettered or numbered in the manner described for exhibits in paragraph (a).

* * * * *

14. By amending Item 12 of Form S–2 in § 239.12 by revising the introductory paragraph (a) and paragraphs (a)(3)(i) and (b) to read as follows (Form S–2 does not appear in the Code of Federal Regulations):

§ 239.12 Form S–2 [Amended]

* * * * *

Item 12. *Incorporation of Certain Information by Reference.*

(a) The documents listed in (1), (2), and, if applicable, the portions of the documents listed in (3) and (4) below, shall be specifically incorporated by reference into the prospectus, by means of a statement to that effect in the prospectus listing all such documents. ►In lieu of incorporating portions of the documents listed in (3) and (4) below, the registrant may incorporate by reference its entire annual or quarterly report to security holders.◄

* * * * *

(3) * * *

(i) description of business furnished in accordance with the provisions of Rule 14a–3(b) ►(6)◄ [(5)] under the Exchange Act (§ 240.14a–3(b)(6) of this chapter);

* * * * *

(b) The registrant may also state, if it so chooses, that specifically described portions of ►its annual or quarterly report to security holders, other than those portions required to be incorporated by reference pursuant to paragraphs (a) (3) and (4) above,◄ [documents which are incorporated by reference] are not part of the registration statement. In such case, the description of portions which are not incorporated by reference or which are excluded shall

be made with clarity and in reasonable detail.

* * * * *

15. By amending Item 11 of Form S–3 in § 239.13 to revise paragraph (b) to read as follows (Form S–3 does not appear in the Code of Federal Regulations):

§ 239.13 Form S–3 [Amended]

Item 11. *Material changes*

* * * * *

(b) Include in the prospectus, if not incorporated by reference therein from the reports filed under the Exchange Act specified in Item 12(a), a proxy or information statement filed pursuant to Section 14 of the Exchange Act, a prospectus previously filed pursuant to Rule 424 ►(b) or (c)◄ under the Securities Act ►(§ 230.424(b) or (c) of this chapter)◄ or a Form 8–K filed during either of the two preceeding fiscal years: (i) Information required by Rule 3–05 and Article 11 of Regulation S–X (17 CFR Part 210); (ii) restated financial statements prepared in accordance with Regulation S–X if there has been a change in accounting principles or a correction in an error where such change or correction requires a material retroactive restatement of financial statements; (iii) restated financial statements prepared in accordance with Regulation S–X where one or more business combinations accounted for by the pooling of interest method of accounting have been consumated subsequent to the most recent fiscal year and the acquired businesses, considered in the aggregate, are significant pursuant to Rule 11–01(b), or (iv) any financial information required because of a material disposition of assets outside the normal course of business.

* * * * *

16. By revising Form S–8 in § 239.16 to delete the instruction to Item 5; and to revise subparagraph (1)(a) of General Instruction A; Note 1 to General Instruction C; the introductory paragraph and paragraph (b) of Item 15; and the signature provision; and Instruction 1 to the signature provision to read as follows (Form S–8 does not appear in the Code of Federal Regulations):

§ 239.16 Form S–8 [Amended]

General Instructions

A. Rule as to use of Form S–8.

(1) * * *

(a) Securities of such issuer to be offered to its employees, or to employees of its subsidiaries or parents, pursuant to any employee benefit plan. ►(See Rule 405 of Regulation C (§ 230.405 of this chapter) defining "employee benefit plan").◄ [(See General Instruction B defining "plan").]

* * * * *

C. Unavailability of the Form S–8 Prospectus for Reoffers or Resales.

* * * * *

Notes.—1. Registered securities may be included in a reoffer prospectus if they have been or will be acquired by the selling security holder pursuant to the plan. If after the effective date the issuer wishes to add any person who has acquired or will acquire any registered securities pursuant to the plan to the list of selling shareholders, the issuer may do so by filing a post-effective amendment[.] ►or by use of a prospectus filed pursuant to Rule 424(c) under the Securities Act (§ 230.424(c) of this chapter).◄

* * * * *

PART I—INFORMATION REQUIRED IN THE PROSPECTUS

* * * * *

Item 15. Incorporation of Certain Documents by Reference.

The issuer and, where interests in the plan are being registered, the plan, shall incorporate by reference into the prospectus the documents listed in (a) through (c) below and shall state that all documents subsequently filed by them pursuant to Sections 13 ►(a), 13(c)◄, 14 and 15(d) of the Securities Exchange Act of 1934, prior to the filing of a post effective amendment which indicates that all securities offered have been sold or which deregisters all securities then remaining unsold, shall be deemed to be incorporated by reference in the prospectus and to be a part thereof from the date of filings of such documents. Copies of these documents are not required to be filed with the registration statement.

* * * * *

(b) All other reports filed pursuant to Sections 13 ►(a)◄ or

15(d) of the Securities Exchange Act of 1934 since the end of the fiscal year covered by the annual reports or the prospectus referred to in (a) above.

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Parts 906, 931, 938, and 950

Permanent State Regulatory Programs of Colorado, New Mexico, Pennsylvania and Wyoming

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Proposed rule.

SUMMARY: The Office of Surface Mining Reclamation and Enforcement (OSM) is considering modifying the deadlines for States to meet one condition of their approved State permanent regulatory programs under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). These States are Colorado, New Mexico, Pennsylvania, and Wyoming. This condition relates to the award of costs and expenses in administrative proceedings.

DATE: Comments must be received by March 22, 1983 at the address below, no later than 4:00 p.m.

ADDRESSES: Written comments must be mailed or hand-delivered to the Office of Surface Mining, Administrative Record Office, Room 5315, 1100 L Street, NW, Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT: Arthur W. Abbs, Chief, Division of State Program Assistance, Office of Surface Mining, Interior South Building, Room 210, 1951 Constitution Avenue, NW., Washington, D.C. 20240, (202) 343-5361.

SUPPLEMENTARY INFORMATION: Under 30 CFR 732.13(i), the Secretary may conditionally approve a State permanent regulatory program which contains minor deficiencies where the deficiencies are of such a size and nature as to render no part of the program incomplete, the State is actively proceeding with steps to correct the deficiencies, and the State agrees to correct the deficiencies according to a schedule set in the notice of conditional approval. The curing of each deficiency is a condition of the approval. The conditional approval terminates if the conditions are not met according to the schedule. The dates are established in consultation with the State, based on the regulatory and administrative needs of the State's permanent program and SMCRA and the time required for changes to be adopted under State procedures or legislative schedules.

Since the Secretary's conditional approval of several western States' programs, the Secretary has received a petition from three western States. The petition requests the deletion of the requirement in 30 CFR 840.15 that each State program provide for public participation which is no less effective than that at 43 CFR 4.129(b) which permits the award of costs and expenses in administrative proceedings, including attorney fees, from OSM to any person other than a permittee. In OSM's view, the importance of the attorney fees issue requires further study. OSM intends to issue a notice of proposed rulemaking to solicit public comment on the attorney fees issue and the petition of the western States.

The Secretary is thus considering whether to revise the permanent program rules relating to costs and expenses in administrative proceedings. The above four States with conditionally approved programs may be expending valuable time pursuing program amendments to meet Federal requirements which may change.

Colorado condition (mm), relating to costs and expenses in administrative proceedings is to be satisfied on or before May 20, 1983. The Secretary proposes to allow the State until August 1, 1984, to meet this condition.

New Mexico condition (e), relating to costs and expenses in administrative proceedings, is to be satisfied on or before March 15, 1983. The Secretary proposes to allow the State until March 15, 1984, to meet this condition.

Pennsylvania condition (i), relating to costs and expenses in administrative proceedings, is to be satisfied on or before August 1, 1983. The Secretary proposes to allow the State until August 1, 1984, to meet this condition.

Wyoming condition (c), relating to costs and expenses in administrative proceedings, is to be satisfied on or before May 20, 1983. The Secretary proposes to allow the State until May 20, 1984, to meet this condition.

The Secretary is continuing to review with the States all of the outstanding program conditions. A final rule implementing these proposed extensions may, in response to public comment, be different than those proposed in this notice.

Additional Information

Paperwork Reduction Act. This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

National Environmental Policy Act. The Secretary has determined that pursuant to Section 702(d) of SMCRA, 30 U.S.C. 1292(d), no Environmental Impact Statement need be prepared on this rulemaking.

Executive Order 12291 and the Regulatory Flexibility Act. On August 28, 1981, the Office of Management and Budget (OMB) granted OSM an exemption from Sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of a Regulatory Impact Analysis and regulatory review by OMB.

The Department of the Interior has determined that this rule will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule does not impose any new requirements; rather, it ensures that existing requirements established by SMCRA and the Federal rules will be met by the State.

List of Subjects in 30 CFR Parts 906, 931, 938, and 950

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

Dated: February 25, 1983.

J. Steven Griles,

Acting Director, Office of Surface Mining.

The following are proposed amendments to 30 CFR, Chapter VII, Subchapter T:

PART 906—COLORADO

§ 906.11 Amended.

30 CFR 906.11(mm) is proposed to be amended by substituting "August 1, 1984," for May 20, 1983 each time it appears.

PART 931—NEW MEXICO

§ 931.11 Amended.

30 CFR 931.11(e) is proposed to be amended by substituting "March 15, 1984," for March 15, 1983 each time it appears.

PART 938—PENNSYLVANIA

§ 938.11 Amended.

30 CFR 938.11(i) is proposed to be amended by substituting "August 1, 1984," for August 1, 1983 each time it appears.

PART 950—WYOMING

§ 950.11 Amended.

30 CFR 950.11(c) is proposed to be amended by substituting "May 20, 1984," for May 20, 1983 each time it appears.

Coast Guard

33 CFR Part 100

[CGD 12-83-01]

Marine Parade; Pacific Inter-Club Yacht Association Opening Day Parade on San Francisco Bay

Correction

In FR Doc. 83-3611 beginning on page 6135 in the issue of Thursday, February 10, 1983, make the following correction:

On page 6136, first column, § 100.35-1201, the second line of paragraph (c)(1), "shall he parade" should have read "shall follow the parade".

BILLING CODE 1505-01-M

POSTAL SERVICE

39 CFR Part 10

International Express Mail Service to Spain and Tunisia

AGENCY: Postal Service.

ACTION: Proposed International Express Mail Service to Spain and Tunisia.

SUMMARY: Pursuant to agreements with the postal administrations of Spain and Tunisia, the Postal Service proposes to begin International Express Mail Service with Spain and Tunisia at postage rates indicated in the tables below. The proposed services are scheduled to begin on May 9, 1983.

DATE: Comments must be received on or before April 4, 1983.

ADDRESS: Written comments should be directed to the General Manager, Rate Development Division, Office of Rates, Rates and Classification Department, U.S. Postal Service, Washington, D.C. 20260. Copies of all written comments will be available for public inspection and photocopying between 9 a.m. and 4 p.m., Monday through Friday, in Room 8620, 475 L'Enfant Plaza West, SW., Washington, D.C. 20260.

FOR FURTHER INFORMATION CONTACT: Leon W. Perlinn (202) 245–4414.

SUPPLEMENTARY INFORMATION: The International Mail Manual is incorporated by reference in the Federal Register, 39 CFR 10.1. Additions to the manual needed to introduce the proposed new services, including the rate tables reproduced below, will be made in due course. Accordingly, although 39 U.S.C. 407 does not require advance notice and the opportunity for submission of comments on international service, and the provisions of the Administrative Procedure Act regarding proposed rulemaking (5 U.S.C. 553) do not apply (39 U.S.C. 410(a)), the Postal Service invites interested persons to submit written data, views or arguments concerning the proposed International Express Mail Service to Spain and Tunisia at the rates indicated in the tables below.

BILLING CODE 7710-12-M

FEDERAL MARITIME COMMISSION

46 CFR Parts 542, 543, and 544

[General Order 40; Docket No. 83-13]

Financial Responsibility For Water Pollution

AGENCY: Federal Maritime Commission.

ACTION: Proposed rulemaking.

SUMMARY: 46 CFR Parts 542, 543, and 544 establish the methods by which foreign and domestic vessel operators may demonstrate financial responsibility in compliance with section 311(p)(1) of the Federal Water Pollution Control Act, section 204(c)(1) of the Trans-Alaska Pipeline Authorization Act and section 305(a)(1) of the Outer Continental Shelf Lands Act Amendments of 1978, respectively. Apparently, as a result of the Panama Canal treaties, the Panama Canal can no longer be considered the navigable waters of the United States. The Federal Maritime Commission therefore is proposing to delete from 46 CFR 542, 543, and 544 all reference to the Panama Canal. The primary result would be that vessel operators who use the Canal would no longer be required to demonstrate to the Commission their financial ability to pay for the removal

of oil and certain other pollutants spilled into the waters of the Canal.

DATE: Comments (Original and 15 copies) on or before April 1, 1983.

ADDRESS: Comments to: Francis C. Hurney, Secretary, Federal Maritime Commission, 1100 L Street NW., Washington, D.C. 20573, (202) 523–5725.

FOR FURTHER INFORMATION CONTACT: Robert M. Skall, Deputy Director, Bureau of Certification and Licensing, Federal Maritime Commission, 1100 L Street NW., Washington, D.C. 20573, (202) 523–5840.

SUPPLEMENTARY INFORMATION: Section 311(p)(1) of the Federal Water Pollution Control Act as amended by the Clean Water Act (33 U.S.C. 1321(p)(1)) applies to vessel operators whose vessels use any port or place in the United States or the navigable waters of the United States. As a precondition to the use of such waters, vessel operators are required to maintain insurance coverage or to otherwise demonstrate their financial ability to repay the U.S. Government for the costs of removing discharges of oil and hazardous substances and for the costs of restoration of natural resources damaged as result of such discharges.

The definition of "United States" in 33 U.S.C. 1321(a)(5) includes "the Canal Zone." Accordingly, the definition of "United States" in 46 CFR 542, which implements 33 U.S.C. 1321(p)(1), also includes "the Canal Zone." In order to comply with 46 CFR 542, therefore, a vessel operator whose vessel uses the Panama Canal must apply for and obtain a Certificate of Financial Responsibility (Water Pollution). Such certificate is obtained by maintaining on file with the Federal Maritime Commission evidence of insurance or other satisfactory evidence of financial responsibility for the purpose stated above.

By memorandum of March 17, 1981, the then Acting Assistant Attorney General, Office of Legal Counsel, Department of Justice, concluded that 33 U.S.C. 1321 no longer applies to any portion of the former Canal Zone. This conclusion is based on treaties between the Republic of Panama and the United States signed in 1977, as well as the implementing legislation (the Panama Canal Act of 1979, 22 U.S.C. 3601–3871).

In addition, on or about July 7, 1982, the Panama Canal Commission issued "Marine Director's Notice to Shipping No. 10–82." That notice removes the prior requirement to present a Certificate of Financial Responsibility (Water Pollution) to Canal boarding officials.

In view of the above mentioned legal opinion and the termination of the prior requirement to present a Federal Maritime Commission Certificate of Financial Responsibility as a precondition to use of the Panama Canal, the following changes to 46 CFR 542 are being proposed:

(1) Delete the words "the Canal Zone" from the definition of "United States" in 46 CFR 542.2(w).

(2) Delete the words ", including the Panama Canal" from item 5 of Form FMC–321, Application for Certificate of Financial Responsibility (Water Pollution), appended to 46 CFR 542.

Those two changes to the rules implementing 33 U.S.C. 1321(p)(1) would relieve vessel operators of the no longer enforced requirement to obtain Certificates of Financial Responsibility as a precondition to use of the Canal.

The Panama Canal treaties also would appear to have some impact on the rules implementing section 204(c)(1) of the Trans-Alaska Pipeline Authorization Act and section 305(a)(1) of the Outer Continental Shelf Lands Act Amendments of 1978. Those rules (46 CFR Parts 543 and 544, respectively) refer to the Canal Zone in 46 CFR 543.2 and 46 CFR 544.2(x), the definitions of "United States". It is therefore appropriate to delete the references to the Canal Zone in those two definitional paragraphs of the rules as well.

Pursuant to the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), the Commission certifies that the rule revisions proposed herein would not, if adopted, have a significant economic impact on a substantial number of small entities. The proposed revisions would not require reports or records, and are based entirely on the 1977 treaties between the United States and the Republic of Panama. Any economic impact which might occur will occur as a direct result of the treaties (e.g., transit toll increases to offset cleanup costs), regardless of whether these proposed revisions are adopted or not.

List of Subjects in 46 CFR Parts 524, 543, and 544

Maritime carriers.

Therefore, pursuant to 5 U.S.C. 553, section 311(p) of the Federal Water Pollution Control Act (33 U.S.C. 1321(p)), section 204(c) of the Trans-Alaska Pipeline Authorization Act (43 U.S.C. 1653), section 305(a) of the Outer Continental Shelf Lands Act Amendments of 1978 (43 U.S.C. 1815), section 3 of Executive Order 11735, section 1–201 of Executive Order 12123, and section 3 of the Panama Canal Act of 1979 (22 U.S.C. 3602), the following provisions of Title 46, Code of Federal Regulations, are proposed to be amended as follows:

PARTS 542, 543 AND 544—[CORRECTED]

(1) 46 CFR 542.2(w), 46 CFR 543.2(n) and 46 CFR 544.2(x): delete the words "the Canal Zone,"

(2) First sentence of Item 5, Form FMC–321, Application for Certificate of Financial Responsibility (Water Pollution) appended to 46 CFR 542: delete the words ", including the Panama Canal"

By the Commission.

Francis C. Hurney,

Secretary.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Parts 13, 17 and 21

Implementation of the Endangered Species Act Exemption for Certain Raptors; Raptor Propagation Permits; Federal Falconry Standards

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule; consideration of comments.

SUMMARY: The Service published a proposed rule that appeared at pages 1325–1332 in the **Federal Register** on January 12, 1983 (48 FR 1325), concerning pre-Act "exempt" status for certain raptors (bird of prey) under the Endangered Species Act of 1973, raptor propagation permits, and the possession of captive-bred Harris' hawks by Apprentice Class falconers under the Federal falconry standards. The comment period on the proposal ended February 11, 1983. However, a number of comments were submitted after the deadline. The Service will consider these comments and any others submitted before March 7, 1983. To the extent that it is feasible to do so, comments submitted after March 7, 1983 will be considered.

ADDRESSES: Comments may be mailed to Director (LE), Fish and Wildlife Service, P.O. Box 28006, Washington D.C. 20005, or delivered weekdays to the Division of Law Enforcement, Fish and Wildlife Service, 3rd Floor, 1375 K Street, N.W., Washington, D.C., between 7:45 a.m. and 4:15 p.m. Comments should bear the identifying notation REG 21–02–13. All materials received may be

inspected weekdays during normal business hours at the Service's Division of Law Enforcement, 3rd Floor, 1375 K Street, N.W., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: John T. Webb or William B. Zimmerman, Branch of Investigations, Division of Law Enforcement, Fish and Wildlife Service, U.S. Department of the Interior, P.O. Box 28006, Washington, D.C. 20005, telephone: (202) 343–9242.

Dated: March 1, 1983.

G. Ray Arnett,

Assistant Secretary for Fish and Wildlife and Parks.

BILLING CODE 4310–55–M

---

50 CFR Part 23

Foreign Proposals To Amend Appendices to the Convention on International Trade in Endangered Species of Wild Fauna and Flora

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of proposed amendments to appendices.

SUMMARY: The Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) regulates international shipment of certain wildlife and plant species, which are listed in appendices to this treaty. Any nation that is a Party to CITES may propose amendments to Appendix I or II for consideration by the other Parties.

This notice announces proposals submitted by Parties other than the United States, and invites information and comments on them in order to develop negotiating positions for the United States delegation. The proposals will be considered in April 1983 at the fourth regular meeting of the Parties.

DATE: The Service will consider all comments received by March 31, 1983, in developing negotiating positions. The Service plans to publish a notice of its decisions on the positions prior to the meeting of the Parties.

ADDRESS: Please send correspondence concerning this notice to the Office of the Scientific Authority, U.S. Fish and Wildlife Service, Washington, D.C. 20240. Materials received will be available for public inspection from 7:45 a.m. to 4:15 p.m., Monday through Friday, in room 537, 1717 H Street, NW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Dr. Richard L. Jachowski, Office of the Scientific Authority, U.S. Fish and Wildlife Service, Washington, D.C. 20240, telephone (202) 635–5948.

SUPPLEMENTARY INFORMATION:

Background

CITES regulates import, export, reexport, and introduction from the sea of certain animal and plant species. Species for which trade is controlled are included in three appendices. Appendix I includes species threatened with extinction that are or may be affected by trade. Appendix II includes species that although not necessarily threatened with extinction may become so unless trade in them is strictly controlled. It also lists species that must be subject to regulation in order that trade in other currently or potentially threatened species may be brought under effective control. Such listings frequently are required because of difficulty in distinguishing specimens of currently or potentially threatened species from other species at ports of entry. Appendix III includes species that any Party nation identifies as being subject to regulation within its jurisdiction for purposes of preventing or restricting exploitation, and for which it needs cooperation of other Parties in controlling trade.

Any Party nation may propose amendments to Appendices I and II for consideration at meetings of the Conference of the Parties. The text of any proposal must be communicated to the CITES Secretariat at least 150 days before the meeting. The Secretariat must then consult the other Parties and interested intergovernmental bodies and communicate their responses to all Parties no later than 30 days before the meeting. Amendments are adopted by a two-thirds majority of the Parties present and voting.

Information Sought

The purpose of this notice is to announce proposals submitted by Parties other than the United States for consideration at the forthcoming meeting of the Parties. Proposals by the United States were announced in two recent **Federal Register** notices (47 FR 51772, November 17, 1982; 47 FR 57524, December 27, 1982). This notice also sets forth tentative negotiating positions of the United States delegation on the foreign proposals.

It is nether practical nor in the best interests of the United States to establish inflexible negotiating positions on the proposals in advance of the meeting. However, the Service will develop guidance for the delegation on the basis of the best available biological and trade information, including comments received in response to this notice.

Indications in this notice of support for, or opposition to, proposals are based on a review of information presented in the proposals in terms of criteria adopted by the Parties for the addition, deletion, and transfer of species in Appendices I and II. The Service is seeking further information that might help in determining if the proposals are appropriate.

Proposals

The proposals by Parties other than the United States are listed in the following table. Tentative negotiating positions and the basis for them also are indicated. The complete text of each proposal is available for public inspection at the Service's Office of the Scientific Authority (see address above).

Species	Proposed amendment	Proponent	Tentative U.S. position [1]
PRIMATES *Lagothrix flavicauda* (yellow-tailed wooly monkey)	Transfer from II to I	Peru	Support (1).
CETACEA spp. (all whales for which catches are regulated by International Whaling Commission)	...do	Seychelles	Oppose (2).
Balaenoptera edeni (Brydes whale)	...do	Ecuador	Oppose (2).
Berardius spp. (beaked whales)	...do	Seychelles	Oppose (2).
Hyperoodon spp. (bottle-nosed whales)	...do	...do	Oppose (2).
CARNIVORA *Canis lupus* (grey wolf)	Remove Canadian population from II.	Canada	Support (1).
Vulpes velox hebes (northern swift fox)	Remove from I	...do	Support (1).
Ursus arctos (brown bear)	Add European population except U.S.S.R. to II.	France, Switzerland	Support (1).
Ursus arctos (grizzly bear)	Remove Canadian population from II.	...do	Support (1).
Lutra canadensis (river otter)	Retain in II for similarity in appearance to other otters.	...do	Support (1).
Lynx canadensis (lynx)	Remove Canadian population from II.	...do	Support (1).

Species	Proposed amendment	Proponent	Tentative U.S. position [1]
Lynx rufus (bobcat)	....do	....do	Support (1).
Panthera pardus (leopard)	Transfer Mozambican population from I to II.	Mozambique	Oppose (2, 3).
Panthera pardus	Transfer eastern and central African populations from I to II.	Zimbabwe	Oppose (2, 3, 4).
Phocidae (seals)	Add to II all species not already listed.	Federal Republic of Germany	Oppose (2, 5).
PERISSODACTYLA *Equus africanus* (African wild ass)	Add to I	Israel	Support (1).
ARTIODACTYLA *Addax nasomaculatus* (addax)	Transfer from II to I	Niger	Oppose (2, 3).
Ammotragus lervia (aoudad, Barbary sheep)	....do	....do	Oppose (2, 3).
Cephalophus dorsalis (bay duiker)	Add to II	Federal Republic of Germany	Oppose (2, 3, 4).
Cephalophus jentinki (Jentink's duiker)	Add to I	....do	Oppose (2, 3, 4).
Cephalophus ogilbyi (Ogilby's duiker)	....do	....do	Oppose (2, 3, 4).
Cephalophus sylvicultor (yellow-backed duiker)	Add to II	....do	Oppose (2, 3, 4).
Cephalophus zebra (zebra-banded duiker)	Add to I	....do	Oppose (2, 3, 4).
Gazella dama (addra or dama gazelle)	....do	Niger	Oppose (2, 3).
Moschus spp. (musk deer)	Add populations of Afghanistan, Bhutan, Burma, India, Nepal, and Pakistan to I.	United Kingdom	Support (1).
Moschus spp.	Add all other populations to II	....do	Support (1).
Oryx dammah (scimitar-horned oryx)	Transfer from II to I	Niger	Oppose (2, 3).
Ovis canadensis (bighorn sheep)	Remove Canadian population from II.	Canada	Support (1).
STRUTHIONIFORMES			
Struthio camelus camelus (N. African ostrich)	Add to I	Niger	Oppose (2, 3).
PELECANIFORMES *Pelecanus crispus* (Dalmatian pelican)	Transfer from II to I	France, Switzerland	Support (1).
CICONIIFORMES *Platalea leucorodia* spp. (flamingos)	Add to II	United Kingdom	Support (1).
ANSERIFORMES *Cayuca leucocephala* (white-headed duck)	....do	....do	Support (1).
GRUIFORMES *Anthropoides virgo* (Demoiselle crane)	....do	....do	Support (1).
CHARADRIIFORMES *Numenius tenuirostris* (slender-billed curlew)	Transfer from II to I	France, Switzerland	Support (1).
PSITTACIFORMES *Ara caninde* (caninde macaw)	....do	United Kingdom	Support (1).
Ara rubrogenys (red-fronted macaw)	....do	....do	Support (1).
Ognorhynchus icterotis (yellow-cheeked conure)	....do	....do	Support (1).
TESTUDINATA *Chelonia mydas* (green sea turtle)	Transfer populations of Tromelin and Europa Islands from I to II (ranching).	France	Support (1).
Chelonia mydas	Transfer population of Surinam from I to II (ranching).	Surinam	Support (1).
CROCODYLIA *Crocodylus niloticus* (Nile crocodile)	Remove Malagasy population from I.	Malagasy Republic	Oppose (2, 3).
Crocodylus niloticus	Transfer Mozambican population from I to II.	Mozambique	Oppose (2, 3).
Crocodylus niloticus	Transfer entire species from I to II	Togo, Zambia, Zimbabwe	Oppose (2, 3, 4).
Crocodylus niloticus	Transfer Zimbabwe population from I to II (ranching).	Zimbabwe	Support (1).
Crocodylus porosus (saltwater crocodile)	Transfer Australian population from I to II (ranching).	Australia	Support (1).
ACIPENSERIFORMES *Acipenser brevirostrum* (shortnose sturgeon)	Transfer from I to II	Canada	Oppose (4).
Acipenser fulvescens (lake sturgeon)	Remove from II	....do	Oppose (4).
Acipenser sturio (Baltic sturgeon)	Transfer from II to I	France, Switzerland	Support (1).
SALMONIFORMES *Coregonus alpenae* (longjaw cisco)	Remove from I	Canada	Support (1).
PERCIFORMES *Stizostedion vitreum glaucum* (blue pike)	....do	....do	Support (1).
VENEROIDA *Tridacna derasa and T. gigas* (giant clams)	Add to II	Australia	Support (1).
ARHYNCHOBDELLIFORMES *Hirudo medicinalis* (medicinal leech)	....do	United Kingdom	Support (1).
PLANTS: BYBLIIDACEAE *Byblis* spp. (rainbow plants)	Remove from II	Australia	Oppose (2, 3).
CEPHALOTACEAE *Cephalotus follicularis* (West Australian pitcher plant)	....do	....do	Oppose (2, 3).
CHLOANTHACEAE spp. (lambe tails)	Remove populations of Australia from II.	....do	Oppose (2, 3).
CUPRESSACEAE *Fitzroya cupressoides* (Chilean false larch, Alerce)	Remove dead specimens from I	Chile	Serious reservations (2, 3, 6).
HAEMODORACEAE *Anigozanthos* spp. (kangaroo paws)	Remove from II	Australia	Oppose (2, 3).
MYRTACEAE *Verticordia* spp. (feather flowers)	....do	....do	Do.
PINACEAE *Abies nebrodensis* (Tronco nudo)	Remove from I	France, Switzerland	Support (1).
PROTEACEAE *Banksia* spp. (Banksias)	Remove from II except for *B. lanuginosa*.	Australia	Oppose (2, 3).
Conospermum spp. (smoke bushes)	Remove from II	....do	Oppose (2, 3).
Dryandra formosa (showy dryandra)	....do	....do	Oppose (2, 3).
Dryandra polycephala	....do	....do	Oppose (2, 3).
Xylomelum spp. (Woody pears)	....do	....do	Oppose (2, 3).
RUTACEAE *Boronia* spp.	....do	....do	Oppose (2, 3).
Crowea spp.	....do	....do	Oppose (2, 3).
Geleznowia verrucosa	....do	....do	Oppose (2, 3).
SAXIFRAGACEAE *Ribes sardoum*	Remove from I	France, Switzerland	Support (1).
THYMELAEACEAE *Pimelea physodes* (qualup bell)	Remove from II	Australia	Oppose (2, 3).
ULMACEAE *Celtis aetnensis*	Remove from I	France, Switzerland	Support (1).

[1] The basis for the tentative negotiating position on each proposal is indicated by number in the table: (1) Listing or delisting of the species, as proposed, appears to be justified by information presented in the proposal; (2) the proposal does not present adequate information on population status to justify listing or delisting the species; (3) the proposal does not present adequate information on trade status to justify listing or delisting the species; (4) the proposal does not present information on the status of the species throughout its range, which needs to be considered; (5) the proposal does not adequately document a need to list the species for the purpose of controlling trade in other species due to similarity in appearance; (6) the proposal does not appear to be consistent with the present provisions of CITES.

Certain of these proposals would transfer populations of Appendix I species to Appendix II in order to allow commercial international trade in ranched specimens. Ranching has been defined by the Parties to mean the rearing in a controlled environment of specimens taken from the wild. The Service sought public comment on the ranching proposals by France and Surinam in relation to a special rule prohibiting the importation of maricultured green sea turtle products under the Endangered Species Act of 1973 (48 FR 43; January 3, 1983). Information and comments received in response to that notice also will be considered in determining the United States negotiating positions on these proposals.

List of Subjects in 50 CFR Part 23

Endangered and threatened wildlife, Exports, Fish, Imports, Plants (agriculture), Treaties.

This notice is issued under authority of the Endangered Species Act of 1973 (16 U.S.C. 1531 et seq.; 87 Stat. 884, as amended). It was prepared by Richard L. Jachowski, Office of the Scientific Authority.

Dated: February 28, 1983.

G. Ray Arnett,

Assistant Secretary for Fish and Wildlife and Parks.

BILLING CODE 4310-55-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 285

Atlantic Tuna Fisheries; Public Meeting

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting.

SUMMARY: The National Oceanic and Atmospheric Administration (NOAA) announces a public meeting on proposed revisions to the rules governing the domestic Atlantic bluefin tuna fishery. NOAA anticipates publishing the proposed rules in the **Federal Register** prior to the conduct of this meeting.

DATES: Individuals or organizations wishing to comment may do so at a public meeting to be held as follows: March 16, Uniondale, New York.

ADDRESS: A public meeting on the proposed revisions to Subparts A and B of CFR 285 will be held on the date and time, and at the location listed below.

HEARING LOCATION:

Date: March 16.

Location: Marriot Hotel, 101 James Doolittle Blvd., Uniondale, LI, NY 11553, Tel: 516/794-3800.

Time: 7 p.m.-9:30 p.m.

FOR FURTHER INFORMATION CONTACT: Mr. William C. Jerome, Jr., 617-281-3600, extension 325; or Mr. David S. Crestin, 617-281-3600, extension 253.

SUPPLEMENTARY INFORMATION: The Atlantic Tunas Convention Act requires that necessary rules be promulgated to implement recommendations of the International Commission for the Conservation of Atlantic Tunas (ICCAT). In autumn 1982, ICCAT recommended increasing the total quota for Atlantic bluefin tuna in the western Atlantic Ocean from 1,279 short tons (st) to 2,931 st. NOAA will be issuing proposed rules based on this recommendation to increase the annual quota of Atlantic bluefin tuna availabile to U.S. fishermen from 667 st to 1,529 st. The proposed rules will discuss increases in the quotas for specific segments of the fishery based on the total amount of Atlantic bluefin tuna available to the United States. The purpose of these increases will be to allow the collection of more complete biological information for stock monitoring purposes, while keeping the total harvest at a conservative level. NOAA desires to have public comment on these proposed rules.

List of Subjects in 50 CFR Part 285

Administrative practice and procedure, Fish, Fisheries, Fishing, Imports, International organizations, Penalties, Reporting and recordkeeping requirements.

(16 U.S.C. 971—*et seq.*)

Dated: March 2, 1983.

Joseph Clem,

Acting Chief, Fisheries Process Division, National Marine Fisheries Service.

Notices

Federal Register
Vol. 48, No. 45
Monday, March 7, 1983

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Packers and Stockyards Administration

Posted Stockyards

Pursuant to the authority delegated under the Packers and Stockyards Act, 1921, as amended (7 U.S.C. 181 *et seq.*), it was ascertained that the livestock markets named below were stockyards within the definition of that term contained in section 302 of the Act, as amended (7 U.S.C. 202), and notice was given to the owners and to the public by posting notices at the stockyards as required by said section 302, on respective dates specified below.

Facility No., name, and location of stockyard	Date of posting
IL-169 Gene Hicks Auction and Livestock Ramsey, Illinois.	Feb. 17, 1983.
MN-178 Edgerton Livestock Auction Market Edgerton, Minnesota.	Aug. 21, 1982.

Done at Washington, D.C., this 1st day of March, 1983.

Jack W. Brinckmeyer,
Chief, Financial Protection Branch, Livestock Marketing Division.

[FR Doc. 83-5710 Filed 3-4-83; 8:45 am]
BILLING CODE 3410-02-M

Deposting of Stockyard

It has been ascertained, and notice is hereby given, that the livestock market named herein, originally posted on the respective date specified below as being subject to the Packers and Stockyards Act, 1921, as amended (7 U.S.C. 181 *et seq.*), no longer comes within the definition of a stockyard under said Act and is, therefore, no longer subject to the provisions of the Act.

Facility No., name, and location of stockyard	Date of posting
TX-181 Leggott Groesbeck Commission Company, Inc., Groesbeck, Texas.	Apr. 29, 1957

Notice or other public procedure has not preceded promulgation of the foregoing rule. There is no legal justification for not promptly deposting a stockyard which is no longer within the definition of that term contained in the Act.

The foregoing is in the nature of a change relieving a restriction and may be made effective in less than 30 days after publication in the **Federal Register.** This notice shall become effective upon publication in the **Federal Register.**

(42 Stat. 159, as amended and supplemented; 7 U.S.C. 181 *et seq.*)

Done at Washington, D.C., this 28th day of February, 1983.

Jack W. Brinckmeyer,
Chief, Financial Protection Branch, Livestock Marketing Division.

[FR Doc. 83-5711 Filed 3-4-83; 8:45 am]
BILLING CODE 3410-02-M

Proposed Posting of Stockyards

The Chief, Financial Protection Branch, Packers and Stockyards Administration, United States Department of Agriculture, has information that the livestock markets named below are stockyards as defined in section 302 of the Packers and Stockyards Act, 1921, as amended (7 U.S.C. 202), and should be made subject to the provisions of the Act.

CO-151 Western Slope Livestock Auction Montrose, Colorado
MN-179 Minnesota Feeder Pig Markets, Inc. Pipestone, Minnesota
OK-201 Checotah Livestock Auction Checotah, Oklahoma
TX-327 Leggott Groesbeck Commission Company, Inc. Groesbeck, Texas

Notice is hereby given, therefore, that the said Chief, pursuant to authority delegated under the Packers and Stockyards Act, 1921, as amended (7 U.S.C. 181 *et seq.*), proposes to designate the stockyards named above as posted stockyards subject to the provisions of the Act as provided in section 302 thereof.

Any person who wishes to submit written data, views, or arguments concerning the proposed designation, may do so by filing them with the Chief, Financial Protection Branch, Packers and Stockyards Administration, United States Department of Agriculture, Washington, D.C. 20250, by March 22, 1983.

All written submissions made pursuant to this notice shall be made available for public inspection in the office of the Chief of the Financial Protecton Branch during normal business hours.

Done at Washington, D.C., this 1st day of March, 1983.

Jack W. Brinckmeyer,
Chief, Financial Protection Branch, Livestock Marketing Division.

BILLING CODE 3410-02-M

CIVIL AERONAUTICS BOARD

Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits; Week Ended February 25, 1983

Subpart Q Applications

The due date for answers, conforming application, or motions to modify scope are set forth below for each application. Following the answer period the Board may process the application by expedited procedures. Such procedures may consist of the adoption of a show-cause order, a tentative order, or in appropriate cases a final order without further proceedings.

Date filed	Docket No.	Description
Feb. 22, 1983.....	41300	Aeromar, C. por A., c/o Mark Pestronk, 805 King Street, Alexandria, Virginia 22314. Application of Aeromar, C. por A. pursuant to Section 402 of the Act and Subpart Q of the Board's Procedural Regulations requests amendment and renewal of its foreign air carrier permit to engage in foreign air transportation of property as follows: Between the terminal point Santo Domingo, Dominican Republic and the co-terminal points Miami, Florida; New York, New York; San Juan, Puerto Rico; and St. Thomas, Virgin Islands. Answers may be filed by March 22, 1983.
Feb. 22, 1983.....	41120	Bowman Aviation, Inc., d/b/a BO-S-Aire Airlines, Inc., c/o Thom G. Field, Neale, Newman, Bradshaw & Freeman, One Corporate Square, P.O. Box 4203 G.S. Springfield, Missouri 65808. Amendment No. 1 to the Application of Bowman Aviation, Inc. d/b/a BO-S-Aire Airlines, Inc. pursuant to Section 401 of the Act and Subpart Q of the Board's Procedural Regulations requests permanent authority to provide foreign charter air transportation of cargo and mail as follows: (a) Between any point in any State in the United States or the District of Columbia, or any territory or possession of the United States, on the one hand, and Canada, on the other; (b) Between any point in any State of the United States or the District of Columbia, or any territory or possession of the United States, on the one hand, and Mexico, on the other; (c) Between any point in any State of the United States or the District of Columbia, or any territory or possession of the United States, on the one hand, and points in Jamaica, the Bahama Islands, Bermuda, Haiti, the Dominican Republic, Trinidad, Aruba, the Leeward and Windward Islands, and any other foreign place located in the Gulf of Mexico or the Caribbean Sea, on the other hand; (d) Between any point in any State of the United States or the District of Columbia, or any territory or possession of the United States, on the one hand, and points in British Honduras, the Canal Zone, Guatemala, Honduras, El Salvador, Nicaragua, Costa Rica, Panama, and in the countries of Colombia and Venezuela on the continent of South America, on the other hand; Conforming applications, Motions to Modify Scope and Answers may be filed by March 23, 1983.
Feb. 23, 1983.....	41035	Dominion Intercontinental Airlines, Inc., c/o Harry A. Bowen, Bowen & Atkin, 2020 K Street, N.W., Suite 350, Washington, D.C. 20006. Amendment No. 1 to the Application of Dominion Intercontinental Airlines, Inc. submitting additional information with respect to the application for a certificate of public convenience and necessity for foreign air transportation.

Phyllis T. Kaylor,
Secretary.

DEPARTMENT OF COMMERCE

International Trade Administration

Performance Review Board Membership

This notice announces the appointment by the Department of Commerce Under Secretary for International Trade, Lionel H. Olmer, of the Performance Review Board for ITA. This is a revised list of membership which includes previous members as listed in the July 29, 1982 **Federal Register** announcement with additional members added to serve out the remainder of the one year term. The purpose of the International Trade Administration PRB is to review performance actions for recommendations to the appointing authority as well as other related matters. The names of the PRB members are:

International Trade Administration

Vincent F. DeCain, Deputy to Deputy Assistant Secretary for Export Administration
Joseph F. Dennin, Deputy Assistant Secretary for Africa, Near East and South Asia
John Evans, Deputy to Deputy Assistant Secretary for Import Administration
Brant W. Free, Director, Office of Service Industries
J. Mishell George, Deputy to Deputy Assistant Secretary for Industry Projects
Ann Hughes, Deputy Assistant Secretary for Western Hemisphere
Richard L. McElheny, Director General, U.S. and Foreign Commercial Services
John Richards, Director, Office of Industrial Resource Administration
Roger Severance, Director, Office of Pacific Basin

Minority Business Development Agency

Herbert S. Becker, Assistant Director for Advocacy, Research and Information.

Dated: February 28, 1983.

James T. King, Jr.,

Personnel Officer, International Trade Administration.

BILLING CODE 3510-25-M

Applications for Duty-Free Entry of Scientific Instruments

The following are notices of the receipt of applications for duty-free entry of scientific instruments published pursuant to Section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Public Law 89-651; 80 Stat. 897) and the regulations issued pursuant thereto (15 CFR Part 301 as amended by 47 FR 32517).

Interested persons may present their views with respect to the question of whether an instrument or apparatus of equivalent scientific value for the purposes for which the instrument is intended to be used is being manufactured in the United States. Comments must be filed in accordance with § 301.5(a) (3) and (4) of the regulations. They are to be filed in triplicate with the Director, Statutory Import Programs Staff, U.S. Department of Commerce, Washington, D.C. 20230, within 20 calendar days after the date on which this notice of application is published in the **Federal Register.**

A copy of each application is on file in the Department of Commerce, and may be examined between 8:30 a.m. and 5:00 p.m., Monday through Friday, Room 1523, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Docket No. 83-133. Applicant: University of Wisconsin, Madison, Department of Chemistry, 1101 University Avenue, Madison, WI 53706. Instrument: Gas Chromatograph Mass Spectrometer System MS-80, and Accessories. Manufacturer: Kratos Analytical Instruments, United Kingdom. Intended use of instrument: The instrument is intended to be used to determine the exact mass of a molecular ion, to record complete mass spectra of newly synthesized, unknown compounds and to analyze the fragmentation patterns of the samples. The overall objective is to determine the molecular formula and the structure of the unknown. The instrument is to be used in conjunction with the following courses: Chemistry 990, 992, 993, and 994 (Research); Chemistry 621 (Instrumental Analysis) and 626 (Topics on Chemical Instrumentation). Application received by Commissioner of Customs: February 17, 1983.

Docket No. 83-136. Applicant: Centers for Disease Control, 1600 Clifton Rd., NE., Atlanta, GA 30333. Instrument: Electron Microscope, EM 410G with Accessories. Manufacturer: Philips Electronic Instruments, Inc., The Netherlands. Intended use of instrument: The instrument is intended to be used for studies of pathology specimens of human and animal origin along with infectious micro-organisms during research into the cases and mechanism of diseases such as Acquired Immune Deficiency Syndrome (AIDS), Legionnaires Disease, Pneumocystis, Kidney Disease, Toxoplasmosis, Herpes and others. Application received by Commissioner of Customs: February 16, 1983.

Docket No. 83-137. Applicant: University of Michigan Hospitals, 1405 E. Ann Street, Ann Arbor, MI 48109. Instrument: Electron Microscope, EM 400 and Accessories. Manufacturer: N.V. Philips, The Netherlands. Intended use of instrument: The instrument is intended to be used to expand the clinical applications of transmission EM including immunoperioxodase and immunoferritin labeling—for the ultrastructural localization of immunoreactive tissue antigens (especially in tumors) not visible at the light microscope. In addition, with the increased usage of the TEM in ultrastructural examination of patient biopsy material, the instrument will be used to further the hospital's ability to handle difficult samples. The instrument will also be used in the teaching of ultrastructural manifestations of disease to medical students, medical technology students, resident physicians and practicing physicians. Application received by Commissioner of Customs: February 16, 1983.

Docket No. 83-138. Applicant: The University of Texas System Cancer Center, M.D. Anderson Hospital & Tumor Institute, 6732 Bertner, Texas Medical Center, Houston, Texas 77030. Instrument: Electron Microscope, EM 410G and Accessories. Manufacturer: Mederlaae Philips Bedrijven B.V., The Netherlands. Intended use of instrument: The instrument will be used in a variety of studies involving both basic and applied virology, ultrastructural analyses of tumor cells, and molecular biology. Specimens from patients with cancer of various types, experimental animal tumors, normal tissues from human and animal sources, cells from various sources maintained in tissue culture, and fractions of cells or viruses will be examined by both conventional and novel methods. In addition, the instrument will be used for training in electron microscopy techniques at the graduate and postgraduate level. Application received by Commissioner of Customs: February 16, 1983.

Docket No. 83-128. Applicant: University of California, Department of Geology & Geophysics, c/o Purchasing Department, 2405 Bowditch Street, Berkeley, CA 94720. Instrument: Interferometer Spectrophotometer, Model DA3.02 with Accessories. Manufacturer: Bomen, Inc., Canada. Intended use of instrument: The instrument is intended to be used in research involving the study of planetary materials at conditions that occur within the planets (e.g., high pressures) in order to constrain models of planetary structure and evolution. Spectroscopy is employed mainly to identify molecular clusters and configurations within complex solid and liquid structures of minerals, as well as to constrain detailed models of vibrational (thermodynamic) and bonding properties of such materials. The instrument will also be used to teach state-of-the-art techniques and concepts in mineral physics. Application received by Commissioner of Customs: February 18, 1983.

Docket No. 83-135. Applicant: Cook County Department of Purchase, (Cook County Hospital), 118 North Clark Street, Chicago, IL 60602. Instrument: Electron Microscope, Model JEM-100CX/II and Accessories. Manufacturer: JEOL Ltd., Japan. Intended use of instrument: The instrument is intended to be used for ultrastructural studies of the following: (1) Pathologic changes in various liver diseases, especially viral hepatitis (identification of viruses and Australian antigen). (2) Kidney diseases (study of the changes of glomerulous membranes). (3) Various tumors especially the differential diagnosis of the various poorly differentiated anaplastic cancers. The instrument will also be used in the training of graduate students and residents. Application received by Commissioner of Customs: February 18, 1983.

BILLING CODE 3510-25-M

Brigham Young University; Decision on Application for Duty-Free Entry of Scientific Instrument

The following is a decision on an application for duty-free entry of a

scientific instrument pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89–651, 80 Stat. 897) and the regulations issued pursuant thereto (15 CFR Part 301 as amended by 47 FR 32517).

A copy of the record pertaining to this decision is available for public review between 8:30 a.m. and 5 p.m. in Room 1523, Statutory Import Programs Staff, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, D.C. 20230

DOCKET NO. 82–00179R. Applicant: Brigham Young University, Department of Chemistry, 228 ESC, Provo, UT 84602. Instrument: Kelvin AC Double Bridge & Automatic Switch Unit. Application is a resubmission, notice of which was published in the **Federal Register** of May 20, 1982.

Comments.—No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, is being manufactured in the United States. Reasons: This application is a resubmission of Docket No. 82–00179 which was denied without prejudice to resubmission on September 27, 1982 for informational deficiencies. The foreign instrument provides accurate automatic measurements with both high and low resistance thermometers. The National Bureau of Standards advises in its memorandum dated February 3, 1983 that: (1) The capability of the foreign instrument described above is pertinent to the applicant's intended purpose; and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use. The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, which is being manufactured in the United States.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials.)

BILLING CODE 3510-25-M

The Rockefeller University; Decision on Application for Duty-Free Entry of Scientific Instrument

The following is a decision on an application for duty-free entry of a scientific instrument pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897) and the regulations issued pursuant thereto (15 CFR Part 301 as amended by 47 FR 32517). A copy of the record pertaining to this decision is available for public review between 8:30 a.m. and 5:00 p.m. in Room 1523, Statutory Import Programs Staff, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Docket No. 82–00185R. Applicant: The Rockefeller University, 1200 York Avenue, New York, N.Y. 10021. Instrument: Incubators, Feedback Controlled to Maintain PO_2 and PCO_2 and pH. Application is a resubmission, notice of which was published in the **Federal Register** of June 11, 1982.

Comments.—No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, is being manufactured in the United States. Reasons: This application is a resubmission of Docket No. 82–00185 which was denied without prejudice to resubmission on September 22, 1982 for informational deficiencies. The foreign instrument provides dynamic feedback control of the incubator environment. The Department of Health and Human Services advises in its memorandum dated December 29, 1982 that: (1) The capability of the foreign instrument described above is pertinent to the applicant's intended purpose; and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use. The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, which is being manufactured in the United States.

National Oceanic and Atmospheric Administration

Receipt of Application for Permit

Notice is hereby given that an Applicant has applied in due form for a Permit to take marine mammals as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216), the Endangered Species Act of 1973 (16 U.S.C. 1531–1544), the National Marine Fisheries Service regulations governing endangered fish and wildlife permits (50 CFR Parts 217–222).

1. Applicant:

a. Name: Mr. Jeffrey D. Goodyear (P317).

b. Address: Moss Landing Marine Laboratories, P.O. Box 223, Moss Landing, California 95039–0223.

2. Type of permit: Scientific Research/Scientific Purposes.

3. Name and number of animals: Fin whale (Balaenoptera physalus), 30; Humpback whale (Megaptera novaengliae), 45.

4. Type of take: Up to 30 humpback whales and 20 fin whales may be approached up to four times each to obtain a skin sample and place a radio tag. An additional 15 humpback whales and 10 fin whales may be approached once to obtain a skin sample.

5. Location of activity: Stellwagon Bank, Cape Cod, Massachusetts.

6. Period of activity: April to September 1983.

Concurrent with the publication of this notice in the **Federal Register**, the Secretary of Commerce is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this application should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, Washington, D.C. 20235, within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries.

All statements and opinions contained in this application are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Documents submitted in connection with the above application are available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, NW., Washington, D.C.;

Regional Director, Southwest Region, National Marine Fisheries Service, 300

South Ferry Street, Terminal Island 90731, and:

Regional Director, Northeast Region, National Marine Fisheries Service, 14 Elm Street, Federal Building, Gloucester, Massachusetts 01930.

Dated: March 1, 1983.

R. B. Brumsted,

Acting Chief, Protected Species Division, National Marine Fisheries Service.

BILLING CODE 3510-22-M

Office of the Secretary

Agency Forms Under Review by the Office of Management and Budget (OMB)

DOC has submitted to OMB for clearance the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: Bureau of the Census.

Title: Survey of Local Government Finances (School Systems).

Form No.: Agency—F-33, F-33-1, F-33-L1, F-33-L3; OMB—0607-0105.

Type of request: Extension.

Burden: 450 respondents; 1,400 reporting hours.

Needs and uses: The collected public school financial data are incorporated with other local government finance data and entered into the national income accounts. Data are also used in long established Census reports and to determine revenue sharing entitlements.

Affected Public: State and local educational agencies.

Frequency: Annually.

Respondent's obligation: Voluntary.

OMB desk officer: Timothy Sprehe, 395-4814.

Agency: Bureau of the Census.

Title: Quarterly Summary of Federal, State and Local Tax Revenue.

Form No: Agency—F-71, F-72, F-73; OMB—0607-0112, 0607-0113, 0607-0114.

Type of request: Extension.

Burden: 5,204 respondents; 5,254 reporting hours.

Needs and uses: The three forms are used to collect State and local tax revenue data that form the basis of a quarterly report. The Bureau of Economic Analysis uses this information to forecast economic indicators. Other organizations such as the Federal Reserve Bank, the Advisory Commission on Intergovernmental Relations, public interest groups and State and local governments use this information for comparative purposes or economic research.

Affected public: State and local governments.

Frequency: Quarterly.

Respondent's obligation: Voluntary.

OMB desk officer: Timothy Sprehe, 395-4814.

Agency: Bureau of the Census.

Title: April 1983 CPS Country of Birth, Immigration and Immigrant Fertility Supplement.

Form No.:

Type of request: New.

Burden: 58,000 respondents; 1,570 reporting hours.

Needs and uses: This supplement to the Current Population Survey (CPS) is needed to collect data on the immigrant populations. These data will be used to compare immigrant and non-immigrant fertility statistics and to improve the fertility component of populations projections for the Nation's immigrants, especially for the Hispanic immigrant population.

Affected public: Households interviewed in the April 1983 CPS sample.

Frequency: On occasion.

Respondent's obligation: Voluntary.

OMB desk officer: Timothy Sprehe, 395-4814.

Copies of the above information collection proposals can be obtained by calling or writing DOC Clearance Officer, Edward Michals (202) 377-4217, Department of Commerce, Room 6622, 14th and Constitution Avenue, N.W., Washington, D.C. 20230.

Written comments and recommendations for the proposed information collections should be sent to the respective OMB Desk Officer, Room 3235, New Executive Office Building, Washington, D.C. 20503.

Edward Michals,

Departmental Clearance Officer.

BILLING CODE 3510-CW-M

COPYRIGHT ROYALTY TRIBUNAL

[Docket No. CRT 81-1]

1980 Cable Royalty Distribution Determination

AGENCY: Copyright Royalty Tribunal.

ACTION: Notice of final determination.

SUMMARY: The Copyright Royalty Tribunal (Tribunal) announces the adoption of its final determination in the proceeding concerning the distribution to certain copyright owners of royalty fees paid by cable systems for secondary transmissions during 1979.

FOR FURTHER INFORMATION CONTACT: Edward W. Ray, Chairman, Copyright Royalty Tribunal, (202) 653-5175.

Introduction

17 U.S.C. 111(d)(5)(B) requires the tribunal after the first day of August to determine whether a controversy exists concerning the distribution of cable royalty fees deposited by cable systems with the Copyright Office. Upon determination that a controversy exists, 17 U.S.C. 804(d) requires the Chairman of the Tribunal to publish in the **Federal Register** a notice announcing the commencement of distribution proceedings.

In a notice published in the **Federal Register** of August 12, 1981 (46 FR 40787), the Tribunal directed that claimants to royalty fees paid by cable operators for secondary transmissions during 1980 submit not later than September 10, 1981 any comments concerning whether a controversy exists concerning the distribution of the 1980 royalty fees.

In a public meeting on October 14, 1981, after giving claimants the opportunity to appear and present arguments, the Tribunal determined that a controversy did in fact exist concerning the distribution of cable royalty fees for the period January 1 through December 31, 1980. The Tribunal set the effective date of March 2, 1982 and in the **Federal Register** of March 2, 1982 (47 FR 8808) announced that distribution proceedings had commenced.

Background and Chronology

Structure of Proceeding

The Tribunal directed claimants or their duly authorized representatives to submit any proposals or comments: in accordance with the Administrative Procedure Act, providing for procedures whereby the Tribunal could utilize the record of the previous proceedings in the 1980 Phase I distribution proceeding and limit the presentation of new testimony and written evidence; on the legality and feasibility of propsals providing for the Tribunal prior to the termination of the 1980 royalty proceeding to make partial distribution of the royalty fees; and, on the alteration of the Phase I categories of claimants established by the Tribunal in the 1979 royalty proceeding, to the tribunal no later than April 30, 1982 (47 FR 8808) which was later extended to May 7, 1982 (47 FR 12203). Reply brief or memorandum, if any, were to be submitted no later than May 21, 1982 (47 FR 12203).

Evidentiary Proceeding

In a notice which appeared in the **Federal Register** on June 8, 1982 (47 FR 24768), the Tribunal announced that the

proceeding would be conducted in two separate phases. Phase I would be devoted to determining the percentages, if any, of the 1980 royalty fund. Phase II would be devoted to resolving disputes, if any, among claimants within each of the categories. In that notice, the Tribunal also announced:

1. Approval of utilization of the record of the 1978 and 1979 distribution proceedings in both phases of the 1980 proceeding;

2. Approval of the request of Superstation, Inc. to participate for all purposes in Phase I;

3. Alternation of the 1979 Phase I categories as listed in the final determination of March 8, 1982 (47 FR 9897) by establishing a new and separate category for Devotional Claimants; and,

4. Its determination that it shall not adopt any restrictions on the introduction of new evidence, or require any preliminary showing that the proferred evidence reflects a significant change in material facts from prior proceedings.

The Tribunal also ordered parties desiring to present evidence and argument and participate in cross examination during Phase I to notify the Tribunal of said intention on or before April 26, 1982 (47 FR 12203). Parties were further advised that participation in Phase I was not a prerequisite to participation in Phase II. The Tribunal directed, that not later than August 16, 1982, each Phase I party to submit any prehearing statements, witness lists, concise summary of each witness's testimony, and copies of all documentary evidence (47 FR 24768). Parties were directed to designate those portions of the 1978 and 1979 records they wished to incorporate in the 1980 record not later than July 15, 1982. The Tribunal subsequently incorporated the entire 1978 and 1979 records into the 1980 proceeding. Phase I of the evidentiary hearing began on September 21, 1982 and continued over a period of 30 days, concluding November 10, 1982. Participants in Phase I were allowed the opportunity to submit rebuttal evidence after the completion of the direct case. The participants were ordered to submit:

a. Names of rebuttal witnesses.

b. Concise summary of each witness rebuttal testimony.

c. Copies of rebuttal documentary evidence.

The hearings on the substantive aspects of the rebuttal proceeding began on November 16, 1982 and continued over a period of seven days, concluding on November 24, 1982.

In the Federal Register on December 28, 1982 (47 FR 57748) the Tribunal published its summary statement of its Phase I determinations. (A correction of a GPO typesetting error was published in the Federal Register of January 7, 1983 (48 FR 859).) In accordance with 17 U.S.C. 803(b), a full and complete statement of the Tribunal's conclusions of law, findings of fact, and other relevant determinations will be included in the Tribunal's final determination.

In that same statement the Tribunal, in preparation for Phase II, directed that not later than January 12, 1983 each claimant category shall notify the Tribunal of any voluntary agreements for distribution of royalty fees among the claimants within a category. The Tribunal further directed that not later than January 12, 1983 any claimant desiring to present evidence during Phase II shall notify the Tribunal of such intention, and the Phase II issues to be decided. Additionally, the Tribunal directed that not later than January 18, 1983 parties shall file with the Tribunal and exchange with other parties their direct, written cases, including list of witnesses, pre-hearing statements, and all documentary evidence.

Phase II of the evidentiary hearing began on January 25, 1983 and continued over a period of five days, concluding on January 31, 1983. The hearing on the substantive aspects of the rebuttal proceeding was conducted on February 2, 1983. The Tribunal ordered the parties to submit findings of fact and conclusions of law on February 9, 1983.

Summary of Evidentiary Positions

Motion Picture Association of America (MPAA)

The Motion Picture Association of America (MPAA) claimed an entitlement to 82% of the 1980 royalty fund.[1] As the primary basis for this claim, MPAA presented a Nielsen study of viewing of distant signal programming. The sample was based upon stations carried on cable systems whose total subscribers exceeded 75,000: 82 stations.[2] MPAA considered that its reliance upon this study was justified by the Tribunal's 1979 judgment that its Nielsen study in that proceeding was the single most important piece of evidence.[3] MPAA considered the Nielsen study an accurate reflection both of benefit to copyright owners and of marketplace value,[4] according to the Tribunal's criteria which had been validated by the Court as precedents the parties could rely on.[5] According to this study, the viewing of movies and syndicated series on distant signals is 82%, in contrast with a total time on the air of 74%.[6]

[1] MPAA Exhibit A, final page.

These results, in MPAA's view, are objective, have been consistent over three years and represent the actual satisfaction of subscribers. Resubscription is a monthly constantly repeating decision,[7] and these patterns of viewing have held also for stations whose programming is said to be as diverse as sports flagship stations and network affiliates.[8] MPAA rejects the accusations of underreporting on diaries as unsubstantiated by hard evidence and not discriminating, even if it did exist, toward one party or another.[9]

Concerning the criterion of harm, MPAA relied upon the testimony of Mr. Horn in the 1979 proceeding and on the testimony of Mr. Valenti in all three proceedings.[10] This testimony stressed that syndicated programming is difficult to sell in heavily cabled markets and that cable intrusion has caused prices in all markets to be less than they would be otherwise. The same series is often run in the same day part nationwide and this makes the industry particularly vulnerable.[11]

MPAA relied for the foundation of its presentation upon the Nielsen study and the consistency with which the Tribunal has placed weight upon that study; but emphasized that this year the deficiencies that the Tribunal and found in its 1979 case had been corrected; in particular with regard to the station sample, the use of sweep weeks, and the value of syndicated programming.[12] MPAA also provided a cable industry witness in contrast to past proceedings. Mr. Kurnit, Vice-President of Warner-Amex Cable Communications, Inc., with responsibility for programming on 190 cable systems, and formerly Program Director for QUBE cable system in Columbus, Ohio.[13]

With respect to the station sample, MPAA felt that it had corrected the deficiencies cited in its 1979 case by simply selecting all stations carried by cable systems whose aggregate subscribers were 75,000 or above; rather than resorting to a statistical selection subsequently requiring weighting. This produced a sample of 82 stations of which 41 were independents, 35 affiliates, and 6 specialty stations; 53 VHF and 29 UHF.[14] The fact that independents are represented more heavily than network affiliates is not an imbalance, but reflects the degree to which independents are picked up to a greater extent as distant signals.[15] The reasonableness and reliability of the sample are not affected by the fact that, for cost and time reasons, preliminary results were used and that the local designation of a few counties is in dispute.[16]

As for the question concerning the use of sweep weeks and the possible distortion they may give to viewing, MPAA presented viewing evidence from the QUBE cable system in Columbus, Ohio. This showed that the differences between sweep and non-sweep periods were inconsequential, and the explanation was given that during sweep periods all stations are promoting themselves simultaneously.[17] To conduct a survey the use of sweep weeks is the only practical method available.[18] MPAA relied upon its QUBE evidence and the testimony of Mr. Kurnit also to question the diminished value the Tribunal attributed to syndicated series in 1979. Cable operators need programming which can provide consistent satisfaction and result in monthly resubscription; and this is the benefit that syndicated series provides. This cannot be evaluated by looking at a single day part,[19] because syndicated series and movies are broadcast throughout the day and, in comparison with sports, for instance, have a much broader appeal.[20] Above all, syndicated series appear during the most important day part, early fringe.[21]

MPAA also presented evidence concerning advertising revenue, based on a 20 station sample. Although MPAA did not consider local advertising data strictly relevant to the distant signal market; nevertheless, it did view them as corroborating the high value of movies and syndicated programming.[22]

MPAA proposed the following allocation among parties:

	Percent
MPAA	61
Sports	7.25
PBS	4.0
NAB	2.25
Music	3.5
CBC	0
Commercial Radio	0
NPR	.25
Devotional	0

Joint Sports

The Joint Sports claimants argued that the royalty share they received for 1979 should be increased to 18% for 1980, considering the significant increase in superstation carriage by satellite between 1979 and 1980 and the unique effect of this development upon sports.[23] Due to the increased industry reliance upon satellites, superstations constituted 63% of new distant signals added by Form 3 cable systems in 1980. Superstations were carried on 75% of Form 3 cable systems in 1980 as against 64% in 1979.[24] Joint Sports argued that this increase in the carriage of superstations has resulted in an increase of the benefits conferred by superstations upon cable operators: relatively low cost, franchise advantages, free publicity, revenue opportunities.[25] This is reflected in the increase in the number of subscribers of those cable systems carrying superstations and of the royalties attributable to his carriage.[26] The Joint Sports claimants contended that programming has been an important factor in the success of superstations

[26] Ibid, p. 33.

and that in comparison with all other programming sports has played the dominant role.[27] Sports occurs on superstations proportionately to a much greater extent than it does on other stations, superstations carrying one-quarter of all professional sports telecast by flagship stations.[28] Cable operators acknowledge sports as a principal reason in their decision to import superstations and advertise sports heavily in promoting their services.[29] Sports claimants argued that because channels and choices proliferated in 1980, the decision by cable operators to carry stations emphasizing sports was therefore much more significant.[30]

Joint Sports contended that unless there are material changes in circumstances the Tribunal is bound to adhere to its previous distribution decisions, especially in light of the court's affirmance of the ground rules. If there are changes of circumstances the burden of proof is upon the parties.[31] Joint Sports argues that it alone of all claimants has done this, and that, except for sports, other shares should remain the same, the only real dispute being between Joint Sports and MPAA.[32]

The Sports claimants considered that Tribunal's award to sports in 1979 was insufficient, given the evaluations by cable operators that sports and movies are of equal value.[33] The testimony of Mr. Jack Williams, Chif Operators Officer of Prism, a regional pay service in Philadelphia, and Mr. James Lahey, cable systems owner and operator, as well as the testimony elicited from cable witnesses presented by other parties, were presented in support of the value cable operators perceive in sports programming.[34] Those not placing an especially high value on sports were in the minority.[35] Sports provide diversity on distant signals which is not diminished by network sports, sports pay networks, or regional interest in sports.[36]

Joint Sports presented a BBD&O cable industry survey in support of its contention of the value placed on sports by cable operators: a telephone interview survey of the senior marketing or program executives of 34 of the 50 largest MSO's, representing 53.6% of the cable subscribers in the United States, similar to studies conducted for both 1978 and 1979.

BBDO Study—Average Allocations for Distant Signal Programming Categories (1979 and 1980) (1980 Sports Ex. 8)

	Percent mean		Percent median	
	1979	1980	1979	1980
Movies	36.00	37.76	40	37.5
Live non-network sports	35.00	32.95	30	34.7
Syndicated TV shows	10.57	11.77	10	10
News and public affairs	9.40	12.62	10	10
PBS and other educational programming	7.03	4.91	5	5

This study reflects that the value placed upon sports by cable operators has remained statistically constant and continues to be roughly equal to that for movies and superior to that for syndicated programming.[37] Joint Sports considered that the relative valuation of different kinds of programming was supported by the NAB/SRI study and the lack of change between 1979 and 1980 by the MPAA/Nielsen study.[38] Sports continues to be worth more to cable operators than the relative time it appears on the air, because it is rare and has a unique ability to attract and hold subscribers;[39] and any comparison with other programming must be made on the basis of programming carried on distant signals, not over the air. According to Joint Sports, the testimony of both its and others' witnesses places Sports well in excess of the 15% awarded for 1979.[40] In recognition of this special appeal and of the adherence to marketplace consideration in the structure of the sports case the Tribunal awarded Sports in 1979 a 3% increase over its award in 1978.[41]

Flagship stations also provide another measure of the value of sports programming to cable operators in that they were imported to a significantly greater degree as distant signals than non-flagships, enjoyed a relatively greater growth in carriage between 1979 and 1980, and were responsible for a higher proportion of the royalty payments. Without taking superstations into account this is still true.[42]

Form 3 Carriage of Non-Superstation [1] Flagship Stations and Non-Flagship Stations in 1980

	Flagships (minus Superstations)	Non-Flagships
Royalties attributable to avg. station	$103,150	$5,406
No. of systems that carried avg. station as a distant signal	34.87	3.06
No. of cable subscribers that received the avg. station as a distant signal	312,252	35,607

[1] Joint Sports Exhibit 8 and 19.

Joint Sports argued that the entire award for sports programming be granted to the sports claimants and no portion to the boardcasters.[43] Mr. Durso, Assistant General Counsel in the Office of the Commissioner of Baseball testified that no contracts expressly recognize copyright ownership in the broadcaster, that the majority of contracts specifically address copyright ownership in favor of the club, that in the instances where this is not the case the club assumes major responsibility for production. In the case of baseball, two-thirds of the contracts disposed of this issue before the Tribunal's first ruling.[44] The broadcasters are precluded from realizing any claim whatsoever for the vast majority of sports programming both under contractual obligations and according to their own theory. This is true for hockey and basketball, as well as baseball, and also for NCAA sports, in which the conference or institutions is responsible for production.[45] Contracts have become more explicit in this regard subsequent to 1980.[46] Joint Sports argued that the terms of negotiation have been established and that to change them would interfer arbitrarily with issues that have already been disposed of by the marketplace.[47] Mr. Jack Jacobson, Chief Operating Officer of Sportsvision, testified that the quality of productions is irrelevant in terms of negotiations or of the value of sports programming to cable operators.[48] The broadcasters' contribution, according to Joint Sports, is of *de minimis* value, as has been held by the Court; the team and the players' performance constitute the sole value of sports programming.[49] The teams, not the quality for production, are responsible for ratings.[50]

Joint Sports proposed the following allocation among all parties:

	Percent
Program Syndicators	67.00
Joint Sports Claimants	18.00
Public Broadcasting	5.25
Commercial Television Broadcasters (for all copyrightable interests	4.50
Music	4.25
Canadian Television	0.75
National Public Radio	0.25
Devotional Claimants	

National Association of Broadcasters (NAB)

The National Association of Broadcasters (NAB) claimed an entitlement to between 10% and 12.6% of the 1980 royalty fund. Station-produced programming alone, NAB claimed, was entitled to between 7.4% and 12.6%.[51] NAB considered that the Tribunal was wrong in its 1979 determination that station-produced programming was of marginal value.[52] The SRI study was presented in order to counter this view by providing the opinions of over 400 randomly selected Form 2 and Form 3 cable operators.[53] More than half of the operators gave station produced programming a rating of three or above, the study's mean on a scale of 1 to 5; and while station-produced programming was not valued on the whole as highly as movies or sports, it was nevertheless valued equally with syndicated programming, [54] and given a rating as high or equal to sports and movies by more than half the operators.[55]

SRI Study [1] Mean Ratings on Value in Attracting and Keeping Subscribers in 1980 on a Scale of 1 to 5

Station-Produced News Programs	2.70
Station-Produced Entertainment and Public Service Programs	2.59
Locally-Produced Telecasts of Sports Games	3.28
Syndicated Movies	3.42
Syndicated Series	2.96

[1] NAB Exhibit A.

In addition NAB presented the testimony of cable operators William Petty, Senior Vice President, Cap Cities Cable, and Edward Hewson, Vice President, King Broadcasting Co., who indicated that in spite of the expense and the fact that much of the other programming was duplicated, they imported signals specifically for their station-produced programming.[56] NAB also contended that between 1979 and 1980 station-produced programming increased: on the most widely carried independents by 9.1%, on WTBS by 48.9%, and on twenty-five network affiliates in the 50 largest markets by half an hour or more.[57] NAB claimed that broadcasters are harmed by cable importation in the same manner as syndication and sports interests are and receive no offsetting revenue, except in the case of WTBS.[58]

NAB presented exhibits to show that station-produced programming is unique, of high quality, and provides the diversity that is valued by the cable industry.[59] This is exemplified by such trends as the regionalization of news services, and increase in quality between 1979 and 1980.[60]

NAB further emphasized that the value of such programming is particularly important to "classic" cable systems in smaller television markets, where local news is inadequate, where over fifty percent of all cable subscribers are located, and where the majority of cable revenues are raised. This explains the importation of network affiliates and the value cable operators place upon station-produced programming.[61]

With respect to sports programming, NAB contended that the contribution of broadcasters was not *de minimis* and judged this first of all by its expense to produce.[62] NAB further argued that the Tribunal must address this issue because the Tribunal's decision inevitably affects private negotiations.[63] Such a decision must unavoidably rely upon subjective judgment, and NAB urged the Tribunal to follow past court practices and allocate equal shares to broadcasters and sports interests. Under this solution the broadcasters would nevertheless still be entitled to substantially less than the broadcaster half share.[64] NAB claimed that the Tribunal for the first time was in a position to assess the broadcasters' contribution and that this would reveal that the telecasts of games are themselves a form of entertainment and have a direct effect upon audiences' enjoyment.[65] NAB witnesses Jimmy Siliman, Independent freelance producer-director, and Peter Bonventre, Editor-at-Large, Inside Sports Magazine for Newsweek, attested that the value of this contribution ranged from 30% to 50%.[66]

NAB contended that the Tribunal must assess the value of the broadcast day as a compilation, now that its copyrightability has been upheld in court. The broadcast day satisfies the requirements of a collective work and meets the very broad standards of fixation. The fact that broadcasters have not specifically contracted for performance rights does not mean that their copyrightable interest has in any way been invalidated.[67] The broadcast day is assembled as a compilation with full knowledge and encouragement of those whose works are incorporated, primarily movies and syndicated series, and enhances the value of those programs.[68]

In addition the assemblage of the broadcast day is expensive and responsible for as much as 28% of programming costs.[69] In support of its contentions NAB presented Mrs. Sandra Pastoor, Vice President and Program Manager, WTTG. Compilations are valuable to cable operators in that they provide packaging, promotional efforts, and station image that cable operators themselves rely upon in selling their services. The value of the broadcast day is not diminished simply because, as a compilation, it is first designed for a local television market.[70] NAB acknowledged that the value of compilation is difficult to quantify and urged that it be related to the allocation for movies and syndicated series; and entitled to a share of 3.25%.[71]

NAB considers that the Tribunal erred in 1979 in making an award to National Public Radio (PR) without one for commercial radio.[72] The fact that duplication exists in commercial radio is no indication of lack of value, and frequently duplication is due to the importation of signals from larger markets for their superior quality. Duplication is not universal, and at times commercial radio is carried on a select signal in preference to NPR. The value cable operators place upon it is shown by the SRI study.[73] The

contribution of music to the value of commercial radio is relatively low as measured as a percentage of cost, between 10% and 30%.[74] On the basis of carriage, commerical radio occupies a substantially greater share of distant signal importation than does NPR, 85% to 5%, according to the study conducted by NAB.[75]

NAB argued that radio programming as a whole should receive an allocation of 1.5% and that NAB's share be 0.5%.[76] NAB recommended the following allocations among all parties:

	Percent
MPAA	57.75
Sports	15.00
NAB	13.25
PBS	5.00
Music	8.75
CBC	0.50
Commercial Radio	.50
NPR	.25

Public Broadcasting Service (PBS)

Public Broadcasting Service argued that its royalty share be increased to 8% from the 5.25% it received for 1979, on the grounds that the Tribunal was incorrect in 1979 in reducing PBS programming subject to any duplication to no value.[77]

Public television signals constituted 10% of all full-time distant signals imported by cable systems in 1980, and, albeit less than commercial stations, but without the assistance of satellite retransmission, increased their carriage from 1979.[78] Public broadcasting signals are also a local "must carry" farther out than commercial signals.[79] PBS contended that public television was responsible for 15% to 20% of all non-network television viewing in the United States in 1980, and unlike the viewing of syndicated series in the prime period of early fringe, the viewing of public television did not decline.[80] PBS also contended that the viewing of public television in cable homes increased more than it did in non-cable homes.[81]

The single public television signal carried by a cable system occupies five percent of all distant signals, and in one-half of the other instances of public television distant signal carriage—in which one public television station is already in a market and one additional signal is brought in—duplication of programming is only partial.[82] PBS presented examples of the different categories and schedules of stations to show that duplication of public television programming was not 100%.[83] PBS conceded that actual duplication of commercial programming is not as great as with public television programming, but argued that in commercial broadcasting the duplication of syndicated series and movies, and in many cases also of sports and local programming, takes place in an important conceptual sense.[84]

PBS contended that, with respect to the claimants in the proceeding, no major change in facts of decisional significance took place between 1979 and 1980. To the extent, however, that there was an increase in the carriage of commercial stations due to satellite of retransmission, this phenomenon played no role in the increase in the carriage of public television stations.[85]

PBS reiterated the emphasis that it has placed in previous proceedings upon the high quality of public broadcasting and contended that commercial broadcasters are unable to equal it. As a result, it is inappropriate to apply to public broadcasting the same rating measure that is used in the commercial world. PBS claimed that this quality is responsible for the desire by cable operators to import public broadcasting signals, citing an instance in which subscribers preferred a public broadcasting channel above one carrying sports.[86] PBS stressed that public television bears no resemblance to the programming of devotional claimants, in spite of the fact that both may solicit funds; in that devotional programming is directed toward a narrow group with a proselytizing message.[87]

PBS contended that, because of the financial precariousness of public television, public television is much more vulnerable than commercial television to the harm caused by the intrusion of distant signals into a local station's market. The report on the Alternative Financing Options for Public Broadcasting was presented in support of this argument, and PBS contended that, of all claimants, it alone has provided concrete proof of harm. PBS also cited the failure of commercial attempts to succeed with high quality and cultural programming.[88]

PBS rejected the contention that, alone of all claimants, public television received a benefit from cable in assisting it to overcome its frequent UHF handicap. Other claimants are also benefitted; in the case of WTBS, program suppliers get increased remuneration for their product, and sports teams increase the number of their fans without impinging upon their gate.[89]

PBS proposed no allocation for the commercial claimants.

American Society of Composers, Authors and Publishers (ASCAP), Broadcast Music, Inc. (BMI) and SESAC, Inc. (Music)

All music claimants joined in one presentation and claimed entitlement to a 6% share of the 1980 cable royalty fund. Music's claim is attributable to both distant cable television carriage and distant cable radio carriage. This allocation was derived by application of the five criteria previously established by the Tribunal in cable royalty distribution proceedings: marketplace value, benefit to cable systems, harm to copyright owners, quality, and time.[90] In addition music attempted to demonstrate in the 1980 proceeding the considerable importance of music as an integral component of virtually all programming carried on distant signals.[91] The 1980 presentation strategy of the music claimants endeavored to illuminate the value of the music component of programming from a new, previously unrevealed perspective: that of the composers and lyricists who are called upon by producers of films, sports, series, and locally produced programming to enhance the value of the product through their creativity.[92]

Music asserts that it is the only claimant group which is entitled to a share of the cable television royalty fund based on a copyrighted element of programs, rather than the programs themselves.

Music's case addressing television for 1980 focused *primarily* on three of the criteria as previously articulated by the Tribunal: music's role in establishing the marketplace value of distant signal programming; the consequential benefit conferred upon cable systems retransmitting these programs; and the claimants perceived quality of the musical component.[93]

The Marketplace Value, Benefit, and Quality of the Music Component of Distant Signal Programming

The essence of the 1980 music case was demonstrated by the BMI documentary film "The Score", which explored the intricate and creative process of composing music for television and motion pictures.[94]

This film was an attempt to illustrate the commercial and creative value contributed to films and television by the efforts of film composers. Music then augmented this theme by presenting the testimony of three successful and distinguished writers of music for programming of the sort carried on distant signals: Hal David, Earle Hagen, and Frank Lewin. Music believed their testimony would be applicable to all uses of music in distant television programming.[95]

Mr. David addressed the value of feature songs in films. His testimony sought to establish that feature songs are frequently a critical component of the artistic and commercial success of films, translating directly into marketplace value, quality and benefit to cable systems carrying such films. Mr. David cited some examples of how successful songs written for movies and released separately generated interest in the movie.[96]

Mr. David asserted that the same songs which generate outside interest in a film also function as an integrated, artistic component of the film. This testimony accompanied two showings of the sequence from the film "Butch Cassidy and the Sundance Kid" for which he wrote "Raindrops Keep Fallin' on My Head."[97]

Composers Earle Hagen and Frank Lewin gave testimony on what they believe to be significant, but often overlooked value of background music in films and programs of all types. They characterized background music in a film as an indivisible component of an integrated product; the combination of which creates a "third entity."[98] Mr. Hagen testified that it was the function of background music to subliminally amplify the dramatic content of a picture. He described the use of music in the movie "Jaws" as one example of this function.[99]

Mr. Lewin testified that music may set a mood, serve as a sound effect or add color, impression or representation of movement. He said that it may also suggest memories, subliminal events and contrasting images to the picture.[100] As an illustration of these function, Mr. Lewin gave two showing of an exceprt from an episode of " The Defenders", during which he described the process of scoring, orchestrating, mixing, and recording music to serve the dramatic purposes of the excerpt.[101]

It was testified that in serving subliminal function background music is often intentionally unobtrusive.[102] It was suggested that the Tribunal's valuation of music on distant signal television must recognize this crucial, yet largely subliminal role of background music as an element of many program types.[103]

Musical themes comprise another category of television music which is utilized by every program type.[104] Mr Hagen cited a crucial function of themes which explains in part their nearly universal use across all types of television programs.[105] Mr Hagen discussed the effort and expense which is often devoted to integrating themes with pictures and graphics in connection with showing the opening sequences of "Mod Squad" and "I Spy."[106]

Harm To Copyright Holders

The music claimants argue that they suffer harm from distant cable carriage in several ways. first, they say copyright owners are harmed on an individual basis because the importation of a certain program by distant signal into a given market forecloses the likelihood that a television station in the market will buy the program and air it. Therefore the music contained in the excluded program will also be excluded.[107] Claimant argued that music has been harmed by cable carriage in other ways. The competition from distant signals received in a given market reduces the audiences for the local television stations in that market with a station's audience smaller its advertising revenues are reduced.[108]

The reduction in local station's advertising revenues causes direct harm to music because the music license fees paid by local television broadcasters are based upon a percentage of advertising revenues. The lower the advertising revenues, the lower the music license fees.[109]

The Mechanistic Approach

Dr. Paul Fagan, ASCAP's chief economist and director of special projects testified that changes in the marketplace have gradually rendered the marketplace analogy of local television music license fee payments less accurate as a reflection of current market conditions as each year goes by. The last license agreements were negotiated in 1969, and expired on December 31, 1977. All payments since then have been on an "interim" basis, subject to ultimate retroactive adjustment when the terms of a new agreement are finally reached.

As market conditions have changed, without a corresponding change in the local television licenses, these "interim payments" have become less accurate reflections of the true market value of copyrighted music.[110] Dr. Fagan also testified that calculation of the marketplace analogy would be particularly deceptive for 1980 because it was a presidential election year and a large proportion of television advertising revenues reflect that fact, because such revenues are deducted by stations in arriving at the net revenue figure upon which music fees are calculated as a percentage.[111]

Music's Share of Radio

Music claims it is entitled to receive virtually all of that portion of the 1980 royalty fund attributable to the carriage of distant signal commercial radio. Most or all of the value of distant signal commercial radio is attributable to music. Cable's benefit from distant commercial radio carriage, which is overwhelmingly FM carriage, is attributable almost exclusively to music, a fact which was established in the 1979 proceeding and confirmed in the 1978 proceeding by NAB witness Wayne Cornils.[112] The records of both years, including testimony of other parties, establish that one of the main purposes of cable carriage of radio is to improve stereophonic sound quality for the subscriber.[113]

Music also claims a significant portion of the fund attributable to the distant carriage of non-commercial radio, arguing that copyrights music occupies approximately 55% of the time attributable to copyrighted programming on public radio stations, including both NPR network and locally produced NPR station programming.[114]

Music proposed the following allocation for all claimants:[115]

	Percent
Music	8.00
Program Producers and Syndicators	89.00
Joint Sports Claimants	14.75
Public Broadcasting Service	5.00
U.S. Commercial Broadcasters	4.25
National Public Radio	0.85
Canadian Claimants	.75
Devotional Claimants	.00
Total	100.00

Canadian Broadcasting Claimants (CBC)

The Canadian broadcasting claimants propose that a share of the royalty fund be awarded to their group for all programming carried on Canadian television stations. The Canadian claimants are requesting an increase in the Canadian allocation from 0.75% to 3.25%. The increase is related to the correction and amplification of the 1980 record with respect to three evidentiary limitations noted by the Tribunal in the 1979 proceeding and not to any demonstrable increase in the extent of Canadian distant signal carriage.[116]

The Canadian claimants augmented the 1979 record with a showing of (1) the relative number of Canadian distant signals and the relative contribution of Canadian distant signal carriage to the overall royalty fees deposited by cable systems. (2) The appeal to U.S. audiences and the cable marketplace value of Canadian content programming. (3) The cable marketplace value of French language television stations.[117] The case on behalf of Canadian Broadcasting Corporation (CBC) presented witnesses and studies in support of a revised claim for 3.25%.[118]

Testimony was presented on the extent to which Canadian television is carried on United States cable systems; and the nature of CBC television programs. Also, each of three witnesses, Mrs. Janice Currie representing CTV, Mr. Jean-Marie Dugas representing CBC French Network and Mr. Jack Craine representing CBC English Network, testified as to the meaning of Canadian content and the nature and appeal of the resultant programming.[119]

The Canadian programming is not limited to local programming. The majority is Canadian network programming.[120]

Although the Canadian claim generally includes FM public radio, no part of the quantitative evidence is based on radio carriage and no part of the requested 3.25% allocation is related to radio.[121]

Mr. Donald Lytle testified as to the methodology employed in applying the "must carry" rules to Canadian stations.[122]

The Canadians made the following proposed limited allocations for the 1980 Cable Copyright Royalty fund.[123]

	Percent
MPAA	66.00–72.0
U.S. Commercial Television	5.0
PBS	5.25
Joint Sports Claimants	14.00
Canadian Claimants	3.25

National Public Radio (NPR)

Public radio's stated goal in the 1980 proceeding was to meet the Tribunal's criticism that the 1979 record was inadequate to assess public radio's marketplace value or the relative contribution of music. With the issue of radio carriage resolved in the 1979 proceeding, the ratio portion of the 1980 proceeding focused on the relative value to cable operators of public and commercial radio signals and on the relative contribution of music to cable radio.[124]

The record evidence on these issues is summarized as follows. First, only the claim of public radio are based upon the production of news, music and spoken word radio programs. While public radio stations also arrange the musical compositions in their schedules, NPR's claims are not based on this evanescent contribution.[125] Second, cable importation of public radio signals brings to cable communities programming which is otherwise unavailable to them. Unlike most commercial radio formats, public radio stations do not blanket the country.[126] NPR asserts that NAB's format duplication study confirms that 85% of all imported commercial signals duplicate locally available formats.[127]

NPR claims this is consistent with the format listings in *Broadcasting Cable Yearbook*, with the analysis of the Carnegie Commission, with Frank Mankiewicz' assessment of commercial radio duplication, and with the conclusions of the Tribunal and the Court of Appeals.[128] Third, NPR claims public radio alone has demonstrated the marketplace value of its programming—in foreign sales, in cassette sales, in the use of its contributors by pay cable services, and in listener contributions.[129] Fourth, NPR asserts that public radio programming is universally acknowledged to be of the highest quality, whether quality is measured by state-of-the-art production technology, by critical acclaim or by the recognition of industry groups.[130]

Marketplace Value and Benefit

NPR claims it developed ample evidence in the 1979 proceeding establishing that cable operators want programming that will encourage potential customers to become and remain subscribers.[131]

The Importance of Radio to Cable Systems

In Arbitron's "Ratings of Cable Program Services" cable subscribers gave more high ratings to distant television signals coming from neighboring cities or via satellite.[132] Additionally, radio's appeal to cable operators is also indicated by the survey of cable operators conducted by Statistical Research, Inc.[133]

NPR witness Carol Whitehorn testifies that the vast majority of cable systems include radio service with television service in the basic service fee.[134] Thus by augmenting subscribership, radio service generates additional fees for cable systems.[135]

The true extent of cable radio revenue cannot be determined because the statements of account do not accurately reflect radio subscribership. Edward Hewson of King Videocable testified that radio is an important part of his company's cable service, stating "It makes money for us and we are financially driven."[136] However, Hewson acknowledged that the separate charges paid by these cable subscribers for radio service were not reflected. Rather, those charges were included in the second set of fees charged by his systems, and the vast majority of other cable systems.[137]

Further evidence of radio's appeal is found in the costs incurred by cable systems in importing distant radio signals. One witness in the 1979 proceeding testified that even all-band facilities cost $3,000–$4,000.[138] Microwave reception fees for radio range from $35 to $200 per month per station.[139] Select signal carriage costs $300–$500 per channel, in addition to the antenna, for a total of about $20,000–$25,000.[140] In general the costs of retransmitting a radio signal average 10%–15% of the cost of importing a television signal.[141] NPR concludes that cable operators would not incur such costs unless they found substantial value in radio signals in the cable marketplace.

Another measure of radio's value lies in the fact that radio signals provide a much more significant portion of cable audio service than television signals do of video service.[142] The value of programming carried by a cable system is diminished by the availability of a similar service on a non-broadcast basis.[143]

NPR claims that an additional measure of marketplace value is NPR's unique programming which attracts subscribers.[144]

NPR claims its programming uniqueness consists of many elements. One example, NPR's programming is uninterrupted by commercials thus making it more interesting.[145] Another, its programs also have "program concept(s)" which gives them a "theme and cohesion."[146] In the 1980 proceeding examples were given of NPR's news and information programming.[147] Also, the scope and depth of NPR's business and economics reporting is allegedly illustrative of its efforts in other areas, as testified to by Robert Krulwich.[148]

Frank DeFord's work as a sports commentator provides another view of NPR's unique contribution to broadcasting. Along with other noted sports commentators DeFord provides the equivalent of a sports column.[149]

Similarly NPR claims its dramatic productions and its spoken word programming is also unique.[150] NPR's fine arts and cultural programming is state-of-the-art and is often recorded live. It is therefore more costly to produce than typical commercial programming.[151]

NPR claims its music programming is also uncommon for several reasons. First many NPR stations provide one of two relatively rare types of music programming, classical and jazz, which command loyal listener support.[152] Second, NPR's classical music sttions have unique appeal to cable subscribers and thus to cable operators.[153] One concrete example was provided by Mr. Hewson of King Cable.[154] Third, there are differences between NPR stations and even those few commercial stations which carry the same type of music. NPR does more concert recording and distribution than does commercial radio.[155]

Programming is delivered in the highest possible quality via satellite.[156] NPR used digital technology in 1980.[157] NPR provides more live guest performances.[158] The recorded music programming is enhanced by commentary and intermixing of pieces of related historical significance.[159] Local NPR stations, too, do live recording, more per station than commercial classical radio even if NPR's contribution is excluded.[160]

NPR advanced three indicia in an attempt to further establish the marketplace value of a non-commercial product such as public radio programs. First, witness Randy Houk, Director of Publishing described NPR's recently initiated program of cassette sales. Sales began in 1981. Sales to individual consumers began in the last six months of 1982. The programs sold span several years and includes those done in 1980.[161] This cassette market reflects upon the cable market for NPR's programming.[162] Continental Airlines is also purchasing NPR's programming and negotiations are ongoing with other airlines.[163]

NPR reports that it also sells its programming to foreign broadcasters.[164]

A further indicator of NPR's marketplace value is that its contributors and staff have been hired by cable systems to perform similar programs to those which they do for NPR.[165]

NPR believes that the extensive Distant and Select Retransmission of Public Radio also indicates its value. The vast majority of cable systems provided radio service in 1979.[166] NPR's survey of cable radio carriage showed that approximately 2,000 cable systems carry NPR signals on a distant basis.[167]

According to NPR perhaps no other measure of its value is as persuasive as the fact that listeners voluntarily pay almost $2.00 a month to help insure that NPR remains on the air.[168]

Harm

NPR stations are injured by the use of their signals without compensation like all other claimants.[169] The record reflects that cable importation of an NPR signal from 150 miles away sapped community support for a public radio station in Wilmington, NC.[170] When a distant NPR station is imported into a market with an existing NPR station, the local station "will receive reduced financial support from the local community because someone else is providing some of the services for which it would otherwise receive contributions."[171] In this way the importation of a distant NPR signal may hamper the expansion of the public radio system.[172]

Quality

Philip McHugh, a news programming consultant testified that "quality of the presentation of information is something that anyone can understand."[173] He emphasized the importance of sophisticated production techniques, originality of program concept, live news coverage, and in depth news coverage.[174]

NPR reproduced a few of the many positive reviews of its programming that have appeared in the nation's leading publications.[175] The record also contains evidence of awards won by NPR for its programming.[176]

NPR proposed the following allocation for all radio claimants:[177]

The Devotional Claimants

CBN, PTL, and Old Time Gospel Hour (OTGH) are individual claimants and presented separate cases. However because of the similarity of the issues we discuss them jointly as the Devotional Claimants.

In the 1979 proceeding the Devotional claimants were grouped within the Motion Picture and Syndicated Program Suppliers category. In the 1980 proceeding a separate claimant category was created for these claimants.

Harm

The Devotional claimants argued that the predominant thrust of the harm suffered by them stems from the loss of control over the use of their copyrighted product that results from the compulsory licensing scheme.[178] One of the specific harms claimed by devotional program suppliers is that of audience fragmentation. The distant signal carriage of duplicative devotional programming causes audience fragmentation with a loss in audience to the local station. Such carriage, the claimants argue, reduces the station's cumulative audience with a resulting direct reduction in the value of the station's commercial time. Second, such carriage then reduces the "lead-in" value of the devotional programming, i.e. its ability to attract and hold an audience which will be carried over to later programming. By reducing the lead-in value of the devotional programming, there is a reduction in the commercial potential of programming followed by that presented by the Devotional programmers. The result of this diminution is to increase the price those programmers must pay to the station to acquire program time.[179]

Another harm claimed by the devotional claimants resulting from distant signal importation is the viewer confusion caused by program duplication and the inherent problems in scheduling and promoting its product.[180]

Some devotional claimants argue that the loss of control of their product resulting from the importation of distant signals which carry their programming imposes yet another direct and specific harm. CBN has implemented a program to license its copyrighted programming directly to the cable television industry. These are the same CBN programs distributed to broadcast systems and carried on a distant signal basis.[181] The direct licensing system takes the form of an advertiser-supported satellite distribution network.

The success of CBN's cable service will have advantages for CBN. First, there is a direct revenue potential from the sale of advertising to commercial entities. The satellite service is a profit-making activity upon which taxes will be paid and from which the profits will be used by CBN to support its tax exempt activities. Second, CBN's cost of acquiring program time will be reduced in markets with significant cable penetration. Finally, CBN has direct control over satellite program scheduling. This allows it to place CBN's own programming, in prime time, which it has had difficulty acquiring on broadcast stations.[182]

Benefit

Devotional claimants argue that because much if not most of devotional programming broadcast in 1980 was contributor-supported it is therefore evident that people will directly support the devotional program producer and provide money to defray the costs of production and broadcast time.[183] Similarly, it is claimed, those same people are willing to expend their money to subscribe to the cable system in order to receive the program. The procedure of "narrowcasting" plays a role in a cable operator's choice among broadcast signals. There are many people who classify themselves as religious but do not have time to participate in religious activities. Devotional programmers meet these needs.[184]

William Petty, Senior Vice President for Cap Cities Cable and witness for NAB testified that there would be an irate reaction among his subscribers if he dropped religious programming.[185] A company negotiationg for a cable franchise has used the existence of devotional as a source of alternative programming to the adult movie fare which *may be* included in the cable package and against which there *may be* some community criticism.[186] Yet another benefit to cable operators from the carriage of devotional programming stems from the FCC policy with regard to the carriage of distant specialty stations.[187]

As an example, station KXTX was cited. Owned and operated by CBN in Dallas it was listed in the MPAA Nielsen study as one of the top ten widely carried distant signals in the country.[188] Qualifying as a specialty station in 1980 it received extensive cable carriage on a distant signal basis in Arkansas, Oklahoma, Louisiana and neighboring states.[189] It was imported into those distant markets by expensive microwave common carriers, the cost for which was paid by the cable systems themselves.[190]

Marketplace Value

Many Devotional programmers purchase time on broadcast stations. The Devotional claimants argue that the method of distribution says nothing about the value of a particular program and should not affect the copyright royalties to the copyright owner of that program.[191] Devotional program suppliers marketed their product in tape form to the cable operator in the past.[192] Presently they are licensing their programming directly to the cable television industry via full satellite channels.[193] Some devotional satellite channels are comprised totally of devotional programming and some channels, such as CBN, are predominantly devotional but also contain "secular" programming. According to the claimants programs which appear on those networks are essentially the same as those distributed to commercial broadcasters.[194] In the case of CBN's satellite channel, the cable operator pays for the programming on that channel through a barter arrangement whereby CBN retains commercial availabilities.[195] The Devotional claimants also introduced evidence that devotional program suppliers have marketed their product on a commercial basis to television stations.[196]

Quality

The Devotionals centered their claim to quality on their production facilities and technical refinements.[197] They also introduced evidence establishing that many of their programs are live programs which are taped daily or weekly for primary circulation.[198]

Time-Related Considerations

The Devotional claimants introduced evidence purporting to show the amount of devotional programming broadcast by stations which were carried as distant signals.[199] The percentages of Devotional programming were derived from the FCC Form 303–A Annual Programming Reports which were filed by the 49 stations in the station sample in 1981 for the programming carried in 1980.[200] The claimants determined from the program descriptions attached to the relevant Form 303–A's those programs which would be classified as "religious" in nature. The amount of time devoted to religious programming by each station was divided by that stations's composite week operating time to determine the percentage of devotional programming during the composite week.[201]

The Devotional Claimants proposed that the 1980 Cable Copyright Royalty Fund be allocated in the following manner:[202]

	Percent
MPAA and Program Suppliers	58.50–67.50
Joint Sports Claimants	14.00–15.00
PBS	5.00
Music	3.60– 4.00
NAB (TV and Radio)	3.50– 4.25
Canadians	0.75– 0.90
NFL	.25
Devotional	3.50– 7.00

Phase II—Allocation Among Program Suppliers Claimants

MPAA and Associated Program Suppliers

MPAA and associated program suppliers contended that in Phase II their share of the program suppliers category should be 97.975%.

The Program Suppliers have presented a proposal which allocates the entire share among all claimants, which has been accepted by the vast majority of those who have an interest, and which provides an administratively feasible and equitable division of the fund.[203]

Program Suppliers is a group of 58 program syndicators and producers out of a possible 60 who have reached a voluntary settlement among themselves as to a fair and reasonable allocation of the 70% of the 1980 royalty fund awarded this category in Phase I.[204]

The Program Suppliers' direct case made use of a 1980 Nielsen Special Study. The study analyzed the viewing of syndicated series and movies in cable households. The 58 settling syndicators and producers agreed that distribution in Phase II should be based on relative distant signal viewing of their programs, series and movies.[205]

Program Suppliers provided viewing data for individual programs, comparisons of different programs, background information concerning the settlement and data collection processes. This new evidence gives added support to the validity of Program Suppliers' proprosal.[206]

The Program Suppliers presented aggregated viewing data for their combined claim, and for the claims of the non-settling claimants, thus giving an overall allocation scheme for this category's share.[207] In addition, Program Suppliers presented relative viewing data for over 600 English language syndicated series and specials appearing in the Nielsen Study, including Multimedia series and specials appearing in the Nielsen Study, thus providing a basis for evaluating the relative viewing of each of Multimedia's program vis-a-vis other program series.[208]

The Program Suppliers' combined claim was based primarily on the Nielsen Special Study. the use of viewing as a primary standard for Phase II is the only equitable and administratively feasible method for determining relative royalty shares for the great variety of syndicated programs.[209]

Relative viewing of programs carried on distant cable systems represents the degree to which local television stations in those markets are losing potential viewers for the same programs, thus reducing the value of the syndicators' programs to those local stations.[210] The relative popularity of programs, as determined by viewing, provides a means of indicating the benefit to cable systems of particular programs: to the extent that distant signals provide programs desired and viewed by subscribers, cable systems benefit.[211] Viewing data has been regarded as the primary determinant of the marketplace value of television series and movies.

The 1980 Nielsen Special Study was modified as a result of certain criticisms of the 1979 study. The 1980 survey included 82 stations versus 49 in 1979. The stations selected were based on the number of subscribers reached rather than fees generated. The sweep period was increased from 15 to 16 weeks.

The Nielsen Special Study reported 1,008,053,280 total households viewing hours attributable to the syndicated program category.[212] Of this total, 924,240,030 households viewing hours (91.685%) were attributable to programs, series, and movies included within the claims of the Program Suppliers.[213] Multimedia/Show Biz programs had 11,668,420 household viewing hours 1.158%), and SIN had 7,429,350 household viewing hours attributed to its claimed programs (.737%).[214] The Nielsen study showed that about 64 million household viewing hours (6,420%) were attributable programs for which no royalty claims had been filed ("unclaimed funds").[215]

Multimedia attempted to show that the Program Suppliers had overstated their share by including movies and series that were not copyrighted and should thus have been assigned to the "unclaimed funds" column.[216] The process to determine ownership and individual shares took approximately six months. Determining ownership of series and movies was a multi-step process including the identification of the syndicator for each program from various source materials which indicate for each series, special, and movie the name of the syndicator and the name of the producer.[217]

The record indicates that Program Suppliers have undertaken practical and effective means for assuring that the programs on which the award is based have valid copyrights.[218] Showing that an inconsequential amount of the Program Suppliers' award may be based on titles that might be in the public domain may properly be dismissed as *de minimus*.[219]

MPAA and associated program suppliers proposed the following allocation of the program syndicators share.[220]

	Percent
MPAA and associated program suppliers	97.975
Multimedia	1.237
SIN	0.788

Multimedia Program Productions, Inc.

Multimedia Program Production, Inc. (Multimedia) proposed that its share of the program suppliers category be increased to 3%.

The advertising study first introduced by Multimedia in 1979 was updated and again used to provide an indication of the marketplace value of *Donahue* for 1980. It established that *Donahue*, only one part of Multimedia's program offerings, accounted for approximately 1.425% of non-network, non-news spot sales in 1980.[221] The result is virtually the same as in 1979.[222]

With regard to the Multimedia programming's ratings and popularity, there were no changes of decisional significance between 1979 and 1980.[223]

Multimedia contended in 1980, as in 1979, that cable operators received significant benefit from the retransmission of *Donahue* in that it is a trigger program which specifically attracts subscribers.

Multimedia was also uniquely disadvantaged by the cable importation of WGN–TV's live *Donahue* program.[224] Fully one and a half years before the Federal Communications Commission (FCC) eliminated syndicated exclusivity protection, Multimedia was unable to provide television affiliates contract protection against the importation of WGN–TV's broadcast.[225] According to FCC records, WGN–TV was carried to 1,291 cable communities with 2,765,443 subscribers in 1979: in 1980 it reached 2,738 cable communities with 6,063,598 subscribers, a subscriber increase of 111.6%.[226]

The time study presented by Multimedia for 1979 was updated for 1980. The study was designed to provide an approximation of the significant amount of syndicated (non-local) broadcast time devoted to Multimedia's programming.

In terms of hours of programming available for cable retransmission, Multimedia provided more than 1400 hours, an increase of more than 40% over Multimedia's 1979 claim.[227] The increase in Show Biz programming above the disallowed 1979 Show Biz claim was approximately 33%.[228]

The Show Biz programming for which Multimedia claims royalty payments is distinguishable in several respects from the vast majority of programs for which program suppliers seek royalties.[229] *Tony Brown's Journal* is perhaps the only public affairs program to provide in-depth exploration of topics of particular interest to the black community.[230] Also, at a time when country music was greatly increasing in popularity, and was important to cable systems as a trigger to gain new subscriptions, Show Bix was probably the nation's largest producer of country programming.[231]

The Show Biz programs, unlike off-network series, have an ephemeral quality because of the importance of the currency of the music and contractual preclusion of repeated program showings.[232]

The Show Biz programs, while carried on certain highly viewed distant signals represented in the MPAA study, are not adequately reflected in the study.[233] The study's focus on top-50 market stations and on urban rather than rural areas, due to the 75,000 subscriber cut-off, fails to give proportionate coverage to many of the stations which feature Multimedia's and Show Biz programs.[234]

Tony Brown's Journal and the Show Biz programs, like *Donahue*, are especially beneficial to cable operators because they trigger cable subscriptions.[235]

Under Multimedia's proposed allocation, the award to each group of claimants, including the aliquot share of unclaimed funds would be:

	Percent
NAB	0.80
MPAA	95.13
[illegible]	3.30
SIN	0.77
Total	100.00

Spanish International Network, Inc. (SIN)

SIN occupies a unique status among all program syndicator claimants.[236] SIN is the only claimant who provided foreign language programming in 1980 and did so for an entire day for each day of that calendar year.[237] SIN's programming included news, movies, sport shows, soap operas, comedy shows and variety shows.

SIN's claim to an award is based on the three primary criteria established by the 1978 decision of the Copyright Royalty Tribunal: the harm to the copyright owner, the benefit to the cable operator, and the marketplace value of programming which has been retransmitted on cable systems via distant signal.

SIN and those program suppliers it represents suffer identifiable harm when a cable system in a distant market opts for secondary retransmission of the signal of a SIN television affiliate and, consequently, pays for this carriage in accordance with the compulsory license.[238]

SIN's position is that a cable operator makes a conscientious choice to retransmit SIN programming and does so only because is has some value for him.[239] Carriage then is *prima facie* evidence that the programming benefits the cable operator.

SIN has submitted evidence that it provides a variety of firstclass Spanish language television programming reflective of the many Hispanic cultures; that Spanish language programming is important to Hispanics; and, consequently, that the availability of Spanish language programming would be of particular benefit or value to any cable operator who served a community which has any sizable population of Hispanics.[240]

SIN sold videocassettes to cable systems in 1979. In 1980 it began to compensate cable systems and virtually ended the sale of videocassettes. Consequently, direct evidence of marketplace value is scarce.[241] As more concrete evidence of the marketplace value of SIN programming, SIN demonstrated the significant amount of money which its programming generated in national advertising revenues as a result of direct affiliation by cable systems as compared to the relatively meager amounts which these same cable systems generated as a result of the compulsory license.[242]

SIN continues to believe that its unique status among program syndicate claimants warrants the use of a fee-generated methodology in determining the amount of its award.[243]

SIN's claim of $359,047 is based on a fee-generated methodology reflecting a reduction for sports, local programming and devotional programming. SIN acknowledges that this amount must be further reduced to reflect awards already granted to music claimants.[244]

SIN presented Norman Hecht, a well recognized authority in audience measurement methods as a witness. Hecht then explained the several serious problems with MPAA's use of the Nielsen diary methodology which results in an understatement of Spanish viewing—problems which Nielsen has acknowledged in writing and which were known to MPAA.[244]

Distribution Criteria

This is the third determination of the Tribunal in a cable royalty distribution proceeding. The claimants have remained consistent, the Tribunal has employed the same criteria, and, other than for matters requiring review in light of judicial proceedings, the issues have not changed. In this situation the Tribunal must first resolve the weight to be accorded its previous divisions of the royalty fund. Since the Tribunal has consistently rejected the use of any single formula, our determination has rested on an assessment of the record as a whole.

In this proceeding, after reviewing all of the evidence, with particular attention to the evidence seeking to establish changed circumstances from the 1979 record, we have concluded that the Phase I royalty allocations established in the 1979 proceeding provide a reasonable division of the royalty fund, an alteration of these shares. Some of the claimants presented evidence seeking to show changed circumstances favorable to their case, but these contentions were challenged generally by other claimants. While we acknowledge that the situation in 1980 was not entirely identical to that presented in the 1979 record, we hold that none of the changed circumstances evidence was such as to specifically result in the increase or decrease of a particular claimant's share.

Program Syndicators

The Tribunal reaffirms the finding of our 1979 determination that the Special Report of Nielsen is an important piece of evidence in this record and does have probative value in establishing the entitlement of claimants in accordance with some, but not all, of the criteria. However, we again find that it may not be utilized as "a talisman which fully reveals and determines the application of the criteria." We again conclude that cable operators are interested in selling subscriptions and retaining subscribers, and that "viewership is of limited relevance to cable operators.[245]

Program Suppliers undertook in their 1980 evidence to address deficiencies which the Tribunal found in their 1979 case. However, on the harm criteria Program Suppliers concede that they rely on "the evidence set out in the 1979 proceeding by Mr. Horn." We have looked, as we did in the 1979 proceeding, at the testimony of Mr. Horn, President of Tandem. We have not altered our analysis of that evidence.

We reaffirm our 1979 finding that in applying viewing data to the harm criteria "it would be change in audience, not absolute audience levels, which would have to be considered."[247] The relevant data for a harm analysis would be the difference between the audience for a program on a local station before that program was duplicated by cable importation of a distant signal, and the audience for that program on the local station after duplication. The Nielsen study does not reflect local station audience ratings, and the Program Suppliers did not present evidence on this issue.

Program Suppliers addressed the Tribunal's concerns with the methodology of the Nielsen study through changes in the selection of the station sample, and by evidence seeking to show that no parties are disadvantaged by the use of sweep weeks. Other claimants argue that these changes are of minor significance or produce greater bias in favor of movies and syndicated series.[248]

We have not attempted to assess the significance of the deficiencies that other parties claim still affect the Nielsen survey; we do, however, dispute that the study is invalid simply on the grounds that it represents independents much more heavily than it does network affiliates. The importation of independents on cable systems is much heavier as a distant signal than is the importation of network affiliates.

We expressed concern in the 1979 determination that the use of sweep periods "could have enhanced the showing of the syndicators to the disadvantage of other claimants. MPAA responded to this issue by presenting certain viewing data compiled by the Warner-Amex QUBE system, seeking to establish that there are not significant differences in viewing between sweep and nonsweep weeks. This evidence was challenged by other claimants. The QUBE cable system has particular and unique attributes. It is our view that data from that system, even if otherwise reliable, does not adequately resolve the "sweep" issue.

The Nielsen Study does not provide a substitute for the application of the criteria to all the record evidence; however, to the extent that the Tribunal has relied upon it in the past, we do find it corroborative of the view that, while the situation in 1980 was not entirely identical to that presented in the 1979 record, none of the changed circumstances is of decisional significance.

In our 1979 determination we observed that "the program syndicator did not present testimony by cable operators in an effort to establish the benefit of their programs to cable systems, or evidence as to the appeal of their programs." In the current proceeding Program Suppliers assert that they have responded to this issue by the testimony of Mr. Kurnit of Warner-Amex. However, we find the testimony of Mr. Kurnit of possibly greater applicability to the situation he experienced at QUBE than to the distant signal cable market in general. The very high value he placed upon syndicated series, for instance, has not been supported by the testimony we have received from other witnesses.[249]

This is the third determination of the Tribunal in a cable royalty distribution proceeding. The claimants have remained consistent, the same criteria have been employed, and the issues have not significantly changed. After reviewing all of the evidence, with particular attention to the evidence seeking to establish changed circumstances from the 1979 record, we have concluded that the Phase I royalty allocation established in the 1979 proceeding continues to provide a reasonable share to MPAA, and that no evidence presented in the 1980 proceeding requires an alteration of this share. With attention also to evidence relating to subjects discussed in our previous determinations, we conclude that an allocation of 70% of the royalty fund to the Program Suppliers continues to be fair and in accord with the record evidence.

[244] Ibid p. 14.
[245] 47 FR 9852.
[247] Ibid.
[248] "MPAA argues that it has improved its Nielsen study in 1980, but in fact has only made it more biased." Proposed Phase I Findings of Fact and Conclusions of Law of National Association of Broadcasters, p. 30; "notwithstanding MPAA's efforts to conceal the data underlying the work from scrutiny—this year's work, as in the previous years, was shown to be replete with deficiencies which preclude attaching talismanic significance to the specific numbers in the study "Proposed Findings of Fact and Conclusions of Law of Joint Sports Claimants," pp. 21–22.
[249] Proposed Findings of Fact and Conclusions of Law of National Association of Broadcasters, p. 31.

Joint Sports

The Tribunal adheres to the conclusions reached in its 1978 and 1979 proceedings that sports enjoyed a special appeal to cable operators and viewers, not enjoyed by the programming of other claims. The Tribunal further concurs with the view presented by Joint Sports that, the claimants remaining consistent, the same criteria being employed, and the issues remaining unchanged, the Tribunal must accord first weight to its previous divisions of the royalty fund.[250]

Joint Sports' claim for an increased royalty share relied heavily upon the increase and proliferation of satellite retransmitted distant signals between 1979 and 1980. The Tribunal concurs that such a change in circumstance did take place; the Tribunal also does not dispute that sport are highly popular upon these signals, in particular WTBS, WGN and WOR. The Tribunal, however, was unpersuaded that there was any causal link between sports programming and the increase in cable carriage of satellite retransmitted signals. Sports testimony and exhibits were convincing as to the increase in satellite retransmission and as to the popularity of sports, but not as to this linkage. This question was posed to Mr. Lahey:

Q: "Is it fair to say, Mr. Lahey, that the first consideration in selecting particular distant signals is the practical availability of those signals.

A: "Yes, that has always been, and still continues to be the first premise." [251]

The Tribunal concluded that an increase in carriage was due to factors principally unrelated to programming, such as cost, promotion, franchising advantages, television station market and stature. [252] To the extent that programming may have been a factor, the Tribunal found no evidence to support the contention that this was due to an increase in the contribution of sports programming.

The BBD&O survey, to the contrary, indicated that the value of sports to cable operators between 1979 and 1980 remained statistically constant.[253] The The Tribunal attaches importance to the fact that this is the third year in which the BBD&O survey has been presented and in which the results have remained generally the same. This year, as in the past, the expression of preference as to various categories of programming cannot be directly quantified or converted into a royalty share allocation.

Additionally, flagship stations were shown this year, as in the past, to be highly important in the spectrum of distant signals, but with respect to the other programming on these signals, sports programming cannot be deduced to have increased in importance simply on the basis of increased carriage.

The Tribunal was also not persuaded that in 1980 the proliferation of channels and the offerings of cable services increased the significance of the choice by a cable operator to carry sports or flagship stations. True effective competition did not necessarily exist between sports and the new services, and doubt prevails as to the actual increase that occurred in the number of choices offered. [254]

Relying upon the same criteria as it has in the past, judging the issues to have remained constant and the circumstances to be unchanged, the Tribunal determined that the 15% royalty share allocated to the sports claimants in 1979 should be awarded again in 1980.

U.S. Television Broadcasters

We have made a total award of 4.5% to U.S. television. broadcasters for their entitlement to royalty fees for distant carriage of station programming, and for sports programming. For lack of persuasive evidentiary justification we have not included in our award any sums for broadcast day compilations.

Although the case of the commercial broadcasters during the 1979 and 1980 proceedings was presented with a degree of coherence lacking in the 1978 case, we have found no occasion to modify the findings made in our 1978 determination and affirmed in our 1979 determination. We reaffirm our previous findings concerning the application of the criteria to the record evidence relating to station programming.[255]

We have reviewed our previous findings in the light of the survey presented by NAB of cable operators attitudes toward different types of programming in attracting and keeping subscribers. Neither the SRI study nor any other evidence requires an alteration of our findings that station programming is only of "marginal value to cable operators." We have never asserted that station programming is of no value to cable operators, but the value of such programming is adequately compensated in our award to commerical television.

NAB also presented the testimony of two cable operators, who asserted that major market station produced news and other programs on distant signals are of value to cable systems in smaller markets because of the better quality of such news programs, and greater regional news coverage. We find support in that testimony for our view that local programming has little value in the larger markets, where most cable subscribers reside.[256] The benefit to cable operators from regional carriage of news and public affairs programs was noted in our 1979 determination, and is reflected in our award.

We find that none of the evidence presented by NAB to establish "changed circumstances" in 1980, such as "qualitative changes" in station produced news programs, an increase in time devoted to news programs, or data presented in the evidence of other claimants is of decisional significance to justify an increase in our award to commercial television. In addition, other evidence could be viewed as supporting a downward adjustment.[257]

We have considered all of the evidence in our record related to the entitlement of commercial telecasters to share in the royalties for sports programming in the light of the decision of the U.S. Court of Appeals for the District of Columbia Circuit.[258] While the character of the Court's explanation of its decision leaves room for improvement, we find nothing in that decision which requires more than our making a judgment (in the absence of relevant cable royalty contractual provisions) of the contribution of the broadcaster to the value and appeal of the sports programming to cable operators and subscribers. We find that for the purposes of cable royalty distribution, the contribution of the broadcaster as compared with that of the teams is minimal, and that it is reasonably reflected in a total award of 4.5% to the commercial television claimants.

We do not dispute that high quality production enhances the enjoyment of a sports telecast. We cannot accept, however, the NAB position that when functioning as the producer of the telecast, the broadcaster should receive one half of the sports royalties. We find no evidence in our record, including that of the NAB sports witnesses, establishing that the contribution of the

[258] *NAB* v. *Copyright Royalty Tribunal*, 675 F. 2d 367 (D.C. Cir. 1982)

broadcaster in any significant respect contributes to a cable operator's interest in sports programming, or the decision of an individual to subscribe to cable television.

In our review of the evidence on this issue we found the testimony and broadcasting experience of Mr. Jack Jacobsen to be particularly useful. Proceeding from the broadcaster use of ratings to judge the value of programs, he testified that the factors that affect the ratings all relate to the sports teams, and that the quality of the production does not affect the ratings. We concur in this testimony. We do not find it creditable that a cable subscriber would pass up viewing a game involving teams competing for the pennant to watch a Chicago Cubs game because of the quality of the production of the Cubs telecast.

We have previously observed that no single subject has received more attention in our proceedings than the sports ownership issue. On the basis of the evidence presented concerning sports ownership and entitlement to royalties, we find that NAB cannot assert a claim under their theory, or any other theory to a very substantial number of televised games in 1980. While it cannot control our disposition of this subject, we find nothing in the evidence relating to the resolution of this matter by the parties for telecasts in subsequent years to caution us to make a correction in our approach to this issue.

There remains some telecasts where under the law, as we are able to follow the opinion of the court, to which broadcasters may assert a claim to a share of the roylaties for their contribution to the telecast. On the basis of our record we have concluded that for purposes of cable royalty distribution that contribution is of minimal significance and is adequately reflected in a total award of 4.5%. Our allocations to claimants are not akin to a cook's recipe, where the ingredients are broken down, such as ½ teaspoon of salt, 1 teaspoon of vinegar, etc. We have not divided our total award between station programming and sports. We observe, however, that the award for sports is so insignificant as to in no way require any internal adjustment of our determination concerning our award to the Joint Sports claimants for sports programming, and our finding that the Joint Sports claimants have established an entitlement for their contribution of 15% of the royalty fund.

NAB is seeking compensation in this proceeding for television broadcast compilations. In our 1978 royalty determination, we stated with regard to the evidence presented by NAB in justification of their claim to royalties for the broadcast day compilation:

> We find that this testimony and the record as a whole provides no basis for establishing the value of the broadcast day nor does it provide any basis for a distribution of royalties to broadcaster claimants on this theory.[259]

We reach the same result in this proceeding. We have once again heard the NAB evidence. As with other elements of the NAB case, the packaging is better than the 1978 case but the box when opened is still empty. We find that broadcast day compilation is of no value to a cable system. We reject the argument of NBA that it is the broadcast compilation which creates "a station image which is highly promotable by cable operators." Cable systems are interested in the programs on a distant signal which induce persons to subscribe, not in the scheduling and promotion.[260]

Public Broadcasting Service

The Tribunal concurs with PBS that "with regard to public television, no major changes of facts have occurred between the years 1979 and 1980."[261]

The Tribunal also judges that it must give first weight to its previous divisions of the royalty fund in light of the fact that the claimants have remained consistent, the same criteria have been employed, and the issues have not changed.

The Tribunal notes that public television's percentage of instances of aggregate full-time distant signal carriage remained approximately 10% in 1980,[262] and while this is evidence of the continuing importance of the role played by public television, the Tribunal does not view time-based considerations as any more than of limited value. This is not judged a basis upon which to increase PBS's share.

PBS presented a theory of "conceptual duplication to show that, in concept, the duplication on commercial television is as extensive as that on public television. While this theory is provocative, the Tribunal considers that it would be fruitless to attempt to assess the degree to which commercial programming is generically similar and then weigh this against the amount that public television programming is subject to identical duplication. The Tribunal also rejects what would essentially be a time-based formula proposed by PBS, according to which public televisions' royalty share would be calculated according to the percentage of its programming which is or is not duplicated.[263] The Tribunal finds nothing in the record to alter the award to PBS on the basis of the same criteria by which that award was adjudged in previous years, neither from the standpoint of commercial marketplace considerations, such as viewing figures, nor from the standpoint of public policy. The Tribunal also did not consider the evidence concerning harm to public televisions as representing a material change in either fact or circumstances. We have concluded that the 5.25% royalty allocation established in the 1978 and 1979 proceedings continues to provide a fair and reasonable share to PBS.

Music

As in our 1979 determination we have made a single award to music for all distant signal carriage of their copyrighted works for which they have established an entitlement under the Copyright Act and the evidence presented in this proceeding.

Music asserts, and other claimants acknowledge, that their presentation in the 1980 proceeding differed substantially from that of previous proceedings. They have abandoned their sole reliance on the mechanistic application of a single formula. The Tribunal in various proceedings has expressed its major reservations about the use of formulas. Futhermore, we have found that the formula advanced—music's share of broadcaster programming expenses as reflected in FCC data—was distorted by the exclusion of certain program expenses.

The principal issue requiring consideration in the music case is the undisputed evidence that the music license fees are declining—whether measured against all programming expenses or against the selected

---

[259] 45 FR 63038.

[260] MPAA has requested us to rule that broadcasters have no legal right to assert a claim for compilation. They assert that "[B]esides the contractual limitations that prevent NAB from seeking a claim for compilation, the compulsory license scheme does not contemplate an award for compilation of a broadcast day." We resolved in our 1978 determination that "Congress did not intend compensation to broadcaster claimants on the basis of the 'broadcast day' nor was any such compensation contemplated by those who participated in the resolution of the complex cable television issue.": 45 63038. The D.C. Court of Appeals held that the broadcast day compilation is a copyrightable work. The relevance of this holding to our 1978 determination or the issues now before us is not clear. We have denied any award to the broadcaster claimants for their compilations for lack of evidentiary justification, and without prejudice to MPAA pursuing their legal theories in any subsequent proceedings.

[261] PBS Proposed Findings of Fact, p. 2 and TR, p. [illegible].

[262] PB Exhibit A, page 3.

[263] PBS Proposed Findings of Fact, pp. 12–13.

programming expenses advanced by the performing rights societies.

Music asserts that the broadcasting license fees are now less appropriate as a marketplace analogy because of altered circumstances, notably that these agreements were negotiated over a dozen years ago. The Tribunal finds this argument persuasive, particularly since it was a conclusion reached by a majority of the Tribunal in Phase II of the 1978 proceeding and affirmed on appeal. After discussing the dates of the local television contracts, we stated:

> We believe that it is valid to utilize the local television contracts, taking into account all the circumstances relating to them, as one factor in our music allocation.[264]

Our award to music for the performance of copyrighted music on distant radio signals in relation to our denial of any award to commercial radio broadcasters in in accordance with our 1979 determination.

On the basis of all the evidence advanced by Music to justify their entitlement by the application of the criteria, we find that an award of 4.25% continues to be reasonable.

Canadian Claimants

The Canadian Claimants undertook in their 1980 evidence to address deficiencies that had been noted in the Tribunal's 1979 determination, rather than to show any demonstrable increase in the extent of Canadian distant signal carriage. The Canadian claimants purported to show that their 1980 evidence provide the Tribunal with an improved record relating to (1) the relative number of Canadian distant signals and the contribution of Canadian distant signal carriage to the over all royalty fees deposited by cable systems, (2) the appeal to U.S. audiences and the cable market place value of Canadian programming and (3) cable market place value of French language television stations.[265]

The Tribunal concludes that the record does not reflect any increase in distant signal carriage of Canadian stations on 1980 over 1979. The Larson data, presented in evidence by Public Broadcasting indicates the opposite, a decrease in Canadian distant signal carriage from the first accounting period of 1980 to the second.[266] Evidence of record does not show, measured by commerical sales of Canadian programming in the U.S., that there was an appeal by American audiences for Canadian programming in 1980.[267]

In regard to "benefit" to cable systems, evidence submitted by Canadian claimants contained so many errors it was of little use in the Tribunal's considerations.[268]

The Canadian claimants did not show in their evidence of record that French programming is of particular interest to American cable subscribers.[269]

No evidence was submitted in this proceeding to establish "harm" due to the cable retransmission of Canadian programming.

Upon review of all the 1980 evidence, the Tribunal concludes that there has been no significant "change of circumstances" from the 1979 record and that an allocation of .75% of the Phase I Royalty fund to the Canadian claimants continues to be reasonable. There is no justification for an award to Canadian radio.

National Public Radio

We have conclude that the record in this proceeding justifies an award to National Public Radio (NRP), while making no award to commercial radio.

As in our 1979 determination, our different treatment of NPR and commercial radio finds record support in the 1980 Proposed Findings of other claimants.[270]

The Tribunal concludes that the 1980 evidence reaffirms our 1979 conclusion that "NPR is a producer and syndicator or innovative, distinctive and quality programming that is transmitted by a number of cable systems as distant signals."[271]

Upon review of all the evidence with particular attention to evidence relating to "changed circumstances" from the 1979 record, we conclude that a .25% award to NPR is in accord with the evidence of record.

Commercial Radio

For the third time we have heard the evidence presented by NAB seeking to persuade us to make an award to commercial radio. We again decline to do so. As with the arguments advanced by NAB, the reasons for our denial remain unchanged. We reaffirm the findings of our previous determinations.[272]

NAB takes umbrage at our determination to include some compensation to Music for the performance of music on distant radio signals, but to deny any award to commercial radio. We hold that in a very substantial degree any value of distant commercial radio signals is attributable to music, and that the non-musical program elements of these signals is of negligible value. We likewise hold that the broadcasters format is of no significant value independent of that attributable to music. We concur in the finding of Music that the "claim for radio formatting is simply a compilation claim, applied to radio."[273]

We hold that commercial radio has again failed to establish that it has any significant copyrights interests on which to base a claim. We concur in the finding of National Public Radio that "disc jockey time is the least attractive part of a commercial radio hour."[274] We find nothing in the 1980 record to alter our previous conclusions as to the massive duplication of locally available commercial radio formats by distant commercial signals. In particular, the NAB study of radio formats when subjected to examination, and the SRI study on the value of distant commercial radio signals do not require an alteration of our general assessment of the commercial radio claim.[275]

Devotional Claimants

The claim of the devotional claimants are for the first time in our distribution proceedings resolved in Phase I, but the issues presented are similar to those which required resolution when presented in phase II. We reaffirm the findings we made in our 1979 determination concerning the application of the criteria to the devotional claimants.[276] We again conclude that the devotional claimants do not qualify for an award under the Tribunal's criteria. They employ their telecasts to raise the funds to pay for the purchase of air time to perform a Christian ministry.

The devotional claimants assert in their proposed findings that the Tribunal is required as a matter of law to make some allocation to devotional program suppliers. This issue is now before the Court of Appeals for the District of Columbia circuit in the appeal of our

1979 determination. We find nothing in the relevant holdings of the Court of Appeals in *NAB v. CRT* which compels our making an award to the devotional claimants.

Most claimants in the 1980 proceeding sought to improve their presentation in areas where the Tribunal has found gaps or deficiencies. No such undertaking was made by the devotional claimants. There was no assertion of changed circumstances, or evidentiary showings to address our inability to find marketplace value based on their 1979 evidence. The factual presentation was essentially limited to a showing of the amount of time religious programs were broadcast on stations included in the Nielsen Study. Because of the motiviations of broadcasters concerning the presentation of religious programming, time-based statistics are even less indicative of value for devotional programming than for other programming categories.

It has been urged that our award to PBS compels us to make same award to the devotional claimants. The devotional claimants argue that both are noncommercial and that both seek financial support from the public. We find no real similarity. The devotional claimants conduct a Christian ministry. Even their more entertainment types of program formats are designed to provide a Christian ministry. In contrast public broadcasting is a programming institution supported by a broadly based coalition of government, corporations, foundations, and individuals which presents a wide range of programming, much of which is not available on commercial television.

Phase II: The Tribunal considered Phase II issues under the Program Syndicators category.

Phase II

Motion Picture Association of America (MPAA)

The MPAA claim in Phase II, for its entitlement within the 70% Program Syndicators allocation, embraced 58 associated program suppliers, consistent with Section 111(d)(5)(A) of the Copyright Act and the Tribunal's encouragement of voluntary settlement.[277] MPAA proposed that the Tribunal adopt its methodology as a basis on which to make the entire Phase II distribution, because its applicability is impartial to the programming of all claimants and because it is impossible to present for each series and movie detailed evidence according to the Tribunal's criteria.[278] While the Tribunal has not relied upon the Nielsen viewing data as the sole means of making royalty distribution in the past, the Tribunal has accorded substantial weight to these data.[279] However, the Tribunal cannot be blinded by the terms of negotiated settlements, and the attractiveness of a single formula, to the different considerations urged upon it by individual claimants not party to a settlement. The Tribunal must both accord proper weight to the fact that 58 separate parties have concurred in the MPAA methodology for distributions and still respect the rights of other parties. We must look to the Phase II record to ascertain what showing has been made to establish particular entitlement to royalty fee.[280]

We do not view the Nielsen data as irreparably tainted due to the infirmities attributed by other parties to the sample and survey methodology. Nor does the Tribunal feel that in order to make a proper assessment concerning the value of individual programs we need the aggregate claims entitlement for each party within the MPAA umbrella.[281] We need only evaluate the record evidence presented by the competing claimants to establish the application to each claim or group of claims of all the criteria. In this regard, the Tribunal was assisted by the inclusion in the record this year of the individual viewing data for all 635 syndicated series appearing in the Nielsen survey.[282]

The contention that the Program suppliers are claiming entitlement for movies that are in the public domain was not judged to be either fully supported or significant. The Tribunal is also satisfied that the programs of those within the MPAA group were carried as distant signals and qualify for entitlement under the rules of the Tribunal.

On the basis of all relevant evidence in this record, we have awarded 96.9% to the MPAA and associated program suppliers.

Multimedia

Multimedia made a claim in this proceeding to an entitlement of 3.3%, to include both its Show Biz programming and its aliquot share of unclaimed funds.[283]

The showing that Multimedia made with respect to its own case reflected unchanged circumstances between 1979 and 1980, except for the addition of Show Biz programming and, possibly, the increased effect upon its syndication efforts of WGN's satellite retransmission to cable systems.[284] The record evidence supports a finding as to the marketplace value, particular benefit to cable operators, and quality of Multimedia's programs. However, with respect to "Donahue," and in light of Multimedia's criticism of the Nielsen study for its preponderant representation of independent stations,[285] the Tribunal notes in the words of MPAA, that "network affiliates are a much less significant factor in the distant signal market than they are in over-the-air markets;"[286] and that "Donahue's" value to cable systems on a distant signal is substantially reduced by its wide availability on local television network affiliates.

The notable addition to the record in the 1980 proceeding was the inclusion of the individual viewing data for the 635 syndicated series appearing in the Nielsen survey.[287] Such specific evidence concerning the marketplace appeal of the programming of other syndicators was not available last year.[288] This year, however, the Tribunal was able to evaluate the entitlement for "Donahue," for example, with full knowledge on a head-to-head basis of the comparative values MPAA proposes for "The Merv Griffin Show" and "The Mike Douglas Show."[289]

Multimedia objected to having viewing data relevant to Multimedia admitted unless the shares were divulged for all 58 members to the MPAA agreement; The tribunal overruled the objection.[290]

We assert, as we have in the past, that in Phase II, as in Phase I, we cannot base our decision upon the application of a single formula; the Nielsen viewing data are at most a useful starting point for the application of our criteria.[291] However, the inclusion of the individual syndicated series viewing data in the record evidence this year has given us cause to revise our assessment of the value and appeal, on a distant signal

basis, of Multimedia programming to cable operators.

Taking into consideration the addition of the Show Biz programming in the Multimedia claim this year, and the possible harm that may have resulted from the increase in cable carriage of WGN in 1980 due to satellite retransmission, the Tribunal concludes that a fair and reasonable share for all Multimedia programming is 1.6%.

National Association of Broadcasters

An award of 0.8% to NAB for programming syndicated by broadcast stations was stipulated to by all parties participating in the Phase II proceeding.

The Tribunal did not hear evidence or testimony with regard to this issue and awards NAB 0.8%.

SIN

The Tribunal is satisfied that the entire record supports an award to SIN and that SIN's Spanish language programming is of particular marketplace value and benefit to cable operators in attracting Spanish speaking subscribers. The Tribunal, however, is not persuaded that the record evidence in the 1980 proceeding provides any basis upon which SIN's award should be altered from the 0.7% share of last year.

The Tribunal has consistently rejected the use of any single formula and made its determination on an assessment of the record as a whole. The Tribunal, therefore, is skeptical of SIN's request for an award of $359,047, a figure significantly similar to the award requested last year. Furthermore, the request is based upon a methodology which the Tribunal has repeatedly indicated fails to lend itself to an application of the Tribunal's criteria. SIN acknowledged this limitation; yet persisted in seeking a claim upon this basis.[292]

The Tribunal has consistently refrained from relying upon a strict application of the Nielsen viewing figures. However, figures do provide corroboration for the value the Tribunal has placed upon SIN's programming. The Tribunal has not found SIN's criticism particularly persuasive with respect to the Nielsen methodology in Hispanic households. SIN's testimony and evidence in this regard seemed to relate entirely to over-the-air television viewing and not to the viewing of distant signals by cable television subscribers.[293] The Tribunal did not find that SIN succeeded in identifying the deficiencies that might apply to both, or that the award to SIN should be altered.

Judging the circumstances and issues relating to SIN's claim to have remained essentially the same, and taking the record as a whole, the Tribunal considers the 0.7% award in 1979 to SIN fair and reasonable for 1980.

Unclaimed Funds: We have not employed any single formula in our Phase II allocation and have not found it necessary to create an unclaimed fund.

DISTRIBUTION OF CABLE ROYALTY FEES

[Financial statement of royalty fees for compulsory licenses for transmissions for cable systems for 1980]

Royalty fees deposited	$18,896,294.55
Interest income	528,412.50
Gain on matured securities	4,592,317.62
Total	25,017,024.67
Less:	
Operating costs of the Copyright Office	323,950.00
Refunds issued	59,118.35
Public Law 976–276 Allocation	51,000.00
Approximate CRT Administrative Costs	37,705.00
Total	471,773.36
Approximate amount for distribution on March 31, 1983	24,545,251.31

Allocations

The Tribunal has adopted the following allocation to categories of claimants in Phase I of the specified percentage of the royalty fees available for distribution:

1. Motion Picture Association of America and other program syndicators	70.00
2. Joint Sports Claimants and NCAA	15.00
3. Public Broadcasting Service (for all purposes)	5.25
4. U.S. Television Broadcaster (for all copyrightable interests except program syndication)	4.50
5. Music Performing Rights Societies	4.25
6. Canadian Television Broadcasters (to exclude all radio claims)	0.75
7. National Public Radio	.25
8. Devotional Claimants	.00
9. Commercial Radio	.00

The allocations adopted by the Tribunal under Phase II for the individual claimants is as follows:

	Percent
Program Syndicators:	
Motion Picture Association of America	96.9
Multimedia Program Productions, Inc.	1.6
National Association of Broadcasters	0.8
Spanish International Network	0.7

The Tribunal for lack of any justification has not awarded cable fees to claimants who:

1. Were not associated with Phase II voluntary agreement, or

2. Could not reasonably on the basis of this record be treated according to the terms of voluntary agreements, or

3. Which did not submit adequate entitlement justification.

Commissioner Burg dissented from the Phase I determination. Commissioner Ortega did not participate in Phase I.

Edward W. Ray,

Chairman.

February 28, 1983.

Minority Views of Commissioner Burg

This commissioner cast the only dissenting vote on the Phase I allocations of the 1980 Cable Royalty Fund Distribution Proceeding. The basis for the allocations reached by the majority in Phase I was predicated, as the Joint Sports Claimants state, on the assumption that the Tribunal was bound by the precedents of its previous decisions, and could not alter those previous allocations unless the facts had materially changed.[294] All evidence therefore had to be viewed through the prism of "changed circumstances."

As a practical effect this concept erected an artificial barrier to examining the record evidence of the claimants from, as Music argued, "new, previously unrevealed perspectives."[295] Likewise the Canadians claimed their 1980 case was a "correction and amplification with respect to three evidentiary limitations noted by the Tribunal in the 1979 proceeding."[296] And even though Joint Sports subscribed in theory to the changed circumstances rubric they nevertheless stated, " * * * if the Tribunal believes, in light of its cumulative experience or in light of newly discovered (but not necessarily new) relevant evidence, that changes in prior awards need be made, it must make them."[297]

Counsel for NAB, in his opening statement quoted from a Supreme Court decision which in part said, "cumulative experience begets understanding and insight by which judgments not objective(ly) demonstrable are validated, quantified or invalidated."[298] Those words from that decision define the essence of my dissent. The commissioners of the Tribunal operate in an area, deal with issues, and confront realities that have been demonstrably difficult to quantify or validate. We have repeatedly rejected formluas as the sole basis of our decisions and have consistently relied on the record as a whole. The record evidence in Phase I convinced me beyond doubt that in some instances a persuasive case was made for a shift in the 1980 percentages.

It appears that at least one other Commissioner shares my views.

In a letter to Chairman Ray explaining his vote against the allocation of 1.6% for the Multimedia claim in Phase II, Commissioner Brennan said, "I believe that it would be justified to reopen our Phase I determination

since the rationale adopted may now no longer reflect the majority sentiment of this body." He concluded by saying, "It, however, will be necessary for me to reconsider my Phase I positions in subsequent distribution proceedings in the light of our 1980 deliberations."

If the facts support it, and I think they did, the Tribunal had an obligation to change certain of its 1979 allocations. To do less was to impose too narrow and too restrictive a perspective on the proceeding.

BILLING CODE 1410-01-M

CONSUMER PRODUCT SAFETY COMMISSION

Notification of Proposed Collection of Information

AGENCY: Consumer Product Safety Commission.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1981 (44 U.S.C. 3501 *et seq.*), the Consumer Product Safety Commission has resubmitted to the Office of Management and Budget a request for approval of a proposed collection of information in the form of a survey to determine the effects on consumers of an amendment to the Safety Standard for Walk-Behind Power Lawn Mowers (16 CFR Part 1205) which allows a rotary power lawn mower with only a manual engine restart mechanism to meet the blade-stop requirements of the standard by means of stopping the engine under certain conditions, specified in the amendment. The amendment to the standard was published in the **Federal Register** of November 5, 1981 (46 FR 54932). Both the amendment of the standard and the survey are required by provisions of section 1212(a) of the Omnibus Budget Reconciliation Act of 1981 (Pub. L. 97-35, 95 Stat. 724).

The survey will be conducted for the Commission by a private contractor, who will screen a panel of approximately 73,000 consumers by means of a short mail questionnaire to identify about 1,200 persons who have purchased a power lawn mower since July 1, 1982. The consumers selected by this process will be interviewed by telephone about safety features on the mowers they have purchased and the manner in which they use those mowers.

Information about the Proposed Collection of Information:

Agency address: Consumer Product Safety Commission, 1111 18th Street NW., Washington, D.C. 20207.

Title of information collection: Study to assess the impact on consumers of the amendment to the safety standard for rotary walk-behind power lawn mowers.

Type of request: Approval of new plan.

Frequency of collection: One time.

General description of respondents: Consumers.

Estimated number of respondents: Mailed questionnaire—73,000; telephone interview—1,200.

Estimated number of hours per response: Questionnaire—9 seconds; telephone interview—18 minutes. Total hours for all respondents, 540.

Comments: Comments on this proposed collection of information should be addressed to Gwen Pla, Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503, telephone (202) 395-7313. Copies of the proposed collection of information are available from Francine Shacter, Office of Budget and Program Implementation, Consumer Product Safety Commission, Washington, D.C. 20207, telephone: (301) 492-6529.

This is not a proposal to which 44 U.S.C. 3504(h) is applicable.

Dated: March 1, 1983.

Sheldon Buttis,

Acting Secretary, Consumer Product Safety Commission.

DEPARTMENT OF DEFENSE

Department of the Army

Public Information Collection Requirement Submitted to OMB for Review

The Department of Defense has submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). Each entry contains the following information: (1) Type of Submission; (2) Title of Information Collection and Form Number if applicable; (3) Abstract statement of the need for and the uses to be made of the information collected; (4) Type of Respondent; (5) An estimate of the number of responses; (6) An estimate of the total number of hours needed to provide the information; (7) To whom comments regarding the information collection are to be forwarded; (8) The point of contact from whom a copy of the information proposal may be obtained.

Extension

Application for Establishment of an Army Senior Reserve Officer's Training Corps Unit, DA Form 918.

College level institutions desiring to host an Army ROTC Unit make application and commit themselves to an agreement by completing and forwarding DA Form 918. Once approved, the application is kept on file as a record of agreement.

Colleges and Universities: 16 responses; 160 hours.

Forward comments to Edward Springer, OMB Desk Officer, Room 3235, NEOB, Washington, D.C. 20503, and John, V. Wenderoth, DOD Clearance Officer, OASD(C), DIRMS, IRAD, Room 1A658, Pentagon, Washington, D.C. 20301, telephone (202) 697-1195.

A copy of the information collection proposal may be obtained from David O. Cochran, DAAG-OPI, Room 1D667, Pentagon, Washington, D.C. 20301, telephone (202) 695-5111.

March 2, 1983.

M.S. Healy,

OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810-01-M

DEPARTMENT OF ENERGY

Economic Regulatory Administration

Order Amending Authorization To Export Electric Energy: Marias River Electric Cooperative, Inc.

AGENCY: Economic Regulatory Administration, (ERA), DOE.

ACTION: Order Amending Authorization to Export Electric Energy issued to the Marias River Electric Cooperative, Inc. (MRE).

SUMMARY: DOE has ordered that the MRE export authorization be increased from the previously authorized maximum amount of 2,000,000 kWh of electric energy per year at a maximum transmission rate of 500 kW to 3,500,000 kWh at a maximum transmission rate of 750 kW.

FOR FURTHER INFORMATION CONTACT:

Garet Bornstein, Division of Petroleum and Electricity (RG-44), Office of Fuels Programs, Department of Energy, Forrestal Building, Room GA-017, 1000 Independence Avenue SW., Washington, D.C. 20585, (202) 252-5935.

Lise Courtney M. Howe, Office of General Counsel (GC-11), Department of Energy, Forrestal Building, Mail Stop 6F-094, 1000 Independence Avenue SW., Washington, D.C. 20585, (202) 252-2900.

SUPPLEMENTARY INFORMATION: Order Amending Authorization to Export Electric Energy: Marias River Electric Cooperative, Inc.

On May 14, 1982, the Marias River Electric Cooperative, Inc. (MRE) filed an application with the Department of Energy (DOE) requesting that its authorization to export electric energy granted by the Federal Power Commission on October 19, 1970, in Docket IT–6097 be increased from 2,000,000 kilowatt hours per year at a maximum transmission rate of 500 kilowatts to 3,500,000 kWh per year at a maximum transmission rate of 750 kW.

According to the application, the purchaser of the additional energy to be exported will continue to be Southern Utilities, Ltd., a Canadian corporation engaged in the distribution of electric energy in and around the Town of Coutts, Province of Alberta, Canada. The increased energy will be used by Southern Utilities, Ltd. to meet increased electrical loads. In the applicant's opinion, the increased level of exports, if authorized, will not impair the sufficiency of electrical supply within the United States or to any of the member/consumers within its serving area.

Notice of the application was given by publication in the **Federal Register** on September 22, 1982 (47 FR 41853), requesting any person desiring to be heard or to make any protest with reference to the application to file before October 15, 1982, with the Department of Energy petitions to intervene or protests in accordance with the Rules of Practice and Procedure (18 CFR 1.8, 1.10). No petition, or protest or request to be heard in opposition to the granting of the application has been received.

DOE Finds:

(1) The proposed transmission of electric energy from the United States to Canada, as limited herein and as hereinafter authorized, will not impair the sufficiency of electric supply within the United States and will not impede or tend to impede the coordination in the public interest of facilities subject to the jurisdiction of DOE.

(2) The period of public notice given in this matter is reasonable.

DOE Orders:

(A) Marias River Electric Cooperative, Inc. hereby is authorized to transmit electric energy from the United States to Canada in accordance with the terms and conditions set forth in the application and subject to the provisions of the Order issued by the Federal Power Commission on October 19, 1970, in Docket No. IT–6097, as herein amended.

(B) Paragraph B of the Order issued by the Federal Power Commission on October 19, 1970, in Docket No. IT–6097 is amended to read as follows:

The electric energy which the Marias River Electric Cooperative, Inc. hereby is authorized to transmit from the United States to Canada shall be in an amount not to exceed 3,500,000 kWh per year at a transmission rate not to exceed 750 kW, the energy to be transmitted over the facilities specified in the Presidential Permit signed by the President of the United States on July 28, 1948, in Docket No. E–6108.

Issued in Washington, D.C., on February 28, 1983.

Rayburn Hanzlik,

Administrator, Economic Regulatory Administration.

BILLING CODE 6450-01-M

[Docket No. ERA–FC–83–003]

Powerplant and Industrial Fuel Use Act of 1978: Electric Utility Conservation Plans

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of approval of conservation plans.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) has received a number of electric utility conservation plans developed and submitted for DOE approval pursuant to section 808 of the Powerplant and Industrial Fuel Use Act of 1978, as amended, 42 U.S.C. 8301 *et seq.* ("FUA" or "the Act"). Pursuant to 10 CFR 508.5(b) (47 FR 25729, June 15, 1982), DOE hereby gives Notice of Approval of Conservation Plans submitted by the electric utility owners or operators listed in the "**SUPPLEMENTARY INFORMATION**" section below.

The public file for each of the listed electric utility owners or operators containing this Notice of Approval of Conservation Plans and all other pertinent documents is available for inspection at the Department of Energy, Freedom of Information Reading Room, 1000 Independence Avenue, SW., Room 1E–190, Washington, D.C. 20585, telephone (202) 252–0620. Approval of each conservation plan is based on ERA's consideration of the entire record of the proceeding, including any comments received during the public comment period for each plan.

DATE: In accordance with 10 CFR 508.5(b), this Notice shall take effect on March 7, 1983.

FOR FURTHER INFORMATION CONTACT:

Edward J. Peters, Jr., Office of Fuels Programs, Economic Regulatory Administration, Forrestal Building, Room GA–073 G, 1000 Independence Avenue, SW., Washington, D.C. 20585, (202) 252–8162.

Allan Stein, Esq., Office of the General Counsel, Forrestal Building, Room 6B–222, 1000 Independence Avenue SW., Washington, D.C. 20585, (202) 252–2967.

SUPPLEMENTARY INFORMATION: Section 1023 of the Omnibus Budget Reconciliation Act of 1981, Pub. L. 97–35 (OBRA) amended FUA by adding a new section 808, entitled "Electric Utility Conservation Plan."

Section 808 requires utilities which own or operate any existing electric powerplant which used natural gas as a primary energy source between August 14, 1980 and August 13, 1981, and which also plan to use natural gas in any electric powerplant, to develop and submit to DOE for approval a conservation plan to conserve electric energy. The plan must set forth the means to achieve the conservation of electric energy at a level equal to 10 percent of the electric energy output of the utility sold within its own system which was attributable to natural gas during the four calendar quarters ending on June 30, 1981. Approved plans must be fully implemented during the five year period following DOE approval.

Notices of Receipt of the proposed conservation plans described below, providing for a thirty (30) day public comment period during which interested persons were invited to submit written comments concerning the content of any such proposed conservation plan, were published in the **Federal Register** on August 12 and 27, 1982 and September 17, 1982 (47 FR 35033, 37952 and 41163, respectively). No comments on these proposed plans were received.

Based upon the entire record of this proceeding, ERA has determined that the conservation plans of each of the following utilities meet the requirements for approval contained in 10 CFR § 508.8. ERA is restricted by the 120 day time limitation imposed by the Act on the plan approval process as to the amount of information which can be analyzed in order to ascertain the environmental significance of approval of these plans. However, based on the information contained in each utility's

submittal, ERA has determined, pursuant to 10 CFR 508.5, that the conservation programs contained in the plan of each utility listed below should not produce environmental consequences significant enough to warrant detailed documentation pursuant to the National Environmental Policy Act or its implementing regulations (40 CFR Part 1500 *et seq.*). Thus this action clearly does not represent a major Federal action significantly affecting the quality of the human environment. Pursuant to 10 CFR 508.5 and section 808(d)(1) of FUA, DOE hereby approves the electric utility conservation plans submitted by the utilities listed below.

Each of the electric utilities whose plans are approved herein shall annually submit a report to ERA pursuant to 10 CFR 508.7 (47 FR 25733, June 15, 1982) identifying the steps taken during the preceding year to implement its approved plan. Each such report shall be submitted within thirty (30) days after the close of a calendar year, beginning with the close of calendar year 1983. The report shall be sent to: Steven Ferguson, Director, Fuels Conversion Division, Office of Fuels Programs, Economic Regulatory Administration, Forrestal Building, Room GA-093, 1000 Independence Avenue SW., Washington, D.C. 20585.

The following utilities' conservation plans are approved:

BILLING CODE 6450-01-M

Office of Energy Research

Light Water Reactor Safety Research and Development Panel; Energy Research Advisory Board; Meeting

Notice is hereby given of the following meeting:

Name: Light Water Reactor Safety R&D Panel of the Energy Research Advisory Board (ERAB). ERAB is a Committee constituted under the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770).

Date and time: March 30-31, 1983, 9 a.m. to 5 p.m.

Place: Department of Energy, Room 8E-089, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585.

Contact: Charles E. Cathey, Energy Research Advisory Board, Department of Energy, Forrestal Building, ER-6, 1000 Independence Avenue, SW., Washington, DC 20585, Telephone: 202/252-8933.

Purpose of the parent board: To advise the Department of Energy on the overall research and development conducted in DOE and to provide long-range guidance in these areas to the Department.

Tentative agenda:

- Briefings by Nuclear Steam Supply System vendors
- Briefings on Industry Degraded Core (IDCOR) program
- Comments by National Association of Regulatory Utility Commissions
- Review draft Department of Energy Management Plan for the Conduct of an R, D&D Program for Improving the Safety of Nuclear Powerplants
- Review reports by subpanels

Public Participation: The meeting is open to the public. Written statements may be filed with the Panel either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact Charles E. Cathey at the address or telephone number listed above. Requests must be received five days prior to the meeting and reasonable provision will be made to include the presentation on the agenda. The Chairperson of the Panel is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business.

Transcripts: Available for public review and copying at the Freedom of Information Public Reading Room, 1E-190, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC, between 8:30 a.m. and 4 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, DC on February 28, 1983.

J. Ronald Young,

Director for Management, Office of Energy Research.

Federal Energy Regulatory Commission

[Docket No. QF83-191-000]

Altamont Windpower I, Ltd.; Application for Commission Certification of Qualifying Status of a Small Power Production Facility

March 2, 1983.

On February 14, 1983, Altamont Windpower I, Ltd., (Applicant), 331 Soquel Drive, Santa Cruz, California 95062, filed with the Federal Energy Regulatory Commission (Commission) an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's rules.

The facility will be located in the Altamont Pass area of Alameda County, California. The facility will consist of a maximum of thirty wind turbine generators. No oil or gas will be used in the facility. The electric power production capacity of the facility will be 2,250 kilowatts. Installation of the facility is expected to begin in June 1983. There are no other windpowered small power production facilities owned by Applicant located within one mile of the facility. No electric utility, electric utility holding company or any combination thereof has any ownership in the facility.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[Docket No. QF83-193-000]

Black River Power Co.; Application for Commission Certification of Qualifying Status of a Small Power Production Facility

March 2, 1983.

On February 16, 1983, Black River Power Company, (Applicant), P.O. Box 435, Cheboygan, Michigan 49721, filed with the Federal Energy Regulatory Commission (Commission) an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's rules.

The hydroelectric small power production facility is located on the Black River between Black Lake and the town of Cheboygan in Cheboygan County, Michigan. The electric power production capacity of the facility is 950 kilowatts. There are no other hydroelectric small power production facilities owned by Applicant located within one mile of the facility. No electric utility, electric utility holding company or any combination thereof has any ownership interest in the facility.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. ER83-322-000]

Empire District Electric Co.; Filing

March 2, 1983.

Take notice that on February 16, 1983, the Empire District Electric Company (Empire) tendered for filing a proposed Amendment to Schedule H, Peaking Power Service, a part of that agreement for interchange of power and interconnected operation between the Empire and Kansas City Power and Light Company (KCPL) designated rate schedule, FERC 88.

The amendment will change the capacity charge from $0.27 per Kw per month to $0.46 per Kw per month and add a $15 per day scheduling and accounting charge.

Empire requests an effective date of April 1, 1983, and therefore requests waiver of the Commission's notice requirements.

Copies of the filing have been sent to the Kansas Corporation Commission and the Missouri Public Service Commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before March 15, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. CP83-185-000]

Mountain Fuel Supply Co.; Application

March 2, 1983.

Take notice that on February 7, 1983, Mountain Fuel Supply Company (Mountain Fuel), 180 East First South Street, Salt Lake City, Utah 84139, filed in Docket No. CP83-185-000 an application pursuant to Section 7(b) of the Natural Gas Act for permission and approval to abandon approximately 5.09 miles of three-inch diameter pipeline and appurtenances located in Lincoln County, Wyoming, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that this request for abandonment authorization is made pursuant to a request by the United States Bureau of Land Management that all surface pipelines in the Moxa Arch area of Lincoln County be buried or removed. Applicant also asserts that no service, sale, or production would be abandoned as wells currently producing into the line proposed to be abandoned would be reconnected to a tap on another main line.

Any person desiring to be heard or to make any protest with reference to said application should on or before March 23, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of

Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own reveiw of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-6782 Filed 3-4-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-193-000]

Mountain Fuel Supply Co.; Application

March 2, 1983.

Take notice that on February 9, 1983, Mountain Fuel Supply Company (Applicant), 180 East First South Street, Salt Lake City, Utah 84139, filed in Docket No. CP83-193-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of approximately 43.5 miles of 20-inch pipeline and appurtenant facilities, as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes the construction and operation of approximately 43.5 miles of 20-inch diameter transmission pipeline and related facilities which would begin at a junction with Applicant's transmission Main Line No. 48 north of Randolph, Utah, and extend to Applicant's high pressure distribution system located west of Hyrum, Utah. Applicant states that the proposed pipeline is required to provide increased general system deliverability, improve overall system operation and reliability, and assure a long-lasting uninterrupted natural gas service to its northern distribution system customers. It is stated that in addition to supplying the volumes of natural gas required for the northern distribution system, the proposed pipeline would provide needed additional capacity in the transmission lines downstream of its Eakin Compressor Station and in several major feeder lines in the distribution network. It is further stated that the proposed pipe would be constructed at a cost of approximately $15,060,780. Such cost, it is asserted, would be financed through funds on hand and/or short-term borrowing.

Any person desiring to be heard or to make any protest with reference to said application should on or before March 23, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-6783 Filed 3-4-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-196-000]

National Fuel Gas Supply Corp.; Application

March 2, 1983.

Take notice that on February 10, 1983, National Fuel Gas Supply Corporation (Applicant), Ten Lafayette Square, Buffalo, New York 14203, filed in Docket No. CP83-196-000 an application pursuant to Section 7 of the Natural Gas Act for permission and approval to abandon certain pipeline facilities in Erie County, Pennsylvania, and for a certificate of public convenience and necessity authorizing the construction and operation of facilities to replace and/or enlarge the facilities to be abandoned, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to remove a portion of pipeline from its Lines A, B and D in Wayne Township and the City of Corry, Erie County, Pennsylvania, and to replace such facilities with a single new 16-inch steel line to be designed as Line D. It is asserted that the existing facilities would be removed and sold for scrap. Applicant states that total estimated cost of this project is $720,000 which would be financed from internally generated funds and/or interim short-term bank loans.

Applicant states that this proposal is a continuation of a replacement program which was begun by its predecessor-in-interest, Pennsylvania Gas Company, to replace Lines A, B and D with new pipe since such replacement is considered to be the most economical means of maintaining such facilities.

Any person desiring to be heard or to make any protest with reference to said application should on or before March 23, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate and permission and approval for the proposed abandonment are required by the public convenience and

necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-5704 Filed 3-4-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-170-000]

Niagara Interstate Pipeline System; Application

March 2, 1983.

Take notice that on January 25, 1983, Niagara Interstate Pipeline System (Applicant), Tenneco Building, 1010 Milam, Houston, Texas 77001, filed in Docket No. CP83-170-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain pipeline facilities and the transportation of natural gas for certain pipeline companies, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

It is asserted that Applicant is a newly-formed interstate pipeline organized under the laws of the state of New York and owned by interstate pipeline affiliates who have the following interests in the partnership:

	Percent
Tennessee Niagara Gas Company	29
Transco Canada Pipeline Company	29
TransCanada Pipeline Niagara Ltd	29
Texas Eastern Niagara, Inc	13

Applicant states that Tennessee Niagara Gas Company is an affiliate of Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee). Transco Canada Pipeline Company is affiliated with Transcontinental Gas Pipe Line Corporation (Transco); Trans-Canada Pipeline Niagara Ltd. is an indirect subsidiary of Trans-Canada PipeLines Limited (TransCanada), and Texas Eastern Niagara is an affiliate of Texas Eastern Transmission Corporation (TETCO).

Applicant requests authorization to render a transportation service for four pipeline shippers: Transco, TETCO, Tennessee and Algonquin Gas Transmission Company (Algonquin) and to construct and operate certain pipeline, compression, measurement and other related facilities which would be required to enable Applicant's to render the proposed transportation services.

It is stated that Applicant pipeline system would be constructed and operated in two segments. Applicant states that the "Northern Segment" between the U.S.-Canada border and East Aurora, New York, would be constructed and operated by Tennessee pursuant to a construction and operating agreement to be executed between Applicant and Tennessee. It is further asserted that the "Southern Segment" between East Aurora and Tamarack, Pennsylvania, near the Leidy Storage Field, would be constructed and operated by Transco under a similar construction and operating agreement with Applicant.

It is indicated that Tennessee has applied for authorization to import from Canada a total of approximately 609,000 Mcf of gas per day in the consolidated proceedings set for hearing in *Boundary Gas, Inc.*, Docket No. CP81-107-000, *et al.* In addition, it is indicated that Tennessee proposes in those proceedings to transport for Boundary Gas, Inc. (Boundary), the 185,000 Mcf of gas per day which Boundary proposes to import from Canada. All of these imported volumes would be purchased from TransCanada at the proposed interconnection between the proposed facilities of Applicant and TransCanada on the international border near Niagara Falls, New York, it is explained.

Applicant further states that Transco has applied for authorization in Docket Nos. CP82-125-000 and -005 to import from Canada up to 413,000 Mcf of gas per day. It is stated that in addition Transco proposes in Docket No. CP82-503-000 to render a related new storage service for its customers. Transco, TETCO and Algonquin have proposed in Docket No. CP82-46-000 to import from Canada up to 305,882 Mcf of gas per day. It is stated that these volumes would be allocated equally to each of these shippers. Finally, TETCO has proposed in Docket Nos. CP82-326-000 and CP82-423-000 to import from Canada up to 200,000 Mcf of gas per day.

Applicant explains that the proposed facilities would initially be allocated to the four shipper pipeline companies to provide transportation of gas in the following quantities:

I. Northern Segment (U.S.-Canada border to East Aurora, New York)—

Shipper	Mcf/d
Algonquin	101,961
Tennessee[1]	1,000,000
TETCO	301,961
Transco	1,114,961

[1] Up to 185,000 Mcf of gas per day of Tennessee capacity is reserved for the benefit of Boundary Gas, Inc., and its customers pursuant to a transportation agreement by and between those parties.

II. *Southern Segment* (East Aurora to Leidy, Pennsylvania)—

Shipper	Mcf/d
A. East Aurora to Tennessee Station 313—	
Algonquin	101,961
Tennessee	285,000
TETCO	301,961
Transco	1,114,961
B. Tennessee Station 313 to Leidy—	
Algonquin	101,961
TETCO	301,961
Transco	1,114,961

Applicant states that the proposed transportation services would be rendered in accordance with the terms of the *pro forma* Canadian gas transportation contract and *pro forma* Rate Schedule T. The proposed transportation service would be rendered for fifteen years, it is submitted.

Applicant states that the transportation charges to be paid by the shippers are based upon an allocation of the cost of service among the shippers on an Mcf/mile demand basis by delivery point and that the design of rates is on a demand-commodity basis. It is stated that the demand rate is designed to recover debt service charges, operation and maintenance expenses, and taxes other than income taxes. It is further stated that shippers would furnish fuel gas based on the ratio of each shipper's transportation requirements to total transportation requirements and miles of transportation. Applicant states that shippers would be obligated to pay the demand charge and a minimum annual commodity charge based on 75 percent of annual contract quantities. The annual depreciation rate would be 6.7 percent, it is asserted.

Applicant asserts that the proposed facilities are an integral part of a much needed larger effort by the pipeline shippers to acquire new long-term gas supplies from Canada to meet the market needs of their customers. Applicant submits that its proposed facilities would remove the need for duplicative facilities and would permit the shippers to utilize a single pipeline system to transport imported gas volumes in an efficient and cost-effective manner. Applicants state in addition that construction and operation of one large-diameter pipeline as proposed by Applicant to transport new long-term gas supplies for the shippers

would have a substantially lesser environmental impact that constructing and operating the separate pipelines previously proposed by Tennessee and Transco's affiliate, Trans-Niagara Pipeline.

The application shows that the facilities would consist of approximately 0.25 mile of dual 36-inch pipeline from the United States-Canada border across the Niagara River, approximately 48.6 miles of 48-inch pipeline from the Canadian border to East Aurora, New York, and approximately 112.7 miles of 42-inch pipeline from East Aurora to Tamarack, Pennsylvania, together with 21,000 horsepower of compression at East Aurora and 38,000 horsepower of compression at Tamarack, measurement and other related facilities as well as certain modifications required to be made to existing facilities.

The total cost of the proposed facilities is estimated to be $417,617,000 which cost would be financed with project financing. Applicant would attempt thereby to obtain a 75 percent/25 percent debt/equity financial structure, it is stated.

Any person desiring to be heard or to make any protest with reference to said application should on or before March 23, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rule of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-5705 Filed 3-4-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-195-000]

Panhandle Eastern Pipe Line Co. and Trunkline Gas Co.; Application

March 2, 1983.

Take notice that on February 9, 1983, Panhandle Eastern Pipe Line Company, P.O. Box 1642, Houston, Texas 77001, and Trunkline Gas Company, P.O. Box 1642, Houston, Texas 77001, filed in Docket No. CP83-195-000 a joint application pursuant to Section 7(b) of the Natural Gas Act for permission and approval to abandon a transportation service for Libbey-Owens-Ford Company (LOF), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicants state that they are presently authorized to transport 1,200 Mcf of natural gas on a firm basis and 1,700 Mcf of natural gas per day on a best-efforts basis for LOF. Applicants receive said gas from LOF in Woods County, Oklahoma, and transport and redeliver such gas to Transcontinental Gas Pipe Line Corporation Northern Natural Gas Company, Division of InterNorth, Inc., and Columbia Gas Transmission Corporation for the account of LOF for further transportation and ultimate redelivery to LOF.

It is stated that LOF has sold its reserves from which production was being transported and, therefore, terminated its transportation agreement with Applicants by letter dated July 30, 1982. Applicants state that LOF has advised that there is no possibility that it would desire further transportation service under the existing agreement. Applicants, therefore, request approval to abandon the transportation of natural gas for LOF.

Any person desiring to be heard or to make any protest with reference to said application should on or before March 23, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to the proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-5706 Filed 3-4-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-187-000]

Tennessee Gas Pipeline Company, a Division of Tenneco Inc.; Application

March 2, 1983.

Take notice that on February 8, 1983, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee), P.O. Box 2511, Houston, Texas 77001, filed in Docket No. CP83-187-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of up to 500 Mcf of natural gas per day, on a best-efforts basis, for Mid Louisiana Gas Company (Mid Louisiana) pursuant to a transportation agreement dated September 2, 1982, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Tennessee proposes to transport natural gas produced from the Eros Prospect Field and sold to Mid Louisiana. It is stated that Tennessee

would receive such volumes at a point located on its existing facilities in Jackson Parish, Louisiana, and would deliver equivalent volumes to Mid Louisiana in Ouachita Parish, Louisiana. It is asserted that the rate proposed to be charged by Tennessee is 3.37 cents per Mcf multiplied by the total quantity of gas received by Tennessee during the month. Mid Louisiana would provide Tennessee 1.2 percent of the quantity of gas received by Tennessee to compensate for fuel and use requirements.

Any person desiring to be heard or to make any protest with reference to said application should on or before March 23, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Tennessee to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-5767 Filed 3-4-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-200-000]

United Gas Pipe Line.; Application

March 2, 1983.

Take notice that on February 16, 1983, United Gas Pipe Line Company (Applicant), P.O. Box 1478, Houston, Texas 77001, filed in Docket No. CP83-200-000 an application pursuant to Section 7 of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain facilities and the reduction of certain natural gas allocations to the Town of Carencro, Louisiana, and for permission and approval to abandon certain pipeline facilities by sale to Trans-Louisiana Gas (Trans-La), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes the reduction of certain natural gas allocations to the Town of Carencro, Louisiana, and the transfer of said allocations to Trans-La in light of the sale by the Town of Carencro of a portion of its local distribution system to Trans-La. Applicant states that it would reduce Carencro's maximum daily delivery obligation from 2,294 Mcfd to 2,065 Mcfd. Applicant further states it would enter into a new gas service agreement with Trans-La wherein the contractual maximum daily delivery obligation would be 229 Mcf.

It is asserted that to effect the delivery of these supplies to Trans-La it would install, at Trans-La's expense, a new metering and regulation station at a point on Applicant's Iowa-Franklin line near Lafayette Parish, Louisiana.

Applicant further proposes to abandon by sale to Trans-La approximately 15,585 feet of Applicant's Iowa-Franklin 8-inch line and 26,446 feet of the 6-inch and 8-inch Lafayette Lateral.

It is asserted that Applicant is currently serving one customer, B. F. Trappey's and Sons, Inc., through the lines which Applicant proposes to sell to Trans-La in order to continue service to that customer.

Applicant states that the sale of the subject lines to Trans-La will be beneficial both operationally and financially. It is indicated that Trans-La has two separate distribution systems in Lafayette which cross these two sections of lines and that by connecting the lines to its system, Trans-La would be able to alleviate the pressure problems currently experienced on one of its systems.

Any person desiring to be heard or to make any protest with reference to said application should on or before March 23, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriated action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate and permission and approval for the proposed abandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

Office of the Secretary

Voluntary Agreement and Plan of Action To Implement the International Energy Program; Meetings

In accordance with section 252(c)(1)(A)(i) of the Energy Policy and Conservation Act (42 U.S.C. 6272), the following meeting notices are provided:

Meetings of the International Energy Agency (IEA) Group of Reporting Companies will be held: (1) On March 17 and 18, 1983, at the Instituto Di Aggiornamento E Formazione ENI, Castelgandolfo, Italy, beginning at 2:30 p.m. on March 17; and (2) on March 29,

1983, at the offices of Texaco, Inc., 2000 Westchester Avenue, White Plains, New York, beginning at 9:00 a.m. These are briefing meetings for personnel of IEA Reporting Companies and their affiliates and for Reporting Company members of the IEA Industry Supply Advisory Group (ISAG) who will participate in the Fourth IEA Allocation Systems Test (AST–4).

The agenda for each meeting is as follows:

1. Opening remarks.
2. Background on the IEA and the International Energy Program.
3. Review emergency sharing system.
4. Review AST–4 Test Guide:
a. Objectives and scope;
b. Scenario and timing;
c. Organizational structure;
d. National Emergency Sharing Organization (NESO) participation;
e. Data base and use; and
f. Communications, including a description of the voluntary offer submission system.
5. Test appraisal.
6. Legal considerations and clearances.
7. Supplemental discussion for ISAG:
a. Assignments and overall responsibilities;
b. Industry Supply Operations Manual (ISOM) overview and ISAG formats;
c. The voluntary offer process and computer support;
d. Appraisal activities;
e. IEA security and document flow; and
f. Personnel considerations.

As provided in section 252(c)(1)(A)(ii) of the Energy Policy and Conservation Act, these meetings will not be open to the public.

Issued in Washington, D.C., February 28, 1983.

Craig S. Bamberger,

Assistant General Counsel, International Trade and Emergency Preparedness.

[FR Doc 83-6091 Filed 3-4-83; 8:45 am]

BILLING CODE 6450-01-M

Public Hearings To Announce Proposal To Nominate a Site Within the State of Nevada for Characterization Studies

AGENCY: Department of Energy.

ACTION: Notice of public hearing and solicitation of comments.

SUMMARY: The U.S. Department of Energy has identified a potentially acceptable site in Nevada for a high level radioactive waste repository and proposes to nominate this site for site characterization pursuant to Section 113 of the Nuclear Waste Policy Act of 1982 (Pub. L. 97–425). Pursuant to Section 112 an environmental assessment will accompany such nomination. Further, before proceeding to sink shafts, a Site Characterization Plan will be issued. The site is located in Nye County, on and adjacent to the southwest corner of the Department's Nevada Test Site. A major objective of the site characterization activity will be the acquisition of geologic information necessary to the evaluation of the suitability of the Nevada site for a repository. Site characterization activities at all candidate sites must be completed within the next four years to support a Departmental recommendation to the President and subsequent Presidential recommendation of a site to the Congress by March 31, 1987. This notice establishes hearing dates and locations, and a public comment period to solicit comments on the nomination, issues to be included in an environmental assessment supporting the nomination, and issues to be addressed in the site characterization plan.

DATES: The Hearings are scheduled as follows:.

1. March 30, 1983, 9:00 a.m. to 5:00 p.m., PST, Las Vegas, Nevada.
2. March 31, 1983, 10:00 a.m. to 6:00 p.m., PST, Reno, Nevada.

Written Requests to schedule time for oral presentation are due by March 20, 1983.

Written Comments are due by March 31, 1983.

ADDRESSES: The Hearings will be held at the following locations;

1. March 30, 1983, University of Nevada, Moyer Student Union Ballroom, 4505 S. Maryland Pky, Las Vega, Nevada 89109.
2. March 31, 1983, University of Nevada, Jot Travis Student Union, UNR Campus, North Virginia Street, Reno, Nevada.

FOR FURTHER INFORMATION CONTACT: Dr. Donald L. Veith, U.S. Department of Energy, Nevada Operations Office, P.O. Box 14100, Las Vegas, Nevada 89114, Telephone: (702) 734–3662.

Public Hearings

Hearings will be conducted by the Department of Energy in Las Vegas, Nevada on March 30, 1983, and in Reno, Nevada on March 31, 1983. The purpose of these hearings is to inform the public of the activities and considerations that led to this proposed nomination and to receive comments. The Department of Energy will develop an Environmental Assessment that addresses site characterization activities. Pub. L. 97–425, Section 112(b)(1)(E), identifies issues that must be addressed by the Environmental Assessment.[1] An additional purpose of the Hearings is to solicit and receive recommendations with respect to specific issues that should be addressed in the aforementioned Environmental Assessment and also specific issues that should be addressed in any Site Characterization Plan which would subsequently be issued, if and when the location is approved by the President as a candidate Site for site characterization.

Presentations

Parties interested in providing oral presentations at the Hearings, may request time not to exceed ten minutes for the purpose of delivering that presentation. Requests for scheduling of oral presentation at a particular hour will be considered but cannot be guaranteed. A typewritten copy of all the material to be presented is requested and should be delivered to the presiding officer before being presented at the Hearing. Requests for scheduled presentations must be written and mailed or delivered so as to be received at the address below no later than March 20, 1983. U.S. Department of Energy, Public Hearings on Nevada Site Characterization, Attn: Presentation Schedule, Mail Stop 555, P.O. Box 14400, Las Vegas, Nevada 89114.

Individuals who do not make advance requests to speak at a Hearing may register to speak with the presiding officer prior to the start of a Hearing. An opportunity to speak will be provided to these individuals if time permits. However, time for these unscheduled presentations will be limited, depending on the number of requests received and time available.

Written Comments

Parties may also submit written comments on the proposed nomination; the issues to be addressed in the Environmental Assessment; and the issues to be addressed by any Site Characterization Plan, if developed. These comments will be added to the Hearing transcripts for both locations and become an official Departmental record of the Hearings. Written comments should be mailed to reach the following address by March 31, 1983. U.S. Department of Energy, Public Hearings on Nevada Site Characterization, Mail Stop 555, P.O. Box 14400, Las Vegas, Nevada 89114.

Conduct of Hearings

DOE reserves the right to arrange the schedule of presentations to be heard and to establish additional procedures governing the conduct of the Hearing.

[1] Pursuant to Section 112a, proposed general guidelines for the recommendation of sites for repositories were published in the **Federal Register** on February 7, 1983 (48 FR 5670).

Questions may be asked only by those conducting the Hearing. Cross examination of persons presenting statements will not be permitted. Anyone present who wishes to ask a question at the Hearing may submit the question in writing to the presiding officer. The presiding officer will determine whether the question is relevant and whether the time limitations permit it to be answered. Any further procedural rules needed for the proper conduct of the Hearing will be announced by the presiding officer.

Transcripts of the Hearings will be made, and the entire record of the Hearings, including the transcripts will be retained by DOE and made available for inspection at the DOE Freedom of Information Office, Nevada Operations Office, P.O. Box 14400, Las Vegas, Nevada 89114, between the hours of 8:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Additional copies of the complete transcripts will also be available at the public document centers noted below. Any person may purchase a copy of the transcript for each Hearing from the reporter so identified by the presiding officer.

The record of both Las Vegas and Reno Hearings will be available for public inspection at:

U.S. Department of Energy, Public Reading Room, FOI, Room 1E–190, 1000 Independence Avenue SW., Washington, DC 20585

and the following Department of Energy field offices:

Albuquerque Operations Office, National Atomic Museum, Kirtland Air Force Base East, Albuquerque, New Mexico

Chicago Operations Office, Room 1136, 175 West Jackson Boulevard, Chicago, Illinois

Idaho Operations Office, 550 Second Street, Idaho Falls, Idaho

Nevada Operations Office, 2753 South Highland Drive, Las Vegas, Nevada

Oak Ridge Operations Office, Federal Building, Oak Ridge, Tennessee

Richland Operations Office, Federal Building, Richland, Washington

San Francisco Operations Office, Wells Fargo Building, 1333 Broadway, Oakland, California

Savannah River Operations Office, Savannah River Plant, Aiken, South Carolina.

For the Department of Energy March 2, 1983.

Donald Paul Hodel,

Secretary of Energy.

BILLING CODE 6450–01–M

ENVIRONMENTAL PROTECTION AGENCY

[OPPM—FRL 2316]

Agency Forms Under OMB Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 3507(a)(2)(B) of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.) requires the Agency to publish in the Federal Register a notice of proposed information collection requests that have been forwarded to the Office of Management and Budget (OMB) for review. The information collection requests listed are available to the public for review and comment.

FOR FURTHER INFORMATION CONTACT: David Bowers; Office of Standards and Regulations; Information Management Section (PM–223); U.S. Environmental Protection Agency; 401 M Street, SW.; Washington, D.C. 20460; telephone (202) 382–2742 or FTS 382–2742.

SUPPLEMENTARY INFORMATION:

Grants Programs

- Title: EPA Form 5700–31 "Application for Federal Assistance (short form)" (EPA ID 0873).

Abstract: State governments use the "Application for Federal Assistance (short form)" to apply for financial support under EPA State Management Assistance Grants. This form provides EPA with the information it needs to award a grant and to assure grantee compliance with Federal requirements.

Respondents: State governments.

BILLING CODE 6560–50–M

[A–10 FRL 2316–3]

Issuance of PSD Permit to Washington Water Power Co., Creston Generating Station, Creston, Washington; Region 10

Notice is hereby given that on November 17, 1982, the Environmental Protection Agency (EPA) issued a Prevention of Significant Deterioration (PSD) permit to The Washington Water Power Company (TWWPCo) to construct a four unit coal-fired generating station (2280 mw) near Creston, Washington.

This permit has been issued under EPA's Prevention of Significant Air Quality Deterioration (40 CFR 52.21) regulation, subject to certain conditions specified in the permit.

On December 15, 1982 attorneys for TWWPCo filed a petition with the Administrator for review of the PSD permit. On January 24, 1983 the petition was withdrawn by the company prior to any rulings by the Administrator. The permit is therefore final.

Under Section 307(b)(1) of the Clean Air Act, judicial review of the PSD Permit is available only by the filing of a petition for review in the Ninth Circuit Court of Appeals within 60 days of today. Under Section 307(b)(2) of the Clean Air Act, the requirements which are the subject of today's notice may not be challenged later in civil or criminal proceedings brought by EPA to enforce these requirements.

Copies of the permit are available for public inspection upon request at the following location: Environmental Protection Agency, Region 10, 1200 Sixth Avenue, Room 11D, M/S 532, Seattle, Washington 98101.

Dated: February 18, 1983.

John R. Spencer,

Regional Administrator.

BILLING CODE 6560–50–M

FEDERAL HOME LOAN BANK BOARD

[No. AC-225]

Fountainebleau Federal Savings & Loan Association, Slidell, La., Final Action; Approval of Conversion Applications

Notice is hereby given that on February 25, 1983, the Office of General Counsel of the Federal Home Loan Bank Board, acting pursuant to the authority delegated to the General Counsel or his designee, approved the application of Fountainebleau Federal Savings and Loan Association, Slidell, Louisiana, for permission to convert to the stock form of organization. Copies of the application are available for inspection at the Secretariat of said Corporation, 1700 G Street NW., Washington, D.C. 20552 and at the Office of the Supervisory Agent of said Corporation at the Federal Home Loan Bank of Little Rock, 1400 Tower Building, Little Rock, Arkansas 72201.

Dated: March 1, 1983.

By the Federal Home Loan Bank Board.

J. J. Finn,

Secretary.

BILLING CODE 6720-01-M

FEDERAL MARITIME COMMISSION

[Docket No. 83-12]

Prudential Lines, Inc. v. Farrell Lines, Inc.; Notice of Filing of Complaint and Assignment

Notice is given that a complaint filed by Prudential Lines, Inc. against Farrell Lines, Inc. was served February 25, 1983. Complainant alleges that respondent has violated sections 16, 17 and 18 of the Shipping Act, 1916, by operating under the subterfuge of an all water tariff under Rate Agreement No. 10281 while actually performing an overland intermodal service without proper tariff authority.

This proceeding has been assigned to Administrative Law Judge William Beasley Harris. Hearing in this matter, if any is held, shall commence within the time limitations precribed in 46 CFR 502.61. The hearing shall include oral testimony and cross-examination in the discretion of the presiding officer only upon proper showing that there are genuine issues of material fact that cannot be resolved on the basis of sworn statements, affidavits, depositions, or other documents or that the nature of the matter in issue is such that an oral hearing and cross-examination are necessary for the development of an adequate record.

Francis C. Hurney,

Secretary.

BILLING CODE 6730-01-M

FEDERAL TRADE COMMISSION

Study of Blue Sky Securities Laws; Survey of State Registrations of Securities

AGENCY: Federal Trade Commission.

ACTION: Application to OMB under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) for clearance of a survey of State registration decisions on common stocks.

SUMMARY: The purpose of the survey is to determine which of the securities issued in 1976 were registered in the individual states. The survey will form part of a study conducted by the FTC's Bureau of Economics: Blue Sky Securities Laws As Investor Protection Regulation. Data from the survey will be analyzed in conjunction with risk and rate of return observations on these securities to assess the impact of State securities regulations on the distribution of securities and on investor welfare.

DATES: Comments on the proposed survey must be submitted on or before April 6, 1983.

ADDRESS: Send comments to Ms. Nell Minow, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 3228, Washington, D.C. 20503. Copies of this application may be obtained from: Public Reference Branch, Room 130, Federal Trade Commission, Washington, D.C. 20580.

FOR FURTHER INFORMATION CONTACT: John C. Hilke, Division of Industry Analysis, Bureau of Economics, Federal Trade Commission, Washington, D.C. 20580 (202) 634-7688.

By direction of the Commission.

John H. Carley,

General Counsel.

BILLING CODE 6750-01-M

GENERAL SERVICES ADMINISTRATION

National Archives and Records Service

Advisory Committee on Preservation; Meeting

Notice is hereby given that the Long Range Policy and Planning Subcommittee of the National Archives and Records Service Advisory Committee on Preservation will meet on March 21, 1983 from 10:00 a.m. to 4:00 p.m., and March 22, 1983 from 9:00 a.m. to 4:00 p.m. in Room 105, National Archives Building, Washington, D.C. This meeting will be devoted to machine-readable pre-accessioning possibilities as related to the mission of the National Archives.

This meeting will be open to the public. For further information call Alan Calmes, 202-523-3159.

Dated: February 18, 1983.

Robert M. Warner,

Archivist of the United States.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Contol

Project Grants for Preventive Health Services—Childhood Immunization; Program Announcement

I. Introduction

A. Purpose and Authority

The purpose of the Immunization Program is to prevent the occurrence and transmission of diseases preventable through immunizations. Immunization grants are awarded to States and local governments to assist in establishing integrated and comprehensive immunization delivery systems capable of making immunizations for vaccine-preventable childhood diseases available to every child in the United States and to assist in maintaining interruption of indigenous measles transmission.

Finanical and direct (i.e., "in lieu of cash") assistance as described in the Catalog of Federal Domestic Assistance Number 13.268 is authorized under Section 317 of the Public Health Service Act (42 U.S.C. 247b) as amended.

Regulations governing the implementation of this legislation are covered under 42 CFR Part 51b.

B. National Program Goals

1. Reduce morbidity and mortality due to vaccine-preventable diseases of childhood.

2. Maintain interruption of indigenous measles transmission.

3. Maintan 90 percent immunization levels for school children under age 15 against measles, poliomyelitis, diphtheria, tetanus, and rubella. Maintain 95 percent immunization levels for school enterers and 90 percent immunization levels for children enrolled in licensed day-care centers against measles, poliomyelitis, diphtheria, tetanus, pertussis, rubella, and mumps.

4. Develop, test, and implement systems for use in the States to ensure that 90 percent or more of children complete basic immunizations by age 2.

C. Eligible Applicants

Grant funds are available to assist official health agencies of any State or local government, the District of Columbia, or United States Territory to plan and carry out an immunization program directed toward vaccine-preventable diseases of childhood. For purpose of these guidelines, United States Territories include: the Commonwealth of Puerto Rico, the Virgin Islands, Guam, the Trust Territory of the Pacific Islands, the Northern Mariana Islands, and American Samoa. Before making a grant to a local public health agency, the granting agency of the Public Health Service (PHS) will discuss the proposed program with the State health authority.

II Application Procedure

A. Forms

Application for grants must be made on standard project application forms (PHS 5131) which may be obtained from the appropriate Health and Human Services (HHS) Regional Office as set forth below.

B. Consultation

Consultation and assistance in developing applications and program plans are available through HHS Regional Offices.

C. Budget Information

Applications shall be submitted for a 1-year budget period and a 5-year project period. Although there are no specific matching fund requirements, information must be provided in the narrative portion of the application on the expenditures for childhood immunization programs made from Federal, State, and other funds obligated by the applicant during its most recent accounting period, a description of the services provided by the applicant for this accounting period, and estimates of support for future accounting periods including, at a minimum, funds to be available during the budget period for which grant support is requested. Information which justifies or explains budget items must also be included in the narrative part of the application; in some instances, information on commitment of applicant support of specific items (such as vaccine) during the budget period may be required. Applicant contributions to the program do not need to be provided on the budget pages of the application unless the applicant desires that these contributions be included as part of the approved budget on the grant award.

D. Submission of Applications

Information about the timing and routing of applications and the consequences of late submission will be included in each request for application from the appropriate HHS Regional Office as set forth below.

Applications are subject to review as governed by OMB Circular A–95 and regulations (42 CFR Part 122—amendment published 47 FR 3551, January 26, 1982—and Part 123) implementing the National Health Planning and Resource Development Act of 1974.

E. Program Narrative

New applications must include a description of the need for project grant support, the long- and short-term objectives of the proposed program, the activities which will be undertaken to accomplish the objectives (including the timing of such actions), the methods which will be employed to evaluate program activities, and any other information which will support the request for grant assistance. Continuation applications need only provide new short-term objectives for the new budget period, a budget justification, a progress report on activities performed during the prior budget period, and a description of any changes in the method of operation, long-term objectives, need for grant support, and evaluation procedures compared to information provided in previous applications.

III. Requirement of an Approved Program

A. Assessment of the Need for a Program

Estimates of the target population must be developed which include susceptible adolescents and young adults in high schools and colleges.

B. Objective Setting

1. Objectives must be established which are specific, measurable, and realistic.

2. Objectives must be related to the National Program Goals, although specific targets will depend upon the level of immunizations currently being achieved in each project area.

3. Both short-term objectives (1 year), which will be reached during the ensuing funding period, and long-term objectives (2 to 3 years) must be developed.

C. Methods of Operation

1. Service Delivery.

This involves a plan to assure that children found to be susceptible *begin* and *complete* their immunizations. Use of several or all of the approaches listed below is indicated:

Required—Systematic immunization of susceptible children at school entry to ensure 95 percent immunization levels against measles, mumps, rubella, polio, diphtheria, pertussis, and tetanus.

Recommended—Use of a standard personal immunization record card should be implemented and accepted as the official record for all preschoolers which will meet immunization requirements at school entry.

Recommended—Systematic and routine immunization of susceptible preschool children in Head Start; Early and Periodic Screening, Diagnosis and Treatment Program; Special Supplemental Food Program for Women, Infants, and Children; and recipients of Aid to Families with Dependent Children (AFDC) and their siblings.

Recommended—Scheduling of special immunization clinics in defined geographic areas in population groups of particularly high susceptibility.

Recommended—Close liaison with neighborhood health centers, Health Maintenance Organizations, health department immunization and well-baby clinics, and other health care providers to ensure that needed immunizations are provided as part of routine primary health care.

2. Assessment of Immunization Status.

A. School

Required—An annual determination must be made by December 31 of each year of the immunization levels of children entering school using procedures outlined in The Guidelines for Assessing Immunity Levels, Centers for Disease Control (CDC), August 1978.

Required—Procedures to assess the reliability and validity of assessment data must be instituted.

Required—Throughout the school year, immunization records of incoming transfer students at all grade levels must be reviewed.

Recommended—A standard Statewide school immunization record should be adopted and implemented. The prototype form developed by PHS is recommended.

B. Preschool

Required—An annual inventory must be conducted of the immunization records of children attending licensed day-care centers to ensure appropriate documentation of vaccines and that 90 percent immunization levels have been attained against measles, mumps, rubella, polio, diphtheria, pertussis, and tetanus.

Required—Systematic review of immunization status of all children under age 2 and new enrollees under age 5 served in public clinics must be conducted.

Required—Immunization records of all new enrollees in licensed day-care centers throughout the year must be reviewed.

Recommended—Where records are not being kept by day-care centers, Head Start programs, health departments, etc., efforts should be made to establish a recordkeeping system. A standard immunization record should be implemented which is compatible with the standard school immunization record card. The prototype form developed by PHS is recommended.

Recommended—Specific plans to bring delinquents back on schedule should be developed.

Recommended—Private physicians and other health-care providers should be encouraged to review systematically the immunization status of the children they serve.

Recommended—Use of a standard personal immunization record card should be implemented and accepted as the offical record for preschoolers which will meet immunization requirements at school entry. The prototype form developed by PHS is recommended.

Recommended—Special surveys for other preschool population groups such as in Head Start programs, unlicensed day-care centers, and recipients of AFDC and their siblings should be considered.

3. Surveillance and Outbreak Control.

Required—A plan for surveillance of vaccine-preventable diseases of childhood that includes morbidity and mortality reporting, as well as field and laboratory investigations, must be developed and implemented.

Required—Procedures must be established for prompt review of the data collected from the morbidity surveillance system to allow for immediate response to all occurrences of suspected measles, diphtheria, and polio cases upon notification.

Required—For controlling measles outbreaks, there must be a procedure that covers all of the following steps:

1. Immediate response to the suspected occurrence of measles to determine compatibility with measles.

2. Confirmation of the diagnosis using the standard clinical classification and laboratory testing where possible.

3. Evaluation of the extent of the outbreak.

4. Identification of a zone of risk which includes all susceptible persons who might possibly have had contact with any suspect cases or incubating contacts.

5. Initiation of necessary action to immunize all persons at risk and to limit contact of actively transmitting cases with other susceptibles, including susceptible adolescents and young adults.

6. Evaluation of effectiveness.

Required—Improvement of the system for monitoring vaccine associated reactions, including a mechanism for responding to persons with vaccine-related complaints, as outlined in Monitoring System for Adverse Reactions to Vaccination, CDC, October 1978. The system should include:

1. All reports from both the public and private sectors, should be made through the State health department to the Centers for Disease Control.

2. All forms ("Report of Illness Following Vaccination," CDC 10.36, 5-79) should be reviewed for completeness and accuracy before forwarding to the Centers for Disease Control.

3. Only cases that fulfill the following criteria should be forwarded to the Centers for Disease Control: illness which began within 4 weeks of receipt of vaccine and was severe enough to require hospitalization or a visit to a physician or other medical care personnel.

4. A report of illness following vaccination which resulted in a death should be reported immediately to the Centers for Disease Control at (404) 329-1080.

Recommended—Appropriate disease case investigation forms should be developed and used.

Recommended—Improvement of pertussis surveillance so that at least 50 percent of cases reported have case investigation forms completed (form CDC 71.14A).

4. Maintenance of Immunization Levels.

Required—A plan must be developed to implement a system to ensure that 90 percent of children born each year complete their immunization by age 2. Unless there is in existence a system which can achieve this goal, such a system must include the following activities:

1. Provider-based tickler systems (public and private) for the recall of children for immunizations.

2. Adoption of a standard immunization record card for the State.

3. A hospital-based immunization/education program for new mothers.

5. Information/Education.

Required—A plan must be developed and implemented for promotion of immunization for children and other appropriate population groups.

Required—A plan must be developed and implemented for informing and seeking support from health professionals to:

1. Encourage immediate reporting of vaccine-preventable diseases.

2. Institute tickler systems for the recall of children for immunizations.

3. Use standard immunization record cards recommended by State health departments.

6. Enforcement of School Immunization Laws.

Required—A plan must be developed and implemented to ensure that every effort is made to obtain compliance with existing school and day-care center immunization laws/regulations.

7. Vaccine Storage, Supply, Delivery, and Inventory.

Required—A plan must be developed and implemented to maintain adequate storage of vaccine and a system for monitoring vaccine distribution and usage among physicians, health departments, schools, and other health-care providers, and to monitor vaccine expiration dates to reduce wastage to less than 5 percent.

8. Citizen Participation.

Recommended—A plan should be developed for active citizen participation in the planning and implementation of the various components of the program.

D. Evaluation

Measures must be established to evaluate the achievement of all project objectives and elements listed under Item III.C.—"Requirement of an Approved Program, Methods of Operations."

IV. Criteria for Review and Award of Grants

A. Each application will be reviewed and evaluated according to the following criteria:

1. Is each program element addressed by the applicant? Will the proposed activities result in a balanced program of service delivery, surveillance of disease and adverse events, assessment, outbreak control, maintenance of immunization levels, and public and professional education?

2. Are the budget requests and proposed use of project funds appropriate and reasonable for a balanced program?

3. Are the project objectives specific, measurable, realistic, and related to the national goals?

4. If the applicant has previously had an immunization grant, does the application detail progress toward previously established objectives and satisfactorily explain any areas in which the objectives were not met?

5. Does the application describe how all of the grant requirements will be met to ensure appropriate provision of information relating to risks and benefits of vaccination to all vaccinees (parents or guardians) receiving vaccination, as stated in Item VI?

6. does the application describe the method for attaining or plans to attain the required activities as stated under Item III.C., "Requirement of an Approved Program, Methods of Operations."

V. Reporting Requirements

Reports are to be submitted to the HHS Regional Offices. Reporting forms and a description of procedures are available from the HHS regional Offices.

A. Monthly

1. Forms reporting adverse events following immunizations should be sent to HHS Regional Offices within 10 days after the end of the month.

B. Quarterly

1. Tabulation of vaccine distributed and vaccinations administered by antigen and age group (<1, 1–4, 5–9, 10–14, 15–19, 20+) within 30 days after the end of the quarter in which they are given or distributed. This includes a tabulation of project vaccine administered by private physicians by antigen and the above age groups.

2. Narrative progress reports must be submitted within 30 days after the end of each calendar quarter (March 31, June 30, September 30, and December 31). Narratives should adress progress being made in achieving project objectives (and methods being used to resolve problems) and other information which, in the grantee's opinion, may be useful to the HHS Regional Office, CDC, or other projects.

C. Annually

1. Antigen-specific projections of public sector vaccine to be administered by quarter (by September 1 of each year).

2. Immunization level assessment data:

a. School-enterers survey by March 31 of each year.

b. Day-care survey by March 31 of each year.

In addition, we encourage health agencies to continue to supplement normal MMWR weekly reporting procedures for measles with detailed telephone summaries of measles cases and related investigations.

VI. Use Of Information Statements On Risks and Benefits of Vaccination

A. In order to assure appropriate provision of information relating to risks and benefits of vaccination in programs for which funds are made available pursuant to this grant, grantees shall take the following steps:

1. Establish procedures for providing copies of the appropriate "Important Information" forms to all vaccinees (parents or guardians) receiving vaccinations in public clinic settings and to private physicians for use if they elect to use the forms in accordance with the conditions specified in the "Private Physician Certification" form. A copy of the "Private Physician Certification" form is available from CDC. Grantees may include appropriate health department identification on the forms. Any other addition to the forms, or variations from the language or format of them, must have the prior written approval of the Director, Centers for Disease Control.

2. Arrange for documentation of the receipt by vaccinees (parent or guardians) of the "Important Information" form relating to the disease or diseases for which vaccines are purchased or furnished as specified above. The documentation shall consist of the signed lower portion of the "Important Information" forms, or a separate signature card or log sheet which contains the following:

"I have read the information contained in the 'Important Information' form(s) about the disease(s) and the vaccine(s). I have had a chance to ask questions which were answered to my satisfaction. I believe I understand the benefits and risks of the vaccine(s) and request that the vaccine(s) indicated below be given to me or to the person named below for whom I am authorized to make this request."

This statement must appear at the top of the signature card or log sheet and the form must include at a minimum the following entries: Name, address, date of birth, age, type of vaccine(s), clinic identification, date of vaccination, site of vaccination, manufacturer and lot number, signature of person to receive vaccine or person authorized to make the request, date of signature, and date printed on the appropriate "Important Information" form.

3. Obtain a signed copy of the "Private Physician Certification" form from all physicians to whom the grantee furnishes vaccine which is to be used in private practice and which was purchased or furnished as described above.

4. Establish procedures for the retention of the signed portion of the "Important Information" forms and "Private Physician Certification" forms, and other types of approved documentation, as detailed in the memorandum from the Director, Centers for Disease Control, dated September 1, 1982. All documentation shall be available to the Director, Centers for Disease Control, upon written request.

5. In the case of a school-based program, or other programs where the information form is to be read and signed in advance of the vaccination by a parent, guardian, or other authorized person who will not be present at the vaccination site when the vaccination is given, procedures shall be established and made known for answering questions by telephone or otherwise.

B. The grantee must use the most current important information forms for measles, mumps, rubella, and combinations thereof, inactivated polio (IPV), oral polio (OPV), and diphtheria, tetanus, and pertussis (DTP).

C. As indicated above, grantees must make copies of the information forms available to private physicians who receive vaccine purchased or furnished pursuant to immunization project grant awards. An exception to the requirement for use of the information forms may be made only where vaccine is administered in the usual private physician-patient situation; i.e., by a physician in the course of discharging his/her responsibilities in the treatment of an individual patient according to scheduling and other procedures normally used in the private practice of medicine. Thus, the information forms must be used in clinic situations even though the clinics are supervised by private physicians.

D. At each immunization clinic, one or more persons shall be available to take responsibility for ensuring that prospective vaccinees (parents or guardians) can read the information provided and to answer questions about the vaccine, its expected benefits, its normal risks, its contraindications (special warnings to vaccinees with low resistance to infections), alternatives to vaccination, and to provide advice regarding medical assistance in the event of suspected vaccine reactions. If an immunization clinic serves significant numbers of people for whom English is not a first language, the written information shall be available in the native language. CDC will provide prototype information forms in English, Spanish, French, Vietnamese, and Chinese.

At each immunization clinic, the person administering the "Important Information" form(s) must routinely ask all vaccinees (parents or guardians) receiving vaccinations if they understand the information provided to them and if they have any questions.

E. These required steps may be supplemented as appropriate with:

1. The provision of pamphlets and the display of posters at clinic sites and physicians' offices on risks and benefits of immunization.

2. The use of audio or audiovisual techniques.

3. Preclinic publicity through the mass media and through other information channels.

VII. Use of Grant Funds

A. Grant funds may be used for costs associated with planning, organizing, and conducting childhood immunization programs and for the purchase of vaccine and toxoids to protect against polio, measles, mumps, rubella, diphtheria, pertussis, and tetanus. Vaccine will be available "in lieu of cash" if requested by applicants. Monovalent mumps vaccine purchased with grant funds may only be used in the population under age 7. (The previous restriction for combined measles, mumps, and rubella is deleted.)

B. No charge may be made to patients for the cost of vaccines provided through project grant funds, whether administered in public clinics or by private physicians. No one in a public clinic may be denied vaccine provided through project grant funds for failure to pay an administration fee.

C. Grant funds may be used to supplement (not substitute for) existing immunization operations and services.

Dated: February 28, 1983.

William H. Foege, M.D.,

Director, Centers for Disease Control.

BILLING CODE 4160-18-M

Cooperative Agreements; Preventive Health Services-Tuberculosis Control; Availability of Funds for Fiscal Year 1983

The Centers for Disease Control (CDC) announces the availability of funds in Fiscal Year 1983 for Cooperative Agreements for Tuberculosis Control Programs, Catalog of Federal Domestic Assistance Number 13.116. This program is authorized by Section 317(a) of the Public Health Service (PHS) Act (42 U.S.C. 247b), as amended. Regulations governing programs for preventive health services are codified at 42 CFR Part 51b. Subpart A contains general provisions relating to these programs. A new subpart governing tuberculosis control programs is being developed.

Eligible applicants for this program are the official public health agencies of State and local governments, including the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, the Trust Territory of the Pacific Islands, the Northern Mariana Islands, and American Samoa. However, because of the limited funds available in Fiscal Year 1983, award will be limited to support of programs in States which reported 100 or more new cases of tuberculosis for each of the years 1980 and 1981 or had an incidence rate greater than the national tuberculosis incidence rate reported in 1981 (11.9 per 100,000 population) for both 1980 and 1981, and to selected urban areas as described below.

Cooperative agreements may also be awarded directly to a local health agency serving a high-priority urban area with a city of at least 250,000 population which reported 200 or more new cases of tuberculosis in each of the years 1980 and 1981 or had an incidence rate greater than the rate for U.S. cities over 250,000 population in 1981 (24 per 100,000 population) for both 1980 and 1981. Although certain local health agencies will be eligible for direct funding, eligible local health agencies within a State are strongly encouraged to include their request for assistance in the State application to ensure effective coordination of State/Local/Federal resources.

State and local applicants must show that tuberculosis cooperative agreement fund will be directed primarily to support outreach activities in high incidence population groups and selected geographical areas with: (1) A significant level of tuberculosis; and (2) an incidence rate greater than the State as a whole.

Applications meeting these requirements will be evaluated and priority for funding of new projects established, based upon the following factors, using data for both 1980 and 1981: (1) The total number of cases reported; (2) the number of bacteriologically confirmed cases reported; (3) the bacteriologically substantiated incidence rate of disease; (4) the number of tuberculosis cases among children 0–14 years of age; (5) significant levels of tuberculosis among individuals who were born in countries with high rates of tuberculosis; and (6) a significant increases in tuberculosis morbidity.

In addition, the overall potential effectiveness of the applicant's plan of operation in meeting the objectives of the proposed project will be considered in evaluating and prioritizing applications. These factors were chosen to establish the extent of an applicant's tuberculosis problem and incorporate

the intent of Congress for expenditure of these funds.

Purpose and Cooperative Activities

A. Purpose

The national goal in tuberculosis control is to reestablish an annual reduction of reported tuberculosis cases of at least 5 percent. The minimum short-term objectives needed to meet this goal include:

1. At least 75 percent of all initially infectious patients will become noninfectious (convert their sputum from positive to negative) within 3 months of starting treatment, and at least 95 percent will become noninfectious with 6 months.

2. At least 90 percent of all reported cases of tuberculosis will complete an American Thoracic Society/Centers for Desease Control (ATS/CDC) recommended regimen of antituberculosis drug therapy.

3. At least 95 percent of all close contacts to infectious cases will receive examinations, with at least 95 percent of all those under 15 years of age and 75 percent of all infected persons 15 years of age and over placed on preventive treatment.

4. For close contacts and other high risk individuals placed on preventive therapy, at least 90 percent of those persons under 15 years of age and 75 percent of all others will complete a recommended course of preventive therapy.

B. Cooperative Activities

The collaborative and programmatic involvement of recipients of funds and CDC is as follows:

1. *Recipient Public Health Agency Activities.* a. Reporting of all tuberculosis cases, suspects, and significant laboratory results by health care providers and laboratories in both the public and private sectors; analysis of reporting trends; and implementation of updated public health record systems needed to monitor the current care status of patients, suspects, contacts, and high-risk infected persons in the community.

b. Deployment of outreach personnel for followup of patients and their contacts; application or intensification of directly administered daily or intermittent drug treatment.

c. Providing tuberculosis diagnostic, treatment, and prevention services adapted to the characteristics of tuberculosis population subgroups; and implementation of special approaches to meet the needs of immigrants with inherent language and cultural barriers.

d. Development or continuation of cost effective, medically sound tuberculosis medical care and public health policies. A major policy component should be the use of recommended ATS/CDC treatment regimens.

e. Epidemiological analysis and rapid followup for laboratory reports of drug resistant organisms.

f. Program evaluation and special epidemiological investigation/analysis of unique tuberculosis problems such as tuberculosis in foreign born, drug resistance, etc. Activities should include detailed investigation of all cases in children to identify causes of community control failure and to design more effective prevention and control actions.

2. *Centers for Disease Control Activities.* a. Collaboration in the development and operation of tuberculosis case reporting and program management record systems. Assistance in analysis and evaluation of morbidity, mortality, and program management information.

b. Assistance in improving program performance through onside assistance and the provision of training materials for use by project staff.

c. Provision of onsite technical assistance in the planning, operation, and evaluation of program activities.

d. Provision of medical and programmatic consultation through telephone and written consultation.

e. Development and dissemination of public health and medical policies and recommendations for the diagnosis, treatment, and prevention of tuberculosis (including the development of joint ATS/CDC statements). Development of patient education and motivation materials.

Quarterly and/or semiannual narrative and performance statistical reports may be required subject to approval by the Office of Management and Budget (OMB). Financial status reports are required no later than 90 days after the end of each budget period. Final financial status and progress reports are required 90 days after the end of a project period.

During fiscal year 1983, $5 million will be available to fund between 25 and 35 new cooperative agreements and continue 8 to 12 agreements initiated in 1982. Individual awards are expected to range from $30,000 to $500,000.

Applications should be submitted for a 1-year budget period and a 1 to 5 year project period. Continuation awards within the project period will be made by CDC on the basis of satisfactory progress in meeting project objectives and on the availability of funds. Funding estimates outlined above may vary and are subject to change due to budgetary uncertainties.

Cooperative agreement funds may be used to support both local personnel and the employment of individuals in direct assistance (i.e., "in lieu of cash") positions under Section 317 of the Public Health Service Act, and to purchase supplies and services directly related to the public health tuberculosis outpatient activities, particularly mobidity surveillance, outreach, and assessment. Project funds may not be used to supplant State or local funds available for tuberculosis control or to support construction costs or inpatient care.

New applications for a cooperative agreement must include a narrative which summarizes: (1) The background and need for support including information that relates to factors by which the applications will be evaluated; (2) both long- and short-term objectives of the proposed project which are consistent with the national goal outlined above, and which are specific, measurable, realistic, and time-framed; (3) the activities and methods which will be employed to accomplish the objectives (of special importance will be the employment of outreach workers in high incidence areas for use in patient followup and directly administered therapy programs); (4) the methods which will be employed to evaluate program activities; (5) fiscal information of the applicant pursuant to provisions of Section 317(b)(2) of the PHS Act, although there are no matching or cost participation requirements; and (6) any other information which will support the request for assistance.

Continuation applications need only provide new short-term objectives for the new budget period; a progress report on activities performed during the prior budget period; a description of any changes in the method of operation, long-term objectives, need for grant support, and evaluation procedures compared to information provided in previous applications; and fiscal and other supporting information as indicated in (5) and (6) above.

The original and one copy of the application must be submitted to the address in 1.a. below on or before 4:30 p.m. (e.d.t.) on May 25, 1983. Applications may meet the deadline by either delivering or mailing the application on or before that date, provided the following conditions are met:

1. *Mailed applications.* Applications mailed through the U.S. Postal Service shall be considered as meeting the deadline if they are either:

a. Received on or before the deadline date by Leo A. Sanders, Chief, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control, 255 E. Paces Ferry Rd., NE., Room 107A, Atlanta, Georgia 30305, or

b. Sent by first class mail, postmarked on or before the deadline date, and received by the granting agency in time for submission to the independent review group. (Applicants must be cautioned to request a legible U.S. Postal Service postmark or to use U.S. Postal Service express mail or certified or registered mail and obtain a legible dated mailing receipt from the U.S. Postal Service. Private metered postmarks shall not be acceptable as proof of timely mailing.)

2. *Applications submitted by other means.* Applications submitted by any means except mailing first class through the U.S. Postal Service shall be considered as meeting the deadline only if they are physically received at the place specified in paragraph 1. above before close of business on or before the deadline date (4:30 p.m. e.d.t., May 25, 1983).

3. *Late applications.* Applications which do not meet the criteria in either paragraph 1. or 2. above are consdidered later applications. In that event the application will not be considered in the current competition.

4. *Copies of Applications.* A copy of the application should be simultaneously submitted to the appropriate Department of Health and Human Services Regional Office listed below. For applicants who are other than State agencies, the appropriate State health agency should be notified of the submission of the application.

Applications are subject to review as governed by OMB Circular A–95 and regulations (42 CFR Part 122—amendment published 47 FR 3551, January 26, 1982—and part 123) implementing the National Health Planning and Resource Development Act of 1974. Information on application procedures, copies of application forms, and other material may be obtained from Leo A. Sanders, Chief, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control, at the address in paragraph 1.a. above, telephone (404) 262–6575, or FTS: 236–6575. Technical assistance may be obtained from John J. Seggerson, Division of Tuberculosis Control, Center for Prevention Services, Centers for Disease Control, Atlanta, Georgia 30333, telephone (404) 329–2506, or FTS: 236–2506. Technical assistance is also available from the appropriate Department of Health and Human Services Regional Office.

Dated: February 28, 1983.

William H. Foege,

Director, Centers for Disease Control.

BILLING CODE 4160–18–M

Public Health Service

Privacy Act of 1974; Termination of Three Systems of Records

AGENCY: Public Health Service, HHS.

ACTION: Notification of termination of three systems of records: 09–25–0043, "Clinical Research: Pharyngeal Development Patients, HHS/NIH/NIDR"; 09–25–0123, "Clinical Research: Clinical Trials Dealing with Fertility-Regulating Methods, HHS/NIH/NICHD"; and 09–25–0127, "Clinical Trials Dealing with Phototherapy for Neonatal Hyperbilirubinemia, HHS/NIH/NICHD."

SUMMARY: In accordance with the requirements of the Privacy Act, the Public Health Service (PHS) is publishing notice of termination of three systems of records maintained by the National Institutes of Health (NIH): 09–25–0043, "Clinical Research: Pharyngeal Development Patients, HHS/NIH/NIDR"; 09–25–0123, "Clinical Research: Clinical Trials Dealing with Fertility-Regulating Methods, HHS/NIH/NICHD"; and 09–25–0127, "Clinical Trials Dealing with Phototherapy for Neonatal Hyperbilirubinemia, HHS/NIH/NICHD."

FOR FURTHER INFORMATION CONTACT: Dr. Kenneth Thibodeau, NIH Privacy Act Coordinator, Building 31, Room 3B07, 9000 Rockville Pike, Bethesda, MD 20205, or call 301–496–4606.

SUPPLEMENTARY INFORMATION: NIH has terminated three systems of records: 09–25–0043, "Clinical Research: Pharyngeal Development Patients, HHS/NIH/NIDR", maintained by the National Institute of Dental Research (NIDR); 09–25–0123, "Clinical Research: Clinical Trials Dealing with Fertility-Regulating Methods, HHS/NIH/NICHD"; and 09–25–0127, "Clinical Trials Dealing with Phototherapy for Neonatal Hyperbilirubinemia, HHS/NIH/NICHD", both maintained by the National Institute of Child Health and Human Development (NICHD). The study supported by system 09–25–0043 has been completed and the records in this system have been destroyed. Data collection in systems 09–25–0123 and 09–25–0127 is complete, and NICHD has removed from the records all information identifying individuals. Data will be used for aggregate analysis only, and there will be no further studies under these systems. Systems of records 09–25–0043, 09–25–0123, and 09–25–0127 were last published in the **Federal Register** on October 13, 1982 (47 FR pp. 45800–01, 45831–32, and 45834–35, respectively).

Dated: March 2, 1983.

James B. Wyngaarden,

Director, National Institutes of Health.

BILLING CODE 4140–01–M

Office of the Secretary

Advisory Council on Social Security; Public Hearing

AGENCY: Office of the Secretary, HHS.

ACTION: Notice of public hearing.

SUMMARY: The Secretary of Health and Human Services announced on September 10, 1982 the establishment of the Advisory Council on Social Security. The Council is charged to place particular emphasis on a review of the Medicare program, and to perpare and submit reports on its findings and recommendations.

In an effort to obtain the views of interested organizations and individuals on the subject of physician assignment

in Medicare, the Council will hold a 1-day public hearing in Washington, D.C. on April 6, 1983. One-day hearings have been previouly announced in the **Federal Register** in different sites around the country. This is the first public hearing, however, which will focus on a single topic.

ADDRESS: This hearing will be held in the first floor auditorium of the Hubert H. Humphrey Building, 200 Independence Avenue, SW., Washington, D.C. 20201, and will begin at 9:00 a.m.

FOR FURTHER INFORMATION CONTACT: Thomas R. Burke, Executive Director, Advisory Council on Social Security, 200 Indedpendence Avenue, SW., Washington, D.C. 20201; telephone (202) 755–8670/71.

SUPPLEMENTARY INFORMATION: This hearing will address the matter of physician assignment exclusively. Assignment occurs when a physician agrees to accept the Medicare allowed charged as payment in full and to bill the beneficiary only for deductible and coinsurance amounts related to that charge. If the physician chooses not to accept assignment, the beneficiary is responsible for all charges beyond the Medicare allowable payment. The decision to accept assignment is made by the physician on a claim-by-claim basis.

For the hearing, the Council welcomes comments, observations, suggestions and recommendations on this significant feature of the Medicare program.

The hearing is open to the public. Attendance will be limited to the space available. Interested parties are invited to present testimony on this subject only; however, only those requesting in advance, preferably in writing, to appear will be permitted to present oral statements. Presenters should submit, 5 days in advance, 20 copies of their presentation, and should bring an additional 50 copies to the hearing to be made available to the public. Oral presentation should summarize the written statement, and will be limited to a maximum of 5 minutes. Other written material can be submitted for the record. Submit written requests to present testimony to the Advisory Council on Social Security, ATTN: Public Hearing, 200 Independence Avenue, SW., Washington, D.C. 20201, or telephone (202) 755–8670/71. The designated chairperson or the Executive Director reserves the right to determine order of presentation, but will make every effort, within available time, to hear all who wish to be heard.

Sign language interpreting services will be provided if requested in advance.

Records will be kept of all public hearings and will be available for public inspection at the Office of the Administrative Officer, Advisory Council on Social Security, Room 317–H, HHH Building, 200 Independence Avenue, SW., Washington, D.C. 20201.

Thomas R. Burke,

Executive Director.

BILLING CODE 4120–03–M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. N–83–1211]

Notice of Submission of Proposed Information Collection to OMB

AGENCY: Office of the Secretary, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below has been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

ADDRESS: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and should be sent to: Robert Neal, OMB Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, D.C. 20503.

FOR FURTHER INFORMATION CONTACT: David S. Cristy, Acting Reports Management Officer, Department of Housing and Urban Development, 451 7th Street, S.W., Washington, D.C. 20410, telephone (202) 755–5310. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposal described below for the collection of information to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. Chapter 35).

The Notice lists the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the agency form number, if applicable; (4) how frequently information submissions will be required; (5) what members of the public will be affected by the proposal; (6) an estimate of the total number of hours needed to prepare the information submission; (7) whether the proposal is new or an extension or reinstatement of an information collection requirement; and (8) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Copies of the proposed forms and other available documents submitted to OMB may be obtained from Davis S. Cristy, Acting Reports Management Officer for the Department. His address and telephone number are listed above. Comments regarding the proposal should be sent to the OMB Desk Officer at the address listed above.

The proposed information collection requirement is described as follows:

Notice of Submission of Proposed Information Collection to OMB

Proposal: State Agency Monitoring Handbook.

Office: Housing.

Form No: None.

Frequency of submission: On Occasion.

Affected Public: State or Local Governments.

Estimated burden hours: 100.

Status: New.

Contact: Elizabeth Taylor, HUD, (202) 755–6887; Robert Neal, OMB, (202) 395–6880.

Authority: Sec. 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; Sec. 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: January 24, 1983.

Judith L. Tardy,

Assistant Secretary for Administration.

BILLING CODE 4210-01-M

DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

McGee Creek Project, Oklahoma; Public Hearings on Draft Supplement to the Final Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior has prepared a draft supplement to the final environmental statement for the McGee Creek Project, Oklahoma. This supplement was filed and made available to the public on February 23, 1983.

The draft supplement covers impacts of two recent plan changes for development of the project including potential oil and gas mineral development on project lands and modification of the proposed fishing/recreation corridor below McGee Creek Dam. Also addressed are impacts of potential oil and gas development on flood plains and wetlands.

Public hearings will be held at the following listed locations at the time indicated to receive views and comments from interested organizations or individuals relating to the environmental impacts of these plan changes and the adequacy of the supplement:

April 27, 1983—7:30 p.m.—Oklahoma Department of Wildlife conservation Auditorium, Wildlife Building, 1801 North Lincoln, Oklahoma City, Oklahoma

April 28, 1983—7:30 p.m.—Kiamichi Area Vo-Tech School Auditorium, Atoka, Oklahoma (Located on State Highway 3, 1.5 miles west of the intersection of State Highway 3 and U.S. Highway 69).

Oral statements at the hearing will be limited to a period of 10 minutes. Speakers will not be allowed to trade their time to obtain a longer oral presentation; however, the person authorized to conduct the hearing may allow any speaker to provide additional oral comment after all persons wishing to make comment have been heard. Speakers will be scheduled according to the time preference mentioned in their letter or telephone request whenever possible, and any scheduled speaker not present when called will lose his or her position in the scheduled order. His or her name will be recalled at the end of the scheduled speakers. Requests for scheduled presentations will be accepted up to 4:30 p.m. on April 26, 1983, and any subsequent requests will be handled on a first-come, first-served basis following the scheduled presentations.

Organizations or individuals desiring to present their statement at the hearing should contact Mr. Wil Banner, Office of Environmental Affairs, Bureau of Reclamation, 714 South Tyler, Suite 201, Amarillo, Texas 79101, telephone (806) 378–5464, and announce his or her intention to participate. Written comments from those unable to attend and from those wishing to supplement their oral presentation at the hearing should be sent on or before April 26, 1983, so that they can be included in the hearing record.

Dated: March 1, 1983.

Bob Broadbent,

Commissioner of Reclamation.

[FR Doc. 83-5731 Filed 3-4-83; 8:45 am]

BILLING CODE 4310-09-M

INTERSTATE COMMERCE COMMISSION

Forms Under Review by Office of Management and Budget

The following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) is being submitted to the Office of Management and Budget for review and approval. Copies of the forms and supporting documents may be obtained from the Agency Clearance Officer, Lee Campbell, (202) 275–7238. Comments regarding this information collection should be addressed to Lee Campbell, Interstate Commerce Commission, Room 1325, 12th and Constitution Ave., NW., Washington, DC 20423 and to Gary Waxman, Office of Management and Budget, Room 3001 NEOB, Washington, DC 20503, (202) 395–7313.

Type of clearance—Extension.

Bureau/office—Office of Proceedings.

Title of form—Application for Authority under 49 U.S.C. 11343, 11344 to acquire control of a motor carrier or motor carriers through ownership of stock or otherwise.

OMB Form No.—3120—0100.

Agency Form No.—OP–F–45.

Frequency—Non-Recurring.

Respondents—Privately and publicly held motor carriers.

Number of respondents—75.

Total burden hours—9,000.

Type of clearance—Extension.

Bureau/office—Bureau of Accounts.

Title of form—Quarterly Report of Freight Commodity Statistics Class I Railroads.

OMB Form No.—3120—0031.

Agency Form No.—QCS.

Frequency—Quarterly.

Respondents—Class I Railroads Freight Commodity.

Number of respondents—38.

Total burden hours—41,230.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

Motor Carriers; Finance Applications

As indicated by the findings below, the Commission has approved the following applications filed under 49 U.S.C. 10924, 10926, 10931 and 10932.

We find:

Each transaction is exempt from section 11343 of the Interstate Commerce Act, and complies with the appropriate transfer rules.

This decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

Petitions seeking reconsideration must be filed within 20 days from the date of this publication. Replies must be filed within 20 days after the final date for filing petitions for reconsideration; any interested person may file and serve a reply upon the parties to the proceeding. Petitions which do not comply with the relevant transfer rules at 49 CFR 1181.4 may be rejected.

If petitions for reconsideration are not timely filed, and applicants satisfy the conditions, if any, which have been imposed, the application is granted and they will receive an effective notice. The notice will recite the compliance requirements which must be met before the transferee may commence operations.

Applicants must comply with any conditions set forth in the following decision-notices within 20 days after publication, or within any approved extension period. Otherwise, the decision-notice shall have no further effect.

It is ordered:

The following applications are approved, subject to the conditions stated in the publication, and further subject to the administrative requirements stated in the effective notice to be issued hereafter.

Agatha L. Mergenovich,

Secretary.

For status, please call Team 2 at 202-275-7030.

Volume No. OP2-085

By the Commission, Review Board No. 1. Members Parker, Chandler, and Fortier.

MC-FC-81164. By decision of February 8, 1983 issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR Part 1181 Review Board Number 1 approved the transfer to SEA KING SALES, INC., Kingston, NH, of License No. MC-130773F, issued November 19, 1980, to WORLDWIDE TRANSPORT SALES, INC., Somerville, MA, authorizing operations as a broker, arranging for the transportation of general commodities (except household goods), between all points in the U.S. Representative: Donald F. Singer, 278 Mystic Ave., Medford, MA 02155.

MC-FC-81192. By decision of February 25, 1983, issued under 49 U.S.C. 10926 and the transfer rules of 49 CFR Part 1181, Review Board Number 1 approved the transfer to transferee OHIO MOTORWAYS TRANSPORTATION, INC., Hebron, OH, of Certificate No. MC-150432 (Sub-No. 10), issued March 10, 1981, to H & M TRANSPORTATION, INC., Reynoldsburg, OH, authorizing the transportation of general commodities (except household goods, commodities in bulk, those requiring special equipment, classes A and B explosives, and those of unusual value), between points in Franklin, Pickway, Madison, Licking, and Delaware Counties, OH, and Erie County, PA, on the one hand, and, on the other, points in the U.S. (except AK and HI). An application for temporary authority has been filed. Representative: Owen B. Katzman, 1828 L St., NW., Suite 1111, Washington, DC 20036, for transferee and transferor.

MC-FC-81209. By decision of February 25, 1983, issued under 49 U.S.C. 10926 and the transfer rules of 49 CFR Part 1181, Review Board Number 1 approved the transfer to SUNDERLAND MOVING AND STORAGE, INC. d.b.a. COLLINGS MOVING & STORAGE, Westerly, RI, of Certificate ME-75263, issued June 5, 1963, to transferor COLLINGS MOVING & STORAGE, INC., Westerly, RI, authorizing the transportation of (1) New furniture, From Westerly, RI, to points in CT, DE, MD, MA, ME, NH, NJ, NY, PA, RI, VT, and DC, (2) new furniture, in the process of manufacture, and rejected shipments of new furniture, from the above-specified destination points to Westerly, RI, and (3) household goods, as defined by the Commission, between Westerly, RI, and points in CT and RI within 25 miles of Westerly. Representative: Russell B. Curnett, P.O. Box 366, 826 Orleans Road, Harwich, MA 02645-0366.

Motor Carriers; Applications, Alternate Route Deviations, and Intrastate Applications

Motor Carrier Intrastate Application(s)

The following application(s) for motor common carrier authority to operate in intrastate commerce seek concurrent motor carrier authorization in interstate or foreign commerce within the limits of the intrastate authority sought, pursuant to Section 10931 (formerly Section 206(a)(6)) of the Interstate Commerce Act. These applications are governed by 49 CFR Part 1161 of the Commission's Rules of Practice which provide, among other things, that protests and requests for information concerning the time and place of State Commission hearings or other proceedings, any subsequent changes therein, and any other related matters shall be directed to the State Commission with which the application is filed and shall *not* be addressed to or filed with the Interstate Commerce Commission.

By the Commission.
Agatha L. Mergenovich,
Secretary.

New York Docket No. T–10138, filed February 8, 1983. Applicant: SHLEPPERS MOVING & DELIVERY SERVICE INC., 16 East 79th Street, New York, NY 10021. Representative: Shlomo Benjamin, 16 East 79th St., New York, NY 10021. Certificate of Public Convenience and Necessity sought to operate a freight service, as follows: Transportation of:

Household goods and office furnishings: Between all points in the Counties of Livingston, Sullivan, Washington, Oneida, Montgomery, Sullivan, Ontario, Madison, Steuben, St. Lawrence, Putnam, Jefferson, Tompkins, Greene, Clinton, Columbia, Erie, Orange, Wayne, Schoharie, Rensselaer, Albany, Rockland, Otsego, Dutchess, Cortland, Saratoga, Monroe and Ulster.

Intrastate, interstate and foreign commerce authority sought. Hearing: date, time and place not yet fixed. Request for procedural information should be addressed to the New York State Department of Transportation, 1220 Washington Ave., State Campus, Albany, NY 12232, and should not be directed to the Interstate Commerce Commission.

New York Docket No. T–1809, filed February 8, 1983. Applicant: LOCK CITY TRUCKING INC., 241 So. Niagara Street, Lockport, NY 14094. Certificate of Public Convenience and Necessity sought to operate a freight service, as follows: Transportation of: *General commodities:* Between all points in Erie, Chautauqua, Niagara, Genesee, Orleans and Monroe

Counties. Intrastate, interstate and foreign commerce authority sought. Hearing: date, time and place not yet fixed. Request for procedural information should be addressed to the New York State Department of Transportation, 1220 Washington Ave., State Campus, Albany, NY 12232, and should not be directed to the Interstate Commerce Commission.

[Docket No. 39025 et al.[1]]

Motor Carriers; Chem-Haulers, Inc.; Petition for Exemption From Tariff Filing Requirements

AGENCY: Interstate Commerce Commission.

ACTION: Notice of provisional exemption.

SUMMARY: Seven motor contract carriers have each requested exemption from the tariff filing requirements of 49 U.S.C. 10702, 10761, and 10762. The sought relief is provisionally granted in part.

DATES: Comments are due March 22, 1983. The sought relief will become effective on April 6, 1983, unless, in response to timely filed adverse comments, the Commission issues a further decision withdrawing this relief.

ADDRESS: Send an original and, if possible, 15 copies of comments to: Room 2139, Interstate Commerce Commission, Washinton, D.C. 20423.

FOR FURTHER INFORMATION CONTACT:

Robin Williams (202) 275-7697
or
Howell I. Sporn (202) 275-7691

SUPPLEMENTARY INFORMATION: Section 10702(b) of the Interstate Commerce Act requires contract carriers to file with the Commission actual and minimum rates for the transportation they provide. Section 10761 prohibits transportation without a tariff on file with the Commission, and section 10762 sets forth general tariff requirements including authority to file only minimum rates. Each of these sections authorizes the Commission to grant exemptions to contract carriers when relief is consistent with the public interest and the transportation policy of section 10101. 49 U.S.C. 10702(b), 10761(b), and 10762(f).

The seven motor contract carriers identified in the appendix filed individual petitions requesting exemptions under the three exemption provisions mentioned above. As the issues presented and the relief sought by these petitioners are substantially similar, we are consolidating them for notice purposes.

The petitioners hold a number of contract carrier permits to serve various shippers transporting a wide variety of commodities. They argue, generally, that the tariff filing requirements represent an undue burden on their ability to compete effectively and to offer their shippers the immediate service often required. Petitioners assert that they are interested in avoiding unnecessary expenses which handicap their efforts to provide economical and efficient service. They also argue that the Motor Carrier Act of 1980 encourages the Commission to remove obstacles which keep contract carriers from realizing their full potential.

One petitioner, Ed Hopson Produce Co., Inc. request that the exemptions sought apply to both existing and future contracts. Several petitioners state that they will provide interested parties with copies of their rates if requested.

We see no reason to deny these carriers the savings to be realized from a tariff filing exemption for existing and future contracts. It appears that exemption of these carriers from the requirements that they file tariffs covering their contract operations is consistent with the public interest and the transportation policy of 49 U.S.C. 10101. We will not order these carriers to provide copies of their rates upon request by interested parties, since we have not imposed that requirement for other recent filings. See No. 38828, *Three Way Corporation, Petition for Exemption from Tariff Filing Requirements* (not printed), decided June 25, 1982.

We provisionally grant the sought relief. This provisional relief will become effective unless the Commission issues a further decision modifying or withdrawing the relief in response to adverse comments that may be filed.

This decision does not appear to have a significant effect on either the quality of the human environment or conservation of energy resources. However, comments may be submitted on these issues.

Authority: 49 U.S.C. 10702(b), 10761(b) and 10762(f).

Decided: February 28, 1983.

By the Commission, Chairman Taylor, Vice Chairman Sterrett, Commissioners Andre, Simmons, and Gradison. Chairman Taylor concurred. He would have preferred to decide the issue of future exemptions on the basis of the record in Ex Parte No. MC-165. Commissioner Simmons dissented in part. He would have granted an exemption for existing contracts but not for future contracts.

Agatha L. Mergenovich,
Secretary.

BILLING CODE 7035-01-M

[Decision-Notice OP5MCF-38]

Motor Carriers; Operating Rights and Properties

The following applications seek approval to consolidate, purchase, merge, lease operating rights and properties, or acquire control of motor carriers pursuant to 49 U.S.C. 11343 or 11344. Also, applications directly related to these motor finance applications (such as conversions, gateway eliminations, and securities issuances) may be involved.

The applications are governed by 49 CFR 1182.1 of the Commission's Rules of Practice. See Ex Parte 55 (Sub-No. 44), *Rules Governing Applications Filed By Motor Carriers Under 49 U.S.C. 11344 and 11349*, 363 ICC 740 (1981). These rules provide among other things, that opposition to the granting of an application must be filed with the Commission in the form of verified statements within 45 days after the date of notice of filing of the application is published in the **Federal Register.** Failure seasonably to oppose will be construed as a waiver of opposition and participation in the proceeding. If the protest includes a request for oral hearing, the request shall meet the requirements of Rule 242 of the special rules and shall include the certification required.

Persons wishing to oppose an application must follow the rules under 49 CFR 1182.2. A copy of any application, together with applicant's supporting evidence, can be obtained from any applicant upon request and payment to applicant of $10.00, in accordance with 49 CFR 1182.2(d).

Amendments to the request for authority will not be accepted after the date of this publication. However, the Commission may modify the operating authority involved in the application to conform to the Commission's policy of simplifying grants of operating authority.

---

[1] This proceeding embraces seven petitions for exemption filed by motor contract carriers, as set forth in the appendix.

We find, with the exception of those applications involving impediments (e.g., jurisdictional problems, unresolved fitness questions, questions involving possible unlawful control, or improper divisions of operating rights) that each applicant has demonstrated, in accordance with the applicable provisions of 49 U.S.C. 11301, 11302, 11343, 11344, and 11349, and with the Commission's rules and regulations, that the proposed transaction should be authorized as stated below. Except where specifically noted this decision is neither a major Federal action significantly affecting the quality of the human environment nor does it appear to qualify as a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient protests as to the finance application *or* to any application directly related thereto filed within 45 days of publication (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (unless the application involves impediments) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice. To the extent that the authority sought below may duplicate an applicant's existing authority, the duplication shall not be construed as conferring more than a single operating right.

Applicant(s) must comply with all conditions set forth in the grant or grants of authority within the time period specified in the notice of effectiveness of this decision-notice, or the application of a non-complying applicant shall stand denied.

Dated: February 28, 1983.

By the Commission, Review Board No. 3, Members Krock, Joyce, and Dowell.

Agatha L. Mergenovich,

Secretary.

MC–F–15111, filed February 2, 1983. UNITED SALES & LEASING COMPANY, INC. (UNITED), d.b.a. PATH TRUCK LINES (3649 East Lake Road, P.O. Box 210, Dunkirk, NY 14048)—Purchase (Portion)—THE CHIEF FREIGHT LINES COMPANY (DEBTOR-IN-POSSESSION) (CHIEF) (2401 North Harvard, Tulsa, OK 74115). Representative: Michael C. Foley, Bankers Trust Bldg., 4th Fl., Jamestown, NY 14701. United seeks authority to purchase a portion of the interstate operating rights and property of Chief. Fred V. Payne and Carter H. Smith, sole stockholders of United, seek authority to acquire control of said rights through the transaction.

United is seeking to acquire that portion of Chief's operating rights contained in No. MC–71478 (Sub-No. 40), issued December 2, 1980, authorizing the transportation of (1) *general commodities* (except those of unusual value, classes A and B explosives, livestock, household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading): over (a) regular routes, between specified points in New York, serving intermediate and off route points; (b) alternate routes, between specified points in New York, serving no intermediate points; (c) irregular routes, radially between Buffalo, NY, and points in three specified Ohio counties, and (2) *dried fruits*, over irregular routes, from Rochester, NY, to points in Suffolk County, NY.

United is authorized to operate as a motor common carrier in No. MC–147309 and sub-numbers thereunder. Condition: Although Fred V. Payne signed the application on behalf of United, as its president, it does not appear that he has signed the application, individually as a party in control of United. Therefore, Mr. Payne must seek joinder in the application as a person in control of United.

Notes.—(1) An application for temporary authority has been filed. (2) Transferor, in the recent past, has not operated. Thus, the operating rights to be acquired may be dormant.

[FR Doc. 83–6718 Filed 3–4–83; 8:45 am]

BILLING CODE 7035–01–M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (except fitness-only); Motor Common Carriers of Passengers (public interest); Freight Forwarders; Water Carriers; Household Goods Brokers. The following applications for motor common or contract carriers of property, water carriage, freight forwarders, and household goods brokers are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common carriage of passengers, filed on or after November 19, 1982, are governed by Subpart D of 49 CFR Part 1160, published in the **Federal Register** on November 24, 1982 at 47 FR 53271. For compliance procedures, see 49 CFR 1160.86. Carriers operating pursuant to an intrastate certificate also must comply with 49 U.S.C. 10922(c)(2)(E). Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E. In addition to fitness grounds, these applications may be opposed on the grounds that the transportation to be authorized is not consistent with the public interest.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations.

We make an additional preliminary finding with respect to each of the following types of applications as indicated: common carrier of property-that the service proposed will serve a useful public purpose, responsive to a public demand or need; water common carrier-that the transportation to be provided under the certificate is or will be required by the public convenience and necessity; water contract carrier, motor contract carrier of property, freight forwarder, and household goods broker-that the transportation will be consistent with the public interest and the transportation policy of section 10101 of chapter 101 of Title 49 of the United States Code.

These presumptions shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication (or, if the application later becomes unopposed), appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract." Applications filed under 49 U.S.C. 10922(c)(2)(B) to operate in intrastate commerce over regular routes as a motor common carrier of passengers are duly noted.

Please direct status inquiries to Team 2, (202) 275–7030.

Volume No. OP2–064

Decided: February 25, 1983.

By the Commission, Review Board No. 1, Members Parker, Chandler, and Fortier.

FF–663, filed February 2, 1983. Applicant; OCEAN EXPRESS LINES, INC., 840 Mark St., Elk Grove Village, IL 60007. Representative: Rick A. Rude, Suite 611, 1730 Rhode Island Avenue NW., Washington, DC 20036, 202–223–5900. BILLING CODE 7035–01–M

Motor Carrier Temporary Authority Applications

The following are notices of filing of applications for temporary authority under Section 10928 of the Interstate Commerce Act and in accordance with the provisions of 49 CFR 1131.3. These rules provide that an original and two (2) copies of protests to an application may be filed with the Regional Office named in the **Federal Register** publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the **Federal Register**. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the ICC Regional Office to which protests are to be transmitted.

Note.—All applications seek authority to operate as a common carrier over irregular routes except as otherwise noted.

Motor Carriers of Property

Notice No. F–242

The following applications were filed in Region I. Send protests to: Interstate Commerce Commission, Regional Authority Center, 150 Causeway Street, Room 501, Boston, MA 02114.

BILLING CODE 7035–01–M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (fitness-only); Motor Common Carriers of Passengers (fitness-only); Motor Contract Carriers of Passengers; Property Brokers (other than household goods). The following applications for motor common or contract carriage of property and for a broker of property (other than household goods) are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** on December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common or contract carriage of passengers filed on or after November 19, 1982, are governed by Subpart D of the Commission's Rules of Practice. See 49 CFR Part 1160, Subpart D, published in the **Federal Register** on November 24, 1982, at 49 FR 53271. For compliance procedures, see 49 CFR 1160.86. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E.

These applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with the appropriate statutes and Commission regulations.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings:

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, or jusidictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to

exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a manor regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the applicant later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

By the Commission, Review Board No. 3, Members Krock, Joyce, and Dowell.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce, over irregular routes unless noted otherwise. Applications for motor contract carrier authority are those where service in for a named shipper "under contract."

Please direct status inquiries to Team Five at 202–275–7289.

Volume No. OP5–87

Decided: February 23, 1983.

MC 165999, filed January 31, 1983. Applicant: WILSON TRUCKING AND LEASING, 50 State St., N. Babylon, NY 11703. Representative: Robert Wilson (Same address as applicant) (516) 643–5866. BILLING CODE 7035–01–M

Motor Carriers; Permanent Authority Decisions; Restriction Removals; Decision-Notice

The following restriction removal applications, are governed by 49 CFR 1165. Part 1165 was published in the Federal Register of December 31, 1980, at 45 FR 86747 and redesignated at 47 FR 49590, November 1, 1982.

Persons wishing to file a comment to an application must follow the rules under 49 CFR 1165.12. A copy of any application can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the restriction removal applications are not allowed.

Some of the applications may have been modified prior to publication to

conform to the special provisions applicable to restriction removal.

Findings

We find, preliminarily, that each applicant has demonstrated that its requested removal of restrictions or broadening of unduly narrow authority is consistent with the criteria set forth in 49 U.S.C. 10922(h).

In the absence of comments filed within 25 days of publication of this decision-notice, appropriate reformed authority will be issued to each applicant. Prior to beginning operations under the newly issued authority, compliance must be made with the normal statutory and regulatory requirements for common and contract carriers.

Agatha L. Mergenovich,

Secretary.

Please direct status inquiries to Team 5, at (202) 275–7289.

Volume No. OP5–83

Decided: February 25, 1983.

By the Commission, Review Board No. 2, Members Carleton, Williams, and Ewing.

MC 92168 (Sub-3X), filed February 7, 1983. Applicant: THEATRICAL FILM SERVICE, INC., 105 Chapman Rd., Stoughton, MA 02072. Representative: Frank J. Weiner, 15 Court Square, Boston, MA 02108, (617) 742–3530. Lead: (1) Remove the seasonal operations restriction; (2) broaden (a) motion picture films and apparatus to "instruments, photographic goods or optical goods, watches or clocks;" and (b) motion picture films and theater supplies to "instruments, photographic goods or optical goods, watches or clocks, and theater supplies;" and (3) expand (a) to authorize service at all intermediate points; (b) the off-route point of Hampton Beach, NH, to points in Rockingham County, NH, as off-route points; (c) the off-route points of Somerville and Cambridge, MA, to points in Middlesex, Essex, Suffolk, and Norfolk Counties, MA, as off-route points; and (d) the off-route points of Newmarket, Durham, and Somersworth, NH, to points in Rockingham and Strafford Counties, NH, as off-route points.

Volume No. OP5–92

Decided: February 24, 1983.

By the Commission, Review Board No. 3, Members Krock, Joyce, and Dowell.

MC 144008 (Sub-7X), filed February 11, 1983. Applicant: STORE TRANSFER & DELIVERY SERVICE, INC. 12 Ferris Lane, Poughkeepsie, NY 12603. Representative: Ronald Shapss, 450 Seventh Ave., New York, NY 10123. Lead and Subs 1F and 3F permits: broaden the territorial description to between points in the U.S. (except AK and HI), under continuing contract(s) with named shippers.

MC 145268 (Sub-6X), filed February 15, 1983. Applicant: KENNETH B. HOLM AND GLENN STEED, d.b.a. H & S ENTERPRISES, P.O. Box 26302, Salt Lake City, UT 84126. Representative: Irene Warr, 311 S. State St., Ste. 280, Salt Lake City, UT 84111, (801) 531–1300. Broaden the commodity description (1) in Sub 2F, to "metal products" from steel and steel pipe, and (2) in Sub 4F, to "clay, concrete, glass or stone products, and chemicals and related products," from floor tile and adhesives; and broaden the territorial scope in Subs 2F and 4F to "between points in the U.S.," under continuing contract(s) with named shippers.

[Volume No. OP1–74]

Motor Carriers; Permanent Authority; Republication of Grants of Operating Rights Authority Prior to Certification

The following grants of operating rights authorities are republished by order of the Commission to indicate a broadened grant of authority over that previously noticed in the **Federal Register.**

An original and one copy of petitions for intervention must be filed with the Commission within 30 days after the date of this **Federal Register** Notice. Applicant may file a verified statement in rebuttal within 50 days. Such pleadings shall comply with 49 CFR 1160.1–1160.49 addressing specifically the issue(s) indicated as the purpose for this republication.

Agatha L. Mergenovich,

Secretary.

Please direct status inquiries to Team 1, (202) 275–7992.

MC 153951, (republication), filed January 22, 1982, published in the **Federal Register** February 9, 1982, and republished this issue. Applicant: NESEL FAST FREIGHT INC., 2480 Lawrence Avenue East, Unit 7, Scarborough, Ontario, Canada MIP 2R7. Representative: Robert D. Gunderman, Can-Am Bldg., 101 Niagara St., Buffalo, NY 14202. A decision by the Commission, Review Board Number 1, decided February 14, 1983, served February 18, 1983, finds that applicant is authorized to operate as a *common carrier,* by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *furniture and fixtures,* between ports of entry on the international boundary line between the U.S. and Canada in Maine, Michigan, New Hampshire, New York, and Vermont, on the one hand, and, on the other, points in Alabama, Arkansas, Connecticut, Delaware, Florida, Georgia, Illinois, Indiana, Kentucky, Louisiana, Massachusetts, Maryland, Maine, Michigan, Mississippi, Missouri, North Carolina, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, South Caroina, Tennessee, Texas, Virginia, Vermont, West Virginia, Wisconsin, and the District of Columbia. Applicant is fit, willing, and able properly to perform the granted service and to conform to statutory and administrative requirements. The purpose of this republication is to include the District of Columbia in the territorial description.

MC 164341, (republication), filed October 21, 1982, published in the **Federal Register** November 8, 1982, and republished this issue. Applicant: ALVIN M. STRICKLAND, d.b.a. STRICKLAND TRUCKING, 4519 W. Knox St., Tampa, FL 33614. Representative: Alvin M. Strickland (same address as applicant). A decision by the Commission, Review Board Number 1, decided February 2, 1983, served February 14, 1983, finds that applicant is authorized to operate as a *contract carrier,* by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *general commodities* (except classes A and B explosives and household goods), between points in the U.S. (except AK and HI), under continuing contract(s) with Florida Steel Corporation, of Tampa, FL. The purpose of this republication is to include authority to transport commodities in bulk.

BILLING CODE 7035–01–M

[No. MC–F–15135; OP4F–109]

Motor Carriers; Anderson Trucking Service, Inc.; Purchase Exemption; Haupt Contract Carriers, Inc.

AGENCY: Interstate Commerce Commission.

ACTION: Notice of proposed exemption.

SUMMARY: Pursuant to 49 U.S.C. 11343(e), and the Commission's regulations in Ex Parte No. 400 (Sub-No. 1), *Procedures for Handling Exemptions Filed by Motor Carriers,* 367 I.C.C. 113 (1982), Anderson Trucking Service, Inc. (Anderson) (MC–95876) and Haupt Contract Carriers, Inc. (Haupt) MC–

126346 and 149487) seek an exemption from the requirement of prior regulatory approval for the purchase by Anderson of all of Haupt's operating rights. These include over fifty permits, and about nine certificates authorizing the transportation of specified commodities mostly to and from points in the Midwest. In addition, temporary authority is sought for Anderson to lease Haupt's operating rights pending disposition of the petition for exemption.

DATES: Comments must be received within 30 days after the date of publication in the **Federal Register.**

ADDRESSES: Send comments to:

(1) Motor Section, Room 2139, Interstate Commerce Commission, Washington, D.C. 20423
and
(2) Petitioner's representative: Robert D. Gisvold, 1600 TCF Tower, 121 S. Eighth St., Minneapolis, MN 55402.

Comments should refer to No. MC–F–15135.

FOR FURTHER INFORMATION CONTACT: Warren C. Wood (202) 275–7949.

SUPPLEMENTARY INFORMATION: Please refer to the petition for exemption, which may be obtained free of charge by contracting petitioner's representative. In the alternative, the petition for exemption may be inspected at the offices of the Interstate Commerce Commission during usual business hours.

Decided: February 16, 1983.

By the Commission, Heber P. Hardy, Director, Office of Proceedings.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

[No. MC-F-15124; OP2-086]

Motor Carriers; Coats Freight Ways, Inc.; Purchase Exemption; Grand Island Express, Inc.

AGENCY: Interstate Commerce Commission.

ACTION: Notice of proposed exemption.

SUMMARY: Pursuant to 49 U.S.C. 11343(e), and the Commission's regulations in Ex Parte No. 400 (Sub–No. 1), *Procedures—Handling Exemptions Filed by Motor Carriers,* 367 I.C.C. 113 (1982), Coats Freight Ways, Inc. (Coats) (MC–133229) and Grand Island Express, Inc. (GI) (MC–135283) seek an exemption from the requirement of prior regulatory approval for the purchase by Coats of GI's Sub-No. 75 certificate, authorizing the transportation of general commodities (except classes A & B explosives, household goods, and commodities in bulk), between Irvington, NE, on the one hand, and, on the other, points in the United States (except Alaska and Hawaii).

DATES: Comments must be received within 30 days after the date of publication in the **Federal Register.**

ADDRESSES: Send comments to:

(1) Motor Section, Room 2139, Interstate Commerce Commission, Washington, D.C. 20423
and
(2) Petitioner's representative: Jack L. Shultz, Nelson & Harding, P.O. Box 82028, Lincoln, NE 68501–2028.

Comments should refer to No. MC–F–15124

FOR FURTHER INFORMATION CONTACT: Warren C. Wood, (202) 275–7949.

SUPPLEMENTARY INFORMATION: Please refer to the petition for exemption, which may be obtained free of charge by contacting petitioner's representative. In the alternative, the petition for exemption may be inspected at the offices of the Interstate Commerce Commission during usual business hours.

Decided: March 1, 1983.

By the Commission, Heber P. Hardy, Director, Office of Proceedings.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

[No. MC-F-15055]

Motor Carriers; V & W, Inc.; Common Control Exemption; Vant Transfer, Inc.

AGENCY: Interstate Commerce Commission.

ACTION: Notice of proposed exemption.

SUMMARY: Pursuant to 49 U.S.C. 11343(e), and the Commission's regulations in Ex Parte No. 400 (Sub-No. 1), *Procedures for Handling Exemptions Filed by Motor Carriers of Property Under 49 U.S.C. 11343,* 367 I.C.C. 113 (1982), Vant Transfer, Inc. (No. MC–133189), all issued and outstanding stock owned by Leonard Vant and James Vant, and V & W, Inc., all issued and outstanding stock owned by Leonard Vant, James Vant, and Steven Warian, seek an exemption from the requirement under section 11343 of prior regulatory approval (1) for the purchase of Vant's common carrier operating authority by V & W and (2) for the resulting common ownership and control relationship between Vant (which will retain contract carrier authority) and V & W, arising from the interests of Leonard Vant and James Vant in both entities.

DATES: Comments must be received within 30 days after the date of publication in the **Federal Register.**

ADDRESSES: Send comments to:

(1) Motor Section, Room 2139, Interstate Commerce Commission, Washington, D.C. 20423
and
(2) Petitioners' representative: John B. Van de North, Jr., Briggs and Morgan, 2200 First National Bank Bldg., St. Paul, MN 55101.

Comments should refer to No. MC–F–15056.

FOR FURTHER INFORMATION CONTACT: Warren C. Wood, (202) 275–7949.

SUPPLEMENTARY INFORMATION: Please refer to the petition for exemption, which may be obtained free of charge by contacting petitioners' representative. In the alternative, the petition for exemption may be inspected at the offices of the Interstate Commerce Commission during usual business hours.

Decided: February 28, 1983.

By the Commission, Heber P. Hardy, Director, Office of Proceedings.

Agatha L. Mergenovich,

Secretary.

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Correction

In FR Doc. 83–2214 beginning on page 3885 in the issue of Thursday, January 27, 1983, make the following correction:

On page 3886, third column, under MC 165621, Transport Normand Larocque, Inc., 13th line, "NY, NY" should have read "NH, NY".

BILLING CODE 1505-01-M

[No. AB-2 (Sub-42)]

Rails; Louisville and Nashville Railroad Company; Abandonment and Discontinuance of Operations Over Southern Railway in Putnam and Cumberland Counties, TN; Findings

The Commission has issued a certificate authorizing the Louisville and Nashville Railroad Company (now the Seaboard System Railroad, Inc.), to abandon its 18.50-mile rail line from milepost NT 110.5 near Monterey, TN (Putnam County) to milepost NT 129.0 near Crossville, TN (Cumberland County), and to discontinue service beyond milepost NT 129 over an 8,034-foot segment of Southern Railway track over which applicant has trackage rights. The certificate will become effective 30 days after this publication unless the Commission also finds that: (1) A financially responsible person has offered financial assistance (through subsidy or purchase) to enable the rail service to be continued; and (2) it is likely that the assistance would fully compensate the railroad.

Any financial assistance offer must be filed with the Commission and served concurrently on the applicant, with copies to Mr. Louis E. Gitomer, Room 5417, Interstate Commerce Commission, Washington, DC 20423, no later than 10 days from publication of this Notice. Any offer previously made must be remade within this 10-day period.

Information and procedures regarding financial assistance for continued rail service are contained in 49 U.S.C. 10905 and 49 CFR 1152.27 [formerly 49 CFR 1121.38].

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

[Docket No. AB-55 (Sub-65)]

Rails; Seaboard Coast Line Railroad Company; Abandonment; Between Forest City and Rutherfordton, NC; Findings

The Commission has found that the public convenience and necessity permit the Seaboard System Railroad, Inc. [formerly Seaboard Coast Line Railroad Company] to abandon its 3.62-mile rail line between Forest City, milepost SF 407.40 and Rutherfordton, milepost for 411 02, in Rutherford County, NC. A certificate will be issued authorizing this abandonment unless within 15 days after this publication the Commission also finds that: (1) A financially responsible person has offered assistance (through subsidy or purchase) to enable the rail service to be continued; and (2) it is likely that the assistance would fully compensate the railroad.

Any financial assistance offer must be filed with the Commission and served concurrently on the applicant, with copies to Mr. Louis Gitomer, Room 5417, Interestate Commerce Commission, Washington, DC 20423, no later than 10 days from publication of this Notice. Any offer previously made must be remade within this 10-day period.

Information and procedures regarding financial assistance for continued rail service are contained in 49 U.S.C. 10905 and 49 CFR 1152.27 [formerly 49 CFR 1121.38].

BILLING CODE 7035-01-M

DEPARTMENT OF JUSTICE

Attorney General

Consent Decree Amendments Pursuant to Clean Air Act; Sharon Steel Corp.

In accordance with Departmental policy, 28 CFR § 50.7, 38 FR 19029, notice is hereby given that on February 15, 1983 a proposed Modification to Consent Decree and Amendment to Modification to Consent Decree in *United States* v. *Sharon Steel Corporation,* Civil Action Nos. 79-1201-J and 80-809-J were lodged with the United States District Court for the Western District of Pennsylvania. The proposed Modification and Amendment provide for the extension of certain final compliance dates pursuant to the Steel Industry Compliance Extension Act of 1981 (42 U.S.C. 113(3)).

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the proposed modification and amendments to consent decree. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and should refer to *United States of America* v. *Sharon Steel Corporation,* D.J. Ref. 90-5-1-1-1126.

The proposed modification and amendment may be examined at the office of the United States Attorney, Western District of Pennsylvania, 633 United States Post Office & Courthouse, Pittsburgh, Pennsylvania, at the Region 3 Office of the Environmental Protection Agency, Philadelphia, Pennsylvania, and at the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice, Room 1515, Ninth Street and Pennsylvania Avenue, N.W., Washington, D.C. 20530. A copy of the proposed modification and amendment may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. In requesting a copy, please enclose a check in the amount of $5.80 (10 cents per page reproduction charge) payable to the Treasurer of the United States.

Carol E. Dinkins,

Assistant Attorney General, Land and Natural Resources Division.

NATIONAL SCIENCE FOUNDATION

Advisory Panel for Behavioral and Neural Sciences; Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, as amended, the national Science Foundation announces the following meeting:

Name: Advisory Panel for Behavioral and Neural Sciences Anthropology (Support for Systematic Collections).

Date and time: March 25, 1983—8:30-5:00 p.m.

Place: National Science Foundation, 1800 G Street NW., Room 338, Washington, D.C. 20550.

Type meeting: Closed.

Contact person: Ms. Mary Greene, Associate Program Director for Anthropology, NSF, Room 320, Washington, D.C. 20550.

Summary of minutes: Available from Contact Person, at above address.

Purpose of panel: To provide advice and recommendations concerning NSF support for research in anthropology.

Agenda: To review and evaluate proposals as part of the selection process for awards.

Reason for closing: The proposals being reviewed include information of proprietary or confidential nature, including technical information, financial (salary) data, and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of Section 10(d) of Pub. L. 92-463. The Committee Management Officer was delegated the

authority to make such determinations by the Director, NSF, July 6, 1979.

M. Rebecca Winkler,

Committee Management Coordinator.

Advisory Committee for Earth Sciences Subcommittees; Meeting

In accordance with the Federal Advisory Committee Act, as amended, Pub. L. 92–463, the National Science Foundation announces the following meeting.

Name: Advisory Committee for Earth Sciences (Stratigraphy and Paleontology, Environmental Geosciences, Crustal Structure and Tectonics, Seismology and Deep Earth Structure, Experimental and Theoretical Geophysics, Petrogenesis and Mineral Resources, Mantle Geochemistry and Experimental and Theoretical Geochemistry Subcommittees).

Date and Time: March 23, 24 and 25, 1983; 8:30 to 5:00 p.m. each day.

Place: The National Science Foundation, Room 643, 1800 G Street, N.W., Washington, D.C 20550

Type of Meeting: Closed.

Contact person: Dr. James Fred Hays, Division Director, Earth Sciences, Room 602, National Science Foundation, Washington, D.C. 20550; Telephone: (202) 357–7958.

Purpose of committee: To provide advice and recommendations concerning support for research in Earth Sciences.

Agenda: To review and evaluate research proposals and projects as part of the selection process for awards.

Reason for closing: The proposals being reviewed include information of proprietary or confidental nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

Authority: This determination was made by the Committee Officer pursuant to provisions of Section 10(d) of Pub. L. 92–463. The Committee Management Officer was delegated the authority to make such determinations by the Director, NSF, on July 6, 1979.

M. Rebecca Winkler,

Committee Management Coordinator.

Commission on Precollege Education in Mathematics, Science and Technology; Open Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92–463, the National Science Foundation announces the following meeting:

Name: National Science Board Commission on Precollege Education in Mathematics, Science and Technology.

Date and time: March 25, 1983, 9:00 a.m.—4:30 p.m.; March 26, 1983, 9:00 a.m.—2:00 p.m.

Place: Houston Independent School District, 3830 Richmond Avenue, Houston, Texas 27027.

Type of meeting: Open.

Contact person: Dr. Richard S. Nicholson, Executive Director, Commission on Precollege Education in Mathematics, Science and Technology, Room 527, National Science Foundation, Washington, DC 20550.

Summary minutes: Contact Dr. Richard S. Nicholson at the above address.

Purpose of Commission meeting and agenda:

March 25: The Commission will conduct both plenary sessions and Task Group meetings to continue formulation of recommendations to be presented at a Public Forum.

March 26: A Public Forum will be held to begin the process of repeated interactions with the public directed toward the development of final recommendations.

Audience participation: The Commission is actively seeking reactions and suggestions regarding its initial recommendations for the improvement of precollege mathematics, science and technology education. Interested persons are encouraged to participate in this Public Forum

M. Rebecca Winkler,

Committee Management Coordinator.

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

Availability of NUREG–0845; Agency Procedures for the NRC Incident Response Plan

The NRC Incident Response Plan, NUREG–0728/MC 0502 describes the functions of the NRC during an incident and the kinds of actions that comprise an NRC response. The NRC response plan will be activated in accordance with threshold criteria described in the plan for incidents occurring at nuclear reactors and fuel facilities involving materials, licensees; during transportation of licensed material, and for threats against facilities or licensed material. In contrast to the general overview provided by the Plan, the purpose of these agency procedures, NUREG–0845, is to delineate:

1. The manner in which each planned response function is performed;
2. The criteria for making those response decisions which can be preplanned;
3. The information and other resources needed during a response.

An inexperienced but qualified person should be able to perform functions assigned by the Plan and make necessary decisions, given the specified information, by becoming familiar with these procedures. This rule of thumb has been used to determine the amount of detail in which the agency procedures are described. These procedures form a foundation for the training of response personnel both in their normal working environment and during planned emergency exercises. These procedures also form a ready reference or reminder checklist for technical team members and managers during a response.

This document is available through the NRC Public Document Room, 1717 H Street, NW., Washington, D.C. 20555.

Signed in Bethesda, Maryland on Feb. 28, 1983.

Kenneth E. Perkins,

Chief, Incident Response Branch, Division of Emergency Preparedness and Engineering Response, Office of Inspection and Enforcement.

BILLING CODE 7590-01-M

[Docket No. 50–261]

Carolina Power & Light Co.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 75 to Facility Operating License No. DPR–23 issued to Carolina Power and Light Company (the licensee), which revised Technical Specifications for operation of the H. B. Robinson Steam Electric Plan, Unit No. 2, (the facility) located in Darlington County, South Carolina. The amendment is effective as of the date of issuance.

The amendment revises the Technical Specifications to provide 72 hours to make operable the essential features of the AFW pumps and to clarify that the conditions under which at least one pressurizer safety relief valve must be operable.

The applications for the amendment comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since this amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see: (1) The applications for amendment dated October 22, 1982 and January 20, 1983, (2) Amendment No. 75 to License No. DPR–23, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Hartsville Memorial Library, Home and Fifth Avenues, Hartsville, South Carolina 29550. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 25th day of February, 1983.

For the Nuclear Regulatory Commission.

Steven A. Varga,

Chief, Operating Reactors Branch No. 1, Division of Licensing.

BILLING CODE 7590-01-M

[Docket Nos. 50–295 and 50–304]

Commonwealth Edison Co.; Issuance of Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 81 to Facility Operating License No. DPR–39, and Amendment No. 71 to Facility Operating License No. DPR–48 issued to the Commonwealth Edison Company (the licensee), which revised Technical Specifications for operation of Zion Station, Units 1 and 2 (the facilities) located in Zion, Illinois. The amendments are effective as of the date of issuance.

These amendments revise the Technical Specifications by: (1) A change in designation numbers for reactor coolant pump undervoltage devices; and (2) a reduction in the frequency of channel functional testing of the reactor protection system and engineered safeguards system from monthly to quarterly.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact

appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to this action, see: (1) The application for amendments dated August 5, 1982, (2) Amendment Nos. 61 and 71 to License Nos. DPR–38 and DPR–47, and (3) the Commission's Related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Zion-Benton Public Library District, 2600 Emmaus Avenue, Zion, Illinois 60099. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 25th day of February, 1983.

BILLING CODE 7590-01-M

[Docket No. 50–155]

Consumers Power Co.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 58 to Facility Operating License No. DPR–6, to Consumers Power Company (the licensee), which revised the Technical Specifications for operation of the Big Rock Point Plant (facility) located in Charlevoix County, Michigan. This amendment is effective as of its date of issuance.

The amendment approves Technical Specification changes which revise the frequency of audits of the emergency preparedness and security plans by the Safety and Audit Review Board.

The application for amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see: (1) The application for amendment dated November 12, 1982, (2) Amendment No. 58 to License No. DPR–6, and (3) the Commission's related Safety Evaluation. These items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Charlevoix Public Library, 107 Clinton Street, Charlevoix, Michigan 49720. A single copy of items (2) and (3) may be obtained by request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

BILLING CODE 7590-01-M

[Docket No. 50–70]

General Electric Co.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 11 to Facility Operating License No. TR–1, issued to General Electric Company (the licensee), which revised Technical Specifications for operation of the General Electric Test Reactor (the facility) located in Pleasanton, California. The amendment is effective as of its date of issuance.

The amendment changes the Technical Specifications to delete the requirements for maintaining the containment vessel integrity and for conducting containment calibration testing while the reactor is secured. It also changes the numbering of the last two paragraphs in the license to make them run consecutively.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, negative declaration or environmental impact appraisal need not be prepared in connection with the issuance of this amendment.

For further details with respect to this action, see: (1) The application for amendment dated October 12, 1982, (2) Amendment No. 11 to License No. TR–1, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C.

A copy of items (2) and (3) may be obtained upon request from the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 23d day of February 1983.

For the Nuclear Regulatory Commission.

BILLING CODE 7590-01-M

[Docket Nos. 50–282 and 50–306]

Northern States Power Co.; Issuance of Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 62 to Facility Operating License No. DPR–42, and Amendment No. 56 to Facility Operating License No. DPR–60 issued to Northern States Power Company (the licensee), which revised Technical Specifications for operation of Prairie Island Nuclear Generating Plant, Unit Nos. 1 and 2 (the facilities) located in Goodhue County, Minnesota. The amendments are effective as of the date of issuance.

The amendments revise the common Technical Specifications (TS) for the Prairie Island Nuclear Generating Plant Unit Nos. 1 and 2 as a result of our review of the TS for compliance with the requirements of Appendix J to 10 CFR Part 50. Other changes include provisions for reducing the 24 hour containment leak rate test period, deletions of obsolete leak testing requirements of the shield and auxiliary buildings (TS 4.4.A.3) and increasing the allowable leakage rate for the overall airlock door tests (TS 4.4.A.5.c).

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to this action, see: (1) The application for amendments dated August 7, 1975 as revised by letters dated December 3 and December 22, 1982, (2) Amendment Nos. 62 and 56 to License Nos. DPR–42 and DPR–60, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Environmental Conservation Library, 300 Nicollet Mall, Minneapolis, Minnesota 55401. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 23d day of February, 1983.

For the Nuclear Regulatory Commission.

Robert A. Clark,

Chief, Operating Reactors Branch No. 3, Division of Licensing.

[Docket No. 50–285]

Omaha Public Power District; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 67 to Facility Operating License No. DPR–40 issued to Omaha Public Power District (the Licensee), which revised the Technical Specifications for operation of the Fort Calhoun Station, Unit No. 1, located in Washington County, Nebraska. The amendment is effective as of its date of issuance.

The amendment revises the limits for reactor coolant radioactivity and steam generator coolant radioactivity.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with the issuance of this amendment.

For further details with respect to this action, see: (1) The application for amendment dated November 17, 1980, as supplemented by letters dated June 26, 1981, May 14, 1982, and February 3, 1983, (2) Amendment No. 67 to License No. DPR–40, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. 20555, and at the W. Dale Clark Library, 215 South 15th Street, Omaha, Nebraska 68102. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 23d day of February, 1983.

[Docket No. 50–285]

Omaha Public Power District; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 68 to Facility Operating License No. DPR–40 issued to Omaha Public Power District (the licensee), which revised the Technical Specifications for operation of the Fort Calhoun Station, Unit No. 1, located in Washington County, Nebraska. The amendment is effective as of its date of issuance.

The amendment adds limiting conditions for operation and surveillance requirements for containment purge isolation valves.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with the issuance of this amendment.

For further details with respect to this action, see: (1) The application for amendment dated November 3, 1981, as supplemented by letter dated April 29, 1982, (2) Amendment No. 68 to License No. DPR–40, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20555, and at the W. Dale Clark Library, 215 South 15th Street, Omaha, Nebraska 68102. Applications for Licenses to Import/Export Nuclear Facilities or Materials

Pursuant to 10 CFR 110.70(b) "Public notice of receipt of an application", please take notice that the Nuclear Regulatory Commission has received the following applications for import/export licenses. A copy of each application is

on file in the Nuclear Regulatory Commission's Public Document Room located at 1717 H Street, NW., Washington, D.C.

A request for a hearing or petition for leave to intervene may be filed within 30 days after publication of this notice in the **Federal Register.** Any request for hearing or petition for leave to intervene shall be served by the requestor or petitioner upon the applicant, the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, the Secretary, U.S. Nuclear Regulatory Commission and the Executive Secretary, Department of State, Washington, D.C. 20520.

In its review of applications for licenses to export production or utilization facilities, special nuclear material or source material, noticed herein, the Commission does not evaluate the health, safety or environmental effects in the recipient nation of the facility or material to be exported. The table below lists all new major applications.

Dated this 23rd day of February, at Bethesda, Maryland.

For the Nuclear Regulatory Commission.

James V. Zimmerman,

Assistant Director, Export/Import and International Safeguards, Office of International Programs.

OFFICE OF SCIENCE AND TECHNOLOGY POLICY

White House Science Council (WHSC); Meeting

The White House Science Council, the purpose of which is to advise the Director, Office of Science and Technology Policy (OSTP), will meet on March 17 and 18, 1983, in Room 5026, New Executive Office Building, Washington, DC. The meeting will begin at 7:00 p.m. on March 17, recess and reconvene at 8:00 a.m. on March 18. Following is the proposed agenda for the meeting:

(1) Briefing of the Council, by the Assistant Directors of OSTP, on the current activities of OSTP.

(2) Briefing of the Council by OSTP personnel and personnel of other agencies on proposed ongoing, and completed panel studies.

(3) Discussion of composition of panels to conduct studies.

The March 17 session and a portion of the March 18 session will be closed to the public.

The briefing on some of the current activities of OSTP necessarily will involve discussion of material that is formally classified in the interest of national defense or for foreign policy reasons. This is also true for a portion of the briefing on panel studies. As well, a portion of both of these briefings will require discussion of internal personnel procedures of the Executive Office of the President and information which, if prematurely disclosed, would significantly frustrate the implementation of decisions made requiring agency action. These portions of the meeting will be closed to the public pursuant to 5 U.S.C. 552b(c)(1), (2), and 9(B).

A portion of the discussion of panel composition will necessitate the disclosure of information of a personal nature, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy. Accordingly, this portion of the meeting will also be closed to the public, pursuant to 5 U.S.C. 552b(c)(6).

The portion of the meeting open to the public will begin at 10:00 a.m. Because of the security in the New Executive Office Building, persons wishing to attend the open portion of the meeting should contact Jerry Jennings, Executive Director of the Office of Science and Technology Policy at (202) 456–7740, prior to 3:00 p.m. on March 17. Mr. Jennings is also available to provide further information regarding this meeting.

Jerry D. Jennings,

Executive Director, Office of Science and Technology Policy.

February 24, 1983.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Request for Early Submission of Preapplications for Airport Grant Funds Under the Airport Improvement Program (AAIA) for Fiscal Year 1983

The FAA notice that appeared in the Federal Register, Vol. 48, No. 9, Page 1583, January 13, 1983, pursuant to section 509(e) of the Airport and Airway Improvement Act of 1982 (AAIA), advised sponsors of airports to which entitlement funds are apportioned that, for FY 1983, approval of preapplications received by FAA after June 1, 1983, for entitlement funds may be deferred until the following fiscal year. Additionally, to assure effective administration of the grant program and to provide information needed by the FAA to carry out its responsibilities under section 508(d)(5), the notice also requested other sponsors to notify FAA of their intent to apply for FY 1983 funds by submitting preapplications no later than the same date.

To help meet the Administration's commitment to increase job opportunities the FAA is working to accelerate the awarding of construction grants so that these grant funds would be available to provide job opportunities in the 1983 construction season.

We are now asking all sponsors, therefore, to make every effort to submit preapplications for construction grants by April 15, 1983, and to accelerate their construction programs to the extent feasible. FAA field personnel will assist sponsors where necessary to help meet shorter grant preparation and procurement schedules. Failure to submit by April 15, 1983, however, will not result in the deferral of preapplications for entitlement funds, provided the preapplications are received by June 1, 1983. For other sponsors unable to submit earlier preapplications, FAA will still consider those submitted by June 1, 1983.

For additional information, contact Mr. John Sekman, APP–520, on 202 (426–8590).

Issued in Washington, D.C., March 2, 1983.

Lowell H. Johnson,

Acting Director, Office of Airport Planning and Programming.

Radio Technical Commmission for Aeronautics (RTCA) Executive Committee; Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463; 5 U.S.C. App. I) notice is hereby given of a meeting of the RTCA Executive Committee to be held on March 25, 1983, in RTCA Conference Room, 1425 K Street, NW., Suite 500, Washington, D.C. commencing at 9:30 a.m.

The Agenda for this meeting is as follows: (1) Approval of Minutes of Meeting Held on January 21, 1983; (2) Chairman's Report on RTCA Administration and Activities; (3) Special Committee Activities Report for January and February, 1983; (4) Consideration of Establishing New Special Committees; (5) Approval of Subsection 2.5 Supplement and Changes to Special Committee 142 Report "Minimum Operational Performance Standards for Air Traffic Control Radar Beacon/Mode S (ATCRDS/Mode S) Airborne Equipment"; (6) Status of Future Planning Group Activities; and (7) Other Business.

Attendance is open to the interested public but limited to space available. With the approval of the Chairman, members of the public may present oral statements at the meeting. Persons wishing to present statements or obtain information should contact the RTCA Secretariat, 1425 K Street, NW., Suite 500, Washington, D.C. 20005, (202) 682–0266. Any member of the public may present a written statement to the committee at any time.

Issued in Washington, D.C., on February 28, 1983.

Karl F. Bierach,

Designated Officer.

CIVIL AERONAUTICS BOARD

[M–375]

March 2, 1983.

TIME AND DATE: 9:30 a.m. (open), 2 p.m. (closed), March 9, 1983.

PLACE: Room 1027 (open), room 1012 (closed), 1825 Connecticut Avenue NW., Washington, D.C. 20428.

SUBJECT:

1. Ratification of Items Adopted by Notation.
2. Federal Aviation Administration's Request for Access to Air Carriers' Restricted Monthly Financial Data. (Memo 1721, OC, OEA, OGC)
3. Docket EAS–794 Essential air service eligibility of Aberdeen/Hoquiam under section 419(b) of the Act. (Memo 743–B, BDA, OGC, OCCCA)
4. Docket 41259, Application of Jet Fleet Corp. for an emergency exemption from section 204.8 to enable it to begin large aircraft operations by April 15, 1983. (Memo 1728, BDA)
5. Docket 41029, Petition of Wien Air Alaska for reconsideration of Order 82–12–70. (Memo 1582–C, BDA, OGC)
6. Docket 41045, Proposed show-cause order tentatively finding Alaska Aeronautical Industries fit to conduct scheduled certificated operations within Alaska. (Memo 1705–A, BDA)
7. Commuter carrier fitness determination of Northern Airways, Inc. (Memo 1720, BDA)
8. Commuter carrier fitness determination of Flamenco Airways, Inc. (Memo 1718, BDA)
9. Commuter carrier fitness determination of Montair Flight Service, Inc. (Memo 1717, BDA)
10. Commuter carrier fitness determination of Visa Airlines, Inc. (Memo 1722, BDA)
11. Docket 41149, Establishment of Special Subsidy Program for Fiscal Year 1983. (Memo 1726, BDA, OCCCA, OGC)
12. Delegation to Director, BIA, to grant or deny applications by foreign air carriers for waiver of the Board's filing fee requirements. (OGC, OMD, BIA)
13. Docket 29044, Reexamination of the Board's smoking rule in light of the Court of Appeals decision in *ASH v. CAB*. (OGC, OCCCA)
14. Docket 40432, *Bergt-AIA-Western-Wien Acquisition and Control Case*. Air Line Pilots Association's petition that the Board issue an order making clear that any Board approval of continued common control of Western and AIA is subject to the stipulated LPP's. (OGC)
15. Docket 21670, *Frontier Airlines, Inc. Subsidy Mail Rates*. (Memo 1036–C, OGC)
16. Docket 40865, Application of Airpac, Inc. for a change of name. (Memo 1690–B, OGC)
17. Docket 40828, *Central Zone-Caracas/Maracaibo, Venezuela Service Case*. (OGC)
18. Docket 38823, Agreement C.A.B. 28940, IATA agreement proposing a new passenger fare structure within the South West Pacific. (Memo 1724, BIA)
19. Docket 41206, Application of Arrow Airways, Inc. for an exemption (Guam-Manila). (Memo 1727, BIA, OGC, BDA)
20. Docket 39926, Application of Transportes Aereos Kantuta, LTDA., Trak Airlines for an initial foreign air carrier permit. (BIA, OGC)
21. Report on the Canadian Negotiations. (BIA)
22. Negotiations with Brazil. (BIA)
23. Report on the United Kingdom User Charge Issue. (BIA)

STATUS: 1–20 open, 21–23 closed.

CONSUMER PRODUCT SAFETY COMMISSION

TIME AND DATE: 10 a.m., Wednesday, March 9, 1983.

LOCATION: Third floor hearing room, 1111 18th Street NW., Washington, D.C.

STATUS: Open to the public.

MATTERS TO BE CONSIDERED:

1. *Aluminum Wire Petition AP 80–2*
   The Commission will consider Petition AP 80–2 which requests a rule under Section 27 (e), CPSA requiring manufacturers of electrical wiring devices to furnish consumers with information about potential overheating hazards when incompatible receptacles and switches are used with aluminum wiring.
2. *Physicians' Samples*
   The staff will brief the Commission on issues related to whether the Commission should issue a previously proposed rule that would require all oral prescription drugs in consumer packages that are distributed by manufacturers to physicians to be in child-resistant packaging.
3. *Smoke Detector Project: Status*
   The staff will brief the Commission on the status of the smoke detector project.

(For a recorded message on the latest agenda information, call 301–492–5709.)

CONTACT PERSON FOR ADDITIONAL INFORMATION: Sheldon D. Butts, Office of the Secretary, 5401 Westbard Ave., Bethesda, Md. 20207; 301–492–6800.

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 4:25 p.m. on Wednesday March 2, 1983, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session, by telephone conference call, to consider the following matters:

Recommendation regarding the Corporation's assistance agreement involving an insured bank pursuant to section 13(c) of the Federal Deposit Insurance Act.

Recommendations with respect to the initiation, termination, or conduct of cease-and-desist proceedings against certain insured banks: Names and locations of banks authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" [5 U.S.C. 552b(c)(6), (c)(8), and (c)(9)(A)(ii)).

Recommendations regarding the liquidation of a bank's assets acquired by the Corporation in its capacity as receiver, liquidator, or liquidating agent of those assets:

Case No. 45,597–NR—Penn Square Bank, National Association, Oklahoma City, Oklahoma

Case No. 45,622–L—Metropolitan Bank and Trust Company, Tampa, Florida

In calling the meeting, the Board determined, on motion of Chairman William M. Isaac, seconded by Director Irvine H. Sprague (Appointive), concurred in by Director C. T. Conover (Comptroller of the Currency), that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no

earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting pursuant to subsections (c)(4), (c)(6), (c)(8), (c)(9)(A)(ii), (c)(9)(B), and (c)(10) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(4), (c)(6), (c)(8), (c)(9)(A)(ii), (c)(9)(B), and (c)(10)).

Dated: March 3, 1983.

Federal Deposit Insurance Corporation.

Part II

Department of Health and Human Services

Office of the Secretary

Nondiscrimination on the Basis of Handicap

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

45 CFR Part 84

Nondiscrimination on the Basis of Handicap

AGENCY: Office of the Secretary, HHS.

ACTION: Interim final rule.

SUMMARY: The interim final rule modifies existing regulations to meet the exigent needs that can arise when a handicapped infant is discriminatorily denied food or other medical care. Three current regulatory provisions are modified to allow timely reporting of violations, expeditious investigation, and immediate enforcement action when necessary to protect a handicapped infant whose life is endangered by discrimination in a program or activity receiving federal financial assistance.

Recipients that provide health care to infants will be required to post a conspicuous notice in locations that provide such care. The notice will describe the protections under federal law against discrimination toward the handicapped, and will provide a contact point in the Department of HHS for reporting violations immediately by telephone.

Notice and complaint procedures have been effective instruments for deterrence and enforcement in a variety of civil rights contexts. The Secretary believes that the interim final rule provides the best means to ensure that violations can be reported in time to save the lives of handicapped children who are denied food or are otherwise imperiled by discrimination in the provision of health care by federally assisted programs or activities.

The procedures to be followed for investigation of complaints are outlined in the supplementary information below. The Secretary intends to rely heavily on the voluntary cooperation of State and local agencies, which are closest to the scene of violations, and which have traditionally played the key role in the investigation of complaints of child abuse and neglect. This will not exclude, of course, a vigorous federal role in enforcing the federal civil rights that are at issue.

The Secretary invites comments on all aspects of the interim final rule. Aspects on which comment is particularly invited are set forth in the supplementary information.

DATES: The interim final rule becomes effective March 22, 1983.

Comments should be submitted by May 6, 1983.

ADDRESSES: Comments should be submitted in writing to the Director, Office for Civil Rights, Department of Health and Human Services, 330 Independence Avenue, S.W., Room 5400, Washington, D.C. 20201, or delivered to the above address between 9:00 a.m. and 5:30 p.m. on regular business days. Comments received may be inspected during these same hours by making arrangements with the contact person shown below.

FOR FURTHER INFORMATION CONTACT: Susan Shalhoub at (202) 245–6585, Office for Civil Rights, Department of Health and Human Services, 330 Independence Avenue, S.W., Room 5514, Washington, D.C. 20201.

SUPPLEMENTARY INFORMATION: The President's directive of April 30, 1982, and the HHS Office for Civil Rights "Notice to Health Care Providers" of May 18, 1982, reminded recipients of federal financial assistance of the applicability of Section 504 of the Rehabilitation Act of 1973. Section 504 provides: "No otherwise qualified handicapped individual . . . shall, solely by reason of his handicap, be excluded from participation in, be denied the benfits of, or be subjected to discrimination under any program or activity receiving federal financial assistance."

The Notice to Health Care Providers explained what is already clear from the language of Section 504 and the implementing regulations (45 CFR Part 84): The discriminatory failure of a federally assisted health care provider to feed a handicapped infant, or to provide medical treatment essential to correct a life-threatening condition, can constitute a violation of Section 504.

This interim final rule does not in any way change the substantive obligations of health care providers previously set forth in the statutory language of Section 504, in the implementing regulations, and in the Notice to Health Care Providers. The interim final rule sets forth procedural specifications designed: (1) To specify a notice and complaint procedure, within the context of the existing regulations, and (2) to modify existing regulations to recognize the exigent circumstances that may exist when a handicapped infant is denied food or other necessary medical care.

The interim final rule affects the following portions of existing regulations:

1. *45 CFR 80.6(d),* as referenced by 45 CFR 84.61, which requires recipients to make available such information, in such a manner, as the Department finds necessary to apprise appropriate persons of the protections afforded under Section 504. The interim final rule specifies the type of information and manner of posting that is necessary to bring the protections of Section 504 for handicapped infants to the attention of those persons within the recipient program or activity who are most likely to have knowledge of possible violations as they occur.

2. *45 CFR 80.8,* as referenced by 45 CFR 84.61, which sets forth procedures for the Secretary to effect compliance with Section 504, including referrals to the Department of Justice for the initiation of appropriate legal proceedings. The existing regulations require a 10-day waiting period from the time the Secretary notifies a recipient of its failure to comply to the time the Secretary makes a referral to the Department of Justice or takes other legal actions to effect compliance. When a handicapped infant is being denied food or other necessary medical care, however, more expeditious action may be required. New § 84.61(c) creates a narrow exception to the 10-day waiting period when, in the judgment of the responsible Department official, immediate remedial action is necessary to protect the life or health of a handicapped individual.

3. *45 CFR 80.6(c),* as referenced by 45 CFR 84.61, which requires each recipient to permit access by Department officials to facilities and information pertinent to ascertaining compliance with Section 504, during normal business hours. Allegations of denial of food or other necessary medical care to handicapped infants may require an immediate effort to ascertain compliance. The interim final rule provides that access to records and facilities of recipients shall not be limited to normal business hours when, in the judgment of the responsible Department official, immediate access is necessary to protect the life or health of a handicapped individual.

The purpose of the interim final rule is to acquire timely information concerning violations of Section 504 that are directed against handicapped infants, and to *save the life of the infant.* The Secretary believes that those having knowledge of violations of Section 504 against handicapped infants do not now have adequate opportunity to give immediate notice to federal authorities. A telephone complaint procedure can provide information to federal authorities in time to save the life of a handicapped infant who is being discriminatorily denied nutrition in a federally assisted program or activity.

Events of the past several years suggest that handicapped infants have died from denial of food in federally assisted programs. The full extent of discriminatory and life-threatening practices toward handicapped infants is not yet known, but the Secretary believes that for even a single infant to die due to lack of an adequate notice and complaint procedure is unacceptable.

For quick and effective response to complaints, the Secretary counts not only the enforcement resources of the federal government, but also on the assistance of state child protective agencies, which can respond quickly and effectively to referrals from the Federal government, and which are often closest to the scene for speedy investigation of life-threatening child abuse and neglect. The Secretary intends to contact state child protective agencies whenever a complaint is received that falls within the definition of child abuse or neglect, in order to give States an opportunity to make their own investigation and to take appropriate action.

The Secretary expects that States will follow their customary procedures for investigating allegations of child abuse and neglect that involve an imminent danger to life. State agencies that receive federal financial assistance are under the same obligation as other recipients not to provide a qualified handicapped person with benefits or services that are less effective than those provided to others.

For those complaints that are expeditiously and effectively investigated and pursued by State agencies, the Secretary anticipates that additional federal efforts will often be unnecessary. The Secretary will closely monitor all investigation and enforcement activity taken pursuant to complaints. The Secretary will make available to State agencies any information and assistance that is helpful and appropriate. For those cases where direct federal action appears helpful, the Secretary will have at his disposal the usual means of federal civil rights enforcement. The interim final rule makes it possible for the Secretary to conduct immediate investigations and to make immediate referrals to the Department of Justice for such legal action as may be necessary to save the life of a handicapped child who is subjected to discrimination by a recipient.

Federal enforcement action can also be taken against any recipient that intimidates or retaliates against any person who provides information concerning possible violations of Section 504. 45 CFR 80.7(e), as referenced by 45 CFR 84.61, prohibites intimidatory or retaliatory acts by recipients against individuals who make complaints or assist in investigations concerning possible violations of Section 504. This provision fully protects individuals who make complaints or assist in investigations concerning possible withholding of food or other necessary medical care from handicapped infants.

Comments solicited. The Secretary seeks public comment on all aspects of the interim final rule. Comments will be considered and modifications made to the rule, as appropriate, following the comment period.

The Secretary also solicits comments on the advisability of requiring (1) that recipients providing health care services to infants perform a self-evaluation, pursuant to 45 CFR 84.6(c)(1), with respect to their policies and practices concerning services to handicapped infants; and (2) that such recipients identify for parents of handicapped children those public and private agencies in the geographical vicinity that provide services to handicapped infants.

Regulatory impact analysis. This rule has been reviewed under Executive Order 12291. It is not a major rule and thus does not require a regulatory impact analysis.

Regulatory flexibility analysis. The Regulatory Flexibility Act (Pub. L. 96–354) requires the federal government to anticipate and reduce the impact of rules and paperwork requirements on small businesses and other small entities. This rule has no significant effect on small entities. Therefore, a regulatory flexibility analysis is not required.

Paperwork Reduction Act. This rule contains no information collection requirements subject to the Paperwork Reduction Act of 1980 (Pub. L. 96–511).

Public participation in rulemaking. With reference to the Secretary's Statement of Policy, dated January 28, 1971, concerning public participation in rulemaking (printed at 36 FR 2532; Feb. 5, 1971), the Secretary finds that this interim final rule is exempt from the requirements of 5 U.S.C. 553. Under 45 CFR 80.6(d) and 84.61, the Secretary is already authorized to specify the manner in which recipients make available information concerning federal legal protections against discrimination toward the handicapped. The exception to the 10-day waiting period of 45 CFR 80.8(d)(3) and the exception to 45 CFR 80.6(c) to allow access outside normal business hours are minor technical changes and are necessary to meet emergency situations. All modifications made by the interim final rule are necessary to protect life from imminent harm. Any delay would leave lives at risk. Immediate publication and implementation of this rule will not cause undue burden to any party. The Secretary therefore finds it necessary to publish this rule as an interim final rule taking effect less than 30 days following publication. The Secretary deems 15 days to be the minimum in which the necessary apparatus can be in place to receive and respond to telephone complaints. The interim final rule is therefore made effective March 22, 1983.

List of Subjects in 45 CFR Part 84

Civil rights, Education of handicapped, Handicapped.

Approved: March 2, 1983.

Thomas R. Donnelly, Jr.,

Acting Secretary.

PART 84—[AMENDED]

Interim Final Rule

45 CFR 84.61 is amended by designating the existing provision as paragraph (a) and by adding paragraphs (b), (c), and (d) to read as follows:

§ 84.61 [Amended]

* * * * *

(b) Pursuant to 45 CFR 80.6(d), each recipient that provides covered health care services to infants shall post and keep posted in a conspicuous place in each delivery ward, each maternity ward, each pediatric ward, and each nursery, including each intensive care nursery, the following notice:

DISCRIMINATORY FAILURE TO FEED AND CARE FOR HANDICAPPED INFANTS IN THIS FACILITY IS PROHIBITED BY FEDERAL LAW

Section 504 of the Rehabilitation Act of 1973 states that no otherwise qualified handicapped individual shall, solely by reason of handicap, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving federal financial assistance.

Any person having knowledge that a handicapped infant is being discriminatorily denied food or customary medical care should immediately contact:

Handicapped Infant Hotline
U.S. Department of Health and Human Services
Washington, D.C. 20201
Phone 800– ———— (Available 24 hours a day)

or

Your State Child Protective Agency

Federal law prohibits retaliation or intimidation against any person who provides information about possible violations of the Rehabilitation Act of 1973.

Identity of callers will be held confidential.

Failure to feed and care for infants may also violate the criminal and civil laws of your State.

(1) Recipients may add to the notice, in type face or handwriting, under the words "Your State Child Protective Agency," the identification of an appropriate State agency, with address and telephone number. No other alterations shall be made to such notice.

(2) Copies of such notice may be obtained on request from the Department of Health and Human Services.

(3) The required notice shall be posted within five days after the recipient is informed by the Department of the applicable toll-free national telephone number.

(c) Notwithstanding the provisions of paragraph (a), the requirement of 45 CFR 80.6(d)(3) shall not apply when, in the judgment of the responsible Department official, immediate remedial action is necessary to protect the life or health of a handicapped individual.

(d) Notwithstanding the provisions of paragraph (a), access to pertinent records and facilities of a recipient pursuant to 45 CFR 80.6(c) shall not be limited to normal business hours when, in the judgment of the responsible Department official, immediate access is necessary to protect the life or health of a handicapped individual.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Rules and Regulations

Federal Register
Vol. 48, No. 46
Tuesday, March 8, 1983

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 932

Olives Grown in California; Amendment

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Interim final rule.

SUMMARY: This interim final rule amends the administrative rules and regulations with respect to nomination procedures, public member and late assessment procedures of the California Olive Committee. The rules also specify the procedures for assessment crediting of handler paid advertising expenditures and removes an obsolete definition of "limited use" styles. The changes implement two recent amendments to the marketing order.

DATES: Interim rule effective March 8, 1983 through June 1, 1983; comments received by April 7, 1983 will be considered with regard to any subsequent rule.

ADDRESS: Send two copies of comments to the Hearing Clerk, U.S. Department of Agriculture, Room 1077, South Building, Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT: William J. Doyle, Chief, Fruit Branch, F&V, AMS, USDA, Washington, D.C. 20250, telephone 202–447–5975.

SUPPLEMENTARY INFORMATION: This rule has been reviewed under Secretary's Memorandum 1512–1 and Executive Order 12291 and has been designated a "non-major" rule. William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities. This action is designed to promote orderly marketing of California olives for the benefit of producers, and will not substantially affect costs for those persons directly regulated.

The amendment of Subpart—Rules and Regulations (47 FR 13118, 51348) is issued under the marketing agreement, as amended, and Order No. 932, as amended (7 CFR Part 932, 47 FR 32905, 51092), regulating the handling of olives grown in California. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). This action is based upon the recommendations and information submitted by the California Olive Committee and upon other available information. It is hereby found that this action will tend to effectuate the declared policy of the Act.

Section 932.52 was amended effective August 1, 1982 (47 FR 32905), to provide that the current U.S. Standards for Grades of Canned Ripe Olives (7 CFR Part 52), instead of the U.S. Standards effective in 1971, apply for purposes of outgoing quality and limited use regulations. Thus, § 932.110 which adds "quartered" and "segmented" styles as those which may be produced from limited use size olives, is no longer applicable and should be terminated.

Effective August 1, 1982, § 932.29 was amended to provide that producer members of the Committee may be nominated through a combination of producer meetings and subsequent mail ballots, or such other procedure recommended by the Committee and approved by the Secretary. Thus, § 932.129 should be revised to provide that Committee members who represent producers shall be nominated through a prescribed combination of public meetings with or without mail ballots, as the Committee may determine. Section 932.129 should also be revised to specify who may vote in such nominations and who may serve on the Committee.

Effective August 1, 1982, § 932.25 was revised to provide that the size of the Committee may be increased from 16 members and alternates to 17 members and alternates through the selection of a public member and alternate who are not producers or handlers. Also, § 932.29(c) was added to provide that nominations for public member and alternate shall be submitted to the Secretary prior to April 16 of year in which nominations are made. Section 932.29(c) also provides that the Committee shall prescribe procedures for the selection and voting for each candidate. Thus, § 932.130 should be added to prescribe the qualifications for the public member and alternate and to permit the Committee to recommend its nominee to the Secretary.

Section 932.39(c) was added in 1982 (47 FR 32905) to permit the Committee with the approval of the Secretary to levy interest and/or late charges for assessments not paid to the Committee by handlers within prescribed period of time. Thus, § 932.139 should be added, which establishes for all assessments not received by the Committee within 30 days, a two percent late payment charge and an additional interest charge computed according to the number of days an assessment is delinquent beyond the 30 day payment period.

Finally, § 932.45 was amended in 1982 (47 FR 51092) to provide for the crediting a portion of a handler's direct expenditures for paid advertising for olives. Section 932.145 should be added to implement this provision. That section specifies the direct expenditures which may be so credited, the amount of assessments available for crediting, and the procedures handlers should follow to obtain credit.

It is found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date of this interim rule until 30 days after publication in the **Federal Register** (5 U.S.C. 553), and good cause exists for making these regulatory provisions effective as specified in that: (1) The changes implement recent amendments to the order which were discussed at a public hearing and subsequently approved in a referendum by olive growers; (2) olive handlers are aware of the changes and require no advanced preparation time; and (3) some of the changes represent a relief of restrictions or an application for benefits and no useful purpose is served by delaying the effective date of this action. Comments will be solicited for 30 days after publication and this document will be reviewed at that time.

List of Subjects in 7 CFR Part 932

Marketing agreements and orders, Olives and California.

PART 932—[AMENDED]

Therefore, Subpart—Rules and Regulations (7 CFR 932.106–932.161) is amended as follows:

1. Section 932.110 is hereby removed.

2. Section 932.129 is revised to read as follows:

§ 932.129 Nomination procedures for producer members.

Members and alternate members on the Committee who represent producers shall be nominated in accordance with the procedures specified in either paragraph (a) or paragraph (b) of this section as the Committee may determine.

(a) Mail ballot voting. (1) The Committee shall schedule a meeting, prior to March 1 of each odd-numbered year, in each producing district for the purpose of selecting candidates for member and alternate member nominations. A notice of such meetings will be mailed to each producer of record in each district. The nomination process is as follows:

(i) Any person who produces olives in a particular district may offer the name of any producer from that district as a candidate for either a member or alternate member position in said district.

(ii) A producer, who produces olives in more than one district, can be selected as a candidate for a member or alternate member position in only one district.

(iii) The Committee will notify by mail producers who are selected as candidates but are not in attendance at such meetings. Such producers have the right to decline such listing on the ballot within 7 days of mailing such notice.

(iv) In the event that no candidates or an insufficient number of candidates are selected as such meetings for the producer members and alternates in the respective districts, the Committee will give written notice to producers in said district that additional names may be submitted for the specified position(s).

(2) Following such meetings, and no later than March 15 of each odd-numbered year, the Committee shall prepare and mail a ballot to each producer that delivered olives during that crop year in each district.

(i) A producer who produces olives in more than one district must choose the district in which the producer will vote and notify the Committee of that choice. If the Committee is not notified and more than one ballot is received from such a producer, the first ballot received will be counted. Candidates may only vote in the district in which they are seeking nomination.

(ii) Each ballot will list separately the names of candidates for the member positions and the names of candidates for the alternate member positions for said district.

(iii) A ballot will be mailed to producers of record to give them an opportunity to vote. Committee records will be used to determine the list of producers eligible to cast ballots. However, any producer who is not identified in such records may receive a ballot if the Committee determines that such producer is eligible to participate in nominations in that district.

(iv) A producer may cast a vote for as many candidates as there are member or alternate positions in said district.

(v) The candidate on each list, as prescribed in subparagraph (a)(2)(ii) of this section, who receives the most votes will be the nominee for the first position, and until all positions for that district are filled, the candidates receiving the second, third and forth highest number of votes will be the nominees for the second, third and fourth position respectively.

(vi) In the event of a tie which would result in elimination of a tied candidate, a second ballot with the names of those tied candidates will be mailed to producers in said district for another vote.

(b) Nomination Meetings. In lieu of the mail ballot nomination procedure specified in paragraph (a) of this section, the Committee may schedule nomination meetings. In such an event, the following procedure will apply:

(1) Prior to March 15 of each odd-numbered year, the Committee shall schedule a nomination meeting to be held in each district for the purpose of obtaining nominees for producer members and alternate members for such district.

(2) Nominations for members and balloting thereon shall precede nominations and balloting for alternate members.

(3) The candidate for each position who receives the highest number of votes shall be the nominee for the position: *Provided,* That such candidate receives a majority of the ballots cast. If no candidate receives such a majority, the two candidates who received the highest number of votes shall participate in a run-off balloting to determine which is the nominee.

(c) For the purposes of this section, a producer is a person engaged in a proprietary capacity as a single business unit in the production of olives for market as packaged olives and includes an individual (owner-operated), partnership, corporation, association, institution, or other legal business unit.

(d) Determination of producer eligibility. (1) Only producers (including duly authorized officers or employees of producers) who produced olives within the district shall participate in the nomination and election of producer members and alternates.

(2) Each producer (as defined in paragraph (c) of this section) shall be entitled to cast only one vote for each position.

(3) A producer having olive acreage in more than one district may participate in nominations and elections in only one district. The district in which the producer wishes to participate shall be the producer's choice.

(4) Any member of a producer's family (husband, wife, son or daughter) may vote on behalf of an owner-operated, landlord-tenant, family enterprise, or other farming unit.

(5) Any authorized officer or employee of a corporation which is a producer may vote.

(6) Any authorized member of a partnership which is a producer may vote.

(7) Power of attorney (proxies) for voting purposes are not accepted.

3. Section 932.130 is added to read as follows:

§ 932.130 Public member and alternate public member eligibility requirements and nomination procedures.

(a) Eligibility requirements. (1) The public member and alternate public member shall not be a producer, handler, or family member (husband, wife, son or daughter) of a producer or handler of olives and shall have no direct financial interest in, nor be engaged in, the commercial production, marketing, buying, grading or processing of olives; nor shall they be either an officer, director, or employee, or family member of an officer, director, or employee of any firm engaged in such activities.

(2) The public member and alternative public member should be able to devote sufficient time and must express a willingness to attend subcommittee and committee activities regularly and to familiarize themselves with the background and economics of the olive industry.

(3) The public member and alternate public member must be residents of California.

(b) Nomination procedures. (1) Prior to April 16 of the year in which nominations are made, the Committee will recommend to the Secretary a public member and alternate public member for the Committee for a two-

year term of office beginning June 1 and ending May 31 of odd numbered years.

(2) The Committee will solicit, interview and recommend to the Secretary its nominees for public member and alternate public member.

(3) A majority vote is required in Committee actions concerning the nomination of the public member and alternate public member.

4. Section 932.139 is added to read as follows:

§ 932.139 Late payment and interest charges.

(a) The Committee shall impose a late payment charge on any handler whose assessment has not been received in the Committee's office within 30 days of the invoice date shown on the handler's assessment statement. The late payment charge shall be two percent of the unpaid balance.

(b) In addition, the Committee shall impose an interest charge on any handler whose assessment payment has not been received in the Committee's office within 30 days of the invoice date. The interest charge shall be the current commercial prime rate at the Committee's bank and shall be applied thereafter to the unpaid balance and late payment charge for the number of days an assessment is delinquent beyond the 30 day payment period.

5. Section 932.145 is added to read as follows:

§ 932.145 Marketing promotion, including paid advertising and crediting for handler paid brand advertising.

(a) In order for a handler to receive credit for paid brand advertising expenditures against the handler's pro rata expense assessment obligations pursuant to § 932.45, the Committee shall determine that such expenditures meet the applicable requirements of this section.

(1) Creditable direct expenditures shall mean the actual money spent for advertising space in magazines, newspapers, outdoor media, transit, or other similar print media not otherwise prohibited in this section, or time charges for radio, television and other similar electronic media: *Provided*, That the amount of the creditable expenditures shall be the gross media cost as listed on the invoice, less any frequency or cash discounts earned.

(2) For an advertisement resulting from joint participation by a handler and one or more manufacturers or sellers of complementary commodities or products, and including the brands of all participants, the handler's credit shall be the amount computed according to the handler's proportional share of the total allowable payment to the advertising medium, or the handler's payment thereof, whichever is less.

(3) Production costs, preparation expense, travel allowances, costs relating to pre-testing of advertising, test marketing, directory advertising, point of sale material, premiums, trade promotional allowances, coupon redemption fees, or other expenses not directly connected with paid space or time costs, shall not be eligible for such assessment crediting.

(4) "Brand" is defined as those brands which are controlled, owned and registered by regulated olive handlers, or their parent or subsidiary companies.

(b) Pursuant to § 932.39, assessments shall be paid by each handler in each fiscal year to cover the Committee's expenses as approved by the Secretary pursuant to § 932.38.

(1) Such assessment funds shall first be made available to cover the Committee's administrative expenses, and if applicable, expenses for research and crop estimates.

(2) Any remaining assessment funds over the amount budgeted pursuant to paragraphs (b)(1) up to an additional $8 per ton, shall be used for the Committee's generic advertising and marketing promotion projects.

(3) Any remaining assessment funds over the amounts budgeted pursuant to paragraph (b)(1) and (2), up to an additional $8 per ton, shall be made available for crediting a handler's direct expenditures for paid brand advertising; and

(4) Any remaining assessment funds over the amounts budgeted pursuant to paragraphs (b)(1), (2) and (3) shall be allocated equally for:

(i) The Committee's generic advertising and marketing promotion projects; and

(ii) Crediting a handler's direct expenditures for paid brand advertising.

(c) Each advertisement must be published, broadcast, or displayed during the fiscal year in which credit is requested, except:

(1) The initial period shall begin on September 1, 1982, and end on December 31, 1983; and

(2) That a maximum of 34 percent of a handler's total assessment obligation available for crediting advertising expenditures as of December 31 of each fiscal year, may be included as an assessment obligation in the succeeding fiscal year, but must be so credited no later than June 30 of such succeeding fiscal year with documentation to be filed with the Committee no later than the following August 31. Any such remaining assessment funds not credited are due to the Committee no later than the following September 15.

(d) Except as provided in paragraph (c), assessments available to a handler for crediting but not so credited by December 1 shall become due and payable by December 1, except that the creditable brand advertising scheduled after December 1 may be deducted from the assessment due provided a purchase order, insertion order or other documents showing that intention to advertise is submitted by December 1. The submission of intentions to advertise will not relieve a handler from the obligation of submitting proof of performance for the expenditure.

(e) Handlers who meet the applicable requirements specified in this section shall be credited with 100 percent of such allowable expenditures, but the total amount credited shall not exceed their individual prorate share of the total amount assessable for brand credit for that fiscal year.

(f) Except as provided in paragraph (c) of this section, any funds available for the assessment credit for handler paid brand advertising but not so credited, shall be paid to the Committee as provided in § 932.39, and such funds shall be placed in the Committee's reserves pursuant to § 932.40 (a)(2).

(g) A handler must file a claim with the Committee to obtain credit for advertising expenditure. Each claim must be submitted in writing and accompanied by appropriate proof of performance as follows:

(1) For published advertisements, a copy of the publication invoice, agency invoice, if any, and tear sheet of the advertisment;

(2) For radio advertisements, a copy of the station invoice, a copy of the script, or reference to a copy on file with the Committee, and the agency invoice, if any;

(3) For television advertisements, a copy of the station invoice, script, and tape or story board of the advertisement, or a reference to these in the Committee files, and the agency invoice, if any;

(4) For outdoor advertisements, a copy of the company invoice, a photograph of the display or a reference to a photograph in the Committee files, and the agency invoice, if any;

(5) Or such other proof of performance and invoice as may be approved by the Committee.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: March 3, 1983.

BILLING CODE 3410-02-M

7 CFR Part 1030

Milk in the Chicago Regional Marketing Area; Notice of Temporary Revision of Shipping Requirements

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Temporary revision of rule.

SUMMARY: This action relaxes the shipping requirement for pool supply plants under the Chicago Regional milk order for the month of March 1983. The action will prevent uneconomic shipments of milk to the market and will help maintain the pool status of producers who regularly supply the market. The revision is made in response to requests of cooperative associations of producers supplying the market.

EFFECTIVE DATE: March 8, 1983.

FOR FURTHER INFORMATION CONTACT: Martin J. Dunn, Marketing Specialist, Dairy Division, Agricultural Marketing Service, United States Department of Agriculture, Washington, D.C. 20250, 202-447-7311.

SUPPLEMENTARY INFORMATION: Prior document in this proceeding:

Notice of proposed temporary revision of shipping standards: Issued February 3, 1983; published February 8, 1983 (48 FR 5747).

It has been determined that this action is not a major rule under the criteria set forth in Executive Order 12291.

Also, it has been determined that the need for adjusting certain provisions of the order on an emergency basis precludes following certain review procedures set forth in Executive Order 12291. Such procedures would require that this document be submitted for review to the Office of Management and Budget at least 10 days prior to its publication in the **Federal Register**. However, this would not permit the completion of the procedure in time to give interested parties timely notice that the supply plant shipping requirement for March 1983 would be modified. The initial request for the action was received on January 25, 1983. Public comments on the proposed action were due February 18, 1983.

William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities. Such action would lessen the regulatory impact of the order on certain milk handlers and would tend to assure that the market would be adequately supplied with milk for fluid use with a smaller proportion of milk shipments from pool supply plants.

This temporary revision is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the provisions of § 1030.7(b)(5) of the Chicago Regional milk order.

Notice of proposed rulemaking was published in the **Federal Register** (48 FR 5747) concerning a proposed decrease in the shipping requirement for pool supply plants for the month of March 1983. The public was afforded the opportunity to comment on the proposal by submitting written data, views and arguments. Two comments were received in favor of the proposed reduction.

After considering all relevant material, including the proposal set forth in the aforesaid notice, data, views, and arguments filed, and other available information, it is hereby found and determined that for the month of March 1983 the supply plant shipping percentage should be reduced temporarily by 2 percentage points from 20 percent to 18 percent.

Pursuant to the provisions of § 1030.7(b)(5) the supply plant shipping percentages set forth in § 1030.7(b) may be increased or decreased by up to 10 percentage points during the months of September through March to encourage additional milk shipments to pool distributing plants or to prevent uneconomic shipments.

The Central Milk Sales Agency (Agency), representing six cooperative associations whose members provide the majority of producer milk associated with the market, requested that the supply plant shipping percentage be decreased by 5 percentage points for March 1983. As proposed, the shipping percentage would be reduced from 20 percent to 15 percent of a supply plant's receipts of milk from producers. The request was based on two anticipated changes in the marketing conditions in the Chicago market. The proponents stated that during February a Chicago pool distributing plant would stop bottling milk and its associated distributing plant unit would cease to exist. With the loss of fluid milk sales due to the plant's closure, fewer shipments of milk from supply plants would qualify as producer milk under the order. Secondly, the proponents stated that they intended to begin delivering direct-shipped producer milk to another distributing plant in the Chicago area. These direct-shipped milk deliveries would result in fewer needed shipments from supply plants.

The Agency estimated that during March its milk receipts would be 542 million pounds and the qualifying shipments to fluid milk handlers would be 98 million pounds. These qualifying shipments would represent 18.1 percent of its producer receipts. The Agency stated in its request that reducing the required percentage of milk that must move from a supply plant, or units of supply plants, would prevent inefficient and uneconomic movements of milk solely for the purpose of qualification. The Agency stated that a reduction in the shipping percentage for pool supply plants is warranted to prevent uneconomic movements of milk.

Interested parties were given an opportunity to submit written data, views and arguments concerning the proposed revision. Comments were received from the proponent cooperative associations of the Central Milk Sales Agency and another cooperative association which supported the reduction in the supply plant shipping requirement. The Agency's spokeman stated that the Chicago pool distributing plant had stopped bottling milk on February 3, 1983, as anticipated in its revision request. The spokesman submitted information that showed that during the last year an average of 7 million pounds of milk had been pooled with the distributing plant unit each month. He stated that another cooperative association would begin supplying the other plant which had been associated in the unit with the closed bottling facility and the Agency would lose those sales on February 21, 1983.

The Agency also stated that it had begun supplying another distributing plant with direct-shipped milk, as anticipated in the revision request. The spokesman indicated that in March more than 6 million pounds of milk would be direct-shipped and an equivalent amount no longer would be needed from supply plants. With fewer shipments needed from supply plants, the proponents concluded that the temporary reduction in the supply plant shipping requirement should be granted as requested for March 1983 to prevent uneconomic movements of milk.

The total receipts of milk from producers for March are expected to be 1,140 million pounds, with 1,091 million pounds expected to be received at supply plants. Approximately 49 million pounds are expected to be received at pool distributing plants directly from producers. The volume of pooled Class I sales during March is anticipated to be

258 million pounds. At the 20 percent shipping percentge for March, the qualifying shipments from supply plants would be 218 million pounds. The volume of unneeded shipments from supply plants would approach 9 million pounds in March.

Reducing the supply plant shipping percentage for March by the requested 5 percentage points to 15 percent would require approxmiately 164 million pounds of qualifying shipments from supply plants. With projected Class I use at 258 million pounds, the difference is substantially greater than the 49 million pounds of expected direct-shipped milk. Thus, a 15 percent shipping standard for March would be too low to assure that distributing plants would have adequate supplies of milk for fluid use.

At an 18 percent shipping percentage for March, qualifying shipments from supply plants would be about 196 million pounds. At this level of shipments, distributing plants should be adequately supplied for March because most of the difference between shipments from supply plants and anticipated Class I use could be made up from direct-shipped milk.

The revised minimum shipping percentage is based essentially on projections of the marketing trends for the entire Chicago Regional market. The proponents' projections for their own operations vary somewhat from the entire projections for the entire market. Because the proponent cooperatives provide the majority of the producer milk associated with the market, additional weight has been given to their projections in setting the revised minimum shipping percentage for March.

On the basis of available information, it is concluded that the supply plant shipping percentage should be reduced to 18 percent for March.

It is hereby found and determined that 30 days' notice of the effective date hereof is impractical, unnecessary, and contrary to the public interest in that:

(a) This temporary revision is necessary to reflect current marketing conditions and to maintain orderly marketing conditions in the marketing area for the month of March 1983;

(b) This temporary revision does not require of persons affected substantial or extensive preparation prior to the effective date; and

(c) Notice of the proposed temporary revision was given interested parties and they were afforded opportunity to file written data, views or arguments concerning this temporary revision. No comments in opposition to the proposed temporary revision were received.

Therefore, good cause exists for making this temporary revision effective upon publication in the **Federal Register.**

List of Subjects in 7 CFR Part 1030

Milk marketing orders, Milk, Dairy products.

It is therefore ordered, That the aforesaid provisions of the order are hereby revised for the month of March 1983.

(Secs. 1–19, 48 Stat. 31, as amended (7 U.S.C. 601–674))

Effective Date: March 8, 1983.

Signed at Washington, D.C., on: March 3, 1983.

BILLING CODE 3410-02-M

DEPARTMENT OF THE TREASURY

Comptroller of the Currency

12 CFR Part 8

[Docket No. 83–11]

Assessment of Fees; National Banks; District of Columbia Banks

AGENCY: Comptroller of the Currency, Treasury.

ACTION: Final rule.

SUMMARY: The Office of the Comptroller of the Currency (Office) is revising 12 CFR 8.7 to delete the reference to the specific dollar amount of the hourly fee charged for trust examinations. The amendment is technical and does not affect the manner in which the hourly fee is calculated. Revision is necessitated to eliminate the possibility of annual revisions to the regulation. Institutions subject to the hourly fee will be notified of any change in the hourly fee resulting from the required annual review.

EFFECTIVE DATE: March 28, 1983.

FOR FURTHER INFORMATION CONTACT:
Dennis J. Arczynski, Project Manager, Financial Operations Division, Office of the Comptroller of the Currency, Washington, D.C. 20219, (202) 447–1878,
or
Jerome Edelstein, Attorney, Legal Advisory Services Division, Office of the Comptroller of the Currency, Washington, D.C. 20219, (202) 447–1880.

SUPPLEMENTARY INFORMATION: The principal drafters of this document are Dennis J. Arczynski, Project Manager, Financial Operations Division, Office of the Comptroller of the Currency, Washington, D.C. 20219, (202) 447–1878, and Jerome Edelstein, Attorney, Legal Advisory Services Division, Office of the Comptroller of the Currency, Washington, D.C. 20219, (202) 447–1880.

This Office is amending the portion of 12 CFR Part 8.7(c) to delete the specific reference to the dollar amount of the hourly rate charged for trust examinations. In line with this revision, 12 CFR 8.7(d) is also amended by deleting the reference to this hourly rate. Deletion of the reference to the $32.44 hourly rate for examinations commencing after December 31, 1980, would eliminate the administrative costs associated with possible annual revisions to the regulation. This amendment will not affect the calculation of the hourly rate and this Office will follow the prescribed methodology in its required annual review of the expenses associated with the hourly rate. Institutions subject to this hourly rate will be notified of any change in the hourly rate resulting from this annual review and 12 CFR 8.7(b) is amended to reflect this. The hourly rate for examinations will be increased to $40.00. Notice of this change will be sent to all affected institutions prior to the effective date of the change. This rate will remain in effect until affected institutions are notified of any subsequent change.

The Secretary of the Treasury has certified that this amendment will not have a significant impact on a substantial number of small banks.

The Office has determined that this amendment does not meet any of the tests for a regulatory impact analysis as required by Executive Order 12291.

The Office has determined that notice and comment or a 30-day delay of implementation pursuant to the Administrative Procedures Act is unnecessary because this amendment constitutes a technical change in the wording of the regulation and because this change has no substantive impact on those subject to 12 CFR 8.7.

List of Subjects in 12 CFR Part 8

National banks, Assessment of fees.

PART 8—[AMENDED]

For the reasons set out in the preamble, Part 8 of Chapter I of Title 12 of the Code of Federal Regulations is amended as set forth below:

1. The authority citation for Part 8 is:

Authority: R.S. 5240, as amended, 12 U.S.C. 481, 482, 12 U.S.C. 3102, and in Section 3, 47 Stat. 1566, 26 D.C. Code 102.

2. Section 8.7 is amended by revising (b), (c) and (d) to read as follows:

§ 8.7 Hourly rate for trust examinations.

* * * * *

(b) To assure continued compliance with the statutory requirement, national banks and other entities with trust departments examined by this Office are assessed a fee which recovers the total direct and overhead expenses of the examination. This fee will be reviewed annually according to the method set forth in paragraph (d) of this section to determine whether changes in such expenses require a revision of the fee. The Office shall notify institutions subject to this fee of any change in the hourly rate resulting from this annual review.

(c) The total fee a trust examination is the hourly fee multiplied by the number of hours examiners spend at the bank and the number of hours spent by examiners working on the examination report while outside of the bank. The Office will waive the fee for time spent by examiners with less than six months of experience and for those hired on a temporary basis.

(d) The hourly rate represents the total expenses of conducting trust examinations as set forth in the budget for the year in which the hourly fee is applicable, divided by the projected number of billable hours for that year.

* * * * *

Dated: March 2, 1983.

C. T. Conover,

Comptroller of the Currency.

BILLING CODE 4810-33-M

SMALL BUSINESS ADMINISTRATION

13 CFR Part 101

[Revision 2—Amendment 26]

Delegation of Authority To Conduct Program Activities in Field Offices

AGENCY: Small Business Administration.

ACTION: Final rule.

SUMMARY: The Regional Administrator in Region IV, proposed a revision to the delegated authority for field offices in his region that would give designated Senior Loan Specialists authority to approve, decline, or take servicing and liquidation actions on loans. These designated officers would have delegated authority equal to the Supervisory Loan Specialist, Financing Division, District Office (D/O), the Supervisory Loan Specialist, Portfolio Management, D/O, and the Supervisory Loan Specialist, Liquidation, D/O, but with no supervisory authority for responsibility. The Senior Loan Specialists would function under supervision of a regular supervisor such as a Deputy District Director, an Assistant District Director/Finance and Investment, or a Chief, Financing Division and would free the Supervisory Loan Officers from some of their routine work, allow them more time for the management of a broader segment of their offices and additionally, would greatly improve the supervisor/employee ratio.

This proposal was approved on a "pilot project" basis for Region IV only. The results concluded from this "project" will be reviewed for retention and possible national usage.

EFFECTIVE DATE: March 8, 1983; not to exceed 1 year.

FOR FURTHER INFORMATION CONTACT: Ronald Allen, Paperwork Management Branch, Small Business Administration, 1441 "L" Street, N.W., Washington, D.C. 20416. Telephone No. (202) 653–8538.

SUPPLEMENTARY INFORMATION: Part 101 consists of rules relating to the Agency's organization and procedures; therefore, notice of proposed rulemaking and public participation thereon as prescribed in 5 U.S.C. 553 is not required and this amendment to Part 101 is adopted without resort to those procedures.

List of Subjects in 13 CFR Part 101

Authority delegations (Government agencies), Administrative practice and procedure, Organization and functions (Government agencies).

PART 101—[AMENDED]

§ 101.3–2 [Amended]

For the reasons set forth in the preamble and pursuant to authority in Section 5(b)(6) of the Small Business Act, 15 U.S.C. 634, Part 101, 13 CFR 101.3–2 is amended as set forth below:

* * * * *

1. Part I, Section A, paragraph 1.a. add a new subparagraph (10) as below, and recodify existing subparagraphs (10) through (14) as (11) through (15).

(10) Senior Loan Specialist, Financing, D/O, Region IV only, 250,000, 350,000.

2. Part I, Section A, paragraph 1.b. add a new subpargraph (10) as below, and recodify existing subparagraphs (10) through (16) as (11) through (17).

(10) Senior Loan Specialist, Financing, D/O, Region IV only, 250,000, 500,000.

3. Part I, Section B, paragraph 2.a. add a new subparagraph (10) as below, and recodify existing subparagraphs (10) and (11) as (11) and (12).

(10) Senior Loan Specialist, Financing, D/O, Region IV only.

4. Part I, Section B, paragraph 2.b. add a new subparagraph (10) as below, and recodify existing subparagraphs (10) and (11) as (11) and (12).

(10) Senior Loan Specialist, Financing, D/O (on fully undisbursed loans), Region IV only.

5. Part I, Section B, paragraph 3.b. add a new subparagraph (2) as below.

(2) Senior Loan Specialist, Financing, D/O (on fully undisbursed loans), Region IV only.

6. Part I, Section B, paragraph 4. add a new subparagraph j. as below, and recodify existing subparagraphs j. and k. as k. and l.

(j) Senior Loan Specialist, Financing, D/O (on fully undisbursed loans), Region IV only.

7. Part IV, Section A, paragraph 1.d. add a new subparagraph (10) as below, and recodify existing subparagraphs (10) through (12) as (11) through (13).

(10) Senior Loan Specialist, Portfolio Management or Liquidation Section, D/O, Region IV only.

Dated: March 3, 1983.

BILLING CODE 1505-01-M

TENNESSEE VALLEY AUTHORITY

18 CR Part 1304

Interpretation of "Owner"; Navigable Houseboats and Floating Boathouses

AGENCY: Tennessee Valley Authority.

ACTION: Interpretation of rule.

SUMMARY: The Tennessee Valley Authority is giving public notice of its interpretation of its rules set forth at 18

CFR 1304.203(c) and 1304.204(b) requiring the owners of nonnavigable houseboats and floating boathouses with living quarters located on TVA reservoirs and not moored in commercial boat harbors to moor them only where such owners either also own the abutting shoreland property or have the abutting owner's permission to moor opposite the abutting owner's property. The question has arisen in administration of this rule whether one of several coowners of the abutting shoreland may, by virtue of such partial ownership, moor a houseboat there over the objection of the coowners. The interpretation is intended to make clear that a coowner may not and that the word "owner" as used in the rules interpreted means all of the owners.

FOR FURTHER INFORMATION CONTACT: John R. Paulk, Director of Land and Forest Resources, Tennessee Valley Authority, Norris, Tennessee 37828, telephone 615–632–6450, FTS No. 856–6450.

PART 1304—[AMENDED]

18 CFR Part 1304 is amended by adding the following appendix to §§ 1304.203 and 1304.204 as follows:

Appendix—Interpretation

1. Sections 1304.203(a) and 1304.204(b) of Title 18 of the Code of Federal Regulations prohibit new nonnavigable houseboats and new floating boathouses not meeting the requirements of § 1304.205(d) in TVA reservoirs. These sections also provide that existing nonnavigable houseboats approved for continued mooring on TVA reservoirs and all floating boathouses shall be moored: (1) To mooring facilities provided by a commercial dock operator within the designated harbor limits of his dock; or (2) to the bank of the reservoir outside the designated harbor limits of commercial boat docks, if the houseboat or boathouse owner is the owner or lessee of the abutting property at the mooring location (or the licensee of such owner or lessee) and has requested and obtained from TVA, pursuant to § 1304.205, written approval authorizing mooring at such location.

In all cases where more than one person owns or leases the abutting property at a present or proposed mooring location as tenants in common or in any other sort of cotenancy, TVA interprets the terms "the owner or lessee of the abutting property" and "such owner or lessee" in 18 CFR 1304.203(c)(2) and 1304.204(b)(2) as meaning all of the owners of such abutting property. The owner or owners of only a fractional interest or of fractional interests totalling less than one in any such property shall under no circumstances be considered, by virtue of such fractional interest or interests only, to be the "owner or lessee" of such abutting property for the purposes of 18 CFR § 1304.203(c)(2) or § 1304.204(b)(2) and, as such, eligible to moor or license others to moor as provided therein without the consent of the other coowners.

(Sec. 26a of the Tennessee Valley Authority Act of 1933, *as amended* (16 U.S.C. 831y–1))

Dated: February 14, 1983.

W. F. Willis,

General Manager.

EFFECTIVE DATE: March 8,1983.

FOR FURTHER INFORMATION CONTACT: Sandra K. Woods, Bureau of Veterinary Medicine (HFV–114), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–3420.

SUPPLEMENTARY INFORMATION: Bristol Laboratories, Division of Bristol-Myers Co., Syracuse, NY 13201, filed NADA 127–892 providing for intrauterine infusion of amikacin sulfate solution for treating genital tract infections (endometritis, metritis, and pyometra) in mares when caused by susceptible organisms including *E. coli, Pseudomonas* spp., and *Klebsiella* spp. Well-controlled studies demonstrated safety and effectiveness of the product for the proposed conditions of use. The NADA is approved, and the regulations are amended to reflect this approval.

In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

The Bureau of Veterinary Medicine has carefully considered the potential environmental effects of this action and has concluded that the action will not have a significant impact on the human environment and that an environmental impact statement therefore will not be prepared. The Bureau's finding of no

significant impact and the evidence supporting this finding, contained in a statement of exemption (pursuant to 21 CFR 25.1(f)(1)(ii) (*a*) and (*e*)), may be seen in the Dockets Management Branch (address above), between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects in 21 CFR Part 529

Animal drugs, Miscellaneous use.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i) 82 Stat. 347 (21 U.S.C. 360b(i))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Bureau of Veterinary Medicine (21 CFR 5.83), Part 529 is amended by adding new § 529.50, to read as follows:

PART 529—CERTAIN OTHER DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

§ 529.50 Amikacin sulfate intrauterine solution.

(a) *Specifications.* Each milliliter of sterile aqueous solution contains 250 milligrams of amikacin (as the sulfate).

(b) *Sponsor.* See No. 000015 in § 510.600(c) of this chapter.

(c) *Conditions of use.*—(1) *Amount.* Two grams (8 milliliters) diluted with 200 milliliters of sterile physiological saline per day for 3 consecutive days.

(2) *Indications for use.* For treating genital tract infections (endometritis, metritis, and pyometra) in mares when caused by susceptible organisms including *E. coli, Pseudomonas* spp., and *Klebsiella* ssp.

(3) *Limitations.* For intrauterine infusion in the horse only. Not for use in horses intended for food. Federal law restricts this drug to use by or on the order of a licensed veterinarian.

Effective date. May 9, 1983.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)))

Dated: March 1, 1983.

21 CFR Part 558

New Animal Drugs in Animal Feeds; Hygromycin B

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a new animal drug application (NADA) filed by Zip Feed Mills, Inc., providing for making an 0.6-gram-per-pound hygromycin B premix from both 2.4- and 8-gram-per-pound hygromycin premixes. The intermediate premix is used for making complete swine feeds for control of infestations of large roundworms, nodular worms, and whipworms and for making complete chicken feeds for control of large roundworms, cecal worms, and capilliary worms.

EFFECTIVE DATE: March 8, 1983.

FOR FURTHER INFORMATION CONTACT: Lonnie W. Luther, Bureau of Veterinary Medicine (HFV–128), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–4317.

SUPPLEMENTARY INFORMATION: Zip Feed Mills, Inc., P.O. Box 500, 304 E. Eighth St., Sioux Falls, SD 57101, is the sponsor of NADA 132–618 providing for use of 2.4- and 8-gram-per-pound hygromycin premixes to make a 0.6-gram-per-pound hygromycin B premix. The intermediate premix is used to make complete swine feeds for the control of infestations of large roundworms, nodular worms, and whipworms and complete chicken feed for the control of infestations of large roundworms, cecal worms, and capillary worms. The NADA was filed by Elanco Products Co. for the sponsor Zip Feed Mills, Inc. Approval of this NADA is based on safety and effectiveness data contained in Elanco's approved NADA's 10–918 and 11–948. Elanco has authorized use of the data in NADA's 10–918 and 11–948 to support approval of this application. This approval does not change the approved use of the drug. Consequently, approval of the NADA poses no increased human risk of exposure to residues of the animal drug, nor does it change the conditions for the drug's safe use in the target animal species.

Accordingly, under the Bureau of Veterinary Medicine's supplemental approval policy (42 FR 64367; December 23, 1977), this approval does not require reevaluation of the safety and effectiveness data in NADA's 10–918 and 11–948. NADA 132–916 is approved, and the regulations are amended to reflect the approval.

In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (address above).

The Bureau of Veterinary Medicine has determined pursuant to 21 CFR 25.24(d)(1)(i) (proposed December 11, 1979; 44 FR 71742) that this action is of a type that does not individually or cumulatively have a significant impact on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

This action is governed by the provisions of 5 U.S.C. 556 and 557 and is therefore excluded from Executive Order 12291 by section 1(a)(1) of the Order.

List of Subjects in 21 CFR Part 558

Animal drugs; Animal feeds.

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360(i))) and under authority delegated to the Commissioner Food and Drugs (21 CFR 5.10) and redelegated to the Bureau of Veterinary Medicine (21 CFR 5.83), Part 558 is amended in § 558.274 *Hygromycin B* by adding, in numerical sequence, drug labeler code "017434" to paragraph (a)(4) and to the "Sponsor" column in paragraph (e)(1)(i) and (ii).

Effective date, March 8, 1983.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)))

Dated: February 23, 1983.

21 CFR Part 558

New Animal Drugs for Use in Animal Feeds; Lincomycin

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a new animal drug application (NADA) filed for Feed Specialties Co. providing for use of 50-gram-per-pound lincomycin premixes to manufacture intermediate premixes subsequently used in swine feeds for treatment and/or control of dysentery.

EFFECTIVE DATE: March 8, 1983.

FOR FURTHER INFORMATION CONTACT: Lonnie W. Luther, Bureau of Veterinary Medicine (HFV–128), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–4317.

SUPPLEMENTARY INFORMATION: Feed Specialties Co., 1877 NE. 58th Ave., Des Moines, IA 50313, is sponsor of NADA 132–660 filed in its behalf by the Upjohn Co. The NADA provides for use of 50-

gram-per-pound lincomycin premixes to manufacture 4-, 8-, and 20-gram-per-pound lincomycin intermediate premixes for subsequent incorporation into complete swine feeds. The swine feeds are used for control and/or treatment of swine dysentery as provided in 21 CFR 558.325(f)(2) (i), (ii), and (iii). The basis of approval of this NADA is discussed fully in the freedom of information (FOI) summary. Based on the data and information submitted, the NADA is approved and the regulations are amended to reflect the approval.

In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

The Bureau of Veterinary Medicine has determined pursuant to 21 CFR 25.24(d)(1)(i) (proposed December 11, 1979; 44 FR 71742) that this action is of a type that does not individually or cumulatively have a significant impact on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

List of Subjects in 21 CFR Part 558

Animal drugs, Animal feeds.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Bureau of Veterinary Medicine (21 CFR 5.83), § 558.325 is amended by adding new paragraph (b)(10) to read as follows:

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

§ 558.325 Lincomycin.

* * * * *

(b) *Approvals.* * * *

(10) Premix levels of 4, 8, and 20 grams per pound have been granted to No. 017274 in § 510.600 of this chapter for use as in paragraph (f)(2) (i), (ii), and (iii) of this section.

BILLING CODE 4160-01-M

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

29 CFR Part 1910

[Docket No. H–049A]

Occupational Exposure to Lead; Respirator Fit Testing; Corrections

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Final rule; corrections.

SUMMARY: OSHA is correcting certain inadvertent errors which appeared in the final rule on respirator fit testing in the lead standard, published on November 12, 1982 (47 FR 51110). The irritant smoke protocol for qualitative fit testing as published in the new Appendix D to 29 CFR 1910.1025 incorrectly required an isoamyl acetate pretest and a combination filter cartridge. These requirements are now being deleted. The saccharin protocol as published incorrectly omitted reference to nebulizers equivalent to the DeVilbiss model 40. This omission is being corrected.

DATE: These corrections are effective on March 8, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. James Foster, Occupational Safety and Health Administration, Rm. N–3637, 200 Constitution Avenue, NW., Washington, D.C. 20210; telephone 202–523–8151.

SUPPLEMENTARY INFORMATION: On November 12, 1982, OSHA published an amendment to the lead standard, 29 CFR 1910.1025 (47 FR 51110). This amendment allowed negative pressure half mask respirators to be fitted by qualitative fit testing (QLFT) as an alternative to quantitative fit testing (QNFT) as long as such testing was done according to the protocols set forth in a new Appendix D to the standard. One of the three protocols set forth in Appendix D was based on the use of an irritant smoke. This protocol was intended to be essentially the same as that described by AISI in its post-hearing submission (Exhibit 41), since OSHA had determined it provided adequate employee protection. However, the protocol as published on November 12, 1982, erroneously required an isoamyl acetate pretest as part of the procedures and a combination filter cartridge. Both of these elements had been included in a previous version submitted by AISI, but were not intended to be included in the final version, accepted by OSHA. Therefore, Appendix D to § 1910.1025 is being corrected to agree with the supporting documentation, by no longer requiring combination filter cartridges and by removing the requirement to pretest with isoamyl acetate.

Another of the protocols set forth in Appendix D was based on the use of a saccharin solution aerosol. This aerosol is produced by a nebulizer. The published protocol inadvertently omitted a phrase which would allow use of nebulizers which are equivalent to the DeVilbiss model 40 in producing a saccharin solution aerosol. The use of equivalent nebulizers which would produce the same particle size distribution at the same concentration as the DeVilbiss model 40 was proposed (46 FR 27358) and OSHA intended to allow their use in Appendix D.

List of Subjects in 29 CFR Part 1910

Occupational safety and health, Respiratory protection.

PART 1910—[AMENDED]

Accordingly OSHA is correcting Appendix D of 29 CFR 1910.1025 as follows:

1. Appendix D, II, A, step 5 and Appendix D, II, C, step 5 are corrected by inserting "or equivalent," after the word "Nebulizer" in the first sentence in each case.

2. Paragraph A in Appendix D, Section III, Irritant Fume Protocol, is corrected to read as follows:

A. Respirator selection.

Respirators shall be selected as described in section IB above, except that each respirator shall be equipped with high efficiency cartridges.

3. Paragraph B, Fit Test, in Appendix D, Section III is corrected as follows:

a. Step B1 is corrected to read: The test subject shall be allowed to smell a weak concentration of the irritant smoke to familiarize him with its characteristic odor.

b. Steps B5 and B6 are deleted.

c. The subsequent steps are renumbered as B5 through B12.

d. Renumbered step B11 (formerly B13) is corrected to read: Steps B4, B7, and B8 of this protocol shall be performed in a location with exhaust ventilation sufficient to prevent general contamination of the testing area by the irritant smoke.

This document was prepared under the direction of Thorne G. Auchter, Assistant Secretary of Labor for Occupational Safety and Health, U.S. Department of Labor, 200 Constitution Ave. NW., Washington, D.C. 20210.

(Sec. 6 Pub. L. 91–596, 84 Stat. 1593 (29 U.S.C. 655), 29 CFR Part 1911; 41 U.S.C. 35, 36; Secretary of Labor's Order No. 8–76 (41 FR 25059))

Signed at Washington, D.C. this 28th day of February 1983.

Thorne G. Auchter,

Assistant Secretary of Labor.

BILLING CODE 4510-26-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 30

[OA–FRL 2317–1]

General Grant Regulations and Procedures

AGENCY: Environmental Protection Agency.

ACTION: Deviation to rule.

SUMMARY: Under the authority of 40 CFR 30.1000, the Environmental Protection Agency (EPA) has issued a class deviation from 40 CFR 30.720(a) of EPA's general grant regulations for cooperative agreements awarded under Section 3012 of the Resource Conservation and Recovery Act (RCRA). This deviation waives EPA's usual five percent cost-sharing requirement for assistance award recipients. We are publishing the class deviation as a part of this document.

EFFECTIVE DATE: This deviation was effective on February 16, 1983.

FOR FURTHER INFORMATION CONTACT: Marshall Schy, Grants Administration Division (PM–216), Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460 (202–382–5298).

SUPPLEMENTARY INFORMATION: Section 3012 of the Resource Conservation and Recovery Act provides for State programs to develop inventories of hazardous waste and disposal sites. Congress appropriated $10,000,000 from the Hazardous Substance Response Trust Fund, established under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), to carry out section 3012. This one-time appropriation will be used to assist States in completing the site assessment and inspection process already begun under CERCLA.

EPA believes there are several reasons for not requiring grantees to share the cost of this program. First, preliminary assessments and site inspections, which will be given priority under this program, presently are not subject to cost-sharing requirements under CERCLA. Second, requiring cost sharing would delay the implementation of program activities until States were able to provide additional funds to meet their share. It also would delay meeting EPA's goals for carrying out preliminary assessments and site inspections. Finally, requiring cost sharing under section 3012 might, because of limited resources, make it difficult for States to meet their cost sharing obligations under CERCLA projects.

A copy of the class deviation follows this document.

Dated: February 16, 1983.

John P. Horton,

Assistant Administrator for Administration (PM–208).

Dated: February 14, 1983.

Michael A. Brown,

Acting Assistant Administrator for Solid Waste and Emergency Response (WH–562A)

List of Subjects in 40 CFR Part 30

Administrative practice and procedure, Grant programs—environmental protection, Inventions and patents, Copyright, Reporting and recordkeeping requirements.

Memorandum

To: William N. Hedeman, Jr., Director, Office of Emergency and Remedial Response (WH–548)

From: Harvey Pippen, Jr., Director, Grants Administration Division (PM–216)

Subject: Class Deviation from 40 CFR 30.720(a)

This responds to your January 21, 1983, request for a class deviation from 40 CFR 30.72(a) of the general grant regulations for Section 3012 of the Resource Conservation and Recovery Act (RCRA). Section 30.720(a) requires EPA assistance recipients to share project costs; at a minimum, recipients must contribute five percent of allowable project costs.

Section 3012 of the Resource Conservation and Recovery Act provides for State programs to develop inventories of hazardous waste and disposal sites. Congress appropriated $10,000,000 from the Hazardous Substance Response Trust Fund, established under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), to carry out Section 3012. This one-time appropriation will be used to assist States in completing the site assessment and inspection process already begun under CERCLA.

EPA believes there are several reasons for not requiring grantees to share the cost of this program. First, preliminary assessments and site inspections, which will be given priority under this program, presently are not subject to cost-sharing requirements under CERCLA. Second, requiring cost sharing would delay the implementation of program activities until States could provide funds to meet their share. It also would delay meeting EPA's goals for carrying out preliminary assessments and site inspections. Finally, requiring cost sharing under section 3012 might, because of limited resources, make it difficult for States to meet their cost-sharing obligations under other CERCLA projects.

Therefore, I approve a class deviation from 40 CFR 30.720(a) for assistance awarded under Section 3012 of RCRA for this one-time appropriation of $10,000,000. This deviation waives the cost-sharing requirement in EPA's general grant regulations (40 CFR 30) for this program.

Dated: February 16, 1983.

BILLING CODE 6560-50-M

40 CFR Part 52

[A–5–FRL 2307–6]

Approval and Promulgation of Implementation Plans: Michigan

AGENCY: Environmental Protection Agency (EPA).

ACTION: Withdrawal of final rulemaking.

SUMMARY: On October 25, 1982 (47 FR 47245), EPA announced final approval of Consent Order APC No. 02–1980, for the Hayes-Albion Corporation and of Permits 341–79 and 375–79 for the American Colloid Plant, as revisions to the Michigan State Implementation Plan (SIP) for Calhoun County. EPA subsequently received a request for an opportunity to submit adverse or critical comments on this approval. Accordingly EPA is today withdrawing its approval of this revision.

EFFECTIVE DATE: This final rulemaking is effective March 8, 1983.

ADDRESSES: Copies of the SIP revision are available for inspection at the following addresses:

The Office of the Federal Register, 1100 L Street, NW., Room 8401, Washington, D.C. 20408;

Environmental Protection Agency, Public Information Reference Unit, 401 M Street, SW., Washington, D.C. 20460;

Environmental Protection Agency, Air Programs Branch, Region V, 230 South Dearborn Street, Chicago, Illinois 60604;
Michigan Department of Natural Resources, Air Quality Division, State Secondary Government Complex, General Office Building, 7150 Harris Drive, Lansing, Michigan 48917.

FOR FURTHER INFORMATION CONTACT: Toni Lesser at (312) 886–6037.

SUPPLEMENTARY INFORMATION: On April 25, 1982, the State of Michigan submitted to EPA: Consent Order APC No. 02–1980 for the Hayes-Albion Corporation, along with alterations to Section 5(D) of the Consent Order; and Permits 341–79 and 375–79 for the American Colloid Plant, as revisions to the Michigan SIP. On June 18, 1982, the State of Michigan submitted a Fugitive Dust Control Plan and a Malfunction Abatement Plan for major air cleaning devices at Hayes-Albion as part of its SIP revision. These plans contain specific measures for reducing total suspended particulate (TSP) emissions. The Hayes-Albion foundry is located in Calhoun County. A one-square-mile area of Calhoun County on the west side of Albion City, around Hayes-Albion (Calhoun County, R4W, T2S, Section 34), has been designated as nonattainment for the primary TSP standards.

On October 25, 1982, (47 FR 47245), EPA announced the availability of this revision and its approval. The reader is referred to 47 FR 47245 for further information about the revision. In the approval notice of October 25, 1982, EPA advised the public that it was deferring the effective date of its approval for 60 days, until December 27, 1982, to provide an opportunity for the public to submit comments on the revision. EPA also announced that, if within 30 days of the publication of the notice of approval we received notice that someone wanted to submit an adverse or critical comment, we would withdraw the approval and begin a new rule by proposing action and establishing a 30-day comment period.

EPA has received notice that a member of the public wants to submit an adverse or critical comment on the revision pertaining to the Hayes-Albion Corporation. Therefore, in accordance with the procedure described above, EPA is today withdrawing its October 25, 1982 approval of Consent Order APC No. 02–1980 for the Hayes-Albion Corporation and Permits 341–79 and 375–79 for the American Colloid Plant. Elsewhere in today's **Federal Register**, EPA is reproposing to approve Consent Order APC No. 02–1980, for the Hayes-Albion Corporation and Permits 341–79 and 375–79 for the American Colloid Plant as revisions to the Michigan SIP and establishing a 30-day comment period on its proposed approval.

EPA is withdrawing this action without providing prior notice or opportunity to comment. EPA finds that it has good cause within the meaning of 5 U.S.C. 553(b) to proceed without notice and comment. Notice and comment would be impracticable because EPA needs to withdraw its approval as quickly as possible in order to consider the comments which members of the public want to submit. Moreover, further notice is not necessary because EPA has already informed the public that it would follow this procedure if it received a request for an opportunity to comment. (See 46 FR 41051 and 46 FR 44477.) For the same reason, EPA finds it has good cause under 5 U.S.C. 553(b) to make this withdrawal immediately effective.

Under Executive Order 12291, today's action is not "Major." The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

List of Subjects in 40 CFR Part 52

Air pollution control, Ozone, Sulfur oxides, Nitrogen dioxide, Lead, Particulate matter, Carbon monoxide, Hydrocarbons, Intergovernmental relations.

This notice is issued under authority of sections 110 and 172 of the Clean Air Act, as amended (42 U.S.C. 7410 and 7502).

Dated: February 25, 1983.

Anne M. Burford,

Administrator.

Note.—Incorporation by reference of the State Implementation Plan for the State of Michigan was approved by the Director of the Federal Register on July 1, 1982.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Public Land Order 6361

[M 41528]

Montana; Revocation of Stock Driveway Withdrawal No. 142, Montana No. 6

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Land Order.

SUMMARY: This order revokes a Secretarial order which withdrew public lands for use as a stock driveway. This action will restore 158.24 acres to operation of the public land laws generally.

EFFECTIVE DATE: April 13, 1983.

FOR FURTHER INFORMATION CONTACT: Roland F. Lee, Montana State Office, 406–657–6291.

SUPPLEMENTARY INFORMATION:

By virtue of the authority contained in Section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, it is ordered as follows:

1. Secretarial Order dated August 12, 1940, which withdrew the following described lands for a stock driveway is hereby revoked:

Principal Meridian

T. 14 S., R. 6 W.,
sec. 30, lots 3, 4 and E½SW¼.

The area described contains 158.24 acres in Beaverhead County.

2. At 8 a.m. on April 13 1983, the lands shall be open to operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law. All valid applications received at or prior to 8 a.m. on April 13, 1983, shall be considered as

simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

3. The lands have been and continue to be open to location under the mining laws and to applications and offers under the mineral leasing laws.

Inquiries concerning the lands should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, P.O. Box 30157, Billings, Montana 59107.

February 22, 1983.

Garrey E. Carruthers,
Assistant Secretary of the Interior.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the nation

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required either to adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for the community. This date may be obtained by contacting the office where the maps are available for inspection indicated in the table below.

ADDRESSES: See table below.

FOR FURTHER INFORMATION CONTACT: Dr. Brian R. Mrazik, Acting Chief, Engineering Branch, Natural Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287-0230.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the final determination of flood elevation for each community listed.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 44 CFR Part 67). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided, and the Agency has resolved the appeals presented by the community.

The Agency has developed criteria for flood plain management in flood-prone areas in accordance with 44 CFR Part 60.

Pursuant to the provisions of 5 USC 605(b), the Associate Director, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that the (final) flood elevation determinations, if promulgated, will not have a significant economic impact on a substantial number of small entities. A flood elevation determination under section 1363 forms the basis for new local ordinances, which, if adopted by a local community, will govern future construction within the flood plain area. The elevation determinations, however, impose no restriction unless and until the local community voluntarily adopts flood plain ordinances in accord with these elevations. Even if ordinances are adopted in compliance with Federal standards, the elevations prescribe how high to build in the flood plain and do not proscribe development. Thus, this action only forms the basis for future local actions. It imposes no new requirement; of itself it has no economic impact.

List of Subjects in 44 CFR Part 67

Flood insurance, Floodplains.

The final base (100-year) flood elevations for selected locations are:

FINAL BASE (100-YEAR) FLOOD ELEVATIONS

State	City/town/county	Source of flooding	Location	#Depth in feet above ground. *Elevation in feet (NGVD)
Arizona	Pima County (Unincorporated Areas), FEMA-8254.	Santa Cruz River	120 feet upstream of the intersection of Avra Valley Road and Santa Cruz River.	*2,085
			130 feet downstream of the intersection of Sunset Road and Santa Cruz River.	*2,213
		Santa Cruz River—With Consideration of Levee.	75 feet downstream of the intersection of the Southern Pacific Railroad spur bridge and Santa Cruz River.	*2,714
		Santa Cruz River—Without Consideration of Levee.	Intersection of Sahuarita Road and Southern Pacific Railroad.	*2,704
		Santa Cruz River	80 feet upstream of the intersection of Continental Road and Santa Cruz River.	*2,854
			Center of U.S.Highway 89 (State Highway 93), 150 feet north of its intersection with Pima Mine Road.	#3
		Santa Cruz River West Overflow Channel.	125 feet downstream of the intersection of Continental Road and Santa Cruz River West Overflow Channel.	*2,854
		Los Robles Wash	150 feet upstream of the intersection of Trico Road and Los Robles Wash.	*1,929
			Center of Avra Road, 1000 feet north of its intersection with Avra Valley Road.	#1
		West Branch Brawley Wash	110 feet downstream of the intersection of Avra Valley Road and West Branch Brawley Wash.	*1,991
		Blanco Wash	Intersection of Chinle Road and Chinle Lane	*1,918
			Center of Tucker Road, 4,200 feet west of its intersection with Arway Road.	#2
		Brawley Wash	Intersection of Manville Road and Reservation Road	#1
		Black Wash	Center of Snyder Hill Road, 2.5 miles east of its intersection with Sandario Road.	#2
		Rillito Creek	Intersection of La Cholla Boulevard and Rillito Creek	*2,256
			25 feet downstream of the intersection of Dodge Boulevard and Rillito Creek.	*2,382
		Rillito Creek North Overbank Diversion.	Approximately 550 feet upstream of its confluence with Rillito Creek.	*2,347

FINAL BASE (100-YEAR) FLOOD ELEVATIONS—Continued

State	City/town/county	Source of flooding	Location	#Depth in feet above ground. *Elevation in feet (NGVD)
		Pantano Wash—With Consideration of Levee.	50 feet north of the intersection of North Craycroft Road and Pantano Wash.	*2,435
		Pantano Wash—Without Consideration of Levee.	Center of North Craycroft Road, 1,250 feet north of its intersection with Fort Lowell Road.	*2,434
		Pantano Wash	Intersection of Golf Links Road and Camino Seco	*2,867
		Canada del Oro	Intersection of Magee Road and Shannon Road	*2,301
			25 feet upstream of the intersection of U.S.Highway 89 (Tucson-Florence Highway) and Canada del Oro.	*2,639
			Intersection of Rolline Road and Lago del Oro Parkway.	*2,925
		Tanque Verde Creek	100 feet upstream of the intersection of Sabino Canyon Road and Tanque Verde Creek.	*2,478
			Center of Barbary Coast Road, 150 feet east of its intersection with Soldier Terrace.	*2,624
		Sopori Wash	Intersection of Arivaca Road and Sopori Ranch Road	*3,197
		Sopori Wash Overflow	Center of U.S.Highway 89, 350 feet south of its intersection with Arivaca Road.	*3,098
		West Branch Santa Cruz River	Center of Valencia Road, 3500 feet east of its intersection with Mission Road.	#1

BILLING CODE 6718-03-M

44 CFR Part 360

State Assistance Program for Training and Education in Comprehensive Emergency Management

AGENCY: Federal Emergency Management Agency (FEMA).

ACTION: Final rule.

SUMMARY: This regulation deletes a provision which states that the program envisions after fiscal year 1981 a sharing of eligible costs between FEMA and the States. This will make the regulations consistent with the current Federal budget.

DATE: March 8, 1983.

FOR FURTHER INFORMATION CONTACT: Dr. Charles N. Turner, Acting Chief, Academic Support and Operations, Telephone Number: (301) 447–8771.

SUPPLEMENTARY INFORMATION: The regulation governing the State assistance program for training and education has a provision which states that for fiscal year 1981 only FEMA funding for this activity would be at 100% of allowable costs and that in future years it was envisioned that there would be cost sharing between the Federal Government and the States. It has now been determined that FEMA will reimburse State and local participants in FEMA field training activities funded under the Comprehensive Cooperative Agreement at the 100% level. As this regulation relieves a restriction, it can be made effective immediately. Also, for the same reason, notice and public comment are considered unnecessary. The rule applies only to States and thus no regulatory flexibility analysis is required. This is also not a major regulation.

List of Subjects in 44 CFR Part 360

Grant programs—education.

PART 360—[AMENDED]

Accordingly, 44 CFR 360.2(e) is amended by numbering the first paragraph as paragraph (1) and by revising the last paragraph to read as follows:

360.2 Description of program.

* * * * *

(e) * * *

(2) Allowable cost will be funded at 100%.

Dated: February 23, 1983.

Fred J. Villella,

Associate Director.

BILLING CODE 6718-03-M

FEDERAL MARITIME COMMISSION

46 CFR Part 536

[General Order 13, Amendment No. 10; Docket No. 80–56]

Publishing and Filing Tariffs by Common Carriers in the Foreign Commerce of the United States

AGENCY: Federal Maritime Commission.

ACTION: Final rule.

SUMMARY: The Commission is providing for 24-hour receipt of permanent tariff filings, including the use of electronic filing methods, in lieu of accepting temporary tariff filings. This will eliminate what has become an unnecessary burden on the Commission's staff and resources and will also simplify the use of foreign commerce tariffs by shippers, carriers and other interested persons. Providing for the receipt of permanent tariff filings on an around-the-clock basis, including those filed by electronic modes, should benefit carriers, conferences and shippers by enabling them to meet commercial exigencies.

DATE: Effective May 30, 1983.

FOR FURTHER INFORMATION CONTACT: James A. Warner, Chief, Office of Foreign Tariffs, Federal Maritime Commission, 1100 L Street NW., Room 10213, Washington, D.C. 20573, (202) 523–5827.

SUPPLEMENTARY INFORMATION: On September 3, 1981, the Commission stayed its Final Rule in this proceeding (46 FR 44190). That rule would have precluded the filing of temporary amendments to tariffs published by carriers or conferences of carriers in the foreign commerce of the United States, effective September 8, 1981 (46 FR 35092). The stay was requested by various conferences which sought an additional period for commenting on the rationale employed by the Commission in arriving at this decision.

By notice served December 28, 1981, the Commission granted interested parties an opportunity to comment on the basis for its rule (46 FR 62869). This notice also proposed a new procedure which would permit the receipt of permanent tariff amendments before and after the Commission's normal business hours, including weekends and holidays.

Comments were received from fourteen commentators on behalf of twenty-three conferences, two ocean carriers, three shippers and four tariff

publishing services. Seven of the commenting conferences support the Commission's proposed discontinuance of the temporary tariff filing privilege,[1] while fifteen conferences object to it.[2]

Other commenting parties support the Commission's proposal, but request that it be expanded to allow the permanent filing of tariff pages by electronic modes, on a 24-hour basis.[3] This suggestion has merit and has been adopted. Also a definition of electronic tariff filing is added to the Commission's tariff filing regulations to recognize such filings as a type of permanent tariff filing. The Commission will receive tariff material 24 hours a day. Material submitted after normal working hours will be stamped in a mail drop in the lobby of the Commission's Washington, D.C. office. The procedure for the receipt of electronic tariff filings will be through the use of a date/time device on receiving machines which are presently, or may in the future be, located in the Commission's public file facilities.[4]

Certain commenting parties request that the Commission expand the rulemaking proceeding to permit the 24-hour filing privilege for tariffs which are filed in the domestic offshore commerce under the requirements of the Commission's General Order 38.[5] Such a request is beyond the scope of this proceeding, which relates only to tariffs filed in the foreign commerce of the United States.

The Commission has also been urged to: (1) Continue the telex filing privilege without restriction; (2) allow foreign based filers continued use of telexes, with or without a limit on the number of such messages; (3) provide further justification before eliminating the temporary tariff filing privilege; (4) provide for the use of temporary filings when filed with sequential numbers; (5) assess a fee for the use of temporary tariff filings; (6) allow tariffs to be filed in the Commission's field offices; and (7) pursue legislative modifications to the Shipping Act to permit filings to be made within a certain period after contracts of affreightment are concluded.[6] Some of these comments [7] have already been considered during the course of this rulemaking proceeding while others are inconsistent with the intent of this rulemaking and therefore merit no further consideration.

The decision to eliminate temporary tariff filings may be inconvenient to some. However, there are means by which tariff changes considered time sensitive can be transmitted to the Commission for immediate effectiveness. Present tariff filing regulations already contain specific language to permit telephonic special permission applications where "emergency situations" appear to exist (*See* 46 CFR 536.15(c)). Further, carriers and conferences can still request a waiver of the Commission's permanent tariff page filing requirements if good cause can be shown.

The provisions of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) do not apply to this Final Rule. The Commission's prior certification that the rule, if implemented, would not have any significant economic impact on a substantial number of small entities was made to the Chief Counsel for Advocacy of the Small Business Administration on January 20, 1982 and published in the **Federal Register** on January 28, 1982.

List of Subjects in 46 CFR Part 536

Maritime carriers, Reporting and recordkeeping requirements.

Therefore, it is ordered, That pursuant to 5 U.S.C. 553, and sections 18(b), 22 and 43 of the Shipping Act, 1916 (46 U.S.C. 817(b), 821 and 841(a)), 46 CFR Part 536 is amended as follows:

§ 536.2 [Amended]

1. A new paragraph (q) is added to § 536.2 which read as follows:

§ 536.2 Definitions.

* * * * *

(q) *Tariff filing, Electronic.*

The transmission of tariff filings to the Commission through the use of commercial data processing terminals. The data processing receiving terminal(s) are to be located in the Commission's Washington, D.C. offices. Tariff material filed electronically must conform to all the regulations applicable to permanent tariff filings, except as follows:

(1) electronically filed tariff pages received from data processing terminals may be used for filing with the Commission; and

(2) electronically filed tariff matter shall be accompanied by an electronically filed letter of transmittal; and

§ 536.3 [Amended]

2. Paragraph (a) of § 536.3 is redesignated as Paragraph (a)(1); and a new paragraph (a)(2) is added to § 536.3 which reads as follows:

§ 536.3 Filing of tariffs; general.

(a) * * *

(2) Receipt of Tariffs—The Commission will receive tariff filings on an around-the-clock basis. Receipt of tariff filings during other than normal business hours will be time stamped at a tariff mail drop in the lobby of the Commission's Washington, D.C. offices. Electronic tariff filings transmitted to the Commission by electronic modes will be receipted by a date/time device on the receiving machine; and

§ 536.10 [Amended]

3. Paragraph (c) of § 536.10 is deleted; and

It is further ordered, that the stay previously issued in this proceeding on September 3, 1981, is hereby rescinded.

By the Commission.

Francis C. Hurney,

Secretary.

INTERSTATE COMMERCE COMMISSION

49 CFR Ch. X

[Ex Parte No. 311 (Sub-No. 4)]

Modification of the Motor Carrier Fuel Surcharge Program

AGENCY: Interstate Commerce Commission.

ACTION: Change in owner-operator fuel reimbursement figure.

SUMMARY: Due to a change in the nationwide average cost of diesel fuel, owner-operator reimbursement has changed from 11.5 to 11 cents per mile.

EFFECTIVE DATE: This decision will be effective on March 22, 1983.

FOR FURTHER INFORMATION CONTACT:
Lee Alexander (202) 275-7723
Ted Kalick (202) 275-6446
Alan Rothenberg (202) 275-7597
Boston, MA (603) 223-2372
Philadelphia, PA (215) 597-4460
Atlanta, GA (404) 881-2167
Chicago, IL (312) 353-6204
Ft. Worth, TX (817) 334-2794
San Francisco, CA (415) 974-7125

SUPPLEMENTARY INFORMATION:

In a decision served February 22, 1983 (48 FR 8152, February 25, 1983), the Commission established owner-operator reimbursement at 11.5 cents per mile for all carrier-related business miles. This change will become effective March 11, 1983. As noted in the October 8, 1981 decision (46 FR 50070, October 9, 1981), the mileage payment will change when the price of fuel in conjunction with the reimbursement formula causes the figure to rise or decline by .5 cents per mile.

As of February 28, 1983, the current price of diesel fuel was 114.4 cents per gallon. The reimbursement figure is 10.8. Ten working days after publication of the notice in the Federal Register (effective March 22, 1983), carriers shall reimburse owner-operators at a minimum of 11 cents per mile.

During this 10-day period or after, if they choose, carriers may adjust their rates to reflect the change in owner-operator reimbursement by using the 10-day notice provisions of Special Permission No. 81-2500 (see Part 2 of Appendix B and Appendix C to the October 8 decision). All other normal rate-making avenues are also available.

Notice shall be given to the general public by mailing a copy of this decision to the Governor of each State having jurisdiction over transportation by depositing a copy in the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., for public inspection and by depositing a copy with the Director, Office of the Federal Register, for publication.

Decided: February 28, 1983.

By the Commission, Heber P. Hardy, Director.

Agatha L. Mergenovich,
Secretary.

49 CFR Parts 1039, 1300, and 1301

[Ex Parte No. 346 (Sub-No. 3)]

Rail General Exemption Authority—Long and Short Haul Transportation

AGENCY: Interstate Commerce Commission.

ACTION: Final rules.

SUMMARY: In light of the expanded exemption authority contained in the Staggers Rail Act of 1980, the Commission is: (1) Exempting all rail rates and charges from the need for prior Commission approval when departing from the restrictions of 49 U.S.C. 10726; (2) overruling case law holding that a violation of section 10726 is *prima facie* evidence of unreasonableness; and (3) eliminating regulations no longer required as a result of the exemption.

EFFECTIVE DATE: April 7, 1983.

FOR FURTHER INFORMATION CONTACT:
Martin E. Foley, (202) 275-7348.

SUPPLEMENTARY INFORMATION:

This proceeding began with a Notice of Proposed Rulemaking published October 29, 1979 (44 FR 61981) in which the Commission sought comment on a proposal to exempt certain categories of rail rates and charges from section 10726 of the Interstate Commerce Act. Section 10726 prohibits rail carriers, unless they obtain prior Commission approval, from charging a higher rate for:

(a) A shorter distance than for a longer distance over the same route in the same direction (where the longer route includes the shorter) or

(b) A through rate than for the sum of the intermediate rates.[1]

[1] The Commission may grant relief from the requirements of this section in "special cases", often called "Fourth Section" cases since the provisions of section 10926 of the Act were, prior to its recodification, found in section 4. Relief is now granted to allow carriers to meet inter- and intramodal competition, to allow for different cost associated with different types of service, and to remedy technical situations (such as group rates to or from all points in a given area).

The October 29, 1979 proposal was limited to nine categories of rail rates. After comments were received in response to that notice, but before the Commission could reach a decision, Congress enacted the Staggers Rail Act of 1980 (Staggers Act) which not only amended section 10726, but also revised and expanded the Commission's exemption authority under 49 U.S.C. 10505.

In light of those statutory changes, the Commission issued a Second Notice of Proposed Rulemaking (second notice) on December 18, 1980 (45 FR 83380) proposing a broader exemption than that in the original notice. The second notice proposed to: (1) Exempt all rates that depart from the restrictions of section 10726 from pre-justification requirements and from the investigation and suspension procedures of section 10707; (2) overrule case law holding that a violation of section 10726 is *prima facie* evidence that a rate is unreasonable; and (3) eliminate the regulations governing Commission approval of departures from section 10726.

Additional information is contained in the Commission's full decision. For a copy of the decision write to: TS Infosystems, Inc., Room 2227, Interstate Commerce Commission, Washington, DC 20423, or call 289-4357 (D.C. Metropolitan area) or toll free (800) 424-5043.

Agatha L. Mergenovich,
Secretary.

Appendix

PART 1039—[AMENDED]

Chapter X of Title 49 of the Code of Federal Regulations is amended as follows:

1. § 1039.12 is added to read as follows:

§ 1039.12 Long and short haul transportation exemption.

(a) All rates and charges for rail transportation are exempt from the provisions of 49 U.S.C. 10726 to the extent that:

(1) Commission approval or consideration before the effective date of these rates and charges is not required; and

(2) Section 10707 will not apply to rates to the extent that they are challenged on the basis of alleged violations of Section 10726.

(b) This exemption does not extend to review by the Commission upon the filing of a formal complaint alleging a violation of section 10726. Commission review will, however, be subject to the following conditions:

(1) A showing that a rate violates section 10726 will not create a presumption that the higher rate is unreasonably high, and

(2) A finding by the Commission that a rate or charge violates the provisions of section 10726 will not, absent a specific showing of damages, afford a basis for an award of reparations.

PART 1300—[AMENDED]

§§ 1300.26, 1300.56, 1300.65, and 1300.200 [Removed]

2. 49 CFR 1300.26, 1300.65, and 1300.200 are removed.

PART 1301—[REMOVED]

3. 49 CFR Part 1301 is removed.

[Ex Parte No. 395 (Sub-1)]

Feeder Railroad Development Program

AGENCY: Interstate Commerce Commission.

ACTION: Final rules.[1]

SUMMARY: The Commission is modifying its regulations governing the feeder railroad development program. This program was created to enable shippers and communities to acquire rail lines prior to downgrading or abandonment. These revisions are adopted to remedy problems which have arisen with the existing regulations and to streamline and clarify our application procedures. Generally, the new rules: (1) Eliminate the existing preapplication notice requirements; (2) make various procedural changes designed to accelerate consideration of feeder line applications; and (3) allow for the submission of competing applications for the acquisition of the same feeder line. This decision also discusses Commission policy toward related feeder line and abandonment applications.

EFFECTIVE DATE: These rules are effective on April 7, 1983.

Karen A. Osterloh, (202) 275–7483.

SUPPLEMENTARY INFORMATION: By notice of proposed rulemaking (NPR) served August 3, 1982, and published in 47 FR 33993 (August 5, 1982), we instituted this proceeding proposing to modify our regulations governing the feeder railroad development program. Comments have been received from several parties. Upon analysis of these comments, we have modified the proposed rules. A summary of the modifications to the proposed rules are contained in Appendix A. The text of the final rules is contained in Appendix B. Although all comments are not specifically discussed in this decision they have been considered in developing the final rules.

Discussion

Our discussion of the comments is divided into seven sections. The first six sections deal with the following major topics: (I) Preapplication notice requirements; (II) the relationship between feeder line applications and abandonment applications involving the same line; (III) competing feeder line applications; (IV) procedural schedules; (V) public notice provisions; and (VI) purchase price determinations. The final section addresses several minor matters.

1. *Preapplication Notice.*—The most significant change contained in our proposed rules is the elimination of the 90-day preapplication notice of intent to file a feeder line application. We proposed to eliminate this requirement to avoid situations similar to those in Docket No. AB–43 (Sub-No. 85F), *Illinois Central Gulf Railroad Company—Abandonment—Between Cisco and Green's Switch in Mason and Piatt Counties, IL*, and Finance Docket No. 29813, *Cisco Cooperative Grain Company—Feeder Line Acquisition—Illinois Central Gulf Railroad Company Line Between Cisco and Green's Switch, IL* (not printed), served May 10, 1982, aff'd by decision served July 19, 1982 *(Cisco)*. In *Cisco*, a party filed a notice of intent of file a feeder line application. However, prior to the termination of the 90-day notice period, the owning carrier filed an abandonment application. The Commission dismissed the feeder notice and found: (1) That the filing of a feeder line notice was insufficient to trigger jurisdiction under 49 U.S.C. 10910; and (2) that feeder line jurisdiction could not be invoked after filing of the abandonment application.[2] Thus, one effect of the notice requirement was to frustrate the feeder line program because owning railroads had a method of circumventing its provisions.

While the majority of the parties' comments favor the elimination of the notice requirements, several parties support the retention of a notice period, either 90 days or a shorter 20 to 30-day notice period. These parties argue that a notice period is necessary to assure adequate public notice and to encourage voluntary negotiations between the parties. As discussed in Sections IV and V, the proposed public notice requirements are adequate to preserve the rights of all necessary parties. While the notice period could possibly encourage some voluntary negotiations between the parties, the same goals may be pursued through negotiations without the filing of the feeder line application. Moreover, voluntary negotiations may proceed regardless. Our experience with similar proceedings under 49 U.S.C. 10905 indicates that these voluntary negotiations are often fruitful when the deadline for Commission action nears.

In addition, there is a practical reason for the elimination of the preapplication notice period. Because we have decided that abandonment and feeder line proceedings must occasionally be conducted concurrently (see discussion below), the feeder line proceedings must be concluded *prior* to the final decision in the abandonment proceeding which is subject to statutory deadlines. If a notice period is added, it would become very

---

[1] Our proposed rules relocated to 49 CFR Part 1121. On November 1, 1982, the Commission issued Ex Parte No. 55 (Sub-No. 55), *Revision and Redesignation of the Rules of Practice*. This decision modified the section citation in 49 CFR Subtitle B, Chapter X, Subchapter B (the rules at 49 CFR 1100 *et seq.*). Because of this, the Feeder Line Development Program regulations are now located at 49 CFR Part 1151.

[2] This decision is on appeal to the United States Court of Appeals for the Seventh Circuit in No. 83-2288, *Cisco Cooperative Grain Company* v. *Interstate Commerce Commission*. United Transportation Union argues that this rulemaking proceeding is an unjustifiable interference with the court proceeding and that the court should be allowed to rule prior to the promulgation of these rules. We disagree. The Commission has a continuing duty to review and modify rules and regulations when faced with new developments or in light of reconsideration of the relevant facts. See *American Trucking* v. *Atchison, Topeka & Santa Fe Ry.*, 387 U.S. 397 (1967). The Commission is meeting that duty here.

difficult to process the feeder application prior to the deadline for reaching a decision in the abandonment case. Accordingly, our final rules contain no provisions for prefiling notices.[3]

II. *Relationship Between Feeder Line and Abandonment Applications.*—In the NPR we proposed the following policy for handling related abandonment and feeder line applications: (1) Any feeder line application involving all or any portion of a line which is the subject of an abandonment application filed prior to the feeder line application will be automatically rejected; and (2) feeder line applications and subsequently filed abandonment applications will be processed concurrently.

There is no substantial opposition to our policy to reject feeder applications filed *after* abandonment applications. Several parties, however, objected to the resolution of the problems raised when the feeder application is filed *before* the abandonment application. The parties have offered two alternative procedures for resolving this problem. Some parties argue that the consideration of the abandonment application must be delayed until after the feeder line application is fully processed. The Association of American Railroads (AAR), on the other hand, argues that the subsequent filing of an abandonment application requires the dismissal of an earlier filed feeder line application. Neither suggestion is acceptable.

There is no statutory authority or legislative history which would allow the postponement of the consideration of an abandonment application until a feeder line application is processed. Section 10904 prescribes very strict time limits for the processing of abandonment applications. There are no provisions for the tolling of these time limits or the suspension of the abandonment proceeding. Accordingly, we must reject the proposal to suspend abandonment proceedings during the pendency of the feeder line application.

We also cannot accept AAR's argument that an abandonment application filed after a feeder line application requires the dismissal of the feeder line application. Congress recently amended 49 U.S.C. 10910 in the Rail Safety and Service Improvement Act of 1982. Section 506(a) of the act amended 49 U.S.C. 10910(b)(1)(A)(ii) to provide that the Commission shall require a rail carrier to sell a line if, *inter alia*, the railroad line "* * * is on a system diagram map as required under section 10904 of this title, but the rail carrier owning such line has not filed an application to abandon such line under section 10903 and 10904 of this title before an application to purchase such line, or any required preliminary filing with respect to such application, is filed under this section * * *" This change was described as "a clarifying amendment designed to achieve an interpretation compatible with the Congressional intent in the previous legislation passed." 128 Cong. Rec. H5821 (daily ed. Aug. 12, 1982) (remarks of Rep. Florio). Thus, Congress has expressly indicated its intent that a feeder line application or notice can not be rejected merely on the basis of a subsequently filed abandonment application.

AAR objects to the simultaneous consideration of the two proceedings, arguing that: (1) The feeder line proceeding is unnecessary if an abandonment application is filed; and (2) the policy would encourage the abuse of Commission procedures. AAR argues that Commission's approach is unnecessary because a purchase pursuant to 49 U.S.C. 10905 may be made following a grant of the abandonment. It is true that under 49 U.S.C. 10905 the Commission can also order the sale of the line to a financially responsible person for fair market value. However, the feeder line provisions offer more benefits to the purchaser than 49 U.S.C. 10905. Under the feeder line statute, the Commission can require the selling carrier to provide the purchaser with *trackage rights* and *joint rates* and the buyer can elect to be *exempt* from the provisions of Title 49 (except joint rates provisions). None of these advantages are available under 49 U.S.C. 10905. Moreover, there is no likelihood of obtaining a lower purchase price under 49 U.S.C. 10905 than under the feeder program since the criteria used to set the price are the same. Under 49 U.S.C. 10910, the purchase price is set at the greater of net liquidation value (NLV) or going concern value (GCV), and under section 10905 the criterion is NLV absent a higher GCV. See *Chicago and North Western Transp. Co.-Abandonment*, 363 I.C.C. 956, 961 (1981); aff'd sub nom. *Chicago and North Western Transp. Co.* v. *United States*, 678 F.2d 665 (7th Cir. 1982). AAR also argues that our policy will encourage the use of "sham" feeder line applications intended merely to delay the abandonment proceeding. Under our proposed rules, an abandonment will be delayed if a feeder applicant files its application during the abandonment notice period (if the feeder applicant files a protest referring to its application). The "delay" results because a feeder applicant need only file a minimal protest to have the abandonment investigated.[4] Thus, the filing of a feeder application (and the protest) could result in a 90-day "delay", because a decision in a non-investigated proceeding is due within 75 days of filing while a decision in an investigated proceeding is due within 165 days of filing. 49 U.S.C. 10904(c)(1) and (3).

However we do not believe that our policy will result in the abuse predicted by AAR. A "sham" applicant will gain little advantage from the filing of a feeder line application. As noted, the potential for the delay of the abandonment proceeding is a maximum of 90 days when compared to the delay that could be achieved through the filing of a perfunctory protest. In addition, the feeder line application must contain all the detailed information required in our regulations or it will be rejected. In light of the substantial burdens of preparing a feeder line application and the limited benefit to be derived from the delay of the abandonment, we conclude that the potential for abuse of our investigation

[3] Due to recent Congressional action in the Rail Safety and Service Improvement Act of 1982, a subsequently filed abandonment application no longer requires the dismissal of the feeder line notice. See discussion, *infra*, at page 8. This legislation has thus eliminated the possibility that the *Cisco* situation could recur. However, because it is still necessary to observe the statutory deadlines in concurrently conducted abandonment applications and because the notice provisions will make it difficult to observe these deadlines, the notice provisions will be eliminated.

[4] Our notice also stated that if the feeder line application involved only a portion of the line involved in the related abandonment proceeding, we would bifurcate the abandonment application and only investigate the abandonment of the segment subject to the feeder line application. AAR argues that this policy would encourage the bifurcation of abandonment proceedings and would make it difficult for the railroads to present adequate cost evidence.

We will bifurcate the abandonment proceeding only when the segment of the line unaffected by the feeder line application is unopposed. While this may create some problems in preparing railroad costing evidence, this procedure is currently used where only a portion of line proposed for abandonment is opposed.

Moreover, bifurcation usually benefits the applicant-railroad by creating two proceedings. This procedure ensures that the rail carrier will be able to discontinue operating over the unopposed line segment at the earliest possible date. It also eliminates the possibility that abandonment of the unopposed line segment will be denied. Despite these benefits, there may be instances where the railroad is unable to apportion its cost evidence over the two segments. Accordingly, we will not order bifurcation of the abandonment proceeding over the specific objection of the applicant-railroad.

Finally, there may be instances where a feeder line application may involve a segment of line which would be completely isolated if the unopposed segment in the related application is allowed to be abandoned. In these situations, the abandonment proceeding will not be bifurcated.

procedures caused by this policy is minimal.

AAR also claims that our investigation policy is an abuse of our discretion under 49 U.S.C. 10904. Currently in making an investigation decision, we consider all relevant factors on a case by case basis. See *Abandonment of R. Lines & Discontinuance of Serv.*, 365 I.C.C. 249, 252 (1981) *(Abandonment Rulemaking)*. However, the statute allows us the discretion to order an investigation when it "is needed to assist in determining what disposition to make of the abandonment proceeding." 49 U.S.C. 10904(c)(1). We find that the existence of a pending feeder application requires an investigation in all instances because the forced sale of the line *requires* a specific disposition of the abandonment proceeding, i.e. dismissal of the abandonment application. Our automatic investigation policy is thus neither arbitrary nor an abuse of our broad discretion.[5]

Finally, several parties also argue that the simultaneous consideration of two applications will overtax the parties' and the Commission's resources. While the simultaneous consideration of two proceedings may require a greater commitment of resources, this burden is not overwhelming. Thus, we will follow the policy regrading related applications, as explained above.

III. *Competing Applications*—We originally proposed the elimination of competing applications because we were concerned that the consideration of these applications might unduly broaden the issues or delay the timely issuance of a decision. Since there might be advantages in competing applications, however, we specifically requested comments on this issue.

The vast majority of comments favor retention of competing applications. Only the National Council of Farmer Cooperatives opposed competing applications, arguing that it was unlikely that the Commission would ever find more than one party willing to complete for the purchase of a line.

We will allow competing applications. While competing applications add complexity, all issues can be resolved within the revised procedural schedule discussed in Section IV.

The parties have made two additional suggestions involving competing applications. Several parties argue that we should establish a rule which provides that the Commission shall select which of the qualified competing applicants will be the purchaser. We will not adopt this rule. The Statute does not require us to make a selection. Moreover, in past proceedings, we have determined that the selection must be left to the selling railroad. See *Indiana Hi-Rail;* Compare 49 U.S.C. 10935(f)(3). Accordingly, where two or more financially qualified applicants are competing for the acquisition of the same line of railroad, we will require the selling railroad to select the purchaser. The owning carrier's selection will be required within 5 days after the applicants' acceptance of the Commission's decision.

Finally, one party argues that the rulers should provide that the information contained in a feeder line application should not be released until the deadline for competing applications is past. Although we can appreciate that applicants who have spent time and money preparing an application might be concerned that their work is being used by competitors, we will not enforce such a provision since it would limit the chances of a complete competing application being filed and because an application must be made available to the public.

IV. *Procedural schedule*—The same parties in opposition to the concurrent handling of feeder line and abandonment applications opposed the imposition of a fixed procedural schedule. Since we have determined that a decision on a feeder line application must be reached before the abandonment is decided, it is necessary to adopt a fixed schedule concluding the feeder line application within 155 days. While the statute does not require a fixed schedule, the Commission has been granted broad discretion to implement the feeder line program and to prescribe such regulations and procedures as may be necessary to carry out the provisions of this section. 49 U.S.C. 10910(k). Accordingly, a fixed schedule is appropriate.

The following schedule will be established:

Day 1—Primary application filed.
Day 30—Competing applications due.
Day 60—Comments to the primary and competing applications due.
Day 80—Replies from primary and competing applicants due.
Day 140—Commission decision.
Day 150—Applicants accept or reject the Commission decision.
Day 155—Railroad chooses purchaser if two or more applicants accept the Commission decision.

This schedule takes into account the views of the majority of the parties that a fixed schedule allowing for competing applications is advantageous. This schedule affords interested parties sufficient time to identify issues, develop and present relevant data, and allows the Commission sufficient time to exercise our duties in a responsible manner.

We have made an additional procedural change which is not reflected in this schedule. Our proposed regulations provided that we would issue a decision to accept or reject the feeder line application on the basis of form and content within 15 days of its receipt. Because it is unnecessary to issue a decision accepting feeder line applications, we have decided to issue preliminary decisions only when we reject applications. Our rules provide that a decision rejecting the initial application will be made within 15 days of receipt of the application. This will discontinue the proceeding at the earliest possible date and will enable opposing parties to avoid the preparation of unnecessary pleadings. Since the rejection of a competing application will not result in the discontinuance of the proceeding, we shall reserve the right to reject the competing application at any time including the date set for the final decision.

Office of Special Counsel (OSC) is concerned that our fixed schedule will not allow us to require additional oral or written testimony if the record does not contain sufficient evidence to permit a decision on the merits. OSC is correct that there may be rare instances where the issues in a proceeding are so complex that development of the record within the set time frames might be impossible. However, in those rare instances, we will take steps to assure the development of a complete record, but specific rules are not needed to address this situation.

V. *Public Notice.*—Because our proposed rules would eliminate the 90-day preapplication notice, it was necessary to prescribe another method of providing public notice of the feeder line application. Accordingly, our proposed rules would require the notification of certain designated parties by certified mail and the publication of a summary of the application in the Federal Register.

---

[5] The Commission's Office of Special Counsel (OSC) suggests that our abandonment regulations be formally revised to provide for the automatic investigation of abandonment applications upon the filing of feeder line applicant's protest. The inclusion of such a provision may be useful addition to our abandonment regulations. Our abandonment regulations are currently proposed for revision in Ex Parte No. 274 (Sub-No. 5), *Revision of Abandonment Regulations* (not printed), served October 5, 1981. We will incorporate OSC's recommendation in that proceeding.

The purpose of providing notice in a feeder line proceeding is to assure that affected persons are alerted to a possible change in the status of the line. We conclude that more efficient notice to the affected public may be provided by directly alerting individual parties rather than by publication in the **Federal Register**. Thus, we have expanded the list of parties upon whom an applicant must serve a copy of the application to include: (1) The owning railroad; (2) all rail patrons receiving or originating traffic on the line during the 12-month period preceding the month in which the application is filed; (3) the designated state agency as defined in 49 CFR 1151.2(g) [formerly 49 CFR 1121.11(g)]; (4) county governments in which the line is located; and (5) the Railway Labor Executives' Association.[6]

VI. *Acquisition Cost Determination.*—Our proposed rules would eliminate existing requirements governing the submission of NLV and GCV evidence [currently 490 CFR 1151.7(d)(1), formerly 1128.7(d)(1)].[7] One party opposes the elimination of the evidentiary requirements. We conclude it is inappropriate to delineate the type of evidence the parties should submit. The parties are free to present *any* evidence of GCV or NLV that they may deem persuasive. We will accord appropriate weight to the presentations.

Finally, the proposed rules would eliminate current 49 CFR 1151.7(a) [formerly 49 CFR 1128.7(a)] which provided, "If the applicant and the owning railroad agree between themselves on an acquisition price, that price shall be the final price and not subject to the requirements of this subpart." Funding System Railcars, Inc. objects to the deletion of this section. We did not mean to suggest that voluntary agreements would not be accepted. The public interest is best served by allowing the parties to enter into voluntary negotiations and by adopting those terms agreed to by the parties. Accordingly, this provision will be reinstated at 49 CFR 1151.4(c).

VII. *Miscellaneous Matters.*—The parties' comments have raised several additional miscellaneous matters involving: (1) Consolidated Rail Corporation (Conrail) lines; (2) affiliates of class I and II railroads as eligible feeder line applicants; (3) joint rates and divisions; (4) non-owning operators; (5) additional application requirements; and (6) termination of services.

Conrail.—The scope section of the proposed rules indicates that a rail line is eligible for forced sale if it appears in category 1 or 2 of the owning carrier's system diagram map (SDM) (but the railroad has not filed an application to abandon the line) or the public convenience and necessity (PC&N) require or permit the sale of the line.

Several parties state that Conrail has withdrawn its SDM and that it is impossible to determine which Conrail lines fall under category 1 or 2. They suggest that we inform all carriers, including Conrail, that a SDM must be filed. This issue was considered recently in Finance Docket No. 29901, *New York Department of Transportation—Petition for an Order to Show Cause* (not printed), served August 25, 1982. In that case, we found that section 1152 of the Northeast Rail Service Act of 1981, Pub. L. No. 97–35, August 13, 1981 (NERSA), exempted Conrail from certain provisions of 49 U.S.C. Chapter 109, including the requirement that all carriers must file a SDM. Accordingly, we will not impose the SDM requirement here.

The Ohio Rail Transportation Authority suggests that an alternate method be devised to identify category 1 and 2 Conrail lines (i.e. that a notice of insufficient revenues under NERSA be deemed to be a category 1 filing). Under 49 U.S.C. 10910(b)(1)(a)(ii), we are specifically required to find that a line has been placed on the SDM as required by section 10904. It is not within our power to substitute any other requirement for this statutorily mandated finding.

Although a prospective feeder line applicant may not acquire a Conrail line under section 10910(b)(A)(ii) so long as Conrail does not file a SDM, interested persons may still submit evidence under 49 U.S.C. 10910(b)(1)(A)(i) to demonstrate that the PC&N requires or permits the sale under the feeder line program.[8] In addition, if Conrail pursues a NERSA abandonment, the financial assistance provisions of 49 U.S.C. 10905(d)–(f) are available.

Affiliates of Class I and II Railroads.—The current regulations [49 CFR 1151.2 formerly 49 CFR 1128.2] and the proposed regulations provide that an affiliate of a class I or II railroad is not an eligible feeder line applicant. The New York Department of Transportation (NYDOT) argues that affiliates should be eligible applicants because they are not expressly excluded by statute.[9] We disagree. Congress enacted the feeder line program to provide shipper groups and government agencies with rail transportation alternatives. H.R. Rep. No. 96–1430, 96th Cong., 2nd Sess. at 124 (1980).

NYDOT argues that, under some circumstances, the only party willing to acquire the line may be an affiliate of a class I or II railroad. It argues that the exclusion of such affiliates may result in the termination of all rail service. Our regulations merely preclude the affiliate's use of the feeder line provisions. An affiliate may still negotiate a voluntary agreement or acquire a line after abandonment under 49 U.S.C. 10905. It is thus unlikely that the preclusion of affiliates will result in the termination of any rail service.

Joint Rates and Division.—In order to reduce the financial and traffic data necessary to support the feeder line application, the Illinois Rail Users Association (IRUA) suggests that applicants be permitted to exclude information in support of the establishment of joint rates and divisions. IRUA suggests that the parties be permitted to negotiate the joint rates and divisions and, if the negotiations fail, to institute a collateral proceeding.

The information requested under 49 CFR 1151.3(a)(14) is optional. An applicant need only submit this information if it wants the Commission to establish joint rates and divisions at the time a feeder line application is decided. It is possible for the Commission to entertain these issues in a collateral proceeding under 49 U.S.C. 10910(f).[10]

We have discovered an error in our original regulations concerning the Commission's joint rate and divisions determinations. [49 CFR 1151.6(c) formerly 49 CFR 1128.6(c)]. As originally drafted, this regulation did not include certain prerequisites to the consideration of joint rates and divisions issues. We have made

---

[6] The Ohio Public Utilities Commission suggested that the notice requirements be expanded to include the posting of notices at rail stations and publication in a local newspaper. We will not adopt this proposal. Posting at rail stations could involve trespass and newspaper publication could be very expensive. Moreover, as noted above, direct service is the most efficient means of notice.

[7] Several parties misinterpret our action as an abdication of our responsibility to set the purchase price in the absence of a voluntary agreement. We will continue to set the purchase price. See 49 CFR 1151.4(c).

[8] In at least one instance, Conrail has attempted to assist prospective purchasers seeking to use the PC&N provisions of the feeder line development program by filing an affidavit in support of their purchase request. See *Indiana Hi-Rail, supra.*

[9] While the existing rules already exclude affiliates as eligible applicants, the first feeder line rulemaking proceeding did not contain such an exclusion in the proposed rule and this provision was inserted into the final rule without any substantive discussion in our decision. Accordingly, we will address this issue in this proceeding.

[10] All other issues *will* be resolved in the *Commission's final decision.*

appropriate revisions to this regulation. See 49 CFR 1151.4(e).

Non-owning Operators.—AAR and UTU argue that the rules should eliminate any reference to a feeder line purchaser's ability to contract with a third party to provide operations over the line [49 CFR 1151.3(a)(7) formerly 49 CFR 1128.3(a)(7)]. They argue that the feeder line applicant must be the carrier and the operator of the line since the language of section 10910 provides that only "acquiring" or "purchasing" carriers can obtain trackage rights or joint rates.[11]

We shall retain the provisions allowing third party operations. No provision of the feeder line program expressly forbids properly authorized third party operations. While several of the beneficial provisions of the program may not be available to these operators, this does not warrant their exclusion. This conclusion conforms to Congress broad policy favoring alternatives to inadequate service through the feeder line program. We note that the parallel provisions governing financial assistance proceedings (49 U.S.C. 10905) also do not expressly provide for third party operations. Yet, the Commission has allowed such arrangements. See Docket No. AB–1 (Sub-No. 111), *Chicago and North Western Transportation Company—Abandonment in Oneida, Vilas, Iron, Ashland and Bayfield Counties, WI and Gogebic County, MI* (not printed), served October 9, 1981, and *Abandonment Rulemaking* at 259.[12]

Additional Acquisition Application Requirements.—One party requests that the Commission determine that all feeder line acquisitions fall within 49 U.S.C. 10901 rather than 49 U.S.C. 11343. It is not necessary to make this determination. The statutory provisions creating the feeder line program remove purchases under section 10910 from the provisions of section 10901 and 11343. No separate applications under these other sections are required. Compare *Abandonment Rulemaking* at 259–60.

Termination of Service.—One party argues that feeder line purchasers should have the right to terminate service and end their common carrier obligation in an uncomplicated manner. The party suggests that this could be accomplished by a certificate similar to a designated operator or modified PC&N certificate (See 49 CFR 1150.11 and 21 formerly 49 CFR 1120.11 and 1120.21).

The statute provides that a feeder line applicant must be able to assure that adequate transportation will be provided over the line for a period of not less than 3 years. 49 U.S.C. 10910(a)(1). We have construed this provision to require that applicants provide a minimum of 3 years of service. *Feeder Railroad Development Program*, 365 I.C.C. 93, 96 and 99 (1981). Accordingly, we will not provide any abbreviated termination procedures to feeder line owners during this period. Moreover, there is no reason to allow feeder line owners, as a class, more expeditious abandonment procedures than those described at 49 U.S.C. 10903 *et seq.* An individual feeder line applicant may, however, elect to be exempt from any of the provisions of Title 49 (except joint rates provisions). 49 U.S.C. 10910(g)(1).

Thus, if an applicant elects to be exempt from 49 U.S.C. 10903 *et seq.* when the feeder line application is filed, it will be able to expeditiously terminate its railroad operations *following* the expiration of the 3-year period.

Conclusion

We adopt the final rules set forth in Appendix B.

Pending notices of intent to file feeder applications are dismissed. Affected parties may immediately file applications in compliance with these regulations.

Regulatory Flexibility Analysis

These rules amend existing regulations which involve feeder line applications under section 10910 and their relationship to abandonment proceedings. These rules also clarify and streamline our application procedures. These changes will have a significant economic effect on a substantial number of small entities. They will have a beneficial impact on shippers and communities located on qualifying rail lines by assuring that these parties will continue to have a viable alternative to inadequate rail service and total abandonment of local rail lines through the acquisition of these lines. The issues raised by the public comments and the charges made in the proposed rules as a result have been addressed above.

This action will not significantly affect the quality of the human environment of conservation of energy resources.

List of Subjects in 49 CFR Part 1151

Administrative practice and procedure, Railroads.

This action is taken under the authority of 5 U.S.C. 553 and 49 U.S.C. 10321 and 10910.

Dated: February 22, 1983.

By the Commission, Chairman Taylor, Vice Chairman Sterrett, Commissioners Andre, Simmons, and Gradison.

Agatha L. Mergenovich,

Secretary.

Appendix A—Summary of Changes Contained in Final Rules

Section 1151.1 Scope.

No Change.

Section 1151.2 Procedures.

This section contains new provisions which: (1) Permit the filing of competing applications and adjust the evidentiary timetable accordingly; (2) eliminate the requirement that the Commission must issue a decision accepting applications but retain provisions requiring the Commission to reject unacceptable initial applications (within 15 days of filing) and competing applications (at any time); and (3) provide that the owning railroad is required to select between competing qualified applicants.

Section 1151.3 Contents of application.

This section imposes the same evidentiary requirements on initial and competing applications. Additionally, this section: (1) Provides that applicants must provide evidence in support of their NLV and GCV evidence; (2) states that the information requested for joint rates and divisions is optional; and (3) modifies the public notice requirements by eliminating **Federal Register** publication of the application in favor of notification of an expanded list of described parties.

Section 1151.4 Commission determination.

This section has been reworded for clarity. A provision for the Commission's acceptance of a voluntarily negotiated acquisition price has been added. As originally drafted, this section did not include certain statutory prerequisites to a Commission determination of joint rates and divisions. These prerequisites have been incorporated in the final rules.

Section 1151.5 Verification and copies.

No change.

Appendix B—Final Rules

Part 1158 of title 49 is revised to read as follows:

---

[11] The proposed rules did not change existing regulations concerning non-owning operators. Since this provision was incorporated into the original rules without substantive discussion, it is appropriate to address this issue here.

[12] While the AAR correctly states that the Congress has imposed a duty upon the *acquiring carrier* to hire (to the extent practicable) the employees who would work on the line [H.R. Rep. No. 96–1430, 96th Cong., 2nd Sess. at 125 (1980)], nothing precludes the delegation of this duty to the third party operator under the operating contract.

PART 1151—FEEDER RAILROAD DEVELOPMENT PROGRAM

1151.1 Scope.
1151.2 Procedures.
1151.3 Contents of application.
1151.4 Commission determination.
1151.5 Verification and copies.

Authority: 5 U.S.C. 553, 49 U.S.C. 10910.

§ 1151.1 Scope.

This part governs applications filed under 49 U.S.C. 10910. The Commission can require the sale of a rail line to a financially responsible person. A rail line is eligible for a forced sale if it appears in category 1 or 2 of the owning railroad's system diagram map (but the railroad has not filed an application to abandon the line), or the public convenience and necessity, as defined in 49 U.S.C. 10910(c)(1), permit or require the sale of the line. Until October 1, 1983, section 10910 is only applicable to lines that carried less than 3 million gross ton-miles of traffic per mile in the preceding calendar year.

§ 1151.2 Procedures.

(a) Before an application is filed, the applicant must obtain a docket number from the Commission's Rail Section.

(b) The application proceeding commences on the filing of the application with the Commission.

(c) Within 15 days of the receipt of the application, the Commission shall issue a decision rejecting the initial application if the Commission determines that the application does not substantially conform to these regulations regarding form and content.

(d) Within 30 days of the receipt of the initial application, other interested parties may file competing applications seeking to acquire all or any portion of the line sought in the initial application.

(e) At any time during the pendency of the proceeding, the Commission may issue a decision rejecting a competing application if the Commission determines that the competing application does not substantially conform to these regulations regarding form and substance.

(f) Within 60 days of the filing of the initial application, the owning railroad and other interested parties shall file their verified statements addressing the applications.

(g) Within 80 days of the filing of the initial application, applicants may file a verified reply.

(h) Within 140 days of the filing of the initial application, the Commission decision disposing of all issues shall be issued. If the Commission finds that the public convenience and necessity require or permit sale of a line, the Commission shall concurrently publish this finding in the Federal Register.

(i) Within 10 days of the service date of the decision ordering the sale, the applicant(s) must file a notice with the Commission and serve a copy on the owning railroad accepting or rejecting the Commission's determination.

(j) If two or more applicants timely file notices accepting the Commission's determination, the owning railroad shall select the applicant with whom it wishes to transact business. Within 15 days of the service date of the Commission decision, the owning railroad shall file this notice with the Commission and serve a copy on the applicants.

§ 1151.3 Contents of application.

(a) The initial application and all competing applications must include:

(1) Identification of the line to be purchased including:

(i) The name of the owning carrier; and

(ii) The exact location of the line to be purchased including milepost designations, origin and termination points, stations located on the line, and cities, counties and States traversed by the line.

(2) Identification of applicant including:

(i) The applicant's name and address;

(ii) The name, address, and phone number of the representative to receive correspondence concerning this application;

(iii) A description of applicant's affiliation with any railroad; and

(iv) If the applicant is a corporation, the names and addresses of its officers and directors.

(3) Information sufficient to demonstrate that the applicant is a financially responsible person. In this regard, the applicant must demonstrate its ability:

(i) To pay the higher of the net liquidation value (NLV) or going concern value (GVC) of the line; and

(ii) To cover expenses associated with providing services over the line (including, but not limited to, operating costs, rents, and taxes) for at least the first 3 years after acquisition of the line.

(4) An estimate of the NLV and the GCV of the line and evidence in support of these estimates.

(5) An offer to purchase the line at the higher of the two estimates submitted pursuant to paragraph (a)(4) of this section.

(6) The dates for the proposed period of operation of the line covered by the application.

(7) An operating plan that identifies the proposed operator; attaches any contract that the applicant may have with the proposed operator; describes in detail the service that is to be provided over the line, including all interline connections; and demonstrates that adequate transportation will be provided over the line for at least 3 years from the date of acquisition.

(8) A description of the liability insurance coverage carried by applicant or any proposed operator. If trackage rights are requested, the insurance must be at a level sufficient to indemnify the owning railroad against all personal and property damage that may result from negligence on the part of the operator in exercising the trackage rights.

(9) Any preconditions (such as assuming a share of any subsidy payments) that will be placed on shippers in order for them to receive service, and a statement that if the application is approved, no further preconditions will be placed on shippers without Commission approval. (This Statement Will Be Binding Upon Applicant if the Application is Approved.)

(10) The name and address of any person(s) who will subsidize the operation of the line.

(11) A statement that the applicant will seek a finding by the Commission that the public convenience and necessity permit or require acquisition, or a statement that the line is currently in category 1 or 2 of the owning railroad's system diagram map. (i) If the applicant seeks a finding of public convenience and necessity, the application must contain detailed evidence that permits the Commission to find that:

(A) The rail carrier operating the line refused within a reasonable time to make the necessary efforts to provide adequate service to shippers who transport traffic over the line;

(B) The tranportation over the line is inadequate for the majority of shippers who transport traffic over the line;

(C) The sale of the line will not have a significantly adverse financial effect on the rail carrier operating the line;

(D) The sale of the line will not have an adverse effect on the overall operational performance of the rail carrier operating the line; and

(E) The sale of the line will be likely to result in improved railroad transportation for shippers who transport traffic over the line.

(ii) If the applicant seeks a finding that the line is currently in category 1 or 2 of the owning carrier's system diagram map, the relevant portion of the current map must be attached to the application.

(12) A statement detailing applicant's election of exemption from the provisions of Title 49, United States Code, and a statement that if the application is approved, no further exemptions will be elected. (This Statement Will Be Binding Upon the Applicant if the Application is Approved.)

(13) A description of any trackage rights sought over the owning railroad that are required to allow reasonable interchange or to move power equipment or empty rolling stock between noncontiguous feeder lines operated by the applicant, and an estimate of the reasonable compensation for such rights, including full explanation of how the estimate was reached. The description of the trackage rights shall include the following information: milepost or other identification for each segment of track; the need for the trackage rights (interchange of traffic, movement of equipment, etc.); frequency of operations; times of operation; any alternative to the use of trackage rights; and any other pertinent data. Trackage rights that are necessary for the interchange of traffic shall be limited to the closest point to the junction with the owning railroad's line that allows the efficient interchange of traffic. A statement shall be included that the applicant agrees to have its train and crew personnel take the operating rules examination of the railroad over which the operating rights are exercised.

(14) A description of any joint rate and division agreement that must be established. The description(s) shall include the following information: the railroad(s) involved; the estimated revenues that will result from the division(s); the total costs of operating the line segment purchased (including the trackage rights fees); and any other pertinent data.

Note.—This information is required only if the applicant requests that the Commission prescribe joint rates and division in the feeder line proceeding.

(15) The extent to which the owning railroad's employees who normally service the line will be used.

(16) If the application is filed before October 1, 1983, informaton sufficient to allow the Commission to determine that the line sought to be acquired carried less than 3 million gross ton-miles of traffic per mile in the preceding calendar year. Gross ton-miles are calculated by adding the ton-miles of the cargo and the ton-miles related to the tare (empty) weight of the freight cars used to transport the cargo in the loaded movement. In calculating the gross ton-miles, only those related to the portion of the segment purchased shall be included.

(17) An affidavit stating that the service requirements on § 1151.3(b) have been met.

(b) Concurrently with the filing of the application, applicant shall serve a copy of the application by certified mail on the following parties: the owning railroad; all rail patrons who originated and/or received traffic on the line during the 12-month period preceding the month in which the application is filed; the Designated State Agency in the State(s) in which the property is located; county governments in which the line is located; and the headquarters of the Railway Labor Executives' Association.

(c) Applicant shall make copies of the application available to interested parties upon request.

§ 1151.4 Commission determination.

(a) The Commission shall determine whether each applicant is a financially responsible person. To be a financially responsible person, the Commission must find that:

(1) The applicant is capable of paying the constitutional minimum value of the line and able to assure that adequate transportation will be provided over the line for at least 3 years;

(2) The applicant is not a class I or class II railroad or an entity affiliated with a class I or class II railroad.

(b) If the Commission finds that one or more applicants are financially responsible parties, it shall determine whether the involved line or line segment is a qualified line. A line is a qualified line if:

(1) Either

(i) The public convenience and necessity require or permit the sale of line or line segment; or

(ii) The line or line segment is classified in category 1 or 2 of the owning carrier's system diagram map; and

(2) The traffic level on the line or line segment sought to be acquired was less than 8 million gross ton-miles of traffic per mile in the preceding calendar year (Note: this finding will not be required for applications filed after October 1, 1983).

(c) If the Commission finds that one or more financially responsible parties have offered to buy a qualifying line of railroad, the Commission shall set the acquisition cost of the line at the higher of NLV or GCV, order the owning carrier to sell the rail line to one of the financially responsible applicants, and resolve any related issues raised in the application. If an applicant and the owning railroad agree on an acquisition price, that price shall be the final price.

(d) If trackage rights are sought in the application, the Commission shall, based on the evidence of record, set the adequate compensation for such rights, if the parties have not agreed.

(e) If the applicant requests the Commission to set joint rates or divisions and the line carried less than 3 million gross ton-miles of traffic per mile during the preceding calendar year, the Commission shall, pursuant to 49 U.S.C. 10705(a), establish joint rates and divisions based on the evidence of record in the proceeding. Unless specifically requested to do so by the selling carrier, the Commission will not set the rate for the selling railroad's share of the joint rate at less than the applicable level (for the year in which the acquisition is made) set by 49 U.S.C. 10709(d)(2), which limits Commission maximum ratemaking jurisdiction to rates above certain cost/price ratios.

§ 1151.5 Verification and copies.

(a) All pleadings permitted by these regulations must be verified.

(b) An original and 10 copies of an application, verified statement, comment or any other pleading permitted by these rules should be submitted to the Rail Section, Room 5417, Interstate Commerce Commission, Washington, D.C. 20423. The outside envelope and the first page of any document submitted under these rules should be clearly marked "Feeder Line Development."

BILLING CODE 7035-01-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration.

50 CFR Parts 611 and 656

[Docket No. 30301-31]

Foreign Fishing; Atlantic Mackerel Fishery

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Rule-related; notice inseason adjustment.

SUMMARY: NOAA has allocated 5,000 metric tons (mt) of the 6,000 mt Atlantic mackerel reserve to foreign fishermen. The remaining 1,000 mt will be retained in reserve for domestic harvest. This final notice follows procedures in the Fishery Management Plan for the

Atlantic Mackerel Fishery and implementing regulations. The intended effect of this allocation is to achieve optimum yield for this fishery through incentives to foreign fishermen and to encourage development of joint ventures off the east coast of the United States.

EFFECTIVE DATE: March 3, 1983.

FOR FURTHER INFORMATION CONTACT: Salvatore A. Testaverde, 617–281–3600.

SUPPLEMENTARY INFORMATION: The Fishery Management Plan for the Atlantic Mackerel Fishery, as amended, established a 6,000 mt reserve of mackerel (45 FR 45291, July 3, 1980). Regulations provide a mechanism to allocate all or part of the reserve to the total allowable level of foreign fishing (TALFF) during each fishing year (45 FR 77446, November 24, 1980). Sections 611.52(a) and 656.22(a) of the regulations direct the Regional Director of the Northeast Region, National Marine Fisheries Service, to publish for a 15-day comment period his projected amount of mackerel to be harvested by domestic fishermen (48 FR 5575, February 7, 1983). No comments were received.

Therefore, 5,000 mt of the 6,000 mt reserve will be allocated to TALFF to provide for the directed-catch portion of the German Democratic Republic joint venture. An equal amount may be taken by domestic fishermen in the joint venture. This opportunity will facilitate achievement of the optimum yield for the Atlantic mackerel fishery. The remainder of the 1,000 mt will be held in reserve for domestic fishermen.

Proposed Rules

Federal Register
Vol. 48, No. 46
Tuesday, March 8, 1983

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 944

Grapes Imported Into the United States; Proposed Grade, Size, Quality, and Maturity Requirements

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This notice invites written comments on a proposal which would establish, during the period May 1–August 15, 1983, quality requirements for vinifera species table grapes (except the Emperor, Calmeria, Almeria nd Ribier varieties) imported into the United States. Such grapes would be required to meet the minimum grade and size requirements for U.S. No. 1 Table grade, as defined in the U.S. Standards for Grades of Table Grapes (European or Vinifera type), and minimum maturity standards as defined in the Administrative Code of California. This action is needed to assure imports of ample supplies of table grapes of acceptable quality, and to promote orderly marketing in the interests of producers and consumers.

DATES: Comments must be submitted on or before March 23, 1983.

ADDRESS: Send two copies of comments to the Hearing Clerk, U.S, Department of Agriculture, Room 1077, South Building, Washington, D.C. 20250.

SUPPLEMENTARY INFORMATION: This proposed rule has been reviewed under Secretary's Memorandum 1512–1 and Executive Order 12291, and has been designated a "non-major" rule. William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities. This action is designed to promote orderly marketing of imported table grapes for the benefit of producers and consumer, and will not substantially affect costs for the persons directly regulated.

The proposed table grape import regulation would be issued under Section 8e (7 U.S.C. 608–1) of the Agricultural Marketing Agreement Act of 1937, as amended. This section requires that whenever specified commodities, including table grapes, are regulated under a Federal marketing order, imports of that commodity must meet the same or comparable grade, size, quality, or maturity requirements as those in effect for the domestically produced commodity.

The California Desert Grape Administrative Committee recommended grade, size, maturity, container, pack, and other requirements for table grapes grown in southeastern California, to be effective for the period May 1–August 15, 1983. A notice of propose rulemaking relative to this matter was published in the February 23, 1983, issue of the **Federal Register** (48 FR 7581).

This proposed regulation would require imported table grapes (except the Emperor, Calmeria, Almeria and Ribier varieties) to meet the minimum grade and size requirements of U.S. No. 1 Table Grade as specified in the U.S. Standards for Grades of Table Grapes (European or Vinifera type). In addition, such grapes would also be required to meet the minimum maturity requirements for table grapes as specified in the California Administrative Code. These requirements are the same as the grade, size and maturity requirements proposed for table grapes grown in southeastern California.

Certain maturity requirements cited in the proposed regulation are specified in the Administrative Code of California (Title 3). Copies of such requirements are available from william J. Doyle, Chief, Fruit Branch, F&V, AMS USDA, Washington, D.C. 20250, telephone 202–447–5975.

List of Subjects in 7 CFR Part 944

Fruits, Import regulations, Grapes.

PART 944—[AMENDED]

Proposal No. 1: Add a new § 944.501 to read as follows:

§ 944.501 Table Grape Import Regulation 1.

(a) *Applicability to imports.* Pursuant to section 8e of the Act and Part 944-Fruits; Import Regulations, during the period May 1, 1983, through August 15, 1983, the importation into the United States of any variety of vinifera species table grapes, except Emperor, Calmeria, Almeria, and Ribier varieties, is prohibited unless such grapes meet the minimum grade and size requirements specified in § 51.884 for U.S. No. 1 Table Grade, as set forth in the U.S. Standards for Grades of Table Grapes (European or Vinifera Type, 7 CFR 51.880–51.912), and minimum maturity standards in accordance with applicable sampling and testing procedures specified in §§ 1436.3–1436.17 of the administrative Code of California (Title 3).

(b) The Federal or Federal-State Inspection Service, Fruit and Vegetable Division, Agricultural Marketing Service, United States Department of Agriculture, is designated as the governmental inspection service for certifying the grade, size, quality, and maturity of table grapes that are imported into the United States. Inspection by the Federal or Federal-State Inspection Service with evidence thereof in the form of an official inspection certificate, issued by the respective service, applicable to the particular shipment of table grapes, is required on all imports. The inspection and certification services will be available upon application in accordance with the rules and regulations governing inspection and certification of fresh fruits, vegetables, and other products (7 CFR Part 51) and in accordance with the Procedure for Requesting Inspection and Designating the Agencies to Perform Required Inspection and Certification (7 CFR Part 944.400).

(c) The term "importation" means release from custody of the United States Customs Service.

(d) Any lot or portion thereof which fails to meet the import requirements may be reconditioned or exported. Any failed lot which is not exported shall be disposed of under the supervision of the Federal or Federal-State Inspection Service with the costs of certifying the disposal of said lot borne by the importer.

(e) It is determined that imports of table grapes, during the effective time of

this regulation, are in most direct competition with table grapes grown in southeastern California, under M.O. 925 (7 CFR Part 925). The grade, size, quality and maturity requirements of this section are the same as those applicable to table grapes grown in southeastern California.

Proposal No. 2: Amend § 944.400 by revising the title and paragraph (a) thereof to read as follows:

§ 944.400 Designated inspection services and procedure for obtaining inspection and certification of imported avocados, grapefruit, limes, oranges, and table grapes regulated under section 8e of the Agricultural Marketing Agreement Act of 1937, as amended.

(a) The Federal or Federal-State Inspection Service, Fruit and Vegetable Division, Agricultural Marketing Service, United States Department of Agriculture, is hereby designated as the governmental inspection service for the purpose of certifying the grade, size, quality, and maturity of avocados, grapefruit, limes, oranges and table grapes that are imported into the United States. Inspection by the Federal or Federal-State Inspection Service with appropriate evidence thereof in the form of an official-inspection Service with appropriate evidence thereof in the form of an official inspection certificate, issued by the respective service, applicable to the particular shipment of the specified fruit, is required on all imports. Such inspection and certification services well be available upon application in accordance with the Regulations Governing Inspection, Certification and Standards for Fresh Fruits, Vegetables, and Other Products (7 CFR part 51) but, since inspectors are not located in the immediate vicinity of some of the small ports of entry, such as those in southern California, importers of avocdos, grapefruit, limes, oranges, and table grapes should make arrangements for inspection, through the applicable one of the following offices, at least the specified number of days prior to the time when the fruit will be imported:

* * * * *

Dated: March 3, 1983.

D. S. Kuryloski,

Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

BILLING CODE 3410-02-M

7 CFR Part 1106

Milk in the Southwest Plains Marketing Area; Notice of Proposed Suspension of Certain Provisions of the Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed suspension of rules.

SUMMARY: This notice invites written comments on a proposal to suspend certain shipping standards for supply plants regulated under the Southwest Plains milk order. The suspension would apply during the months of March through July 1983. Under the proposed action, no shipments of milk to distributing plants from supply plants would be required in order to pool supply plants that were previously associated with the market. The action was requested by the operator of a pool supply plant because of increasing production and a decline in demand for milk in fluid uses. Because of a change in the market's supply-demand relationship, the plant operator does not anticipate that any supply plant shipments will be necessary to furnish the fluid milk needs of distributing plants. Without the suspension, proponent contends that unneeded and uneconomic shipments of supply plant milk would have to be made solely for the purpose of pooling milk of diary farmers who have historically furnished the fluid milk needs of the market.

DATE: Comments are due not later than March 15, 1983.

ADDRESS: Comments (two copies) should be filed with the Hearing Clerk, Room 1077, South Building, U.S. Department of Agriculture, Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT: Robert F. Groene, Marketing Specialist, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, (202) 447-4824.

SUPPLEMENTARY INFORMATION: This proposed action has been reviewed under USDA procedures established to implement Executive Order 12291 and has been classified as a "non-major" action.

It has been determined that any need for suspending certain provisions of the order on an emergency basis precludes following certain review procedures set forth in Executive Order 12291. Such procedures would require that this document be submitted for review to the Office of Management and Budget at least 10 days prior to its publication in the **Federal Register**. However, this would not permit the completion of the required suspension procedures and the inclusion of March 1983 in the suspension period if this is found necessary. The initial request for this action was received on February 24, 1983.

William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this proposed action would not have a significant economic impact on a substantial number of small entities. Such action would lessen the regulatory impact of the order on certain milk handlers and would tend to insure the dairy farmers would continue to have their milk priced under the order and thereby receive the benefits that accure from such pricing.

Notice is hereby given that, pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended, (7 U.S.C. *et seq.*), the suspension of the following provisions of the order regulating the handling of milk in the Southwest Plains marketing area is being considered for the months of March through July 1983:

1. In § 1106.6, the language "during the month".

2. In § 1106.7(b)(1), the language "until any month of such period in which less than 20 percent of the milk received or diverted as previously specified, is shipped to plants described in paragraph (a) of this section. A plant not meeting such 20 percent requirement in any month of such February–August period shall be qualified in any remaining month of such period only if transfers and diversions pursuant to paragraph (b)(2) of this section to plants described in paragraph (a) of this section are not less than 50 percent of receipts or diversions, as previously specified" and the language "until any month of such period in which the plant fails to meet the 20 percent shipping requirement".

All persons who desire to submit written data, views, or arguments in connection with the proposed suspension should file two copies of such material with the Hearing Clerk, Room 1077, South Building, United States Department of Agriculture, Washington, D.C. 20250, not later than 7 days from the date of publication of this notice in the **Federal Register**. The period for filing comments is limited to 7 days because a longer period would not provide the time needed to complete the required procedures and include March 1983 in the suspension period.

The comments that are sent will be available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

Statement of Consideration

Under the proposed suspension no shipments of milk to distributing plants from supply plants would be required in order to pool supply plants that were previously associated with the market. The order currently defines a supply plant as a plant from which shipments are made to distributing plants during the month. Also, the order provides that supply plants that were pooled during each of the previous months of September through January under the Southwest Plains order or during the months of September through December 1982 under any of the four predecessor orders that were merged to form the Southwest Plains order effective January 1, 1983, will be pooled during the following months of February through August if not less than 20 percent of monthly receipts are shipped to pool distributing plants. The proposed action would eliminate the supply plant shipping standards for pooling such plants during March–July 1983.

The action was requested by a handler who operates a supply plant that is currently pooled under the order on the basis of milk shipments to pool distributing plants. The plant was also pooled during each of the previous months of September 1982 through January 1983 under the Southwest Plains order or its predecessdor orders. The handler contends that the suspension is necessary because of a general increase in production without a corresponding increase in the demand for milk in fluid use. Because of a change in the supply-demand relationship, proponent does not anticipate that any shipments from its supply plant will be needed to furnish the fluid milk needs of distributing plants. The handler contends that without the suspension unneeded and uneconomic shipments of milk would have to be made solely for the purpose of pooling the milk of dairy farmers who have historically supplied the fluid milk needs of the market.

BILLING CODE 3410-02-M

DEPARTMENT OF THE TREASURY

Comptroller of the Currency

12 CFR Parts 3, 6, 7, and 32

[Docket No. 83-12]

National Bank Lending Limits; Extension of Comment Period

AGENCY: Comptroller of the Currency, Treasury.

ACTION: Extension of comment period.

SUMMARY: The Comptroller of the Currency is extending the comment period for the proposed rulemaking on national bank lending limits by 14 days to encourage maximum public participation in this matter.

DATE: Comments must be received on or before March 22, 1983.

ADDRESS: Please send comments to Docket No. 82–25, Communications Division, Third Floor, Office of the Comptroller of the Currency, 490 L'Enfant Plaza East, SW., Washington, D.C. 20219. Attn: C. Christine Jones ((202) 447–1768).

FOR FURTHER INFORMATION CONTACT: Carol M. Beaumier, Manager, International Examinations ((202) 447–1747); Howard J. Finkelstein, Attorney, Legal Advisory Services Division ((202) 447–1880); Claire Owen, National Bank Examiner, Commercial Examinations ((202) 447–1164).

SUPPLEMENTARY INFORMATION: On December 21, 1982 (47 FR 56862), the Office of the Comptroller of the Currency published proposed regulations implementing section 401(a) of Pub. L. 97–320, relating to national bank lending limits. On February 1, 1983, the comment period for the proposed regulation was extended to February 18, 1983. The agency has received requests that the comment period be reopened in order to facilitate consultations with representatives of the banking industry. The agency has considered the requests and concluded that an additional 14 days would allow for greater public participation in the rulemaking. Accordingly, the comment period is being extended to March 22, 1983.

Dated: March 4, 1983.

Doyle L. Arnold,

Acting Comptroller of the Currency.

BILLING CODE 4810-33-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 271

[Docket No. RM79-76-187 (New Mexico-22)]

High-Cost Gas Produced from Tight Formations, New Mexico; Proposed Rulemaking

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Energy Regulatory Commission is authorized by section 107(c)(5) of the Natural Gas Policy Act of 1978 to designate certain types of natural gas as high-cost gas where the Commission determines that the gas is produced under condition which present extraordinary risks or costs. Under section 107(c)(5), the Commission issued a final regulation designating natural gas produced from tight formations as high-cost gas which may receive an incentive price (18 CFR 271.703). This rule established procedures for jurisdictional agencies to submit to the Commission recommendations of areas for designation as tight formations. This Notice of Proposed Rulemaking by the Director of the Office of Pipeline and Producer Regulation contains the recommendation of the State of New Mexico that the Morrow Formation be designated as a tight formation under § 271.703(d).

DATE: Comments on the proposed rule are due on April 18, 1983. *Public Hearing:* No public hearing is scheduled in this docket as yet. Written requests for a public hearing are due on March 18, 1983.

ADDRESS: Comments and requests for hearing must be filed with the Office of the Secretary, 825 North Capitol Street NE., Washington, D.C. 20426.

FOR FURTHER INFORMATION CONTACT: Leslie Lawner, (202) 358–6511, or Victor Zabel, (202) 357–8616.

SUPPLEMENTARY INFORMATION:

Issued: March 3, 1983.

I. Background

On February 16, 1983, the State of New Mexico Energy and Minerals Department, Oil Conservation Division (New Mexico) submitted to the Commission a recommendation, in accordance with § 271.703 of the Commission's regulations (45 FR 56034, August 22, 1980), that the Morrow Formation located in Lea and Eddy

Counties, New Mexico, be designated as a tight formation. Pursuant to § 271.703(c)(4) of the regulations, this Notice of Proposed Rulemaking is hereby issued to determine whether New Mexico's recommendation that the Morrow Formation be designated a tight formation should be adopted. The United States Department of the Interior, Minerals Management Service concurs with New Mexico's recommendation. New Mexico's recommendation and supporting data are on file with the Commission and are available for public inspection.

II. Description of Recommendation

The recommended area is located in southeast New Mexico and consists of approximately 319,000 acres. The recommended formation underlies the northeast corner of Lea County and southeast quarter of Eddy County, New Mexico. The Morrow Formation is defined as that interval located stratigraphically above the Mississippian Barnett Shale and below the Pennsylvanian Atoka Formations. The average depth to the top of the Morrow Formation is 13,600 feet, and the thickness of the formation varies from 928 feet to 1,475 feet.

III. Discussion of Recommendation

New Mexico claims in its submission that evidence gathered through information and testimony presented at a public hearing in Case 7735 convened by New Mexico on this matter demonstrates that:

(1) The average *in situ* gas permeability throughout the pay section of the proposed area is not expected to exceed 0.1 millidarcy;

(2) The stabilized production rate, against atmospheric pressure, of wells completed for production from the recommended formation, without stimulation, is not expected to exceed the maximum allowable production rate set out in § 271.703(c)(2)(i)(B); and

(3) No well drilled into the recommended formation is expected to produce more than five (5) barrels of oil per day.

New Mexico further asserts that existing State and Federal Regulations assure that development of this formation will not adversely affect any fresh water aquifers.

Accordingly, pursuant to the authority delegated to the Director of the Office of Pipeline and Producer Regulation by Commission Order No. 97, issued in Docket No. RM80-68 (45 FR 53456, August 12, 1980), notice is hereby given of the proposal submitted by New Mexico that the Morrow Formation, as described and delineated in New Mexico's recommendation as filed with the Commission, be designated as a tight formation pursuant to § 271.703.

IV. Public Comment Procedures

Interested persons may comment on this proposed rulemaking by submitting written data, views or arguments to the Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, on or before April 18, 1983. Each person submitting a comment should indicate that the comment is being submitted in Docket No. RM 79-76-187 (New Mexico-22), and should give reasons including supporting data for any recommendations. Comments should include the name, title, mailing address, and telephone number of one person to whom communications concerning the proposal may be addressed. An original and 14 conformed copies should be filed with the Secretary of the Commission. Written comments will be available for public inspection at the Commission's Division of Public Information, Room 1000, 825 North Capitol Street NE., Washington, D.C., during business hours.

Any person wishing to present testimony, views, data, or otherwise participate at a public hearing should notify the Commission in writing of the desire to make an oral presentation and therefore request a public hearing. Such request shall specify the amount of time requested at the hearing. Requests should be filed with the Secretary of the Commission no later than March 18, 1983.

List of Subjects in 18 CFR Part 271

Natural gas, Incentive price, Tight formations.

(Natural Gas Policy Act of 1978, 15 U.S.C. 3301-3432)

Accordingly, the Commission proposes to amend the regulations in Part 271, Subchapter H, Chapter I, Title 18, Code of Federal Regulations, as set forth below, in the event New Mexico's recommendation is adopted.

Kenneth A. Williams,

Director, Office of Pipeline and Producer Regulation.

PART 271—[AMENDED]

Section 271.703 is amended by adding paragraph (d)(170) to read as follows:

§ 271.703 Tight formations.

* * * * *

(d) *Designated tight formations.*

* * * * *

(170) *Morrow Formation in New Mexico.* RM 79-76-187 (New Mexico-22).

(i) *Delineation of formation.* The Morrow Formation is located in Lea and Eddy Counties, New Mexico, in Township 19 South, Range 31 East, Sections 27 S/2, 33 E/2, 34 and 35; Township 20 South, Range 30 East, Sections 25, 26, 31 through 34, 35 N/2 and 36; Township 20 South, Range 31 East, Sections 1 through 36; Township 20 South, Range 32 East, Sections 2 through 11, 14 through 23, and 26 through 35; Township 21 South, Range 28 East, Sections 1 and 2, 3: Lots 3, 4, 5, 6, 11, 12, 13, 14, and S/2, 4 through 20, 21 W/2, 22 through 25, 26 S/2, 27, 28, 29 S/2, and 30 through 36; Township 21 South, Range 29 East, Sections 1 through 7, 8 N/2, and 9 through 36; Township 21 South, Range 30 East, Sections 1 through 12, 14 through 23, and 27 through 34; Township 21 South, Range 31 East, Sections 1 through 12; Township 22 South, Range 28 East, Sections 1 through 26, and 33 through 36; Township 22 South, Range 29 East, Sections 1 through 36; Township 22 South, Range 30 East, Sections 3 through 10, 13 W/2 W/2 and Ne/4 NW4, 14 through 23, 24 W/2 NW/2 NW/4, and 26 through 36; Township 23 South, Range 29 East, Sections 1 through 3, 10 through 12, 13 W/2, 14, 15, 22 through 27, and 34 through 36; Township 23 South, Range 30 East, Sections 1 through 17, 18 S/2, and 19 through 36; Township 23 South, Range 31 East, Sections 19, 30, and 31; Township 24 South, Range 29 East, Sections 1 and 2, 11 through 14, 23 through 26, 35, and 36; Township 24 South, Range 30 East, Sections 1 through 7, 8 N/2, 9 through 16, 17 E/2, and 18 through 36; Township 24 South, Range 31 East, Sections 6, 7, 15 through 22, and 27 through 34; Township 25 South, Range 30 East, Sections 1 through 36; Township 25 South, Range 31 East, Sections 3 through 10, 15 through 22, and 27 through 34; Township 26 South, Range 30 East, Sections 1 through 12; Township 26 South, Range 31 East, Sections 3 through 10; NMPM.

(ii) *Dept.* The Morrow Formation is defined as that interval located stratigraphically above the Mississippian Barnett Shale and below the Pennsylvanian Atoka Formations. The average depth to the top of the Morrow Formation is 13,600 feet. The Morrow Formation varies in thickness from 928 feet to 1,475 feet.

[Docket No. RM79-76-188 (New Mexico-23)]

High-Cost Gas Produced From Tight Formations, New Mexico; Proposed Rulemaking

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Energy Regulatory Commission is authorized by section 107(c)(5) of the Natural Gas Policy Act of 1978 to designate certain types of natural gas as high-cost gas where the Commission determines that the gas is produced under conditions which present extraordinary risks or costs. Under section 107(c)(5), the Commission issued a final regulation designating natural gas produced from tight formations as high-cost gas which may receive an incentive price (18 CFR 271.703). This rule established procedures for jurisdictional agencies to submit to the Commission recommendations of areas for designation as tight formations. This Notice of Proposed Rulemaking by the Director of the Office of Pipeline and Producer Regulation contains the recommendation of the State of New Mexico that the Chacra Formation be designated as a tight formation under § 271.703(d).

DATE: Comments on the proposed rule are due on April 18, 1983. *Public Hearing:* No public hearing is scheduled in this docket as yet. Written requests for a public hearing are due on March 18, 1983.

ADDRESS: Comments and requests for hearing must be filed with the Office of the Secretary, 825 North Capitol Street NE., Washington, D.C. 20426.

FOR FURTHER INFORMATION CONTACT: Leslie Lawner, (202) 357-8511, or Victor Zabel, (202) 357-8616.

SUPPLEMENTARY INFORMATION:

Issued: March 3, 1983.

I. Background

On February 18, 1983, the State of New Mexico Energy and Minerals Department, Oil Conservation Division (New Mexico) submitted to the Commission a recommendation, in accordance with § 271.703 of the Commission's regulations (45 FR 56034, August 22, 1980), that the Chacra Formation located in Rio Arriba County, New Mexico, be designated as a tight formation. Pursuant to § 271.703(c)(4) of the regulations, this Notice of Proposed Rulemaking is hereby issued to determined whether New Mexico's recommendation that the Chacra Formation be designated a tight formation should be adopted. The United States Department of the Interior, Minerals Management Service concurs with New Mexico's recommendation. New Mexico's recommendation and supporting data are on file with the Commission and are available for public inspection.

II. Description of Recommendation

The Chacra Formation is located in the southeastern portion of the San Juan Basin in Rio Arriba County, New Mexico. The recommended area is comprised of approximately 20,160 acres including all of Sections 4 through 8, and the N/2 of Sections 9 and 10 Township 25 North, Range 7 West, NMPM; as well as all of Sections 5 through 9, 15 through 22, 26 through 36, the W/2 of Section 10, the S/2 of Section 14, and the SW/4 of Sections 23 and 25 in Township 26 North, Range 7 West, NMPM. The type section for the Chacra Formation is found at a depth of approximately 3,734 to 3,844 feet on an Induction Gamma Ray Log from the Curtis J. Little Turner Well No. 2. The average depth to the top of the Cacra Formation is 3,350 feet. The thickness of the Chacra Formation ranges from 110 to 130 feet.

III. Discussion of Recommendations

New Mexico claims in its submission that evidence gathered through information and testimony presented at a public hearing in Case No. 7783 convened by New Mexico on this matter demonstrates that:

(1) The average *in situ* gas permeability throughout the pay section of the proposed area is not expected to exceed 0.1 millidarcy;

(2) The stabilized production rate, against atmospheric pressure, of wells completed for production from the recommended formation, without stimulation, is not expected to exceed the maximum allowable production rate set out in § 271.703(c)(2)(i)(B); and

(3) No well drilled into the recommended formation is expected to produce more than five (5) barrels of oil per day.

New Mexico further asserts that existing State and Federal Regulations assure that development of this formation will not adversely affect any fresh water aquifers.

Accordingly, pursuant to the authority delegated to the Director of the Office of Pipeline and Producer Regulation by Commission Order No. 97, issued in Docket No. RM80-68 (45 FR 53456, August 12, 1980), notice is hereby given of the proposal submitted by New Mexico that the Chacra Formation, as described and delineated in New Mexico's recommendation as filed with the Commission, be designated as a tight formation pursuant to § 271.703.

IV. Public Comment Procedures

Interested persons may comment on this proposed rulemaking by submitting written data, views or arguments to the Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, on or before April 18, 1983. Each person submitting a comment should indicate that the comment is being submitted in Docket No. RM79-76-188 (New Mexico-23), and should give reasons including supporting data for any recommendations. Comments should include the name, title, mailing address, and telephone number of one person to whom communications concerning the proposal may be addressed. An original and 14 conformed copies should be filed with the Secretary of the Commission. Written comments will be available for public inspection at the Commission's Division of Public Information, Room 1000, 825 North Capitol Street NE., Washington, D.C. during business hours.

Any person wishing to present testimony, views, data, or otherwise participate at a public hearing should notify the Commission in writing of the desire to make an oral presentation and therefore request a public hearing. Such request shall specify the amount of time requested at the hearing. Requests should be filed with the Secretary of the Commission no later than March 18, 1983.

List of Subjects in 18 CFR Part 271

Natural gas, Incentive price, Tight formations.

(Natural Gas Policy Act of 1978, 15 U.S.C. 3301-3432)

Accordingly, the Commission proposes to amend the regulations in Part 271, Subchapter H, Chapter I, Title 18, Code of Federal Regulations, as set forth below, in the event New Mexico's recommendation is adopted.

Kenneth A. Williams,

Director, Office of Pipeline and Producer Regulation.

PART 271—[AMENDED]

Section 271.703(d) is amended by adding subparagraph (171) to read as follows:

§ 271.703 Tight formations.

* * * * *

(d) *Designated tight formations.*

* * * * *

(171) *Chacra Formation in New Mexico.* RM79–76–188 (New Mexico–23).

(i) *Delineation of formation.* The Chacra Formation is located in all of Sections 4 through 8, and the N/2 of Sections 9 and 10 in Township 25 North, Range 7 West, NMPM; as well as all of Sections 5 through 9, 15 through 22, 26 through 36, the W/2 of Section 10, the S/2 of Section 14, and the SW/4 of Sections 23 and 25 in Township 26 North, Range 7 West, NMPM, in Rio Arriba County, New Mexico.

(ii) *Depth.* The Chacra Formation is located approximately 30 miles southeast of the town of Bloomfield in northwestern New Mexico in the southeastern portion of the San Juan Basin. The type section for the Chacra Formation is found at a depth of approximately 3,734 feet to 3,844 feet on an Induction Gamma Ray Log from the Curtis J. Little Turner Well No. 2. The average depth to the top of the Chacra Formation is 3,350 feet. Thickness of the Chacra Formation ranges from 110 to 130 feet.

[Docket No. RM79–76–176 (Texas—3 Addition VI)]

High-Cost Gas Produced From Tight Formations; Texas

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Energy Regulatory Commission is authorized by section 107(c)(5) of the Natural Gas Policy Act of 1978 to designate certain types of natural gas as high-cost gas where the Commission determines that the gas is produced under conditions which present extraordinary risks or costs. Under section 107(c)(5), the Commission issued a final regulation designating natural gas produced from tight formations as high-cost gas which may receive an incentive price (18 CFR § 271.703). This rule established procedures for jurisdictional agencies to submit to the Commission recommendations of areas for designation as tight formations. This notice of proposed rulemaking by the Director of the Office of Pipeline and Producer Regulation contains the recommendation of the Railroad Commission of Texas that an additional area of the Cisco-Canyon Formations located in southwest Sterling County, Texas in the area of the Conger (Penn) Field be designated as tight formations under § 271.703(d).

DATE: Comments on the proposed rule are due on April 15, 1983.

Public hearing: No public hearing is scheduled in this docket as yet. Written requests for a public hearing are due on March 16, 1983.

ADDRESS: Comments and requests for hearing must be filed with the Office of the Secretary, 825 North Capitol Street, NE., Washington, D.C. 20426.

FOR FURTHER INFORMATION CONTACT: Leslie Lawner, (202) 357–8511, or Walter W. Lawson, (202) 357–8556.

SUPPLEMENTARY INFORMATION:

Issued: March 1, 1983.

I. Background

On January 10, 1983, the Railroad Commission of Texas (Texas) submitted to the Commission a recommendation, in accordance with § 271.703 of the Commission's regulations (45 FR 56034, August 22, 1980), that an additional area of the Cisco-Canyon Formations located in southwest Sterling County, Texas, in the area of the Conger (Penn) Field be designated as tight formations. The Commission previously adopted a recommendation that the Cisco-Canyon Formations in a specified portion of Glasscock County be designated as tight formations (Order No. 242, issued July 15, 1982, in Docket No. RM79–76 (Texas—3 Addition III)) and currently has under consideration recommendations that additional areas of the Cisco-Canyon Formations in Glasscock, Reagan and Sterling Counties be designated as tight formations (Docket No. RM79–76–149 (Texas—3 Addition IV), Notice of Proposed Rulemaking issued December 16, 1982, and Docket No. RM79–76–166 (Texas—3 Addition V), Notice of Proposed Rulemaking issued February 14, 1983). Pursuant to § 271.703(c)(4) of the regulations, this Notice of Proposed Rulemaking is hereby issued to determine whether Texas' recommendation that an additional area of the Cisco-Canyon Formations in southwest Sterling County be designated tight formations should be adopted. Texas' recommendation and supporting data are on file with the Commission and are available for public inspection.

II. Description of Recommendation

Texas recommends that an additional area of the Cisco-Canyon Formations encountered in the Southwestern portion of Sterling County, in west Texas, Railroad Commission District 8, in the area of the Conger (Penn) Field be designated as tight formations. The recommended area is an expansion of the Cisco-Canyon Formations in Glasscock, Reagan and Sterling Counties which are currently being considered or have previously been approved by the Commission. The recommended area includes Sections 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, and 36 of Block 22, H&TC RR Survey; Sections 13, 14, 23 and 24, Block 32, T–5–S, T&P RR Survey; Sections 4, 5, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, and 30, Block 31, T–5–S, T&P RR Survey; Section 1, C&M RR Survey; Section 2, O. R. Wilson Survey; Sections 3 and 4, Block 2, T&P RR Survey; all of Mrs. Ann Morrison Survey No. 7; all of F. A. Brooks Survey No. 4; and the north 656.65 acres of the north part of Moses Herrin Survey No. 6, Block A.

For the total area of the Cisco-Canyon Formations which have either been approved or are currently under consideration by the Commission including the additional area recommended herein, the top of the Cisco Formation varies from approximately 6,990 feet in the northeast part of the area to 8,670 feet in the southwest. The depth to the top of the Canyon Formation (the base of the Cisco Formation) varies from 7,370 feet in the northeast to 8,810 feet in the southwest part of the area. Total thickness of the two sandstone formations varies from approximately 200 feet in the southwest to 710 feet in the northeast.

III. Discussion of Recommendation

Texas claims in its submission that evidence gathered through information and testimony presented at a public hearing convened by Texas on this matter demonstrates that:

(1) The average *in situ* gas permeability throughout the pay section of the proposed area is not expected to exceed 0.1 millidarcy;

(2) The stabilized production rate, against atmospheric pressure, of wells completed for production from the recommended formations, without stimulation, is not expected to exceed the maximum allowable production rate set out in § 271.703(c)(2)(i)(B); and

(3) No well drilled into the recommended formations is expected to produce more than five (5) barrels of oil per day.

Texas further asserts that existing State and Federal regulations assure that development of these formations will not adversely affect any fresh water aquifers.

Accordingly, pursuant to the authority delegated to the Director of the Office of

Pipeline and Producer Regulation by Commission Order No. 97, issued in Docket No. RM80-68 (45 FR 53456, August 12, 1980) notice is hereby given of the proposal submitted by Texas that the Cisco-Canyon Formations, as described and delineated in Texas' recommendation as filed with the Commission, be designated as tight formations pursuant to § 271.703.

IV. Public Comment Procedures

Interested persons may comment on this proposed rulemaknng by submitting written data, views or arguments to the Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, on or before April 15, 1983. Each person submitting a comment should indicate that the comment is being submitted in Docket No. RM79-76-176 (Texas—3 Addition IV), and should give reasons including supporting data for any recommendations. Comments should include the name, title, mailing address, and telephone number of one person to whom communications concerning the proposal may be addressed. An original and 14 conformed copies should be filed with the Secretary of the Commission. Written comments will be available for public inspection at the Commission's Office of Public Information, Room 1000, 825 North Capitol Street, NE., Washingtin, D.C., during business hours.

Any person wishing to present testimony, views, data, or otherwise participate at a public hearing should notify the Commission in writing of a desire to make an oral presentation and therefore request a public hearing. Such request shall specify the amount of time requested at the hearing. Requests should be filed with the Secretary of the Commission no later than March 16, 1983.

List of Subjects in 18 CFR Part 271

Natural gas, Incentive price, Tight formations.

(Natural Gas Policy Act of 1978, 15 U.S.C. 3301-3432)

Accordingly, the Commission proposes to amend the regulations in Part 271, Subchapter H, Chapter I, Title 18, Code of Federal Regulations, as set forth below, in the event Texas' recommendation is adopted.

Kenneth A. Williams,

Director, Office of Pipeline and Producer Regulation.

PART 271—[AMENDED]

Section 271.703 is amended by revising paragraph (d)(12)(iii) to read as follows:

§ 271.703 Tight formations.

* * * * *

(d) *Designated tight formations.* * * *

(12) *Cisco Sandstone Formation in Texas.* RM79-76 (Texas-3) * * *

(iii) *The Cisco-Canyon Formations.*

(A) *Delineation of formation.* The Cisco-Canyon Formations are found in the area of the Conger (Penn) Field and the Conger, S.W. (Penn) Field in Glasscock, Reagan and Sterling Counties, Texas, Railroad Commission Districts 7C and 8. The area includes the following surveys: T&P RR Block 33, T-5-S, Sections 34, 36, and W ½ of 38; T&P RR, Block 32, T-5-S, Sections 13 through 17, 20 through 29, 32 through 42 and 44 through 48; EL & RR RR Sections 1, 2, 3 and 4; D. L. Carver Section 4; H. T. Tweedle Section 2; T&P RR, Block 2, Sections 3, 4, 9 through 14, 21 through 26, 33 through 38, 41, 43, 44, 49 through 52, 61, 62, 69, 70, 71, 89 through 92, 100, 118, 128, 146, 155 and 156; GC & SF RR Sections 1 and 3; GC & SF RY Section 1; W. C. Elam Section 4; CT & MC RR Section 2; W. R. Barton Section 4; S. H. Birdwell Section 17; Brooks & Burleson Sections 1 and 2; T. B. Wilson Section 2; RR Section 1; H&TC RR, Block 22, Sections 19 through 36; T&P RR, Block 31, T-5-S, Sections 4, 5 and 7 through 30; O. R. Wilson Section 2; Mrs. Ann Morrison Section 7; F. A. Brooks Section 4; and the north 656.65 acres of the north part of Moses Herrin No. 6 Block A.

(B) *Depth.* The depth to the top of the Cisco Formation varies from approximately 6,670 feet in the southwest part of the area to 6,990 feet in the northeast. The depth to the top of the Canyon Formation varies from approximately 6,810 feet in the southwest to 7,370 feet in the northeast. Total thickness of the two formations varies from approximately 200 feet in the southwest to 710 feet in the northeast.

[Docket No. RM79-76-169 (Texas—22 Addition III)]

High-Cost Gas Produced from Tight Formations; Texas

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Energy Regulatory Commission is authorized by section 107(c)(5) of the Natural Gas Policy Act of 1978 to designate certain types of natural gas as high-cost gas where the Commisson determines that the gas is produced under conditions which present extraordinary risks or costs. Under section 107(c)(5), the Commission issued a final regulation designating natural gas produced from tight formations as high-cost gas which may receive an incentive price (18 CFR 271.703). This rule established procedures for jurisdictional agencies to submit to the Commission recommendations of areas for designation as tight formations. This Notice of Proposed Rulemaking by the Director of the Office of Pipeline and Producer Regulation contains the recommendation of the Railroad Commission of Texas that the Strawn-Detrital Formation be designated as a tight formation under § 271.703(d).

DATE: Comments on the proposed rule are due on April 15, 1983.

Public hearing: No public hearing is scheduled in this docket as yet. Written requests for a public hearing are due on March 16, 1983.

ADDRESS: Comments and requests for hearing must be filed with the Office of the Secretary, 825 North Capitol Street, NW., Washington, DC. 20426.

FOR FURTHER INFORMATION CONTACT: Leslie Lawner, (202) 357-8511, or Walter W. Lawson, (202) 357-8556.

SUPPLEMENTARY INFORMATION:

Issued: March 1, 1983.

I. Background

On December 23, 1982, the Railroad Commission of Texas (Texas) submitted to the Commission a recommendation, in accordance with § 271.703 of the Commission's regulations (5 FR 56034, August 22, 1980), that additional areas of the Strawn-Detrital Formation adjacent to and including portions of the University Block 31 (Strawn-Detrital) and Howards Creek (Penn) fields in Crockett county, Texas, be designated as a tight formation. On August 24, 1982, the Commission issued Order No. 249 in Docket No. RM79-76-111 (Texas—22) in which the Commission designated portions of the Strawn-Detrital Formation in the University Block 31 (Strawn-Detrital) Field as a tight formation under § 271.703. Other recommendations are currently under consideration to designate the Detrital Formation in the Perner Ranch area [Notice of Proposed Rulemaking issued December 2, 1982, Docket No. RM79-76-150 (Texas—22 Addition)] and additional areas of the Strawn-Detrital Formation in the University Block 31 Field area [Notice of Proposed Rulemaking issued December 23, 1982, Docket RM79-76-157 (Texas—22 Addition II)] as tight formations.

Pursuant to § 271.703(c)(4) of the regulations, this Notice of Proposed Rulemaking is hereby issued to determine whether Texas' recommendation, that the additional areas of the Strawn-Detrital Formation be added to the previously designated tight formation should be adopted. Texas' recommendation and supporting data are on file with the Commission and are available for public inspection.

II. Description of Recommendation

Texas recommends that the Strawn-Detrital Formation in areas adjacent to and including portions of the University Block 21 (Strawn-Detrital) Field and the Howards Creek (Penn) Field in Crockett County, Texas, Railroad Commission District 7C, be designated as a tight formation. The recommendation consists of approximately 22,400 acres and is divided into two specific areas. Area I consists of Sections 7, 8, 9, 16, 17, 18 and the south half of Section 10, Block 30 and Sections 6 through 11 and 13 through 16, Block 33 of the University Land Survey Crockett County. Area II consists of Sections 50 through 53, 66 through 70, 78 through 79, 91 through 93, the southern halves of Sections 54 and 90, the northern halves of Sections 49 and 94, and the eastern half of Section 71, Block OP, of GC and SF Railroad Company Survey Crockett County.

The average depth to the top of the Strawn-Detrital Formation in Area I is approximately 8,535 feet and the formation varies in thickness from approximately 100 feet to 250 feet. In Area II, the average depth to the top of the formation is approximately 7,950 feet and the formation varies in thickness from approximately 50 feet to 100 feet.

III. Discussion of Recommendation

Texas claims in its submission that evidence gathered through information and testimony presented at a public hearing on November 17, 1982, convened by Texas on this matter demonstrates that:

(1) The average *in situ* gas permeability throughout the pay section of the proposed area is not expected to exceed 0.1 millidarcy;

(2) The stabilized production rate, against atmospheric pressure, of wells completed for production from the recommended formation, without stimulation, is not expected to exceed the maximum allowable production rate set out in § 271.703(c)(2)(i)(B); and

(3) No well drilled into the recommended formation is expected to produce more than five (5) barrels of oil per day.

Texas further asserts that existing State and Federal regulations assure that development of the formation will not adversely affect any fresh water aquifers that are or are expected to be used as a domestic or agricultural water supply.

Accordingly, pursuant to the authority delegated to the Director of the Office of Pipeline and Producer Regulation by Commission Order No. 97, issued in Docket No. RM80-68 (45 FR 53456, August 12, 1980), notice is hereby given of the proposal submitted by Texas that the Strawn-Detrital Formation, as described and delineated in Texas' recommendation as filed with the Commission, be designated as a tight formation pursuant to § 271.703.

IV. Public Comment Procedures

Interested persons may comment on this proposed rulemaking by submitting written data, views or arguments to the Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, on or before April 15, 1983. Each person submitting a comment should indicate that the comment is being submitted in Docket No. RM79-76-169 (Texas—22 Addition III) and should give reasons including supporting data for any recommendation. Comments should include the name, title, mailing address, and telephone number of one person to whom communications concerning the proposal may be addressed. An original and 14 conformed copies should be filed with the Secretary of the Commission. Written comments will be available for public inspection at the Commission's Office of Public Information, Room 1000, 825 North Capitol Street, NE., Washington, D.C., during business hours.

Any person wishing to present testimony, views, data, or otherwise participate at a public hearing should notify the Commission in writing of a desire to make an oral presentation and therefore request a public hearing. Such request shall specify the amount of time requested at the hearing. Requests should be filed with the Secretary of the Commission no later than March 16, 1983.

List of Subjects in 18 CFR Part 271

Natural gas, Incentive price, Tight formations.

(Natural Gas Policy Act of 1978, 15 U.S.C. 3301-3432)

Accordingly, the Commission proposes to amend the regulations in Part 271, Subchapter H, Chapter I, Title 18, Code of Federal Regulations, as set forth below, in the event Texas' recommendation is adopted.

Kenneth A. Williams,

Director, Office of Pipeline and Producer Regulation.

PART 271—[AMENDED]

Section 271.703(d) is amended by revising paragraph (106)(i) to read as follows:

§ 271.703 Tight formations.

* * * * *

(d) *Designated tight formations.*

* * * * *

(106) Strawn-Detrital Formation in Texas. RM79-76 (Texas—22).

(i) *University Block 31 (Strawn-Detrital) and Howards Creek (Penn) Fields.*

(A) *Delination of formation.* The Strawn-Detrital Formation in the area of the University Block 31 and Howards Creek Fields is located in Crockett County, Texas, Railroad Commission District 7C. the designated area consists of Section 7, 8, 9, the south half of Section 10, Sections 16 through 20, the south half of Section 21, Sections 29 through 32, Block 30, University Lands Survey; all Sections in Block 31, University Lands Survey; Sections 1, 2, 3, the south half of Section 4, Section 5, through 8, the south half of Section 9, Sections 11 through 14, and the north half of Section 18, Block 32, University Lands Survey; Sections 8 through 20, Block 33, University Lands Survey; the southwest ¼ of Section 12, Section 29, 30, 31, the south half of Section 32, Sections 50, 51, and the southeast ¼ of Section 53, Block UV, GC & SF RR Co. Survey; Section 2, Block ST-2, GC & SF RR Co. Survey; the north half of Hampton Survey; Section 1001 of W. C. Hall Survey; Section 1002 of J. M. Jean Survey; Section 1003 of M. F. Lopez Survey; Sections 1, 2, 14 through 18, Block ST, GC & SF RR Co. Survey; the north half of Section 49, Sections 50 through 53, the south half of Section 54, Sections 66 through 70, the east half of Section 71, Sections 76 through 79, the south half of Section 90, Sections 91, 92, 93 and the north half of Section 94, Block OP, GC & SF RR Co. Survey.

(B) *Depth.* The average depth to the top of the Strawn-Detrital formation is approximately 7,900 feet in the north and 8,535 feet in the southwest. The thickeness of the formation varies from 50 feet to 100 feet in the northeast and

from 100 feet to 250 feet in the southwest.

BILLING CODE 4717-01-M

DEPARTMENT OF THE INTERIOR

National Park Service

36 CFR Part 14

Rights-of-Way Regulations; Power Transmission Lines

AGENCY: National Park Service, Interior.

ACTION: Proposed rule.

SUMMARY: This proposed rulemaking would eliminate an outdated and unneeded provision concerning wheeling stipulations in existing right-of-way regulations. The provision currently reserves the Department of the Interior's right to utilize capacity of electric power and energy transmission facilities requiring right-of-way permits to cross Federal lands within the National Park System.

DATE: Written comments, will be accepted until April 7, 1983.

ADDRESS: Comments should be directed to: Associate Director, Management and Operations, National Park Service, 18th & C Streets NW, Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT: Arthur E. Eck, Ranger Activities and Protection Division, National Park Service, Telephone: (202) 343-5607.

SUPPLEMENTARY INFORMATION:

Background

This proposed rulemaking would revise the right-of-way regulations for the National Park Service. Specifically, the wheeling stipulation, which allows the Department of the Interior to utilize capacity of electric power and energy transmission facilities crossing Park System lands, contained in 36 CFR 14.76(a)(5)(ii), would be deleted. Wheeling stipulations had been a requirement of the Department from 1948 to 1954, and again from 1963 to 1982. By final rulemaking published March 23, 1982 (47 FR 12568), the Bureau of Land Management deleted this requirement from its regulations in 43 CFR Part 2800. This revision is consistent with the Bureau's deletion.

Drafting Information

The principal author of this proposed rule is Arthur E. Eck, Ranger Activities and Protection Division, National Park Service.

Paperwork Reduction Act

This rule does not contain information collection requirments which require approval by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.*

Compliance With Other Laws

It is hereby determined that the publication of this document is not a major Federal action significantly affecting the quality of the human environment, and that no detailed statement is required pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)).

The Department of the Interior has determined that this document is not a "major rule" under E.O. 12291, and certifies that this document will not have a "significant economic effect on a substantial numbers of small entities" under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). The revision is expected to have little effect on costs to consumers of power marketing agencies; the agencies may negotiate with applicants or seek orders for wheeling from the Department of Energy under 16 U.S.C. 824j. The revised regulation will reduce the cost to the United States of processing some rights-of-way applications, as well as costs to applicants caused by delays.

Authority

Section 3 of the Act of August 25, 1916, 39 Stat. 535 as amended (16 U.S.C. 3).

List of Subject in 36 CFR Part 14

National parks; Electric power; Public lands rights of way.

PART 14—[AMENDED]

In consideration of the foregoing, § 14.76, Subpart F of Part 14, Title 36 of the Code of Federal Regulations is amended by revising paragraph (a)(5) to read as follows:

§ 14.76 Terms and conditions.

(a) * * *

(5) An applicant for a right-of-way for a transmission facility having a voltage of 66 kilovolts or more must, in addition to the requirements of Subpart C, execute and file with its application a stipulation agreeing to accept the right-of-way grant subject to the following condition: In the event the United States, pursuant to law, acquires the applicant's transmission or other facilities constructed on or across such right-of-way, the price to be paid by the United States shall not include or be affected by any value of the right-of-way granted to the applicant under authority of the regulations of this part.

* * * * *

Dated: January 21, 1983.

J. Craig Potter,

Acting Assistant Secretary for Fish and Wildlife and Parks.

[FR Doc. 83-6618 Filed 3-7-83; 8:45 am]

BILLING CODE 4310-70-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

Approval and Promulgation of Implementation Plans; Michigan

AGENCY: U.S. Environmental Protection Agency.

ACTION: Proposed rulemaking.

SUMMARY: The purpose of today's rulemaking is to propose approval of Consent Order APC No. 02-1980, for the Hayes-Albion Corporation and Permits 341-79 and 375-79 for the American Colloid Plant, as revisions to the Michigan State Implementation Plan (SIP) for Calhoun County. Consent Order APC No. 02-1980, contains control measures beyond the present requirements of Michigan's Rule 336.1301 and 336.1331 for reducing total suspended particulate (TSP) emissions. EPA is proposing to approve these revisions.

DATE: Comments on these revisions and on the proposed EPA action must be received by April 7, 1983.

Copies of the revision and other materials relating to this rulemaking are available for inspection at the following addresses: (It is recommended that you telephone the contact person listed below, before visiting the Region V Office).

Environmental Protection Agency, Air Programs Branch, 230 South Dearborn Street, Chicago, Illinois 60604

Michigan Department of Natural Resources, Air Quality Division, 7150 Harris Drive, Lansing, Michigan 48909

Comments on this proposed rule should be addressed to (Please submit an original and five copies, if possible): Gary Gulezian, Chief, Regulatory Analysis Section, Air Programs Branch, Region V, Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois 60604.

FOR FURTHER INFORMATION CONTACT: Toni Lesser, Air Programs Branch, Region V, Environmental Protection Agency 230 South Dearborn Street, Chicago, Illinois 60604, (312) 886-6037.

SUPPLEMENTARY INFORMATION: On April 5, 1982, the State of Michigan submitted to EPA Consent Order APC No. 02–1980 for the Hayes-Albion Corporation, along with alterations to Section 5(D) of the Consent Order, and permits 341–79 and 375–79 for the American Colloid Plant. The Hayes-Albion foundry is located in Calhoun County. A one-square mile area on the west side of Albion City, around Hayes-Albion (Calhoun County, R4W, T2S, Section 34), has been designated as nonattainment for the primary TSP standards. On June 18, 1982, the State of Michigan submitted a Fugitive Dust Control Plan and a Malfunction Abatement Plan for major air cleaning devices at Hayes Albion as part of its SIP revision. These plans contain specific measures for reducing TSP emissions and have been implemented by the dates specified in Consent Order APC No. 02–1980.

On October 25, 1982, EPA announced the availability of this revision and took final action to approve (47 FR 47245). In that notice, EPA advised the public that it was deferring the effective date of its approval for 60 days, until December 27, 1982, to provide an opportunity for submittal of comments on the revision. EPA announced that, if within 30 days of the publication of approval notice we received notice that someone wished to submit an adverse or critical comment we would withdraw the approval and begin a new rulemaking by proposing the action and establishing a 30-day comment period. EPA also published a general notice announcing this special procedure on September 4, 1981 (46 FR 44476).

EPA has received notice that someone wishes to submit an adverse or critical comment. Therefore, in accordance with the procedure described above, EPA today is taking final action elsewhere in today's **Federal Register** to withdraw its October 25, 1982, approval of this revision to the Michigan SIP for the Hayes-Albion Corporation and in this notice, is reproposing to approve the revision. A detailed description of the revision and EPA's rationale for proposing approval are contained in the 47 FR 47245. Interested persons are invited to submit comments on this proposed approval. EPA will consider all coments received within 30 days of the publication of this notice.

Under Executive Order 12291, today's action is not "Major". The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

List of Subjects in 40 CFR Part 52

Air pollution control, Ozone, Sulfur dioxide, Nitrogen dioxide, Lead, particulate matter, Carbon monoxide, Hydrocarbons.

This notice is issued under authority of section 110 of the Clean Air Act as amended (42 U.S.C. 7410).

Dated January 28, 1983.

Alan Levin,

Acting Regional Administrator.

BILLING CODE 6560-50-M

---

40 CFR Part 86

[AMS-FRL-2319-2]

Control of Air Pollution From New Motor Vehicles and New Motor Vehicle Engines; Emissions Standards for 1985 and Later Model Year Light-Duty Vehicles

AGENCY: Environmental Protection Agency.

ACTION: Notice of public hearing.

SUMMARY: EPA will hold a public hearing on the Notice of Proposed Rulemaking (NPRM) to implement section 206(f)(1) of the Clean Air Act, as amended, for 1985 and subsequent model year light-duty vehicles (LDVs). Under the statute, all 1984 and later model year LDVs must meet the national emission standards regardless of the altitude at which they are sold. The proposed requirements for 1985 and later LDVs are identical to those recently promugated as an interim final rule for 1984 LDVs. Both the NPRM and the final rule were published in the **Federal Register** on February 18, 1983 (48 FR 7399 and 48 FR 7392, respectively). Anyone desiring a complete description of the proposed regulations should refer to the 1984 interim final rulemaking.

DATES: The hearing will be held on March 22, 1983 and will convene at 9:30 a.m. and adjourn at such time as is necessary to complete the testimony. Written comments on the proposal will be accepted through April 21, 1983.

ADDRESSES: The hearing will be held at the Federal Office Building, Tenth Floor, 1961 Stout Street, Denver, CO 80202. Written comments should be submitted (perferably 4 copies) to: Central Docket Section (A–130), Environmental Protection Agency, Docket No. A–80–01, 401 M Street, SW., Washington, D.C. 20460. Docket No. A–80–01 is located at the U.S. EPA, Central Docket Section, West Tower Lobby, Gallery 1, 401 M Street, SW., Washington, D.C. 20460. The docket may be inspected between 8:00 a.m. and 4:00 p.m. on weekdays. As provided in 40 CFR Part 2, a reasonable fee may be charged for photocopying.

FOR FURTHER INFORMATION CONTACT: Mr. Richard S. Wilcox, Emission Control Technology Division, U.S. Environmental Protection Agency, 2565 Plymouth Road, Ann Arbor, MI 48105, (313) 668–4390.

SUPPLEMENTARY INFORMATION:

I. Background

Section 206(f)(1) of the Clean Air Act, as amended, requires all 1984 and later LDVs to comply with the national emission standards of section 202 regardless of the altitude at which they are sold. On February 18, 1983, EPA published an interim final rule which implemented this Congressional mandate for the 1984 model year (48 FR 7392). On the same date, EPA also published a notice of proposed rulemaking (NPRM) in the **Federal Register** which would establish identical emission control requirements for 1985 and later model years (48 FR 7399).

Anyone desiring the complete details of the NPRM should refer to the 1984 interim final rulemaking. However, for convenience the main components of the proposal are briefly summarized below.

1. Every LDV would need to be capable of automatically controlling emissions of hydrocarbon (HC), carbon monoxide, nitrogen oxides, evaporative HC, and diesel particulate to the levels required by the national emission standards at both low and high altitudes, unless otherwise exempted.

2. Exemptions from the above requirement would be available for certain low-power vehicles in order to prevent adversely affecting model availability at all altitudes. Such exempted vehicles would be certified for sale at low altitude only.

3. Certification to the national emission standards would be specifically required only at a single low-altitude location and a single high-altitude location.

4. Compliance with emission standards at low altitude will continue to be demonstrated using the applicable Federal Test Procedure (FTP) and other existing certification protocols. At high altitude, manufacturers have the option of performing FTP tests or relying on engineering evaluations to determine compliance.

II. Public Participation

Any person desiring to make a statement at the hearing should provide written notice of such intention to the contact person indicated above by March 18, 1983. This notice should include an estimate of the length of the testimony and any need for audio/visual equipment. If possible, we request that

an advance copy of the proposed statement or material be included.

The record of the hearing will be left open for 30 days (through April 21, 1983) following the close of the hearing to allow submission of rebuttal and supplementary information. Any documents submitted during this period of time should be sent to the EPA Central Docket Section at the address shown above. It is also requested, but not required, that a copy of this submittal be sent directly to the contact person indicated above.

Commenters desiring to submit proprietary information should separate it from the other comments to the greatest extent possible, and label it "Confidential Business Information." Submissions containing such proprietary information should be sent directly to the appropriate Agency contact indicated above, and not to the Docket, to ensure that proprietary information is not inadvertently placed in the public docket.

Information covered by such a claim will be disclosed by EPA only to the extent, and by means of the procedures, set forth in 40 CFR Part 2. If no claim of confidentiality accompanies the information when it is received by EPA, it may be made available to the public without further notice to the commenter.

Mr. Richard Wilson is hereby designated as the Presiding Officer of the hearing. He will be responsible for maintaining order, excluding irrelevant or repetitious material, scheduling presentations and notifying participants of the time at which they may appear.

The hearing will be conducted informally. Technical rules of evidence will not apply. A written transcript of the hearing will be taken. Anyone desiring to purchase a copy of this transcript should make arrangements individually with the court reporter recording the hearing.

Dated: March 3, 1983.

Kathleen M. Bennett,

Assistant Administrator for Air, Noise and Radiation.

Nevada's Application for Interim Authorization, Phase I and Phase II, Components A and B, Hazardous Waste Management Program

AGENCY: Environmental Protection Agency, Region 9.

ACTION: Notice of public comment period and public hearing.

SUMMARY: Today EPA is announcing the availability for public review of the Nevada application for Phase I and Phase II, Components A and B interim authorization, for the hazardous waste management program, inviting public comment and giving notice that if significant public interest is expressed, EPA will hold a public hearing on the application.

DATE: If significant public interest is expressed in holding a hearing, a public hearing is scheduled for April 22, 1983 at 1:00 p.m. EPA reserves the right to cancel the public hearing if significant public interest in holding a hearing is not communicated by EPA by telephone or in writing by April 6, 1983. EPA will determine by April 11, 1983, whether there is significant interest to hold the public hearing. All written comments on the Nevada Interim Authorization application must be received by the close of business on April 6, 1983.

ADDRESSES: If significant public interest is expressed, EPA will hold a public hearing on Nevada's application for Interim Authorization on April 22, 1983 at 1:00 p.m. at the Washoe County Health Department, 1001 E. Ninth St. Reno, Nevada. Written comments on the application and written or telephone communications of interest in EPA's holding a public hearing on the Nevada application must be sent to: U.S. Environmental Protection Agency, Region 9, Toxics and Waste Management Division, Attention: Gary Lance (T-2-1), 215 Fremont Street, San Francisco, CA 94105, (415) 974-8125. If you wish to find out whether or not EPA will hold a public hearing on the Nevada application based upon EPA's decision that there was significant public interest in such a hearing, write or telephone after April 11, 1983, the EPA contact person listed below. Copies of the Nevada Interim Authorization application are available during normal business hours at the following address for inspection and copying:

Environmental Protection Agency, Region 9, Library Information Center, 215 Fremont Street Room 601, San Francisco, CA 94105

EPA Headquarters Library, 401 M Street, SW., Room 2404, Washington, D.C. 20460

Nevada Division of Environmental Protection, 201 South Fall Street, Carson City, Nevada 89710

FOR FURTHER INFORMATION, CONTACT: Environmental Protection Agency, RCRA State Programs Section, Attn: Gary Lance (T-2-1), 215 Fremont Street, San Francisco, CA 94105, (415) 974-8125.

SUPPLEMENTARY INFORMATION: In the May 19, 1980 **Federal Register** (45 FR 33063) the Environmental Protection Agency promulgated regulations, pursuant to Subtitle C of the Resource Conservation and Recovery Act of 1975 (as amended), to protect human health and the environment for the improper management of hazardous waste. These regulations include provisions under which EPA can authorize qualified State hazardous waste management programs to operate in lieu of the Federal program. The regulations provide for a transitional stage in which qualified state programs can be granted interim authorization. The interim authorization program is being implemented, in two phases corresponding to the two stages in which the underlying Federal program will take effect.

As noted in the May 19, 1980, **Federal Register**, copies of state submittals for interim authorization are to be available for public inspection and comment. The purpose of this notice is to announce the availability of the Nevada submittal for interim authorization; to invite public comment; and, that if significant public interest is expressed in holding a hearing, to give notice of a public hearing to be held on the Nevada application. A listing and a description of requirements for interim authorization are stated in 40 CFR Part 123, Subpart F.

List of Subjects in 40 CFR Part 123

Hazardous materials, Indian-land, Reporting and recordkeeping requirements, Waste treatment and disposal, Water pollution control, Water supply, Intergovernment relations, Penalties, Confidential business information.

Authority

This notice is issued under the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976, as amended, 42 U.S.C. 6901 et seq. and implementing regulation: in 40 CFR Part 123, Subpart F.

Dated: February 10, 1983.

Sonia F. Crow,

Regional Administrator.

BILLING CODE 6560-50-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

45 CFR Part 77

Sanctions Applicable to Letter of Credit Administration

AGENCY: Office of the Secretary, HHS.

ACTION: Proposed rule.

SUMMARY: We are proposing regulations that would govern the imposition of sanctions against recipient organizations holding letters of credit under programs administered by the Department of Health and Human Services. The regulations would describe the conditions which may prompt the imposition of sanctions and would establish uniform procedures for providing affected recipient organizations: (1) Adequate notice of the grounds upon which proposed sanctions are based, (2) an opportunity to respond to the factual and legal bases of the proposed sanctions, and (3) a reasoned decision that articulates the factual and legal bases of the Department's final decision. We believe that these uniform procedures would be useful both as a sound management tool for the Department and as a guide to grantees and contractors.

DATE: To assure consideration, comments should be received by May 9, 1983.

ADDRESS: Address comments in writing to: David V. Dukes, Deputy Assistant Secretary, Finance Office of the Assistant Secretary for Management and Budget, Department of Health and Human Services Room 705D, Hubert H. Humphrey Building, 200 Independence Ave., SW., Washington, D.C. 20201. Comments will be available for public inspection, beginning approximately two weeks after publication, in Room 705D of the Department's offices at 200 Independence Ave., SW., Washington, D.C. 20201 on Monday through Friday of each week from 8:30 a.m. to 5:00 p.m. Because of the large number of comments we receive, we cannot acknowledge or respond to them individually. However, in preparing the final rule, we will consider all comments and will respond to them in the preamble to that rule.

FOR FURTHER INFORMATION, CONTACT: David V. Dukes, (202) 245-7064.

SUPPLEMENTARY INFORMATION:

Background

For many years the Department has administered the disbursement of federal funds to recipients of grant awards and contracts under numerous programs by means of the letter of credit system. In fiscal year 1981 alone, $80.4 billion under 281 Departmental programs were disbursed through 4555 letters of credit. Under the letter of credit system, recipient organizations are financed by either a Federal Reserve Bank Letter of Credit (FRB–LOC) or a Treasury Financial Communication System-Letter of Credit (TFCS–LOC). Under the FRB–LOC, recipient organizations draw cash advances against their awards directly from the United States Treasury, through letters of credit maintained in Federal Reserve Banks. Under the TFCS–LOC, recipient organizations draw their cash advances against their awards directly from the United States Treasury, through letters of credit maintained by the United States Treasury Disbursing Office. It is the award that constitutes the authorization to draw federal funds, not the letter of credit. The letter of credit is only a payment device that facilitates the transfer of federal funds from the Treasury to the individual grantee or contractor. Basic authorities governing withdrawal of federal cash under the letter of credit system were issued by the Treasury Department in its Circular No. 1075, now codified at 31 CFR Part 205 and in the Treasury Fiscal Requirements Manual. The Department has published a compendium of policies and procedures for grantees and contractors whose awards under Departmental programs are paid by letter of credit called the "Departmental Federal Assistance Financing System Policy and Procedures Manual for Recipients" (DFAFS Manual). Within the Department, administration of the letter of credit process lies largely with the Departmental Federal Assistance Financing System, but it is also shared with the Assistant Secretaries for Health and Human Development Services, and the Administrator of the Health Care Financing Administration.

While the Department has on numerous occasions identified instances in which recipient organizations have violated pertinent requirements regarding the administration of their letters of credit, there has never been a uniform Departmental procedure for resolution of letter of credit disputes or imposition of remedial steps were circumstances warrant such action. We believe that the adoption of uniform procedures that would govern the imposition of sanctions against recipient organizations that hold letters of credit would be useful both as a sound management tool for the Department and as a guide to apprise grantees and contractors of procedures that may affect the manner by which they have federal funds disbursed to them under awards issued by this Department.

The proposed rules seek to draw a balance between the need to establish and formalize administratively feasible procedures that will protect the integrity of the letter of credit system, while insuring that parties potentially affected by adverse Departmental action have an adequate opportunity to be advised of the Department's concerns regarding letter of credit administration, to respond to the Department's concerns, and to have a reasoned decision that fully sets forth the grounds for the disposition of the dispute. These regulations would not govern a recipient organization's entitlement to the grant or contract underlying its letter or credit nor would they govern the suspension or termination of grant awards since Departmental regulations already provide for these procedures. Similary, any decision reached by the Department under these regulations would relate only to a grantee's obligations under its letter of credit and would not determine the grantee's ultimate liability with respect to improperly spent funds or other misconduct.

The Proposed Rule

1. *Conditions that may prompt remedial action.*—The proposed rule sets forth five conditions, any one of which may prompt remedial action by the Department against a grantee. These are:

(1) A recipient organization draws funds through its letter of credit in excess of the aggregate grant award or contract authority currently available to it. Thus, for example, should a grantee have aggregate grant award authority of $50 million for all Departmental programs in which it participates, but it draws $60 million from its letter of credit, it would be subject to remedial action notwithstanding the fact that it may be within permissible drawing limits for several of its individual grants.

(2) A recipient organization draws Federal funds for a particular program in excess of currently available grant award or contract authority for that program even though aggregate award authority may not have been exceeded.

(3) A recipient organization fails to file in a timely fashion all reports and other data required by the Department in connection with its grant awards, contracts, or letters of credit. This provision would encompass not only the pertinent requirements contained in Chapter VI of the DFAFS Manual and 45 CFR Part 74 in general, but also those requirements currently set forth by

specific program regulations necessary for the processing of individual grant awards. Thus, failure of a State agency to file a quarterly expenditure report under its Medicaid program as required by 45 CFR 201.5 may sufficiently hinder the grant award process as to warrant Department action to protect outstanding letter of credit authority available to the State under that program.

(4) A recipient organization accumulates, through the letter of credit system or otherwise, excess amounts of Federal funds relative to its actual and immediate disbursement requirements. This requirement is also set forth in Treasury Department regulations at 31 CFR 205.6. For those programs under which Federal funds are disbursed on a checks paid or delayed draw system, this issue should not arise since any cash on hand would be unauthorized under these payment systems.

(5) A recipient organization's cash management system fails to comply with well recognized accounting principles or Departmental regulations, or otherwise demonstrates irregularities, misrepresentations, fraud or abuse in its operation. While this condition is broadly stated, it necessarily reflect the difficulty in attempting to compile a complete list of cash management failures by recipient organizations that pose a threat to the integrity of the letter of credit system and, therefore, warrant remedial action by the Department. This requirement would include cash management irregularities such as falsifying expenditure reports or violations of Treasury Department regulations.

2. *Remedial actions available to the Department.*—The proposed rule sets forth several sanctions that the Department may impose against recipient organizations once it identifies the existence of any of the conditions described above:

(1) The Department may place special limits, restrictions or controls upon the recipient organization's use of the letter of credit. For example, if a recipient organization fails to adhere to proper cash management principles in administering its letter of credit, the department may place the organization on a working capital advance method. Similarly, where the Department determines that a recipient organization is carrying over indefinitely Federal funds required through its letter of credit, it may determine that the organization should instead have a monthly dollar ceiling for the expenditure of its federal funds. Or, the Department may require more frequent drawdowns to correlate with disbursements.

(2) The Department may require more frequent or more detailed financial reporting from the recipient organization. For example, the Department might conclude that more frequent than quarterly reporting by a grantee would be needed to assure the proper disbursement of federal funds, or that a grantee should identify summary expenditures to be made for each major program during a quarter.

(3) The Department may suspend, reduce, or terminate a recipient organization's use of its letter of credit. Suspension constitutes a temporary cessation of an organization's access to the letter of credit system. Under this remedy, the organization's letter of credit remains in force, but is rendered inoperative until the issue that prompted the suspension is resolved. A reduction in a letter of credit might occur when the Department identifies a need to recapture Federal funds that have been improperly drawn by a grantee. Termination of a letter of credit would occur when the Department has concluded that a recipient organization has so abused the letter of credit system that removal of the organization from the system is the only viable method of disbursing grant funds with some assurance that the funds will be properly expended. For example, should the Department conclude that a grantee's conduct under its letter of credit demonstrates that there is a need to correlate the grantee's draws of Federal funds more closely with specific grant expenditures than current letter of credit requirements permit, the Department may choose to change the payment mechanism available to the grantee to either a Treasury check payment system or a working capital advance system. These payment systems would enable the Department to monitor closely the relationship of specific payments of Federal funds with specifically approved grant expenditures. These regulations would not apply to the letter of credit terminations that occur because a grantee does not meet threshold criteria for use of a letter of credit. Thus, Department regulations (45 CFR 74.93(a)(1)) already specify that a grantee must have continuing relationship with the Department for at least a year and be receiving at least $120,000 in cash advances annually. These factors are unrelated to inquiries regarding a grantee's improper use of its letter of credit and, as such, are outside the concerns addressed by these regulations.

Because the kinds of cash management issues that give rise to remedial action by the Department are so varied, it is impossible to catalogue each kind of issue that could give rise to a specific remedy. The particular facts govern the selection of the most appropriate remedy in any given case. There are, however, two overriding criteria that govern: (1) The severity of the cash management problem demonstrated by the recipient organization, and (2) the extent to which the Department perceives a substanial threat to the integrity of the letter of credit system and the protection of Federal grant or contract funds.

3. *Procedures applicable to remedial actions.*—In designing procedures to impose sanctions, our intent is to fashion a system that provides basic procedural fairness through an administratively efficient procedure. We are mindful that the courts have consistently held that there is no single procedure or formula that will satisfy minimum due process requirements in every situation. As the Supreme Court stated in *Morrissey* v. *Brewer*, 408 U.S. 471, 482 (1972), "It has been said so often by the Court and others as not to require citation of authority that due process is flexible and calls for such procedural protections as the particular situation demands." These protections depend generally on the importance of the interests involved, the degree of reliability in which the procedures result, and the cost and administrative burden which the procedure entails. *Mathews* v. *Eldridge*, 424 U.S. 319 (1976); *Gray Panthers* v. *Schweiker*, 652 F. 2d 146 (D.C. Cir. 1980).

It is also axiomatic that the fundamental requirement of due process is "the opportunity to be heard at a meaningful time and in a meaningful manner." *Armstrong* v. *Manzo*, 380 U.S. 545, 552 (1965); *Eldridge, supra*, at 334. We perceive this requirement, at a minimum, to include three elements. First, a party must be given notice of the reasons for a governmental action affecting its interests. Second, the party must be given an opportunity to present its case in opposition to the Government's proposed action. And third, there must be a reasoned decision which states the reasons for the determination and indicates the law and the facts upon which the decisionmaker relied. *Goldberg* v. *Kelley*, 397 U.S. 254 (1970). *Greater Boston Television Corporation* v. *F.C.C.*, 444 F. 2d 841, 850 (1970), *cert. denied*, 403 U.S. 923 (1971). Thus, within the broad limits as defined by the courts, there is, we believe, substantial discretion and flexibility to

design a procedure that balances, on the one hand, the interests of a grantee to a full and fair airing of the issues with, on the other hand, the administrative needs of the Department. In light of these principles, we are proposing procedures that would generally require the Department, before it implements its decision to take remedial actions against a recipient organization, to provide the organization with notice, an opportunity to respond, and a reasoned decision on the matter in dispute. We propose that a recipient organization should be notified of potential adverse action at least 30 days before implementation of the decision. As the notice would fully set forth both the legal and factual bases of the Department's initial conclusions, we believe that affected parties should not need more than 30 days within which to furnish the Department with a written response stating the legal and factual reasons why the Department should not impose the proposed remedial action.

We are proposing to restrict parties generally to written submissions for three reasons. First, we believe that the issues that underlie letter of credit disputes may be amply articulated in writing. Second, since the credibility of witnesses should not be an issue in determining the appropriateness of the proposed Departmental action, an oral hearing would not materially enhance the decision making process, provide the party any additional protection, or reduce the risk of an incorrect decision. Third, the conduct of oral hearings in every case of disputes between the Department and recipient organizations could be prohibitively expensive and would render the decision making process unnecessarily slow.

Although oral hearings would not ordinarily contribute materially to a full and fair resolution of letter of credit disputes, we do not wish to foreclose all opportunities for an oral presentation by the recipient organization or by Department employees. In some cases, the presiding officer may find the written submissions confusing or incomplete and desire a hearing for the purpose of clarifying them. For this reason, we are proposing that should the presiding official determine that his ability to resolve the matter would be substantially enhanced by an oral presentation of the issues, he may convene an informal conference of the parties. The scope of the conference would be determined in advance by the presiding official. Any such conference would be transcribed by the Department and become part of the record. We propose to leave the judgment for determining the need for an informal conference solely with the presiding official primarily for two reasons. First, as described above, the nature of letter of credit disputes is such that we expect it to be the exception rather than the rule that the oral presentation of issues will materially assist the final decision making process. Second, if informal conferences were conducted as a matter of right in each case, the attendant expenditure of time and resources could be unacceptably costly in comparison to the possible benefits of such proceedings.

The Departmental official having responsibility for rendering final decisions in the disputes governed by these proposed regulations will vary according to the Departmental component that has primary responsibility for the administration of the letter of credit in dispute. Because the large bulk of letter of credit administration within the Department lies with DFAFS, final decisions on letter of credit disputes within its jurisdiction will rest with the Assistant Secretary for Management and Budget or his designee. Disputes involving other letters of credit, such as those administered by the Health Care Financing Administration for the Medicare program (42 U.S.C. 1395 *et seq.*), would be resolved by the HCFA Administrator or her designee. Similarly, the Assistant Secretary for Health or his designee would issue final decisions under matters relating to the Indian Self Determination Act (25 U.S.C. 450 *et seq.*).

The proposed rules set forth certain basic elements regarding the final decision making process that are designed to assure the fairest possible decision:

(1) The final decision maker will have the authority to affirm, modify, or reverse the initial determination that sanctions should be imposed. By giving the final decision maker the added latitude to modify an initial decision, rather than simply affirm or reverse, we believe that the final decision may more accurately achieve the most equitable result that otherwise would not be possible. For example, the decision maker may conclude that an initial decision to terminate a letter of credit is too severe to remedy a particular weakness in the grantee's letter of credit administration but that some remedy is necessary to protect the integrity of the letter of credit system. By permitting the final decision maker to conclude that a short term suspension of the letter of credit is the most prudent solution, the final decision may reflect that conclusion without having to accept the extremes of termination or no remedy at all.

(2) The final decision will be based solely on the materials presented to the final decision maker during the course of the review process. These materials would include the Department's notice to the recipient organization and accompanying documents, the organization's response and accompanying documents, the Department's reply and its accompanying documents, and the record of any informal conference. Thus, the final decision will be based solely on a record that is available to the affected parties and not on the basis of *ex parte* communications or information not known to the recipient organization.

(3) The final decision will be in writing and will set forth the rationale for the decision.

(4) The final decision maker will be an individual who was not involved in the initial decision to seek remedial action against the recipient organization. No person involved in the initial decision would be responsible for making the final decision. We believe that this, too, comports with basic principles of fairness by separating the "prosecutorial" and "adjudicatory" functions pertinent to the decision making process.

4. *Imposition of sanctions in emergency situations.*—The proposed rules would ordinarily provide recipient organizations with notice, opportunity for comment, and a written decision prior to the imposition of any sanction. We would expect these procedures to be used in the vast majority of situations that pose a need for remedial action. Situations arise, however, that may require immediate action by the Department to assure the integrity of the letter of credit system and the protection of the Federal government's assets. For example, the Department may learn of what it believes to be misconduct by a grantee of such a nature that it could irrevocably risk the loss of grant funds if not immediately remedied. This might occur in the case of a grantee experiencing severe financial hardship with a poor case management record. Should the Department conclude that it faces a substantial likelihood of losing Federal grant funds without a realistic chance for their recovery, the proposed rules would permit the Department to take immediate steps to impose a sanction, such as the suspension of the grantee's letter of credit, pending a fuller examination of the facts necessary for a resolution of the issue once the sanction is in effect. In such cases, the affected

grantee would then be entitled to the same notice, opportunity to be heard, and written decision that under normal circumstances would be furnished prior to the imposition of a sanction. We wish to emphasize that the emergency situations that may give rise to this alternative procedure occur infrequently and involve only recipient organizations that have the most serious cash management difficulties and with whom the Department does not have a continuing relationship under its programs. Even in these cases, however, the proposed rule provides that a recipient organization against whom a sanction is imposed without prior notice be notified orally within one business day of the sanction's imposition and in writing within seven business days. Moreover, because of the seriousness of this remedy, and the hope of minimizing the amount of time that a recipient organization would be subject to the sanction without an oportunity to be heard, we are proposing that the Department be required to reach a final decision within 20 calendar days after receiving the organization's response to the notice of the proposed sanction.

Impact Analysis

Executive Order 12291

We have determined that these proposed regulations do not meet the criteria for a major rule that are set forth in section 1(b) of Executive Order 12291. That is, the proposed regulations would not:

(1) Have an annual effect on the economy of $100 million or more;

(2) Cause a major increase in costs or prices for consumers, individual industries, government agencies, or geographic regions; or

(3) Have significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

We have made this determination because the proposed rules would not require Department grantees or other recipient organizations to alter the manner in which they administer their grant programs or contracts. These regulations would simply provide all recipient organizations with a well defined set of procedures that should facilitate their requests for an orderly review of potentially adverse determinations affecting their grant or contract administration. Additionally, these regulations would remove the uncertainty that now exists among recipient organizations as to the process for resolution of disputes they may have with the Department concerning cash management issues.

Regulatory Flexibility Act.—We have reviewed this regulatory initiative in light of the Regulatory Flexibility Act (5 U.S.C. ch. 6), and we have concluded that it will not have a significant economic impact on a substantial number of small businesses, organizations, or government jurisdictions. As discussed above, the proposed regulations would not impose any new requirements on recipient organizations who receive federal funds through the letter of credit system. Indeed, requirements for grant administration would remain wholly unaffected by these regulations. We believe that the proposed regulations would, in fact, benefit holders of Departmental letters of credit because for the first time grantees would have available to them well defined procedures that expressly address the resolution of disputes that often occur with the Department concerning letter of credit administration.

List of Subjects in 45 CFR Part 77

Credit, Grants administration, Penalties.

45 CFR is amended by adding a new Part 77 as set forth below:

PART 77—SANCTIONS APPLICABLE TO LETTER OF CREDIT ADMINISTRATION

Sec.

77.1 Purpose.
77.2 Scope.
77.3 Conditions that may give rise to sanctions.
77.4 Sanctions.
77.5 Sanction procedures.

Authority: 5 U.S.C. 301.

§ 77.1 Purpose.

Letters of credit with the United States Treasury, issued by the Department to States or other grantees and contractors, are a convenient means for disbursing Federal funds to recipients of grant awards or contracts (recipient organizations) under the programs of this and other Executive Departments. The sound and efficient operation of the letter-of-credit system is dependent in large part upon the honesty, good faith, and responsible financial management of recipient organization that receive funds pursuant to letters of credit. This part sets forth conditions that may prompt the Department to seek remedial action against a recipient organization operating under a letter of credit and the procedures that will be used to reach a final decision regarding the imposition of a sanction against a recipient organization.

§ 77.2 Scope.

The regulations in this part apply to all recipient organizations under any program administered by the Department through which the organization receives Federal funds under a letter of credit.

§ 77.3 Conditions that may give rise to sanctions.

If the Department determines that any of the following conditions is present in a recipient organization's administration of a letter of credit, it may impose sanctions against the organization:

(a) A recipient organization draws Federal funds through its letter of credit in excess of the aggregate grant award or contract authority currently available to it.

(b) A recipient organization draws Federal funds for a particular program in excess of currently available grant award or contract authority for that program, even though the organization may not have exceeded its aggregate grant award or contract authority.

(c) A recipient organization fails to file in a timely fashion all reports and other data required by the Department in connection with its grant awards, contracts, or letter of credit.

(d) A recipient organization accumulates, through its letter of credit or otherwise, excess amounts of Federal funds relative to its actual and immediate disbursement requirements.

(e) A recipient organization's cash management system fails to comply with well recognized accounting principles or Departmental regulations or otherwise demonstrates irregularities, misrepresentations, fraud, or abuse in its operation.

§ 77.4 Sanctions.

If, after the conclusion of the procedures set forth in § 77.5, the Department finds that one or more of the conditions set forth in § 77.3 is or has been present, the Department may impose the following sanctions against a recipient organization's use of its letter of credit:

(a) The Department may place special limits, restrictions, or controls upon the recipient organization's use of its letter of credit.

(b) The Department may require more frequent or more detailed financial reporting from the recipient organization.

(c) The Department may suspend, reduce, or terminate the recipient organization's use of its letter of credit.

§ 77.5 Sanction Procedures.

(a) Except as provided in paragraph (b) of this section, the Department will use the following procedures whenever it seeks the imposition of a sanction specified in § 77.4.

(1) *Notice.*—Prior to imposing a sanction, the Department will provide the recipient organization written notice of its intended action setting forth both the legal and factual reasons therefor. Notice may be provided by certified or express mail, TWX, telegram, delivery, or similar means.

(2) *Opportunity to respond.*—(i) The recipient organization has 30 days after receipt of the notice in which to submit to the Department a written statement setting forth any legal and factual reasons why it believes the proposed sanction would be inappropriate. If no response is received by the Department within the 30-day period, the Department may make the proposed sanction effective immediately. If a response opposing imposition of the sanction is received from the recipient organization within the 30-day period, no sanction will be imposed until a final decision has been reached under paragraph (a)(3). (ii) The Department may prepare a written reply to the recipient organization's response. Any such reply will be forwarded to the deciding official together with the notice sent to the recipient organization and the organization's response, and a copy of the reply will be served on the recipient organization.

(3) *Departmental decision.*—The Department's decision to impose a sanction under this part will be made by an official of the Department who had no involvement with the initial determination to seek to impose a sanction. The deciding official may affirm, reverse, or modify the initial determination. In making his decision, the official will consider only the notice provided by the Department, the recipient organization's statement, the Department's reply, together with any other documents attached to them, and statements at any informal conference held pursuant to paragraph (a)(4) of this section. The official's decision will be provided to the recipient organization in writing and will constitute the Department's final administrative action on the matter.

(4) *Informal conference.*—If, in the judgment of the official designated to make a final decision, it would materially enhance his ability to resolve the matters in dispute, he may convene an informal conference to question or hear an oral presentation by the parties. If an informal conference is convened, it shall be transcribed.

(5) *Effect of decision.*—The decision in a proceeding under this section affects only the recipient organization's obligations related to its letter of credit and does not determine the organization's ultimate liability with respect to improperly spent funds or other misconduct.

(b) *Emergency sanctions.*—(1) Should the Department determine that it cannot adequately protect assets of the Federal government available to a recipient organization under its letter of credit without the imposition of a sanction prior to the procedures specified in paragraph (a) of this section, it may immediately impose the sanction subject to the subsequent completion of those procedures.

(2) Where the Department has imposed a sanction as described in paragraph (b)(1) of this section, it will notify the recipient organization orally of the sanction within one business day of its imposition and in writing within seven business days of its imposition. The written notice will conform to that described in paragraph (a)(1) of this section.

(3) After receipt of the written notice, the recipient organization will have the same opportunity to respond as described in paragraph (a)(2)(i) of this section.

(4) The Department will issue a final decision in writing no later than twenty days following receipt of any response submitted by the recipient organization.

Dated: February 1, 1983.

Richard S. Schweiker,

Secretary.

BILLING CODE 4150-04-M

INTERSTATE COMMERCE COMMISSION

49 CFR Ch. X

[Ex Parte No. 444]

Electronic Filing of Tariffs

AGENCY: Interstate Commerce Commission.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: Interstate Commerce Commission regulations require filing of tariffs only in printed form. The Commission is considering establishing rules and procedures to permit parties wishing to do so to file tariffs electronically. Commission regulations requiring printed tariffs may be impeding the progress of other tariff issuers and users that wish to avail themselves of the efficiencies made possible by computer technology. This advance notice seeks comments from interested parties on whether this is a timely and practical idea; on the technical standards involved in implementing an electronic tariff filing system; on the form, if any, in which the Commission should prescribe, maintain and make accessible electronically filed tariffs; and on whether the Commission should transmit electronically filed tariffs to users.

DATE: Comments should be submitted by April 22, 1983.

ADDRESS: An original and 10 copies should be sent to: Secretary, Interstate Commerce Commission, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT: W. Paul Geisenkotter, Section of Tariffs, Bureau of Traffic (202) 275-7739.

SUPPLEMENTARY INFORMATION: At present, tariffs must be filed with the Interstate Commerce Commission in printed form. While a limited number of tariffs are transmitted electronically and filed in print-out form, most tariffs are printed and then mailed to the Commission. The Commission has no ability or procedures to accept electronically filed tariffs, that is, tariffs generated by a computer and transmitted directly to another computer via an electronic medium such as a telephone or dedicated line, microwave transmission system, or computer-readable magnetic tape.

While the printed tariff system poses no special problems for many of the parties issuing and using tariffs, and may continue to provide an acceptable service to some issuers and users in the future, Commission regulations requiring printed tariffs may be impeding the progress of other tariff issuers and users that wish to avail themselves of the efficiencies made possible by computer technology. The Commission believes some tariff issuers and users that have computerized tariff systems continue to maintain duplicate printed tariff systems solely because of Commission regulations, and thus are incurring needless expense. Other tariff issuers and users may be delaying conversion from printed to electronic tariffs because of this expense.

In addition to the expense incurred when tariff issuers and users must maintain, or contemplate maintaining, redundant systems to deal with both electronic and printed tariffs, the use of printed tariffs causes problem in two other areas. First, the transfer of tariff

information in printed form through the mails results in delay between the time an issuer decides upon a tariff change and the time that change can take effect. Electronic filing of tariffs can shorten this period without affecting the time available to users to react to the change. Second, the volume of printed tariff materials—which has increased with the level of competition brough about by regulatory reform—is itself an impediment to the efficient functioning of the transportation marketplace because users must spend considerable time and effort to learn the full range of price and service options available. The availability of tariff data in electronic form may increase the amount of usable information available and thereby allow the marketplace to function more efficiently.

The Commission is considering permitting and encouraging the electronic filing of tariffs on a voluntary basis. Adopting electronic tariff filing would, we think, foster rather than replace, private initiatives already underway regarding electronic transfer of tariff information. The Commission believes it can foster such private initiatives by relieving issuers and users who chose to use electronic tariff systems of the need to generate separate paper tariffs for the Commission, and by making electronically filed tariff data available in consolidated form. The Commission hopes to be able to adopt standards and formats for electronic tariffs developed by the private sector. We expect private entrepreneurs will develop and market services to help issuers and users to file, retrieve, and analyze tariff information electronically.

The Commission solicits comments from interested parties concerning the desirability of providing for voluntary electronic filing of tariffs. We especially seek comments on the following subjects:

(1) Is electronic transmission of tariffs practical and timely? That is, would a significant number of carriers and shippers wish and be able to make use of computer technology for this purpose?

(a) What are the advantages and disadvantages of transmitting, receiving and storing tariffs electronically?

(b) To what extent are shippers and carriers now capable of receiving, transmitting and storing tariffs electronically? If electronic filing is approved, when would: (i) Carriers; and (ii) shippers start to use it?

(2) If the Commission decides to implement an electronic tariff filing system, how should the system be established?

(a) What steps already have been taken toward development of electronic transmission technical standards, formats, and other material by: (i) Individual carriers or carrier groups; (ii) individual shippers or shipper groups; (iii) others?

(b) Are uniform formats and standards for electronic tariff filing necessary or desirable? (i) If so, should the Commission publish technical standards, formats, and other detailed requirements, or should the Commission adopt standards developed, or to be developed, by private initiative? (ii) If not, can the Commission allow issuers to file tariff data in any format together with a program enabling the Commission to print hard copy (e.g., paper tariffs, microfiche or microfilm) of a tariff that meets the Commission's standards governing tariff content?

(3) Should the Commission receive and maintain tariff information that is filed electronically, or should we seek statutory changes permitting tariff information to be transmitted directly to users with notice to the Commission concerning where the information is available?

(a) If tariff information is filed electronically with the Commission: (i) To what extent should the Commission provide a library service similar to that it now provides with printed tariffs and what would be the estimated cost for the Commission to acquire (by purchase, time sharing, etc.) access to the required equipment? (ii) Would it serve a useful purpose for the Commission to offer to transmit periodically a consolidated version of the electronic tariff filings it receives to users, and vendors offering services to users, and what would be the estimated cost for the Commission to acquire (by purchase, time sharing, etc.) access to the required equipment?

(b) If we permit tariff information to be transmitted directly from issuers to users without requiring that it also be filed at the Commission: (i) Who should be required to bear the cost of transmission; (ii) how could users not equipped to receive electronic information gain access to the data, (e.g., should paper copies continue to be available on request from issuers or the Commission?); and (iii) how could the Commission gain access to data on an as-needed basis to fulfill its statutory obligations, and how could the Commission be assured that tariff records would be retained for the prescribed period of time?

(4) If the Commission provides facilities to receive tariff information electronically, to provide library services for electronic tariffs, or to transmit information electronically, should tariff issuers and users pay user fees based upon the cost of providing the equipment?

In addition to responses to the preceding questions, we solicit comments and recommendations from all parties, especially tariff users, on any other matter relevant to the establishment of an effective electronic tariff filing system.

It does not appear that this proposal will significantly affect the quality of the human environment or the consumption of energy resources.

Dated: March 2, 1983.

By the Commission, Chairman Taylor, Vice Chairman Sterrett, Commissioners Andre, Simmons and Gradison. Commissioner Simmons did not participate.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

Notices

Federal Register
Vol. 48, No. 46
Tuesday, March 8, 1983

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

Committee on Rulemaking; Public Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. 92–463), notice is hereby given of a meeting of the Committee on Rulemaking of the Administrative Conference of the United States, to be held at 10:00 a.m., Tuesday, March 22, 1983, at 2120 L Street, NW., Washington, D.C. The meeting will be held on the Lower Level, FTC Hearing Room No. 3.

The committee will consider possible recommendations based upon Professor Ellen R. Jordan's study of agency use of the administrative Procedure Act's "good cause" exemptions from procedural requirements that apply to agency rulemaking. At a meeting on February 8, 1933, the committee tentatively agreed that post-promulgation notice and comment would be desirable for some classes of summarily-adopted rules.

Attendance is open to the interested public, but limited to the space available. Persons wishing to attend should notify the Office of the Chairman of the Administrative Conference at least two days prior to the meeting. The committee chairman, if he deems it appropriate, may permit members of the public to present oral statements at the meeting; any member of the public may file a written statement with the Committee before, during or after the meeting.

For further information concerning this meeting, contact Michael W. Bowers, Office of the Chairman, Administrative Conference of the United States, 2120 L Street, NW., Suit 500, Washington, D.C. 20037. (Telephone: (202) 254–7065.) Minutes of the meeting will be available on request.

Dated: March 1, 1983.

Richard K. Berg,

General Counsel.

BILLING CODE 6110–01–M

DEPARTMENT OF AGRICULTURE

Office of the Secretary

[Docket No. 83–003N]

National Advisory Committee on Meat and Poultry Inspection; Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463), notice is hereby given that a meeting of the National Advisory Committee on Meat and Poultry Inspection will be held on April 13 (beginning at 10 a.m.), and April 14, 1983 (beginning at 9 a.m.), in the Departmental Auditorium, Conference Room B, 12th Street and Constitution Avenue, NW., Washington, DC.

The purpose of the Committee is to advise the Secretary of Agriculture regarding certain issues pertaining to the meat and poultry inspection program, pursuant to sections 7(c), 24, 205, and 301(a)(4) of the Federal Meat Inspection Act (21 U.S.C. 607(c), 624, 645, and 661(a)(4)) and sections 5(a)(4), 8(b), and 11(e) of the Poultry Products Inspection Act (21 U.S.C. 454(a)(4), 457(b), and 460(e)). The meeting will include a discussion of the following topics:

1. Cured Pork Products (Protein Fat Free).
2. Residue Control Program.
3. Legislative Initiatives (Update).
4. Poultry Post-Mortem Inspection.
5. Cadmium—Kidney Removal from Mature Poultry.
6. Ground Pork Standard.
7. Exemption Study.
8. 1984 Budget.

The meeting is open to the public on a space available basis. Comments of interested persons may be filed with the Committee before or after the meeting, and should be sent to Linda Wood, Director, executive Secretariat, Room 335–E, Administration Building, U.S. Department of Agriculture, 14th Street and Independence Avenue, SW., Washington, DC 20250, (202) 447–3002.

Done at Washington, D.C., on March 2, 1983.

Donald L. Houston,

Vice Chairman.

BILLING CODE 3410–CM–M

Soil Conservation Service

Dewitt Creek Watershed, Indiana; Intent To Deauthorize Federal Funding

AGENCY: Soil Conservation Service, USA.

ACTION: Notice of intent to deauthorize Federal funding.

SUMMARY: Pursuant to the Watershed Protection and Flood Prevention Act, Pub. L. 83–566, and the Soil Conservation Service Guidelines (7 CFR Part 622), the Soil Conservation Service gives notice of the intent to deauthorize Federal funding for the Dewitt Creek Watershed project, Lawrence County, Indiana.

FOR FURTHER INFORMATION CONTACT: Robert L. Eddleman, State Conservationist, Soil Conservation Service, 5610 Crawfordsville Road, Suite 2200, Indianpolis, Indiana 46224, telephone 317–248–4350.

SUPPLEMENTARY INFORMATION: A determination has been made by Robert L. Eddleman that the proposed works of improvement for the Dewitt Creek Watershed project will not be installed. The sponsoring local organizations have concurred in this determination and agree that Federal funding should be deauthorized for the project. Information regarding this determination may be obtained from Robert L. Eddleman, State Conservationist, at the above address and telephone number.

No administrative action on implementation of the proposed deauthorization will be taken until 60 days after the date of this publication in the **Federal Register.**

BILLING CODE 3410-16-M

North Cedar Creek RC&D Measure, Iowa; Finding of No Significant Impact

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of a finding of no significant impact.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the North Cedar Creek RC&D Measure, Clayton County, Iowa.

FOR FURTHER INFORMATION CONTACT: William J. Brune, State Conservationist, Soil Conservation Service, 693 Federal Building, 210 Walnut Street, Des Moines, IA 50309, telephone 515-284-4260.

SUPPLEMENTARY INFORMATION: The environmental assessment of this Federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Willian J. Brune, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for water quality management and critical area treatment. The planned works of improvement include terraces, grade stabilization structures, streambank protection, waste management system, contour strip cropping, conservation tillage systems, timber stand improvement and fencing.

The Notice of a Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various Federal, State, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by contacting William J. Brune.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the **Federal Register.**

(Catalog of Federal Domestic Assistance Program No. 10.901, Resource Conservation and Development Program. Office of Management and Budget Circular A-95 regarding State and local clearinghouse review of Federal and federally assisted programs and projects is applicable)

Dated: February 25, 1983.

William J. Brune,

State Conservationist.

Finding of No Significant Impact for North Cedar Creek RC&D Measure, Clayton County, Iowa

Introduction

North Cedar Creek is a Federally assisted action authorized under Section 102 of the Food and Agriculture Act of 1962 (Pub. L. 87-703) and the Soil Conservation Act of April 27, 1935 (16 U.S.C. 590 a-f). Sponsors of this measure are the Iowa Conservation Commission and the Clayton County Soil Conservation District. An environmental evaluation was conducted in consultation with local, State and Federal agencies along with other interested organizations and individuals. Data developed during the evaluation is available for review at the following location: U.S. Department of Agriculture, Soil Conservation Service, 693 Federal Building, 210 Walnut Street, Des Moines, IA 50309.

Recommended Action

North Cedar Creek is a trout stream in Clayton County in northeast Iowa. Sediment and attached pollutants (nutrients and pesticides) from cropland sheet erosion are the major water quality problems. Gully erosion and streambank erosion also contribute sediment. Livestock waste runoff reaches the stream.

The measure plan includes the installation of conservation practices for water quality management and critical area treatment within the 3,220 acre drainage area of North Cedar Creek.

Planned works of improvement include terraces, grade stabilization structures, streambank protection, waste management system, contour strip cropping, conservation tillage systems, timber stand improvement and fencing.

All practices except streambank protection will be installed on privately owned land. These practices will be operated and maintained by the landowner on whose land they are applied. Streambank protection will be installed on land owned by the Iowa Conservation Commission. They will also be responsible for the operation and maintenance of this practice.

Planned actions have been reviewed by Federal or State agency personnel along with local interested groups and individuals at public meetings. Measure plans are reviewed through the project Notification and Review System.

Effects of Recommended Action

A biological assessment indicates no habitat of federally-listed threatened and/or endangered species will be affected. The red-shouldered hawk, a state-listed endangered species, is known to nest within five miles of the project area. The hawk could nest on state-owned land along North Cedar Creek. Construction activities will be minimized during the peak nesting period to reduce chances of nest desertion. No long-term impacts on these hawks are anticipated.

No wetlands are present.

Construction of the grade stabilization structures will remove small areas of woody habitat in the uplands. This habitat will be replaced by improved management of existing woody cover near the structure sites. Installation of project measures will improve water quality in the trout stream.

No prime farmland will be taken from production.

The SCS will undertake study of cultural resources in the North Cedar Creek drainage. Studies will begin in 1983. Objectives of field study will include an inventory of cultural resources and testing to determine eligibility to the National Register of Historic Places according to agency procedures (7 CFR 656). Cultural resources determined eligible to the National Register will be protected from adverse project effects.

Alternatives

1. Do nothing—This would not meet sponsors objectives as water quality would continue to deteriorate in North Cedar Creek and critical erosion problems would not be solved.

2. Second alternative is to apply conservation practices on land within drainage area of North Cedar Creek. This would be the most effective means of controlling erosion and improving water quality. It was selected by the sponsors as being the most acceptable. It would help alleviate problems of two objectives listed in the area plan for the Upper Explorerland RC&D Area.

Conclusion

The Environmental Assessment indicates that this federal action will not cause significant local, regional or national impacts on the environment. Therefore, based on these findings, I have determined that an environmental impact statement for North Cedar Creek RC&D measure is not required.

Dated: February 25, 1983.

William J. Brune,

State Conservationist.

BILLING CODE 3410-16-M

West Creek Watershed, Indiana and Illinois; Intent To Deauthorize Federal Funding

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of intent to deauthorize Federal funding.

SUMMARY: Pursuant to the Watershed Protection and Flood Prevention Act, Pub. L. 83-566, and the Soil Conservation Service Guidelines (7 CFR Part 622), the Soil Conservation Service gives notice of the intent to deauthorize Federal funding for the West Creek Watershed project, Lake County, Indiana, and Kankakee and Will Counties, Illinois.

FOR FURTHER INFORMATION CONTACT: Robert L. Eddleman, State Conservationist, Soil Conservation Service, 5610 Crawfordsville Road, Suite 2200, Indianapolis, Indiana 46224, telephone 317-248-4350.

SUPPLEMENTARY INFORMATION: A determination has been made by Robert L. Eddleman that the proposed works of improvement for the West Creek Watershed project will not be installed. The sponsoring local organizations have concurred in this determination and agree that Federal funding should be deauthorized for the project. Information regarding this determination may be obtained from Robert L. Eddleman, State Conservationist, at the above address and telephone number.

No administrative action on implementation of the proposed deauthorization will be taken until 60 days after the date of this publication in the **Federal Register.**

BILLING CODE 6320-01-M

[Order 83-3-17; Docket 31777]

Order To Show Cause; Trans World Airlines, Inc.

AGENCY: Civil Aeronautics Board.

ACTION: Notice of Order to Show Cause: Order 83-3-17 Docket 31777.

SUMMARY: The board is issuing an order directing all interested persons to show cause why the certificate of Trans World Airlines, Inc. for Route 147 should not be amended to authorize the foreign air transportation of persons, property and mail between a point or points in the United States, on the one hand, and Barcelona, Spain; Casablanca, Morocco; and a point or points in Austria, on the other.

OBJECTIONS: All interested persons having objections to the board's tentative findings and conclusions that this authority should be granted, as described in the order cited above, shall, no later than March 17, 1983, file a statement of such objections with the Civil Aeronautics Board (20 copies, addressed to Docket 31777, Docket Section, Civil Aeronautics Board, Washington, D.C. 20428) and mail copies to Trans World Airlines, Inc., the City of Philadelphia, the Greater Philadelphia Chamber of Commerce, and the Departments of State and Transportation. Copies of the objections should also be sent to the Ambassadors of Spain, Morocco and Austria in Washington, D.C.

A statement of objections must cite the docket number and must include a summary of testimony, statistical data, or other such supporting evidence.

If no objections are filed, the Board will issue an order which will make final the Board's tentative findings and conclusions and issue the proposed certificate.

To get a copy of the complete order, request it from the C.A.B. Distribution Section, Room 100, 1825 Connecticut Avenue, NW., Washington, D.C. 20428, (202) 673-5432. Persons outside the Washington metropolitan area may send a postcard request.

FOR FURTHER INFORMATION CONTACT: Lawrence R. Krevor, (202) 673-5203, Bureau of International Aviation, Civil Aeronautics Board, Washington, D.C. 20428.

By the Civil Aeronautics Board: March 2, 1983.

BILLING CODE 6335-01-M

DEPARTMENT OF COMMERCE

International Trade Administration

Intitiation of Antidumping Investigation; Fall-Harvested Round White Potatoes From Canada

AGENCY: International Trade Administration, Commerce.

ACTION: Initiation of Antidumping Investigation.

SUMMARY: On the basis of a petition filed with the United States Department of Commerce, we are initiating an antidumping investigation to determine whether fall-harvested round white potatoes from Canada are being, or are likely to be, sold in the United States at less than fair value. We are notifying the United States International Trade Commission (ITC) of this action so that it may determine whether there is a reasonable indication that imports of fall-harvested round white potatoes from Canada are materially injuring, or are threatening to materially injure, a United States industry. The allegations of sales at less than fair value include an allegation that home market sales are being made at less than the cost of production in Canada. Also, critical circumstances have been alleged under section 733(e) of the Act. If the investigation proceeds normally, the ITC will make its preliminary determination on or before March 28, 1983, and we will make ours on or before July 19, 1983.

EFFECTIVE DATE: March 7, 1983.

FOR FURTHER INFORMATION CONTACT: Vincent Kane or Terry Link, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230; telephone (202) 377-5414 or 377-0189.

SUPPLEMENTARY INFORMATION:

Petition

On February 9, 1983, we received a petition filed by counsel on behalf of the Maine Potato Council. In compliance with the filing requirements of § 353.36 of the Commerce Regulations (19 CFR 353.36), the petition alleges that imports from Canada of fall-harvested round white potatoes are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 731 of the Tariff Act of 1930, as amended (19 U.S.C. 1673) (the Act) and that these imports are materially injuring, or are threatening to materially injure, a United States industry. The allegations of sales at less than fair value include an allegation that home market sales are being made at less than the cost of production in Canada. Also, critical circumstances have been alleged under secion 733(e) of the Act.

The allegation of sales at less than fair value is supported by comparisons of United States prices based on published ex-farm prices on sales of merchandise in the United States with published Montreal market prices on sales made in Canada. In addition, the allegation of sales at less than fair value is further supported by comparing the United States price with the constructed value as developed by the petitioner from published information.

There is also an allegation of sales at less than the cost of production. The cost of production was based on published information.

Initiation of Investigation

Under section 732(c) of the Act, we must determine, within 20 days after a petition is filed, whether a petition sets forth the allegations necessary for initiation of an antidumping investigation and whether it contains information reasonably available to the petitioner supporting the allegations. We have examined the petition on fall-harvested round white potatoes and

have found that it meets these requirements.

Therefore, in accordance with section 732 of the Act, we are initiating an antidumping investigation to determine whether fall-harvested round white potatoes from Canada are being, or are likely to be, sold in the United States at less than fair value and whether critical circumstances exist. If the investigation proceeds normally, we will make our preliminary determination by July 19, 1983.

Scope of Investigation

For purposes of this investigation, the term "fall-harvested round white potatoes" covers fall-harvested fresh or chilled round white potatoes as currently classifiable under items 137.20, 137.21, 137.25, or 137.28 of the *Tariff Schedules of the United States*.

Notification of ITC

Section 732(d) of the Act requires us to notify the ITC of this action and to provide it with the information we used to arrive at this determination. We will notify the ITC and make available to it all nonprivileged and nonconfidential information. We will also allow the ITC access to all privileged and confidential information in our files, provided that the ITC confirms it will not disclose such information either publicly or under an administrative protective order without the written consent of the Deputy Assistant Secretary for Import Administration.

Preliminary Determination by ITC

The ITC will determine by March 28, 1983, whether there is a reasonable indication that imports of fall-harvested round white potatoes from Canada are materially injuring, or are threatening to materially injure, a United States industry. If its determination is negative, this investigation will terminate; otherwise, the investigation will continue according to statutory procedures.

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

February 28, 1983.

BILLING CODE 3510-25-M

Polychloroprene Rubber From Japan; Final Results of Administrative Review of Antidumping Finding

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of Final Results of Administrative Review of Antidumping Finding.

SUMMARY: On November 26, 1982, the Department of Commerce published the preliminary results of its administrative review of the antidumping finding on polychloroprene rubber from Japan. The review covers three of the five known manufacturers and/or exporters of this merchandise to the United States and the period December 1, 1980 through November 30, 1981. There were no known shipments of this merchandise to the United States during the period and there are no known unliquidated entries.

Interested parties were given an opportunity to submit oral or written comments on the preliminary results. We received no comments. Based on our analysis, the final results of review are unchanged from those presented in the preliminary results of review.

EFFECTIVE DATE: March 7, 1983.

FOR FURTHER INFORMATION CONTACT: Arthur N. DuBois or Susan Crawford, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230, telephone: (202) 377-3601.

SUPPLEMENTARY INFORMATION:

Background

On December 6, 1973, the Treasury Department published in the **Federal Register** (38 FR 35393) an antidumping finding with respect to polychloroprene rubber from Japan. On November 26, 1982, the Department of Commerce ("the Department") published in the **Federal Register** (47 FR 53442) the preliminary results of its last administrative review of the finding. The Department has now completed that administrative review.

Scope of the Review

Imports covered by the review are shipments of polycholorprene rubber, an oil resistant synthetic rubber also known as polymerized cholorobutadiene or neoprene, currently classifiable under items 446.1521 and 446.2000 of the Tariff Schedules of the United States Annotated.

The review covers three of the five known manufacturers and/or exporters of Japanes polychloroprene rubber to the United States and the period December 1, 1980 through November 30, 1981. There were no known shipments to the United States during the period and there are no known unliquidated entries for these firms. The Department is deferring review of entries of merchandise produced by Toyo Soda or Showa Neoprene and exported by Hoei Sangyo until a subsequent review.

Final Results of the Review

Interested parties were invited to comment on the preliminary results. The Department received no written comments or requests for disclosure or a hearing. Based on our analysis, the final results of our review are the same as those presented in the preliminary results of review, and we determine that, for the period December 1, 1980 through November 30, 1981, the following margins exist:

Manufacturer/exporter	Margin (percent)
Denki	[1]0
Suzugo Corporation	[1]55
Denki/Hoei Sangyo	[1]55

[1]No shipments during the period.

As provided for by § 353.48(b) of the Commerce Regulations, a cash deposit of estimated antidumping duties based on the above margins shall be required on all shipments of Japanese polychloroprene rubber from these firms entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice. For the 2 firms not covered by this or a prior review, the cash deposit rate shall be 55 percent, the highest rate from our last review. For any shipment from a new exporter not covered in this administrative review, unrelated to any covered firm, a cash deposit of 55 percent shall be required. These deposit requirements shall remain in effect until publication of the final results of our next administrative review. The Department intends to conduct the next administrative review by the end of December 1983. The Department encourages interested parties to review the public record and submit applications for protective orders, if desired, as early as possible after the Department's receipt of the information during the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act of 1930 (19 U.S.C. 1675(a)(1)) and § 353.53 of the Commerce Regulations (19 CFR 353.53).

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

BILLING CODE 3510-25-M

Subcommittee on Export Administration of the President's Export Council; Closed Meeting

AGENCY: International Trade Administration, Commerce.

SUMMARY: In accordance with Section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. (1976), notice is hereby given that a closed

meeting of the Subcommittee on Export Administration of the President's Export Council will be held on Friday, March 11, 1983. This meeting is being called on short notice as a continuation of the February 23, 1983 closed meeting. The Subcommittee will complete their review and recommendations on the Export Administration Act at this meeting

The Subcommittee on Export Administration was initially established on June 1, 1976. Executive Order 12399 of December 31, 1982 continued the Subcommittee until September 30, 1984.

The Subcommittee provides advice on matters pertinent to those portions of the Export Administration Act of 1979 that deal with United States policies of encouraging trade with all countries with which the United States had diplomatic or trading relations, and of controlling trade for national security and foreign policy reasons.

TIME AND PLACE: The meeting will take place from 9:30 a.m. to 1:00 p.m., March 11, 1983, at the Main Commerce Building, Room B–841, 14th Street and Constitution Avenue, NW., Washington, D.C.

AGENDA: *Executive Session.* Discussion of matters properly classified under Executive Order 12356, dealing with matters pertaining to the control of exports for national security, foreign policy or short supply reasons under the Export Administration Act.

SUPPLEMENTARY INFORMATION: The Assistant Secretary of Commerce for Administration, with the concurrence of the delegate of the General Counsel, formally determined on February 2, 1983, pursuant to Section 10(d) of the Federal Advisory Committee Act, as amended by Section 5(c) of the Government in the Sunshine Act, Pub. L. 94–409, that the matters to be discussed in Executive Session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 522b(c)(1) and properly classified under Executive Order 12356.

A copy of the Notice of Determination to close the Subcommittee's meetings or portions thereof is available for public inspection and copying in the Central Reference and Records Inspection Facility, Room 6628, U.S. Department of Commerce, telephone (202) 377–4217.

FOR FURTHER INFORMATION CONTACT: Ms. Debbie Kappler, Office of the Assistant Secretary for Trade Administration, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230 (202–377–1455) or Ms. Elisabeth Vermilye, President's Export Council Room 3213 (202–377–1125).

Lawrence J. Brady,

Assistant Secretary for Trade Administration.

BILLING CODE 3510–25–M

Consolidated Decision on Applications for Duty-Free Entry of Electron Microscopes; Villanova University

The following is a consolidated decision on applications for duty-free entry of electron microscopes pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897) and the regulations issued pursuant thereto (15 CFR Part 301 as amended by 47 FR 32517).

A copy of the record pertaining to each of the applications in this consolidated decision is available for public review between 8:30 AM and 5:00 PM in Room 1523, Statutory Import Programs Staff, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Docket No. 83–24. Applicant: Villanova University, Villanova, PA 19085. Instrument: Electron Microscope, Model H–600–2 with Accessories. Manufacturer: Hitachi Scientific Instruments, Japan. Intended use of instrument: See Notice on page 2811 in the **Federal Register** of January 21, 1983. Instrument ordered: August 5, 1982.

Docket No. 83–53. Applicant: University of California, San Francisco, School of Medicine, Department of Anatomy, 3rd & Parnassus Avenue, San Francisco, CA 94143. Instrument: Electron Microscope, Model EM 10CA and Accessories. Manufacturer: Carl Zeiss, West Germany. Intended use of instrument: See Notice on page 54998 in the **Federal Register** of December 7, 1982. Instrument ordered: September 27, 1982.

Docket No. 83–58. Applicant: California Institute of Technology, 1201 East California Boulevard, Pasadena, CA 91125. Instrument: Electron Microscope Model EM 420 and Accessories. Manufacturer: Philips Electronics, The Netherlands. Intended use of instrument: See Notice on page 55987 in the **Federal Register** of December 14, 1982. Instrument ordered: September 27, 1982.

Docket No. 83–61. Applicant: Muhlenberg College, 2600 Chew Street, Allentown, PA 18104. Instrument: Electron Microscope EM 109 and Accessories. Manufacturer: Carl Zeiss, West Germany. Intended use of instrument: See Notice on page 55988 in the **Federal Register** of December 14, 1982. Instrument ordered: October 18, 1982.

Docket No. 83–68. Applicant: University of California at Davis, School of Medicine, Department of Human Anatomy, Davis, CA 95616. Instrument: Electron Microscope, Model EM 410 and Accessories. Manufacturer: N. V. Philips, Gloeilampenfabrieken, The Netherlands. Intended use of instrument: See Notice on page 56534 in the **Federal Register** of December 17, 1982. Instrument ordered: November 1, 1982.

Docket No. 83–69. Applicant: University of Wisconsin-Madison, 1115 Engineering Research Building, 1500 Johnson Drive, Madison, WI 53706. Instrument: Electron Microscope, Model HB501. Manufacturer: VG Microscopes, United Kingdom. Intended use of instrument: See Notice on page 56533 in the **Federal Register** of December 17, 1982. Instrument ordered: April 23, 1982.

Docket No. 83–70. Applicant: North Carolina State University, P.O. Box 5935, Raleigh, NC 27650. Instrument: Electron Microscope, Model H–800 and Accessories. Manufacturer: Hitachi, Japan. Intended use of instrument: See Notice on page 56534 in the **Federal Register** of December 17, 1982. Instrument ordered: November 1, 1982.

Docket No. 82–226R. Applicant: Cuyahoga County Hospitals, Cleveland Metropolitan General Hospital, 3395 Scranton Rd., Cleveland, Ohio 44109. Instrument: Electron Microscope, Model EM 10–CR. Application is a resubmission, notice of which was published in the **Federal Register** of July 7, 1982 (47 FR 29580). Instrument ordered: April 8, 1982.

Comments: No comments have been received with respect to any of the foregoing applications.

Decision: Applications approved. No instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as these instruments are intended to be used, was being manufactured in the United States at the time the instruments were ordered.

Reasons: Each foreign instrument to which the foregoing applications relate is a conventional transmission electron microscope (CTEM). The description of the intended research and/or educational use of each instrument establishes the fact that a comparable CTEM is pertinent to the purposes for which each is intended to be used. We know of no CTEM which was being manufactured in the United States either at the time of order of each instrument described above or at the time of receipt

of application by the U.S. Customs Service.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to any of the foreign instruments to which the foregoing applications relate, for such purposes as these instruments are intended to be used, which was being manufactured in the United States either at the time of order or at the time of receipt of application by the U.S. Customs Service.

BILLING CODE 3510-25-M

National Oceanic and Atmospheric Administration

Receipt of Modification Request; Bolt, Beranek and Newman, Inc.

Notice is hereby given that Bolt, Beranek and Newman, Inc., 10 Moulton Street, Cambridge, MA 02238, has requested a modification of Permit No. 400, issued on December 29, 1982 (48 FR 1827), under the authority of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407) and the Endangered Species Act of 1973 (16 U.S.C. 1531–1543).

Permit No. 400 authorizes the taking of gray whales *(Eschrictius robustus)* by harassment to study the behavioral responses to acoustic stimuli. The Permit Holder is requested to include air gun sources, in addition to the simulated OCS noises currently authorized by the permit.

Concurrent with the publication of this Notice in the **Federal Register**, the Secretary of Commerce is forwarding copies of the request to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this modificaion request should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, Washington, D.C. 20235 within 30 days of the publication of this Notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this request would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries.

All statement and options contained in the request are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Documents submitted in connection with the above modification request are available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, NW., Washington D.C.; and

Regional Director, National Marine Fisheries Service, Southwest Region, 300 South Ferry Street, Terminal Island, California 90731.

Dated: March 3, 1983.

R. B. Brumsted,

Acting Chief, Protected Species Division, National Marine Fisheries Service.

[FR Doc. 83-6882 Filed 3-7-83; 8:45 am]

BILLING CODE 3510-22-M

Receipt of Application for Permit; Hubbs-Sea World Research Institute

Notice is hereby given that an Applicant has applied in due form for a Permit to take marine mammals as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216).

1. Applicant:

a. Name: Hubbs-Sea World Research Institute (P167D).

b. Address: 1700 South Shores Road, Mission Bay, San Diego, California 92100.

2. Type of Permit: Scientific Research.

3. Name and Number of Animals:

Beluga whale (Delphinapterus leucas),3,670

4. Type of Take:

Potential harassment aerial survey, 1500
Direct harassment sound playback, 2000
Dye marking, 120
Spaghetti tags, 50

5. Location of Activity: Nushagak Bay, Alaska.

6. Period of Activity: One year.

Concurrent with the publication of this notice in the **Federal Register**, the Secretary of Commerce is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this application should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, Washington, D.C. 20235, within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries.

All statements and opinions contained in this application are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Documents submitted in connection with the above application are available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street NW., Washington, D.C.;

Regional Director, National Marine Fisheries Service, Alaska Region, P.O. Box 1668, Juneau, Alaska 99802; and

Regional Director, National Marine Fisheries Service, Southwest Region, 300 South Ferry Street, Terminal Island, California 90731.

Dated: March 1, 1983.

R. B. Brumsted,

Acting Chief, Protected Species Division, National Marine Fisheries Service.

BILLING CODE 3510-22-M

North Pacific Fishery Management Council, its Scientific and Statistical Committee and its Advisory Panel; Public Meetings

AGENCY: National Marine Fisheries Service, NOAA.

SUMMARY: The North Pacific Fishery Management Council, established by Section 302 of the Magnuson Fishery Conservation and Management Act (Pub. L. 94–265, as amended), has established a Scientific and Statistical Committee (SSC) and an Advisory Panel (AP) to assist the Council in carrying out its responsibilities under the Act. The Council, its SSC and AP will hold separate public meetings, but the Council will also meet with the Alaska Board of Fisheries in joint session.

DATES: The Council and the Alaska Board of Fisheries will convene their joint public meeting on Tuesday, March 29, 1983, at approximately 9 a.m., in the Alaska Room of the Westward Hilton Hotel, Anchorage, Alaska, to hear technical reports on the status of the king and tanner crab resources off Alaska, review regulatory proposals to the Board and discuss regulations for 1983. Public testimony will be taken on the regulatory proposals. The Council and the Board will also discuss salmon management for 1983 in light of the current status of the proposed U.S./

Canada salmon interception treaty. The Board and the Council will continue to meet jointly on Wednesday, March 30, to finish discussion of the above items. The Council will meet alone in Room 101 of the Old Federal Building, 605 West Fourth Avenue, from approximately 9 a.m., on Thursday, March 31, until about 3 p.m., on Friday, April 1, 1983, or until Council business is completed. If necessary the meeting may be continued into Saturday, April 2.

The SSC meeting will convene on Monday, March 28, 1983, at approximately 9:30 a.m., and will ajourn at approximately 5 p.m., on Tuesday, March 29, in the 3rd Floor Conference Room of the Old Federal Building, 605 West Fourth Avenue. The AP will convene its meeting on Monday, March 28, at approximately 9:30 a.m., and will adjourn at approximately 5 p.m., in Room 101 of the Old Federal Building, 605 West Fourth Avenue; and may continue into Tuesday, March 29. The meetings may be lengthened or shortened depending upon progress on the agenda items.

Proposed Agenda: Council—A detailed agenda will be sent to the public around March 14, 1983. The Council will review the proposed U.S./Canada salmon interception treaty and any proposed changes. The Council will also review proposals to the Board for salmon management in 1983 and take final action on setting optimum yields and seasons for the 1983 season. The herring plan will also be up for review. The Council will also discuss recommendations of the Herring Working Group and take action on a Marine Resources Company request for an offshore allocation. The Council will review stock status and regulatory proposals for the king and tanner crab fisheries, and will also review a proposed change in the pollock optimum yield in the Western and Central Gulf. The Council will also give its final recommendations concerning the proposed halibut moratorium and will review a draft final report on its contracted study of halibut limited entry systems. Finally, the Council will consider foreign fishing permits. Parts of this meeting may be conducted in joint session with the Alaska Board of Fisheries. SSC and AP agenda items will be the same as that of the Council.

FOR FURTHER INFORMATION CONTACT: North Pacific Fishery Management Council, P.O. Box 3136DT, Anchorage, Alaska 99510, Telephone: (907)–274–4563.

Dated: March 2, 1983.

Richard B. Stone,

Acting Chief, Operations Coordination Group, National Marine Fisheries Service.

[FR Doc. 83–6061 Filed 3–7–83; 8:45 am]

BILLING CODE 3510–22–M

Pacific Coast Groundfish Fishery

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice and request for comment.

SUMMARY: This notice acknowledges receipt of three experimental fishing permit applications and announces a public comment period as required in the regulations implementing the Pacific Coast Groundfish Fishery Management Plan. The applicants propose to delay sorting mid-water trawl catches of Pacific whiting and disposing of species prohibited in trawl catches, until the catches are landed. An experimental fishing permit allows a fishing practice which otherwise would be prohibited by Federal regulation.

DATE: Comments on these applications must be received by March 18, 1983.

ADDRESS: Alan W. Ford, Director, Southwest Region, National Marine Fisheries Service, 300 South Ferry Street, Terminal Island, California 90731.

FOR FURTHER INFORMATION CONTACT: Rodney R. McInnis, Chief of the Resource Management Branch in the Southwest Region; 213–548–2518.

SUPPLEMENTARY INFORMATION: The Pacific Coast Groundfish Fishery Management Plan (FMP) was approved by the Secretary of Commerce on January 4, 1982, and implementing regulations were published on October 5, 1982 (47 FR 43964). The FMP specifies that experimental fishing permits (EFPs) may be issued to authorize fishing which otherwise would be prohibited. The procedures for issuance of EFPs appear in the regulations at 50 CFR 663.10. Applications were received for three mid-water trawl vessels to delay sorting and discarding prohibited species from the catch in their fishing operations directed on Pacific whiting. By delaying sorting until the time of landing, the applicants expect to shorten the length of time before the catch is placed in refrigerated seawater. Since Pacific whiting deteriorate rapidly after death, rapid refrigeration is necessary to maintain product quality when shoreside processing is involved.

The regulations at 50 CFR 663.7(i) prohibit the retention of any species of salmonid or Pacific halibut caught in trawl nets, among other types of fishing gear. Normal practice on groundfish trawl vessels is to sort the catch from each tow before storing it in the hold. Species and sizes of fish that are not marketable are discarded during this sorting. Prohibited species also are returned to the sea at that time. Currently, any salmonid or Pacific halibut taken in a trawl and placed in the hold (not returned to the sea immediately) is considered to be retained in violation of 50 CFR 663.7(i).

Domestic mid-water trawlers that deliver Pacific whiting to foreign-flag processing vessels (joint ventures) are not affected by this prohibition on retention of salmonids because the catch is not brought on board the fishing vessel. Instead, the codend of the trawl net is taken directly on board the processing vessel. In this type of operation, prohibited species must be returned to the sea during the sorting on the processing vessel's deck, the point of first opportunity to sort.

The incidence of salmon caught by U.S. mid-water trawlers fishing for Pacific whiting and delivered to foreign processing vessels has been monitored carefully. During the 1982 season, observers reported that these joint venture operations caught and discarded 11,546 salmon while harvesting 67,465 metric tons (mt) of Pacific whiting. This rate of 0.17 salmon per metric tone of whiting will vary seasonally and geographically, but it represents the best documented information available on incidental take of salmon in this fishery. This annual average rate has been remarkably constant, ranging form 0.13 to 0.18 salmon per metric ton of whiting since 1979.

The three applications currently being considered are summarized below and are available for public review at the Regional Director's office during the pubic comment period (see address section). The Pacific Fishery Management Council will discuss these applications at its March 16–17, 1983, meeting in Portland at the Cosmopolitan Hotel, 1030 N.E. Union Avenue, Portland, Oregon (503–235–8433). The decision to grant or deny an EFP application will be based on the information in the completed application, willingness of the applicant to comply with conditions of the EFP, information provided at the Council's March meeting, and comments received during the public comment period.

(1) *Purpose and significance.*—The purpose of this experiment is to demonstrate that the quality of Pacific whiting improves when refrigeration is

not delayed due to sorting each tow for prohibited species. The applicants have stated that one impediment to further development of a wholly domestic Pacific whiting fishery is that the flesh deteriorates rapidly after death. Consequently it is important for the vessels to make short tows and to refrigerate the catch without delay. If the catch must be sorted on deck to remove any salmon which may be in the catch, whiting quality will suffer due to excess handling and delayed refrigeration. Since salmon are about the same size and color as Pacific whiting, they would not be noticed if the catch were dumped directly into the fish hold.

(2) *Vessel.*—Each applicant has requested a permit for one vessel. The three vessels range from 60 to 100 feet in length, and from 51 to 134 net tons and 61 to 198 gross tons in tonnage.

(3) *Species.*—The Applicants intend to target on Pacific whiting and plan to take approximately 3,000 metric tons during 1983. They also expect indicental catches of rockfish and salmon. They anticipate catching, on average, one salmon in every 10 mt of whiting, based on their experience over the past few years. The whiting catch would be sold to a local, shore-based processor. Incidental catches of rockfish would be sold to local processors as well, subject to any existing trip limits. Incidentally-caught salmon would be sorted from the catch at the processor and would be confiscated by enforcement agents. Confiscated salmon would not be sold and would not enter normal market channels.

(5) *Time.*—The operation would take place from April through October, but incidental catches of salmon are expected to be highest during the spring months.

(6) *Place.*—The vessels would fish predominately within a 60 mile radius of the entrance to Humboldt Bay, California.

(7) *Gear.*—Each vessel would use a mid-water rope trawl with a minimum mesh size of three inces in the codend, which is legal gear under the current regulation.

(16 U.S.C 1801 *et seq.*)

Dated: March 3, 1983.

Carmen J. Blondin,

Acting Deputy Assistant Administrator for Fisheries Resources Management, National Marine Fisheries Service.

[FR Doc. 83-6060 Filed 3-3-83; 3:11 pm]

BILLING CODE 3510-22-M

COMMODITY FUTURES TRADING COMMISSION

Joint Audit Plans

AGENCY: Commodity Futures Trading Commission.

ACTION: Request for comment.

SUMMARY: Each self-regulatory organization must adopt, and submit for approval by the Commodity Futures Trading Commission ("Commission"), rules prescribing minimum financial and related reporting requirements for its member futures commission merchants ("FCMs"), and conduct audits of its member FCMs for compliance with such rules. Each self-regulatory organization must also establish procedures for and conduct sales practice audits of member FCMs which engage in the offer and sale of exchange-traded options under the Commission's pilot program, as well as review promotional material used by FCMs in connection with such activity. Section 1.52(c) of the Commission's regulations provides that any two or more self-regulatory organizations may file with the Commission a plan for delegating to a "designated" self-regulatory organization ("DSRO") those responsibilities for any FCM which is a member of more than one such self-regulatory organization.

The Commission has approved previously joint audit plans covering all of the contract markets. The National Futures Association ("NFA"), a futures association registered under Section 17 of the Commodity Exchange Act, as amended ("Act") and a self-regulatory organization under the Commission's regulations, has entered into two agreements with the contract markets whereby NFA will become a party to one of the existing joint audit plans and a party to a new joint audit plan. The Commission is publishing this notice to request comment, in accordance with § 1.52(g) of the regulations, on the new joint audit plan and on the revisions to one of the existing joint audit plans.

DATE: Comments must be received on or before April 7, 1983.

ADDRESS: Comments should be sent to: Commodity Futures Trading Commission, 2033 K Street NW., Washington, D.C. 20581. Attention: Secretariat.

FOR FURTHER INFORMATION CONTACT: Lawrence B. Patent, Special Counsel, or Delacy Cox, Assistant Chief Accountant, Division of Trading and Markets, at the above address. Telephone: (202) 254-8955.

SUPPLEMENTARY INFORMATION: On April 23, 1980, the Commission approved, pursuant to § 1.52(g) of the regulations, the joint audit plan submitted by seven contract markets, the Amex Commodities Exchange, Inc., Chicago Mercantile Exchange, Commodity Exchange, Inc., MidAmerica Commodity Exchange, Coffee, Sugar & Cocoa Exchange, Inc., New York Cotton Exchange and New York Mercantile Exchange.[1] On May 28, 1982, the Commission approved revisions to that plan which: (1) Amended the plan's requirements for conducting audits to conform with Interpretation No. 4 of the Commission's Division of Trading and Markets or with guidelines to be developed by the Joint Audit Committee, and (2) amended the plan's membership to include the New York Futures Exchange, Inc. and to delete the Amex Commodities Exchange, Inc.[2]

The Commission has approved two other DSRO plans: one involving the Board of Trade of the City of Chicago, the Board of Trade of Kansas City, Missouri, Inc., the Minneapolis Grain Exchange and the MidAmerica Commodity Exchange,[3] and the other between the Board of Trade of the City of Chicago and the New Orleans Commodity Exchange.[4]

Each of the eleven contract markets is therefore a party to at least one approved DSRO plan, and the Board of Trade of the City of Chicago and the MidAmerica Commodity Exchange are parties to two of the three plans.

Each of those plans provides for a delegation by the parties to the plan to a DSRO of the responsibility for the following functions with respect to each FCM which is a member of more than one such party:

1. Monitoring and auditing for compliance with the minimum financial and related reporting requirements of the various contract markets;

2. Receiving the financial reports necessitated by such minimum financial and related reporting requirements; and

3. Monitoring and examining the books and records kept by FCMs relating to their business of dealing in commodity futures and cash commodities, insofar as such business relates to its dealings on contract markets.

---

[1] The Commission published a notice requesting comment on that plan at 44 FR 61239 (October 24, 1979).

[2] The Commission published a notice requesting comment on those revisions at 47 FR 15403 (April 9, 1982).

[3] The Commission published a notice requesting comment on that plan at 45 FR 48682 (July 21, 1980), and approved the plan on October 6, 1980.

[4] The Commission published a notice requesting comment on that plan at 46 FR 11572 (February 9, 1981), and approved the plan on March 30, 1981.

When the Commission adopted rules to govern the pilot program in exchange-traded commodity options, § 1.52(c) was amended to provide that a contract market's responsibilities for such function as reviewing promotional material and conducting sales practice audits of FCMs in connection with their exchange-traded option activities could be delegated to a DSRO under a joint audit plan.[5] The Commission also stated that "Existing joint audit plans which already have been approved by the Commission may, upon notice to the Commission, be expanded to include monitoring and auditing of FCMs with respect to option activities."[6] In connection with the filing of applications for designation as a contract market for option trading, and in other correspondence from those responsible for the operation of the joint audit plans, the various contract markets involved in option trading have provided such notices.

NFA has also submitted a document setting forth its program for regulating the option-related activites of its members, which the Commission has under advisement. In order for NFA's surveillance burden with respect to option-related activities of its member FCMs to be limited to those FCMs which are not members of any contract market it is necessary for NFA to become a party to joint audit plans with the contract markets. Otherwise, NFA would have to supervise the option-related activities of all of its member FCMs.

NFA has entered into two agreements, each of which is dated January 24, 1983 and which were submitted under cover of a letter dated February 8, 1983, with the various contract markets. One of the agreements is an amendment to the first joint audit plan. The amendment: (1) Adds NFA as a party to the plan; (2) delegates to the appropriate DSRO NFA's responsibilities to monitor and audit for compliance with NFA's financial requirements, and to receive financial reports necessitated by such requirements, for any NFA member futures commission merchant ("FCM") which is also a member of one or more of the seven contract markets which are parties to the first joint audit plan; (3) provides that each of those seven contract markets (except the New York Futures Exchange, Inc.) will include in its audit program for those FCMs which are not also members of the New York Stock Exchange, Inc. procedures for review of compliance by such FCMs with NFA Bylaws 1101 and 1301, concerning doing business with non-members of NFA and NFA dues and assessments, respectively; (4) further provides that the seven contract markets will consider, subject to certain conditions, adding to their audit programs such additional programs and procedures to monitor compliance with other NFA requirements as NFA shall submit; and (5) provides for the delegation to the appropriate DSRO of the responsibility to perform audits of exchange-traded option sales practices of member FCMs as required by Part 33 of the Commission's regulations. The agreement also provides that NFA is bound by the terms of the existing joint audit plan, which concern such items as access to information and audit workpapers, the right of inspection of a member FCM, payment of costs for auditing services, and a limitation on liability.

The second agreement submitted by NFA establishes a new jont audit plan, which would be the fourth joint audit plan, between and among the NFA and the Board of Trade of the City of Chicago, the Board of Trade of Kansas City, Missouri, Inc., the Minneapolis Grain Exchange, and the New Orleans Commodity Exchange.[7] The new joint audit plan: (1) Delegates to the appropriate DSRO each party's responsibilities in the financial and exchange-traded option areas; (2) provides that each contract market which is a party to the plan will include in its audit program procedures for review of compliance by FCMs with NFA Bylaws (including Bylaws 1101 and 1301) as shall be provided by NFA and agreed to by such contract markets; (3) sets forth each party's rights with respect to receiving information about any of its member FCMs; (4) requires each party to supply the DSRO with appropriate financial and option rules and any amendments or supplements thereto; (5) sets forth a limitation of liability and indemnification clause; and (6) provides for NFA's contribution to the costs incurred by the contract markets under the plan.

For the purpose of assuring comprehensive options sales practice audits of all firms engaged in soliciting or accepting options orders and to avoid duplicative audits, NFA is becoming a party to the first joint audit agreement along with the seven existing exchange participants and is entering into a new joint audit agreement (the "fourth" joint audit agreement) with four other exchanges as described above. Under these agreements, NFA will assume options sales practice auditing responsibilities for its FCM member firms which are not members of any contract market, the other exchange participants to the agreements will assume auditing responsibilities for member sales practices relating to all designated option contracts (not just those option contracts in which the exchange responsible for the audit is designated), and NFA will exercise disciplinary authority over its members' options practices. Such disciplinary authority will extend not only to NFA members which are not exchange members, but also to NFA members which are members of the exchanges which are participants in these joint audit agreements.

The firms on the NFA list set forth below, except for the three firms specially noted by more than one asterisk next to their names, are not members of any of the contract markets which are parties to the first joint audit plan. Those firms with a single asterisk next to their name are members of at least one of the other contract markets. If NFA's program for supervision of the option-related activities of its member FCMs and the revisions to the first joint audit plan and the new fourth joint audit plan are approved by the Commission, FCMs which are members of NFA (including those listed below) could engage in the solicitation or acceptance of orders for commodity options traded on a contract market of which the FCM is not a member.[8] Thus, FCMs which currently may not solicit or accept option orders at all, *i.e.*, those firms which are not members of any of the contract markets designated for option trading, as well as FCMs which may not solicit or accept orders for all of the options currently traded because they are not members of all such contract markets, would be able to do so.

Under the proposed fourth joint audit plan and the proposed revisions to the first joint audit plan, NFA will not conduct financial audits or exchange-traded option sales practice audits of any firm which is a member of any contract market. NFA will conduct financial and options sales practice audits for those FCMs, and only those FCMs, which are not members of any contract market. For example, if a firm

[5] 46 FR 54500, 54511, 54525, 54530, 54531 (November 3, 1981).

[6] 46 FR 54500, 54511 (November 3, 1981).

[7] While it was contemplated originally that MidAmerica Commodity Exchange would be a party to the fourth joint audit plan, the Commission has been informed by NFA's General Counsel that the MidAmerica Commodity Exchange will not be a signatory to the fourth joint audit plan at this time, though it may still decide to join the plan at some future date.

[8] *See* 17 CFR 33.3(b)(1) (1982), *as amended* 47 FR 56996, 57016 (December 22, 1982).

which is only a member of NFA and the Board of Trade of Kansas City, Missouri, Inc. engaged in the solicitation or acceptance of orders for commodity options traded on the Commodity Exchange, Inc., the sales practice audit covering such activity would be performed by the Board of Trade of Kansas City, Missouri, Inc.

Under the fourth joint audit plan, NFA will not be the DSRO for any firms. Each of the other parties to this new joint audit plan will be the DSRO under that plan for the same FCMs for which they are the DSRO under the second and third joint audit plans approved by the Commission. The same effect will be achieved under the first joint audit plan as amended to include NFA, since NFA will only conduct audits of FCMs which are not members of any contract market. However, the revisions to the first joint audit plan indicate that NFA will be the DSRO for the following firms (asterisks have been added by the Commission; only firms with no asterisk next to their names will be audited by NFA):

DEPARTMENT OF EDUCATION

National Advisory Council on Adult Education; Meeting

AGENCY: National Advisory Council on Adult Education.

ACTION: Notice of meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming meeting of the Committee on Illiteracy of the National Advisory

Council on Adult Education. This notice also describes the functions of the Council. Notice of this meeting is required under Section 10(a)(2) of the Federal Advisory Committee Act.

DATE: March 24–25, 1983, 9:00 a.m. to 5:00 p.m.

ADDRESS: National Advisory Council on Adult Education, 425 13th St., NW., Suite 323, Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Helen Banks, Administrative Assistant, National Advisory Council on Adult Education, 425 13th St., NW., Washington, D.C. 20004 (202/376–8892).

SUPPLEMENTARY INFORMATION: The National Advisory Council on Adult Education is established under Section 313 of the Adult Education Act (20 U.S.C. 1201). The Council is established to:

Advise the Secretary in the preparation of general regulations and with respect to policy matters arising in the administration of this title, including policies and procedures governing the approval of State plans under section 306 and policies to eliminate duplication, and to effectuate the coordination of programs under this title and other programs offering adult education activities and services.

The Council shall review the administration and effectiveness of programs under this title, make recommendations with respect thereto, and make annual reports to the President of its findings and recommendations (including recommendations for changes in this title and other Federal laws relating to adult education activities and services). The President shall transmit each such report to the Congress together with his comments and recommendations.

The meeting of the Committee is open to the public. The proposed agenda includes:

Develop position paper on illiteracy.

Records are kept of all Council proceedings, and are available for public inspection at the office of the National Advisory Council on Adult Education, 425 13th St., NW., Suite 323, Washington, D.C., 20004, from the hours of 8:00 a.m. to 4:30 p.m.

Signed at Washington, D.C. on February 28, 1983.

Rick Ventura,

Executive Director, National Advisory Council on Adult Education.

BILLING CODE 4110–51–M

DEPARTMENT OF ENERGY

Economic Regulatory Administration

[ERA Docket No. 83–CERT–003]

Application for Certification of the Use of Natural Gas To Displace Fuel Oil; Bethlehem Steel Corp.

Bethlehem Steel Corporation (Bethlehem), 8th & Eaton Avenue, Bethlehem, Pennsylvania 18106, filed an application on February 17, 1983 with the Economic Regulatory Administration (ERA) for certification of an eligible use of natural gas to displace fuel oil at its Lackawanna Plant in Lackawanna, New York, pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). More detailed information is contained in the application on file and available for public inspection at the ERA Natural Gas Division Docket Room, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In its application, Bethlehem indicates that the volume of natural gas for which it requests certification is approximately 6,000 Mcf per day. This volume is estimated to displace the use of approximately 40,865 gallons (973 barrels) of No. 6 fuel oil (1.0 percent sulfur) per day.

The eligible seller is N.E.A. Cross Company, R.D. No. 1, P.O. Box 86, Union City, Pennsylvania 16438. The gas will be transported by National Fuel Gas Supply Corporation, 308 Seneca Street, Oil City, Pennsylvania 16301; and by National Fuel Gas Distribution Corporation, 10 Lafayette Square, Buffalo, New York 14203.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Office of Fuels Programs, Natural Gas Division, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, Attention: Paula A. Daigneault, within ten (10) calendar days of the date of publication of this notice in the **Federal Register.**

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary. If ERA determines that an oral presentation is necessary, further notice will be given to Bethlehem and any persons filing comments and will be published in the **Federal Register.**

Issued in Washington, D.C. on March 2, 1983.

James W. Workman,

Director, Office of Fuels Programs, Economic Regulatory Administration.

[FR Doc. 83–5685 Filed 3–7–83; 8:45 am]

BILLING CODE 6450–01–M

[Docket No. OFU–037]

Energy Supply and Environmental Coordination Act; Effectiveness of Prohibition Order; Virginia Electric & Power Co.

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of Effectiveness.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) hereby issues its Notice of Effectiveness (NOE) to Virginia Electric and Power Company's (VEPCO) Portsmouth Unit 4, effectuating a Prohibition Order issued to that unit on June 30, 1975, pursuant to Section 2 of the Energy Supply and Environmental Coordination Act of 1974, 15 U.S.C. 791 *et seq.* (ESECA). When the prohibition contained in the Order becomes effective, Portsmouth Unit 4 will be prohibited from using petroleum or natural gas as its primary energy source. The prohibition will become effective on December 30, 1985.

Detailed information may be found in the Suplementary Information section below.

DATES: The Prohibition Order is effective upon service and the prohibition contained therein will become effective on December 30, 1985.

FOR FURTHER INFORMATION CONTACT:

Steven E. Ferguson, Director, Fuels Conversion Division, Office of Fuels Programs, Economic Regulatory Administration, Department of Energy, Forrestal Building, Room GA–093, 1000 Independence Avenue SW., Washington, D.C. 20585, Phone (202) 252–1316

Marya Rowan, Esq., Office of the General Counsel, Department of Energy, Forrestal Building, Room 6B–222, 1000 Independence Avenue SW.,

Washington, D.C. 20585, Phone (202) 252–2967.

SUPPLEMENTARY INFORMATION:

Docket No.	Owner	Installation	Unit[1]	Location
OFU–037	Virginia Electric & Power Co.	Portsmouth	4	Portsmouth, Va.

[1]Effective January 6, 1982, Virginia Electric and Power Company elected, pursuant to Section 1022 of the Omnibus Budget Reconciliation Act of 1981 (Pub. L. 97–35) and DOE Regulations published at 46 FR 48118, October 1, 1981, to have Portsmouth Unit 4 remain subject to Section 2 of ESECA. No election was made for Portsmouth Units 1, 2, and 3, which also received prohibition order on June 30, 1975 (OFU–034, OFU–035 and OFU–036); accordingly, these units are within the jurisdiction of Title III, Section 301 of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 4301 *et seq.*).

On June 30, 1975, the Federal Energy Administration issued a Prohibition Order to the above listed powerplant pursuant to Section 2 of the Energy Supply and Environmental Coordination Act of 1974 (ESECA), as amended, (15 U.S.C. 791 *et seq.*). The order stated that it would become effective on the date specified in a Notice of Effectiveness (NOE), to be served on the powerplant subsequent to issuance of the Prohibition Order.

Pursuant to 10 CFR 303.10(b), 303.37 and 305.7, the Economic Regulatory Administration (ERA) of the Department of Energy (DOE) [1] hereby gives notice that the Prohibition Order issued June 30, 1975 (40 FR 28430, July 3, 1975) to the above listed powerplant shall be effective upon the date this Notice is served. The prohibition against the burning of natural gas or petroleum as the primary energy source for Portsmouth Unit 4 shall become effective on December 30, 1985. Pursuant to 10 CFR 303.7(c), service of this NOE is complete upon mailing.

In accordance with the provisions of the Clean Air Act (42 U.S.C. 1857 *et seq.* (Section 119(d)(1)(B)) which were in effect at the time the subject order was issued, and in accordance with the requirements of the Clean Air Act, as amended (42 U.S.C. 7413(d)(5)), and Section 112 of the Clean Air Act Amendments of 1977 (Pub. L. 95–95), the Environmental Protection Agency (EPA) certified to DOE, by letter dated May 11, 1977 that 33 months from the date of service of DOE's Notice of Effectiveness (December 30, 1985) would be the earliest date upon which Portsmouth Unit 4 could burn coal and comply with all applicable air pollution requirements.

[1] Effective October 1, 1977, the responsibility for implementing ESECA was transferred by Executive Order No. 12009 from the Federal Energy Administration to the Department of Energy pursuant to the Department of Energy Organization Act (Pub. L. 95–91).

In accordance with the provisions of the National Environmental Policy Act of 1969 (NEPA), DOE has performed an environmental review of its action and has concluded that the Prohibition Order to Portsmouth Unit 4, when made effective by this Notice, is not a major Federal action significantly affecting the quality of the human environment within the meaning of Section 102(2)(C) of NEPA (42 U.S.C. 4332(c)).

As provided in the June 30, 1975, Prohibition Order, any person aggrieved by such order may file an appeal with the DOE Office of Hearings and Appeals in accordance with 10 CFR Part 303, Subpart H. The appeal must be filed within 30 days after the service of this Notice. There has not been an exhaustion of administrative remedies until an appeal has been filed pursuant to Subpart H of Part 303 and the appellate proceeding is completed by the issuance of an order granting or denying the appeal.

Application may be made for modification or rescision of the Prohibition Order in accordance with the provisions of 10 CFR Part 303, Subpart J. An application for modification or rescission of a Prohibiton Order based on "significantly changed circumstances", which circumstances occurred during the interval between issuance of the Order and service of this NOE, shall be filed within 30 days of service of this Notice. Application for modification or rescission of a Prohibition Order based on significantly changed circumstances occurring after that interval may be filed at any time after this Notice is served.

All terms and conditions of the Prohibition Order and this Notice may be the subject either of an appeal or an application for modification or rescission.

If an application for modification or rescission of a Prohibition Order is made in accordance with Subpart J of Part 303, any appeal of the Order under Part 303, Subpart H shall be suspended until 30 days after an Order has been issued in accordance with Subpart J or until 30 days from the date on which such application for modification or rescission may be treated as having been denied in all respects.

The Prohibition Order made effective by this Notice is effective against any persons that, as of the date of service of this NOE, own, lease, operate, or control the above named powerplant, and against any successors-in-interest or assignees of such persons.

Any terms utilized in this Notice have the same meaning as such terms have in 10 CFR Parts 303 and 307.

Issued in Washington, D.C. March 1, 1983.

Robert L. Davies,

Deputy Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450–01–M

Office of Energy Research

Materials R&D Panel; Energy Research Advisory Board; Meeting

Notice is hereby given of the following meeting:

Name: Materials R&D Panel of the Energy Research Advisory Board (ERAB). ERAB is a Committee constituted under the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770).

Date and time: March 31, 1983, 8:00 a.m. to 4:00 p.m.

Place: Department of Energy, Room 4A–110, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585.

Contact: William Woodard, Energy Research Advisory Board, Department of Energy, Forrestal Building, ER–6, 1000 Independence Avenue SW., Washington, DC 20585, Telephone: 202/252–8933.

Purpose of the parent board: To advise the Department of Energy on the overall research and development conducted in DOE nad to provide long-range guidance in these areas to the Department.

Tentative agenda:

—Discussion of Initial Working Outline for Draft Report.

—Future Meetings Outside Washington, D.C.

—Overview of Other Federal Agencies' Programs in Materials R&D.

Public participation: The meeting is open to the public. Written statements may be filed with the Panel either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact William Woodard at the address or telephone number listed above. Requests must be received five days prior to the meeting and reasonable provision will be made to include the presentation on the agenda. The Chairperson of the Panel is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business.

Transcripts: Available for public review and copying at the Freedom of Information Public Reading Room, 1E–190, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC, between 8:30 a.m. and

4 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, DC on March 3, 1983.

J. Ronald Young,

Director for Management, Office of Energy Research.

[FR Doc. 83-5864 Filed 3-1-83; 8:45 am]

BILLING CODE 6450-01-M

ENVIRONMENTAL PROTECTION AGENCY

[OPP 180612; PH-FRL 2315-2]

Mississippi; Receipt of Application for Specific Exemption for Ferriamicide; Solicitation of Public Comment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received a specific exemption request from the Mississippi Department of Agriculture and Commerce (hereafter referred to as the "Applicant"), for the use of Ferriamicide, which contains the active ingredient dodecachlorooctahydro-1,3,4-metheno-2H-cyclobuta[cd]pentalene (commonly known as mirex) to control imported fire ant infestations. All uses of mirex were voluntarily cancelled in 1977. EPA is soliciting comment before making the decision whether or not to grant the specific exemption.

DATE: Comments must be received on or before April 7, 1983.

ADDRESS: Comments should bear the document control number OPP-180612 and be submitted to: Document Control Office (TS-793), Office of Pesticides and Toxic Substances, Environmental Protection Agency, Rm. E-409, 401 M St., SW., Washington, D.C. 20460.

The public record regarding this notice will be available for public inspection in Rm. E-107 at the above address from 8:00 a.m. to 4 p.m. Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: Jack E. Housenger, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 716C, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703-557-1192).

SUPPLEMENTARY INFORMATION: Pursuant to section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C. 136p), the Administrator may, at her discretion, exempt a State agency from any registration provision of FIFRA if she determines that emergency conditions exist which require such exemption.

The Applicant has requested the Administrator to issue a specific exemption to permit the use of Ferriamicide to control imported fire ants. Information in accordance with 40 CFR Part 166 was submitted as part of this request.

The Applicant claims that the imported fire ant problem has become very serious over the past few years because, in part, the voluntary cancellation of mirex in 1977 eliminated the use of an effective and relatively low-cost imported fire ant control. The Applicant also argues that mirex was a desirable means of control because of the simplicity of application.

The Applicant claims that currently registered controls are too expensive, degrade too quickly to offer effective control, and/or cannot be applied easily to large areas of infested acreages.

Authorization has been requested to use 1,250 pounds of the active ingredient on 2.5 million acres. Treatments would be made to pasture, rangeland, land used to produce forage crops, and non-agricultural land, to include fence rows, ditch banks, and other margins not used for food production within the cropland area, as well as public areas and home sites.

The Applicant claims thats the use of Ferriamicide would reduce economic losses currently suffered by Mississippi farmers and other citizens and that without this proposed use, the imported fire ant infestation can be expected to worsen dramatically.

The Applicant proposes applying Ferriamicide using both ground and aerial application equipment at a maximum rate of one pound of bait, which contains .05 percent active ingredient, per acre. Mound treatments are also proposed, at a rate of one-quarter ounce of product per mound. Authorization for this use is requested for a 12-month period.

The Agency through this notice solicits public comment on the application for the emergency exemption submitted by Mississippi. EPA, however, does not believe that the court in the case of *EDF* v. *Blum*, 458 F. Supp. 650 (D.D.C. 1978) was correct in characterizing an emergency exemption under section 18 of FIFRA as a "rule" subject to the rulemaking provisions of the Administrative Procedures Act (5 U.S.C. 553). Rather, the Agency treats the consideration of applications for emergency exemptions as informal adjudications. Therefore, the Agency does not believe it is legally required to provide opportunity for notice and comment as a part of the informal adjudication to determine whether to issue an emergency exemption. However, due to the widespread public interest concerning the use of the pesticide Ferriamicide, the Agency in its discretion has chosen to provide this opportunity for comment pursuant to 40 CFR 166.10 as a part of the informal adjudication. The Agency, accordingly, will review and consider all comments received during the comment period in determining whether to issue the emergency exemption requested by Mississippi.

Dated: February 23, 1983.

Edwin L. Johnson,

Director, Office of Pesticide Programs.

[FR Doc. 83-5341 Filed 3-7-83; 8:45 am]

BILLING CODE 6560-50-M

FEDERAL COMMUNICATIONS COMMISSION

[BC Docket 82-345]

Commission Announces Oral Presentation Schedule in Network Television Financial Interest and Syndication Proceeding

March 4, 1983.

The Commission indicates its intention to hold an En Banc meeting to hear oral presentations in BC Docket 82-345. The meeting will be held on Monday, March 14, 1983, at the Commission's offices at 1919 M Street, NW., Washington, D.C. in room 856. Within each panel parties are free to coordinate presentations. Groups within a panel whose interests are similar are welcome to consolidate, allowing one representative more time. The schedule follows:

1. (8:30-9:00) National Telecommunication and Information Administration, United States Department of Justice.

Each party is allocated 10 minutes, and the Commission will have a 10 minute question period.

2. (9:00-10:40) Committee for Prudent Deregulation (CPD), Motion Picture Association of America, CPD (Program producer), CBS Inc., American Broadcasting Companies, Inc., National Broadcasting Company, Inc., Westinghouse Broadcasting and Cable.

Each party is allocated 10 minutes and the Commission will have a 30 minute question period.

3. (10:55-12:15) CPD (Economist), Robert W. Crandall, Association of National Advertisers, Owen, Greenhalgh & Myslinski, Shooshan & Jackson, Inc., Bolter & Nilsson RJ.

Each party is allocated 10 minutes and the Commission will have a 20 minute question period.

4. (1:30–3:20) CPD (Representative), CPD (Representative), Association of Independent Television Stations, National Association of Independent Television Producers and Distributors, Metromedia, NBC Television Affiliates, ABC Television Affiliates, CBS Television Network Affiliates, NATPE International.

Each party is allocated 10 minutes and the Commission will have a 20 minute question period.

5. (3:30–4:35) National Black Media Coalition, National Commission of National Council of Churches of Christ in the U.S.A., Office of Communication of the United Church of Christ, National Council of Senior Citizens, Comma/OCC Media Department, Black Citizens for Fair Media, Office of Media Communication for Presbyterian Church in United States, United Rubber, Cork, Linoleum & Plastic Workers of America, Women in Film, Telecommunication Research and Action Center.

The initial two parties are allocated 10 minutes and the other parties 5 minutes. A 10 minute question period will follow.

6. (4:50–5:45) Springfield Broadcasting, Taft Broadcasting, Buena Vista Cablevision, Inc., Interstellar Media, Inc., Gateway Communications, CPD (Guild), CPD (Syndicator).

The initial two parties are allocated 10 minutes and the other parties 5 minutes. A 10 minute question period will follow.

This meeting will be open to the public. For further information contact William H. Johnson, or Molly Pauker, telephone number (202) 632–6460.

William J. Tricarico,

Secretary, Federal Communication Commission.

BILLING CODE 6712–01–M

FEDERAL MARITIME COMMISSION

Agreement Filed

The Federal Maritime Commission hereby gives notice that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and may request a copy of the agreement and the supporting statement at the Washington, D.C. Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10325. Interested parties may submit protests or comments on the agreement to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments and protests are found in § 522.7 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Any person filing a comment or protest with the Commission shall, at the same time, deliver a copy of that document to the person filing the agreement at the address shown below.

Agreement No.: T–3753–2.

Title: MPA/A&G Lease Amendment.

Parties: Maryland Port Administration (MPA)/Atlantic and Gulf Stevedores, Inc. (A&G).

Synopsis: Agreement No. T–3753–2 modifies the basic agreement between the parties which provides for MPA's five-year lease to A&G, with renewal options, of the South Locus Point Marine Terminal at the Port of Baltimore. The purpose of the modification is to memorialize the settlement of a dispute between the parties by (1) redefining the word "cargo" for the purposes of the agreement, (2) adjusting A&G's base rental payment to MPA, and (3) providing a liquidated damages clause should A&G not exercise its renewal option.

Filing Party: Richard A. Lidinsky, Jr., Thomas K. Farley, Attorneys for the Maryland Port Administration, World Trade Center Baltimore, Baltimore, Maryland 21202.

By Order of the Federal Maritime Commission.

Dated: March 3, 1983.

Francis C. Hurney,

Secretary.

BILLING CODE 6725–01–M

Agreements Filed

The Federal Maritime Commission hereby gives notice that the following agreements have been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and may request a copy of each agreement and the supporting statement at the Washington, D.C. Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10325. Interested parties may submit protests or comments on each agreement to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, within 20 days after the date of the **Federal Register** in which this notice appears. The requirements for comments and protests are found in § 522.7 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Any person filing a comment or protest with the Commission shall, at the same time, deliver a copy of that document to the person filing the agreement at the address shown below.

Agreement No.: T–4093.

Title: Los Angeles/Metropolitan Stevedore Agreement.

Parties: City of Los Angeles (City/Metropolitan Stevedore Company (Metropolitan).

Synopsis: Agreement No. T–4093 is a five-year permit granted by City to Metropolitan of approximately 39 acres for use as a marine terminal.

Filing party: Frank Wagner, Deputy City Attorney, Office of City Attorney, Harbor Division, P.O. Box 151, San Pedro, California 90731.

Agreement Nos.: 14–49 and 5700–32.

Title: Transpacific Freight Conference (Hong Kong) and New York Freight Bureau.

Parties: Agreement No. 14–49: Japan Line, Ltd.; Nippon Yusen Kaisha; Showa Line Ltd.; and Yamashita-Shinnihon Steamship Co., Ltd.; Agreement No. 5700–32: Japan Line, Ltd.; Mitsui O.S.K. Lines, Ltd.; Nippon Yusen Kaisha; Yamashita-Shinnihon Steamship Co., Ltd.

Synopsis: The basic agreements would be amended to (1) reduce the voting requirement for actions other than changes in the agreements from three-fourths to a simple majority; (2) provide that each member shall have the right, on thirty days' notice, to take independent action on any freight rate, rule or regulation; (3) provide for a separate misrating program; (4) delete obsolete references to Compradores and Chinese Freight Agents; (5) allow carriers to divulge their positions on conference matters to shippers and consignees; (6) permit adoption of Appendices to the respective Agreements; and (7) make administrative changes in agreement language.

Filing party: Charles F. Warren, Warren & Associates, P.C., 1100 Connecticut Avenue, NW., Washington, D.C. 20036.

Agreement No.: 10051–8.

Title: Mediterranean Force Majeure Agreement.

Parties: Compagnie Maritime d'Affretement, Costa Line, Farrell Lines, Inc., Hellenic Lines Ltd., Ibero Lines, Italia S.p.A.N., Jugolinija, Lykes Bros. Steamship Co., Inc., Prudential Lines,

Sea-Land Services, Inc., Spanish Line, and Zim Israel Navigation Co., Ltd.

Synopsis: The amendment extends the scope to include the Gulf Ports of the United States.

Filing agent: David F. Smith, Esquire, Billig, Sher & Jones, P.C., 2033 K Street, NW., Washington, D.C. 20006.

Agreement No.: 10469.

Title: TMT/Naviera Central Husbanding Agreement.

Parties: Trailer Marine Transport Corporation (TMT)/Naviera Central, C.A. (Naviera Central).

Synopsis: Agreement No. 10469 provides that TMT shall act as husbanding agent in the United States for Naviera Central, and shall perform husbanding and related terminal and administrative services.

Filing party: William H. Fort, Esquire, Kominers, Fort, Schlefer & Boyer, 1776 F Street, NW., Washington, D.C. 20006.

By Order of the Federal Maritime Commission.

Dated: March 3, 1983.

Francis C. Hurney,

Secretary.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Acquisition of Bank Shares by a Bank Holding Company; Bank of New Hampshire Corp.

The company listed in this notice has applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire voting shares or assets of a bank. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors, or at the Federal Reserve Bank indicated. With respect to the application, interested persons may express their views in writing to the address indicated. Any comment on the application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

A. **Federal Reserve Bank of Boston** (Richard E. Randall, Vice President) 600 Atlantic Avenue, Boston, Massachusetts 02106:

1. *Bank of New Hampshire Corporation,* Manchester, New Hampshire; to acquire 100 percent of the voting shares of The Bristol Bank, Bristol, New Hampshire ("Bank"), through merger with its wholly owned *de novo* subsidiary, First BNH Acquisition Bank, Manchester, New Hampshire. Bank will operate under its charter and title. Comments on this application must be received not later than March 31, 1983.

Board of Governors of the Federal Reserve System, March 2, 1983.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Bank Holding Company; Proposed de Novo Nonbank Activities; Dominion Bankshares Corp.

The organization identified in this notice has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(1) of the Board's Regulation Y (12 CFR 225.4(b)(1)), for permission to engage *de novo* (or continue to engage in an activity earlier commenced *de novo*), directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.

With respect to the application, interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices." Any comment on the application that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated. Comments and requests for hearings should identify clearly the specific application to which they relate, and should be submitted in writing and received by the appropriate Federal Reserve Bank not later than the date indicated.

A. **Federal Reserve Bank of Richmond** (Lloyd W. Bostian, Jr., Vice President) 701 East Byrd Street, Richmond, Virginia 23261:

1. *Dominion Bankshares Corporation,* Roanoke, Virginia (investment or financial advisory activities; United States): To engage through its subsidary, Dominion Trust Company, in acting as investment or financial advisors to the extent of furnishing general economic information and advice, general economic statistical forecasting services and industry studies. These activities would be performed throughout the United States of America. Comments on this application must be received not later than March 30, 1983.

Board of Governors of the Federal Reserve System, March 2, 1983.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Bank Holding Companies; Proposed de Novo Nonbank Activities; Shawmut Corp., et al.

The organizations identified in this notice have applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(1) of the Board's Regulation Y (12 CFR 225.4(b)(1)), for permission to engage *de novo* (or continue to engage in an activity earlier commenced *de novo*), *directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.*

With respect to these applications, interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any comment that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of that proposal.

The applications may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated. Comments and requests for hearing should identify clearly the specific application to which they relate, and should be submitted in writing and received by the appropriate Federal Reserve Bank not later than the date indicated.

A. **Federal Reserve Bank of Boston** (Richard E. Randall, Vice President) 600 Atlantic Avenue, Boston, Massachusetts 02106:

1. *Shawmut Corporation*, Boston, Massachusetts (commercial financing; United States): To engage through its subsidiary, Shawmut Credit Corp., in commercial finance activities including the making or acquiring for its own account or for the account of others loans and other extensions of credit such as would be made by a finance company (including, without limitation, commercial loans, which may be secured by acounts receivable, inventory, equipment or other assets) and servicing such loans and other extensions of credit for others. These activities would be conducted from a new office to be located in New York, New York serving the United States. Comments on this application must be received not later than March 28, 1983.

B. **Federal Reserve Bank of Kansas City** (Thomas M. Hoenig, Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *Kansas Bancorporation, Inc.*, Kansas City, Kansas (mortgage lending activities; Kansas, Missouri): To engage, through its subsidiary, Kansas Mortgage Company, in originating, acquiring and servicing residential and commercial real estate loans. These activities would be conducted from an office in Overland Park, Kansas, serving the metropolitan Kansas City area. Comments on this application must be received not later than March 31, 1983.

C. **Federal Reserve Bank of San Francisco** (Harry W. Green, Vice President) 400 Sansome Street, San Francisco, California 94120:

1. *Trabanc*, Salt Lake City, Utah (management consulting; Utah, Idaho, and Wyoming): To engage, through its subsidiary, Tracy Management Consulting Co., in providing management consulting advice to institutions such as savings and loan associations, mutual savings banks, credit unions, industrial banks, Morris Plan banks, cooperative banks, and industrial loan companies. These activities would be conducted from offices in Salt Lake City, Utah, serving Utah, Idaho, and Wyoming. Comments on this application must be received not later than March 31, 1983.

Board of Governors of the Federal Reserve System, March 2, 1983.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Centerre Bancorporation

Centerre Bancorporation, St. Louis, Missouri; Charter Corp., Kansas City, Missouri; CNB Financial Corporation, Kansas City, Kansas; County Tower Corp., St. Louis, Missouri; and Mercantile Banccorporation, Inc., St. Louis, Missouri, have applied, pursuant to section 4(c)(8) of the Bank Holding Company Act of 1956 as amended, (12 U.S.C. 1843(a)(8)) and 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)) for prior approval to retain at least a one-fourth interest (except that CNB Financial Corporation and County Tower Corp. will acquire at least a one-eighth interest) in Monetary Transfer System, a joint venture and partnership located in St. Louis, Missouri.

Applicants state that the proposed joint venture would engage in data processing activities through the operation of a communications network processing service and switching system for electronic funds transfer and information exchange between financial institutions.

The activities would be performed from offices of Applicant's joint venture in St. Louis, Missouri, serving the states of Illinois, Iowa, Kansas, Kentucky, and Missouri. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of St. Louis.

Any views or request for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C., not later than April 1, 1983.

Board of Governors of the Federal Reserve System, March 2, 1983.

James McAfee,

Associate Secretary of the Board.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

Burley District; Advisory Council Meeting

Notice is hereby given in accordance with Pub. L. 91-463, Pub. L. 94-579, Pub. L. 95-514, and 43 CFR Part 1780, that a meeting of the Burley District Advisory Council will be held on Wednesday, April 20, 1983, at 9 a.m. at the Conference Room in the Burley District Office, 200 South Oakley Highway, Burley, Idaho 83318.

Agenda for the meeting will include the following:

1. Introduction and Opening Comments.
2. Orientation and Highlight of District Programs.
3. Council Function and Involvement.
4. Fiscal Year 1983 Public Land Sale Program.
5. Cassia Resource Management Plan.
6. Magic and Raft River Resource Area Consolidation.
7. Minerals Management Service Merger with BLM.
8. Election of Officers.
9. Arrangements for Next Meeting.

The meeting is open to the public. Interested persons may make oral statements to the Council between 3:30 p.m. and 4 p.m., or file written statements for the Council's consideration. Anyone wishing to make an oral statement must notify the District Manager at the Burley BLM District Office, 200 South Oakley Highway, Burley, Idaho 83318 by April 14, 1983. Depending on the number of persons wanting to make oral statements, a per-person time limit may be established.

Summary minutes of the meeting will be maintained in the District Office and will be available for public inspection and reproduction during business hours (7:45 a.m. to 4:30 p.m.) 30 days after the meeting.

Dated: February 23, 1983.

Nick James Cozakos,

District Manager.

BILLING CODE 4310-84-M

[F-14915-A]

Alaska Native Claims Selection; Ohog Inc.

On November 15, 1974, Ohog Incorporated, for the Native village of Ohogamiut, filed selection application F-14915-A, as amended, under the provisions of Sec. 12(a) of the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601, 1611) (ANCSA), for the surface estate of certain lands in the Ohogamiut area.

As to the lands described below, application F-14915-A, as amended, is properly filed and meets the requirements of ANCSA and of the regulations issued pursuant thereto. These lands do not include any lawful entry perfected under or being maintained in compliance with laws leading to acquisition of title.

In view of the foregoing, the surface estate of the following described lands, selected pursuant to Sec. 12(a), aggregating approximately 66,017 acres, is considered proper for acquisition by Ohog Incorporated and is hereby approved for conveyance pursuant to Sec. 14(a) of ANCSA.

Seward Meridian, Alaska (Unsurveyed)

T. 18 N., R. 67 W.,
Secs. 31 and 32;
Sec. 33, excluding Native allotment F-16106 Parcel B.
Containing approximately 1,525 acres.

T. 17 N., R. 68 W.,
Sec. 1.
Containing approximately 640 acres.

T. 18 N., R. 68 W.,
Secs. 14, 15, and 16;
Sec. 18, excluding Native allotments F-16107 and F-17233 Parcel C;
Sec. 20;
Sec. 21, excluding Native allotments F-16103 Parcel A, F-17233 Parcel D, and F-17337 Parcel D;
Secs. 22 and 23;
Secs. 26, 27, and 28;
Sec. 29, excluding Native allotment F-17337 Parcel C;
Sec. 30, excluding Native allotments F-16107, F-16214 Parcel C, F-17337 Parcel B, and F-17338 Parcel A;
Sec. 31;
Secs. 32 and 33, excluding Native allotment F-19182 Parcel A;
Secs. 34, 35, and 36.
Containing approximately 8,623 acres.

T. 16 N., R. 69 W.,
Secs. 6 and 7.
Containing approximately 1,199 acres.

T. 17 N., R. 69 W.,
Secs. 1 to 4, inclusive;
Sec. 5, excluding Native allotments F-15608 Parcel B and F-17338 Parcel B;
Sec. 6;
Secs. 7 and 8, excluding Native allotment F-15608 Parcel B;
Secs. 9 to 16, inclusive;
Sec. 17, excluding Native allotment F-16097 Parcel B;
Sec. 18, excluding Native allotments F-16097 Parcel B, F-17235 Parcel B, F-19182 Parcel C, and F-19196 Parcel B;
Secs. 19 and 20, excluding Native allotment F-16097 Parcel B;
Secs. 21 to 32, inclusive;
Secs. 33 and 34, excluding Native allotment F-16100;
Secs. 35 and 36.
Containing approximately 21,446 acres.

T. 18 N., R. 69 W.,
Secs. 22, 23, and 24;
Sec. 25, excluding Native allotment F-19196 Parcel A;
Secs. 26 and 27;
Sec. 28, excluding Native allotment F-16186 Parcel A;
Secs. 31 and 32;
Sec. 33, excluding Native allotment F-16186 Parcel A;
Secs. 34, 35, and 36.
Containing approximately 4,925 acres.

T. 16 N., R. 70 W.,
Secs. 1 to 18, inclusive.
Containing approximately 11,401 acres.

T. 17 N., R. 70 W.,
Secs. 1, 2, and 3;
Secs. 11 and 12;
Sec. 13, excluding Native allotments F-15609 Parcel D, F-17240 Parcel D, and F-19196 Parcel B;
Sec. 14;
Sec. 19, excluding Native allotments F-15609 Parcel A, F-17236 Parcel B, F-17240 Parcel A, F-18191 Parcel B, and F-18368 Parcel C;
Secs. 20 to 36, inclusive.
Containing approximately 13,061 acres.

T. 18 N., R. 70 W.,
Sec. 22, excluding Native allotment F-17240 Parcel C;
Secs. 23 and 26;
Secs. 27 and 34, excluding Native allotment F-17236;
Secs. 35 and 36.
Containing approximately 3,175 acres.
Aggregating approximately 66,017 acres.

Excluded from the above-described lands herein approved for conveyance are the submerged lands, up to the ordinary high water mark, beneath all water bodies determined by the Bureau of Land Management to be navigable because they have been or could be used in connection with travel, trade, and commerce. Those water bodies are identified on the attached navigability maps, the original of which will be found in easement case file F-14915-EE.

All other water bodies not depicted as navigable on the attached maps within the lands to be conveyed were reviewed. Based on existing evidence, they were determined to be nonnavigable.

The lands excluded in the above description are not being approved for conveyance at this time and have been excluded for the following reason: Lands are under applications pending further adjudication. These exclusions *do not* constitute a rejection of the selection application, unless specifically so stated.

The conveyance issued for the surface estate of the lands described above shall contain the following reservations to the United States:

1. The subsurface estate therein, and all rights, privileges, immunities and appurtenances, of whatsoever nature, accruing unto said estate pursuant to the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601, 1613(f)); and

2. Pursuant to Sec. 17(b) of the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601, 1616(b)), the following public easements referenced by easement identification number (EIN) on the easement maps attached to this document, copies of which will be found in case file F-14915-EE, are reserved to the United States. All easements are subject to applicable Federal, State, or Municipal corporation regulation. The following is a listing of uses allowed for each type of easement. Any uses which are not specifically listed are prohibited.

25 Foot Trail—The uses allowed on a twenty-five (25) foot wide trail easement are: travel by foot, dogsled, animals, snowmobiles, two- and three-wheel vehicles, and small all-terrain vehicles (ATV's) (less than 3,000 lbs. Gross Vehicle Weight (GVW)).

One Acre Site— The uses allowed for a one (1) acre site easement are: vehicle

parking (e.g., aircraft, boats, ATV's snowmobiles, cars, trucks), temporary camping, loading or unloading. Temporary camping, loading, or unloading shall be limited to 24 hours.

a. (EIN 8 C5) An easement twenty-five (25) feet in width for a proposed access trail from the Yukon River in Sec. 26, T. 18 N., R. 69 W., Seward Meridian, northerly to public lands. The uses allowed are those listed above for a twenty-five (25) foot wide trail easement.

b. (EIN 8a C5) A one (1) acre site easement upland of the ordinary high water mark in Sec. 26, T. 18 N., R. 69 W., Seward Meridian, on the right bank of the Yukon River. The uses allowed are those listed above for a one (1) acre site easement.

c. (EIN 9 C4, C5) An easement twenty-five (25) feet in width for a proposed access trail from site EIN 9a C4, C5 on the left bank of the Yukon River in Sec. 36, T. 18 N., R. 69 W., Seward Meridian, southeasterly to public lands. The uses allowed are those listed above for a twenty-five (25) foot wide trail easement.

d. (EIN 9a C4, C5) A one (1) acre site easement upland of the ordinary high water mark on the left bank of the Yukon River in Sec. 36, T. 18 N., R. 69 W., Seward Meridian. The uses allowed are those listed above for a one (1) acre site easement.

The grant of the above-described lands shall be subject to:

1. Issuance of a patent after approval and filing by the Bureau of Land Management of the official plat of survey confirming the boundary description and acreage of the lands hereinabove granted;

2. Valid existing rights therein, if any, including but not limited to those created by any lease (including a lease issued under Sec. 6(g) of the Alaska Statehood Act of July 7, 1958 (48 U.S.C. Ch. 2, Sec. 6(g))), contract, permit, right-of-way or easement, and the right of the lessee, contractee, permittee or grantee to the complete enjoyment of all rights, privileges and benefits thereby granted to him. Further, pursuant to Sec. 17(b)(2) of the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601, 1616(b)(2)) (ANCSA), any valid existing right recognized by ANCSA shall continue to have whatever right of access as is now provided for under existing law; and

3. Requirements of Sec. 14(c) of the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601, 1613(c) (Supp. IV, 1980)), that the grantee hereunder convey those portions, if any, of the lands hereinabove granted, as are prescribed in said section.

Ohog Incorporated (for the village of Ohogamiut) is entitled to conveyance of 69,120 acres of land selected pursuant to Sec. 12(a) of ANCSA. Together with the lands herein approved, the total acreage conveyed or approved for conveyance is approximately 66,017 acres. The remaining entitlement of approximately 3,103 acres will be conveyed at a later date.

Pursuant to Sec. 14(f) of ANCSA and Departmental regulation 43 CFR 2652.4, conveyance of the subsurface estate of the lands described above shall be issued to Calista Corporation when the surface estate is conveyed to Ohog Incorporated (for the village of Ohogamiut), and shall be subject to the same conditions as the surface conveyance, except for those provisions under Sec. 14(c) of ANCSA; also the right to explore, develop or remove minerals from the subsurface estate in lands within the boundaries of the Native village shall be subject to the consent of Ohog Incorporated.

In accordance with Departmental regulation 43 CFR 2650.7(d), notice of this decision is being published once in the **Federal Register** and once a week, for four (4) consecutive weeks, in The Tundra Drums.

Any party claming a property interest in lands affected by this decision, an agency of the Federal government, or regional corporation may appeal the decision to the Interior Board of Land Appeals, Office of Hearings and Appeals, in accordance with the attached regulations in Title 43 Code of Federal Regulations (CFR), Part 4, Subpart E, as revised. However, pursuant to Public Law 96–487, this decision constitutes the final administrative determination of the Bureau of Land Management concerning navigability of water bodies.

If an appeal is taken, the notice of appeal must be filed in the Bureau of Land Management, Alaska State Office, Division of ANCSA and State Conveyances (960), 701 C Street, Box 13, Anchorage, Alaska 99513. Do not send the appeal directly to the Interior Board of Land Appeals. The appeal and copies of pertinent case files will be sent to the Board from this office. A copy of the appeal must be served upon the Regional Solicitor, 701 C Street, Box 34, Anchorage, Alaska 99513.

The time limits for filing an appeal are:

1. Parties receiving service of this decision by personal service or certified mail, return receipt requested, shall have thirty days from receipt of this decision to file an appeal.

2. Unknown parties, parties unable to be located after reasonable efforts have been expended to locate, parties who failed or refused to sign their return receipt and parties who received a copy of this decision by regular mail which is not certified, return receipt requested, shall have until April 7, 1983 to file an appeal.

Any party known or unknown who is adversely affected by this decision shall be deemed to have waived those rights which were adversely affected unless an appeal is timely filed with the Bureau of Land and management, Alaska State Office, Division of ANCSA and State Conveyances.

To avoid summary dismissal of the appeal, there must be strict compliance with the regulations governing such appeals. Further information on the manner of and requirements for filing an appeal may be obtained from the Bureau of Land Management, 701 C Street, Box 13, Anchorage, Alaska 99513.

If an appeal is taken, the parties to be served with a copy of the notice of appeal are

Ohog Incorporated, Ohogamiut, via Russian Mission, Alaska 99657
Calista Corporation, 516 Denali Street, Anchorage, Alaska 99501.

Ann Johnson,
Chief, Branch of ANCSA Adjudication.

Fish and Wildlife Service

Migratory Bird Hunting; Meetings

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of meetings.

SUMMARY: This notice announces that representatives of the U.S. Fish and Wildlife Service will be in attendance at meetings of the Atlantic, Mississippi, Central, Pacific, and National Flyway Councils at the following times and locations.

DATES:

March 19, 1983—Atlantic Flyway Council, 1 p.m.

March 20, 1983

—Mississippi Flyway Council, 9 a.m.
—Central Flyway Council, 8:30 a.m.
—Pacific Flyway Council, 10:00 a.m.
—National Waterfowl Council, 3 p.m.

ADDRESS: Council meetings will be held at the Radisson Muehlebach Hotel, Kansas City, Missouri, as follows:

Atlantic Flyway Council, Room 4, Mezzanine Level;
Mississippi Flyway Council, Trianon D, Trianon Level;

Central Flyway Council, Muehlebach A. Mezzanine Level;
Pacific Flyway Council, Lido Room, Trianon Level;
National Waterfowl Council, Colonial Ballroom, Mezzanine Level.

FOR FURTHER INFORMATION CONTACT: John P. Rogers, Chief, Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Department of the Interior, Washington, DC 20240, telephone AC 202–254–3207.

SUPPLEMENTARY INFORMATION: Flyway Councils are organizations of State conservation agencies which cooperate with the U.S. Fish and Wildlife Service and the Canadian Wildlife Service in migratory bird management and research programs. Their meetings are scheduled in conjunction with the 48th North American Wildlife and Natural Resources Conference to be held March 18–23, 1983, at the Radisson Muehlebach Hotel, Kansas City, Missouri. Although the U.S. Fish and Wildlife Service is not a member of these councils, it will be represented at the above meetings to facilitate discussions of various migratory bird management and research programs, many of which are conducted jointly with the Service.

Dated: March 2, 1983.

G. Ray Arnett,

Assistant Secretary for Fish and Wildlife and Parks.

Minerals Management Service

Oil and Gas and Sulphur Operations in the Outer Continental Shelf

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of the receipt of a proposed development and production plan.

SUMMARY: Notice is hereby given that Texaco U.S.A. has submitted a Development and Production Plan describing the activities it proposes to conduct on Lease OCS–G 4408, Block 547, West Cameron Area, Offshore Louisiana.

The purpose of this Notice is to inform the public, pursuant to Section 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the Plan and that it is available for public review at the Office of the Regional Manager, Gulf of Mexico OCS Region, Minerals Management Service, 3301 North Causeway Blvd., Room 147, Metairie, Louisiana 70002.

FOR FURTHER INFORMATION CONTACT: Minerals Mangement Service, Public Records, Room 147, open weekdays 9 a.m. to 3:30 p.m., 3301 North Causeway Blvd., Metairie, Louisiana 70002, Phone (504) 837–4720, Ext. 226.

SUPPLEMENTARY INFORMATION: Revised rules governing practices and procedures under which the Mnerals Management Service makes information contained in Development and Production Plans available to affected States, executives of affected local governments, and other interested parties became effective December 13, 1979, (44 FR 53685). Those practices and procedures are set out in a revised § 250.34 of Title 30 of the Code of Federal Regulations.

Dated: February 28, 1983.

John L. Rankin,

Acting Regional Manager, Gulf of Mexico OCS Region.

National Park Service

Death Valley National Monument Natural and Cultural Resources Management Plan

Pursuant to Section 102(2)(c) of the National Environmental Policy Act, the Department of the Interior has prepared a plan for the management of natural and cultural resources in Death Valley National Monument. Copies of the plan and record of decision are available at the following locations:

Superintendent, Death Valley National Monument, Death Valley, California 92328

Regional Director, Western Region Office/National Park Service, 450 Golden Gate Avenue, San Francisco, California 94102

National Park Service, Department of the Interior, 18th and C Street NW., Washington, D.C. 20240

Record of Decision—Death Valley National Monument Natural and Cultural Resources Management Plan

I. The Decision

The National Park Service has decided to adopt the natural and cultural resources management plan as presented in the Death Valley National Monument Final Environmental Impact Statement (FES 82-48). This final plan was released to the public on November 3, 1982. The final plan is a modification of the draft plan and statement (DES 81-47) which generated significant public controversy when it was released in 1981. While most people accepted the concept of burro removal from the monument, many either felt that the 10-year time frame was too long, or that shooting the burros was unacceptable. Consequently, the National Park Service held meetings with a consortium of animal protection groups and developed the final plan which provides for a live removal program that will be accomplished in three years.

The goals of this plan are to restore those natural areas of the monument that have been altered, and to maintain or enhance existing conditions in the natural and cultural environment. To this end, the plan proposes methods to maintain, perpetuate, or restore natural ecosystems where possible, and to ameliorate or modify those degrading factors that are impossible to eliminate. It also proposes research to be used as a basis for sound management decisions and corrective actions. The plan will guide resources management activities at the monument for an indefinite period. Individual projects will be assessed annually. Additional NEPA compliance may be required for non-burro actions.

A. Natural Resources

In order to restore natural ecosystems within the monument, the plan proposes removal of those exotic species wherever feasible. Exotic animals in Death Valley include feral burros and horses, domestic livestock, and mosquito fish; exotic plants include tamarisk (salt cedar), Russian thistle, hornwort, and palms.

The plan proposes to remove all burros from the monument in a three-year period beginning in the fall of 1983. The plan calls for a cooperative effort between the National Park Service and a consortium of participating animal protection groups. The National Park Service will provide for a humane roundup of all animals that will be transported to a central holding facility. The animal protection groups will accept all captured animals for adoption. Construction of fences to exclude burros from the west side of the monument is not anticipated; however, construction of approximately 40 miles of fence will be required to ensure exclusion of domestic livestock from a 100,000-acre area on the east side of the monument.

Mosquito fish are currently being removed from the waters at Scotty's Castle, and the plan proposes to continue this practice in all the Death Valley waters to avoid competition with pupfish. Tamarisk will be eliminated from approximately 200 acres of the monument by cutting and herbicide treatment. Russian thistle, a dryland weed, is common in many disturbed portions of the monument, including approximately 300 acres near Harrisburg Flats and Skidoo, other old mining sites, and along roadsides. Date and Washington palms that are not part of the historic scene will be removed from individual springs. Hornwort, an aquatic plant with dense growth, will be removed from Saratoga Springs.

Projects proposed to restore natural conditions include obliteration of unused facilities, reclamation of disturbed lands, restoration of water sources, and management of fire. Actions enhancing public safety will be the first priority, followed by environmental restoration of disturbed lands that are important to wildlife survival or that are visually intrusive. About 350 mine shafts and exploration holes that are considered dangerous will be filled or fenced in and debris will be removed. Approximately 600 to 700 miles of abandoned roads will be obliterated. The existing network of usable roads, and those which are historically significant, will be retained.

Approximately 2,700 to 3,000 acres, including mining areas that are not historically or acheologically significant in the vicinity of Skidoo and Chloride City, will be regraded and revegetated. Revegetation will be done with native species by reseeding and planting of seedlings.

At least 53 sources of water that have been altered by human activities or burros, will be restored and rehabilitated in order to provide a dependable source of water for wildlife. If this fails, artificial watering devices such as small water catchment dams or wildlife guzzlers will be constructed. These devices, particularly the guzzlers, will be constructed as a last resort when all other efforts to restore water supplies have failed. Only the minimum necessary construction needed to counteract human activities will be done to provide water for wildlife.

The plan proposes several studies and continuing research programs that will provide a comprehensive, reliable information base and resolutions to resources management problems. These proposed studies include an engineering study to investigate design alternatives that will return minor floods and a portion of major floods to the historical channel down Furnace Creek Wash. Other studies will determine hydrologic systems (aquifers) feeding Death Valley springs, establish baseline information, and offer alternate strategies to ensure future water supplies to the monument, as well as ensure compliance with state water quality standards.

Helicopter surveys, waterhole counts, and photographic monitoring will be used to determine mule deer and bighorn populations. The plan proposes to continue habitat monitoring and regular censuses of the Devils Hole pupfish population. Concurrent with removal of feral and trespass animals and replanting of disturbed areas, vegetation will be monitored to determine the rate of recovery. Monitoring will include establishment of permanent and temporary transects, exlosures, and other conventional research methods.

B. Cultural Resources

The plan's proposals for archeology are as follows: Identification and analysis of collected artifacts will be

used to determine site significance; and archeological survey will be conducted with a sample site large enough to make predictions for the entire monument; and an intensive archeological survey will be conducted in heavy use areas and regular monitoring of these sites will be instituted.

Proposals for historic resources include oral interviews with individuals who can supply first-hand data on Death Valley history, a historic resources study on the history of exploration and surveying in Death Valley, and historic structures reports to cover preservation projects at Scotty's Castle and Ranch.

Historic structures that will be stabilized and preserved include Scotty's Castle, Keane Wonder historic Site, Eagle Borax Works, and the Skidoo National Register property.

II. The Alternatives

The following alternatives were considered in the planning process.

A. No action.

Alternate Methods of Achieving Environmental Restoration With Total Removal of Burros

B. Remove burros by trapping and shooting followed by boundary fencing.

C. Totally remove burros with emphasis on those methods allowing the largest number to be removed alive.

D. Totally remove burros by direct reduction.

Alternate Methods of Achieving Partial Restoration With Retention of Some Feral Burros

E. Retain present population levels.

F. Retain burros in some existing herds.

G. Establish a burro viewing area.

Other Methods that Might be Included to Achieve Either Partial or Total Removal

H. Remove burros by sterilizing.

I. Use immobilizing drugs.

J. Exclude burros by adding boundary fences.

Infeasible Alternatives

K. Introduce predators.

L. Introduce equine diseases.

M. Ship burros to Mexico.

N. Sell carcasses.

III. Mitigating Measures

All practicable means to avoid or minimize harm have been adopted, including but not limited to the following specific measures.

A. Natural Resources

Portable traps and corrals will be used in all areas to reduce environmental damage caused by trailing and trampling activity at a fixed site. Corrals and overnight campsites will be placed on previously disturbed or bare ground rather than undisturbed areas where possible. All traps and corrals will be removed when no longer needed.

Traps will not be set in areas where native animals might be injured. Fences will be built only as a last resort and only in areas where it is considered absolutely necessary.

All captured animals will be freeze-branded or permanently marked to identify escaped or intentionally released animals.

Where needed, clearing of brush or trees for boundary fences will be done by hand. The clearing width will be 6 feet in open brush areas and 10 feet in forested areas to provide adequate sight distance and to prevent injury to livestock or wildlife.

Minimal work will be done at each spring to ensure a dependable supply of water to wildlife. Restoration work will be designed to minimize environmental alteration and aesthetic intrusions.

When needed, water storage tanks will be placed underground to reduce visual intrusion.

Guzzler catchment aprons will be used only if flash flood potential weights against use of rock dams. They will be fenced to prevent structural damage from trampling animals.

The chemical used to remove mosquito fish will be toxic to fishes only; therefore, other aquatic organisms will not be affected. Mosquito fish are the only fish present in these areas.

Hand-cutting of tamarisk and direct application of herbicides by hand will prevent injury to native mesquite in mixed stands.

Tree-cutting will not be done during the nesting season in order to minimize disruption to nesting birds.

Plantings of native species will be made after removal of non-native plants to prevent quick regrowth of weeds. Similar planting on disturbed and regraded areas will prevent growth of weeds and reduction of soil by erosion.

Previously disturbed demonstration areas will be selected for replanting, and revegetation techniques used at pilot areas will be applied elsewhere to ensure the most effective methods.

Local native seed sources will be used to ensure replanting with genetically similar or identical indigenous stock.

Nurseries will be fenced to prevent seedling damage from trampling by people and damage by rodents and rabbits.

During construction of the boundary fence in the Sarcobatus Flat area, a botanist will be onsite to ensure that damage to *Lathyrus hitchcockianus* is minimized or avoided. Distribution of this plant has been mapped.

B. Cultural Resources

Archeological clearance surveys of proposed boundary fence alignments or portions of alignments will be done prior to installation. Areas proposed for corrals and traps will be archeologically investigated before construction.

Historic and archeological evaluation will precede spring rehabilitation and guzzler installment.

Before the removal of abandoned structures and materials, or the grading, scarification, and revegetation of old roads and disturbed areas, each site will be investigated and inventoried for potential cultural resources, especially within or near archeological or historic properties listed on or proposed for listing on the National Register of Historic Places.

Repair, restoration, or stabilization of cultural sites will be accomplished in accordance with NPS policies and in compliance with the procedures of the Advisory Council on Historic Preservation (36 CFR Part 800).

The state historic preservation officers of California and Nevada have reviewed the effects of the plan on cultural resources. A memorandum of agreement, which has been signed by both states and by the Advisory Council, became effective in August 1982.

Prior to any work efforts, springs will be inventoried by hydrologists, biologists, historians, and archeologists, who will make recommendations on how to minimize impacts on natural and cultural resources.

C. Visitors

In accordance with manufacturer's safe handling recommendations, the time of fish treatment for mosquito fish removal will be selected to coincide with a time that water is not used to irrigate a food crop. The treatment area will be monitored for 24 hours to ensure that people do not use the water and to evaluate efficiency of treatment. Treatment time will occur during low visitation to reduce visitor inconvenience. At the end of the treatment period, an oxidant will be used to remove all traces of toxicant.

D. Feral Burros

Corrals and traps will be supervised to ensure that captured animals have adequate food and water and that they do not suffer injury. Camps will be set

up at portable corrals to maintain a constant watch.

Experienced government employees will round up and transport captured animals to reduce stress and to ensure humane treatment of the animals.

Schedules for transporting animals from trap sites to portable corrals will be arranged to minimize stress on animals, and gathering activities will be scheduled to avoid overloading the capacity of the central holding facility.

The central holding facility will be constructed to prevent overcrowding and stress. It will be large enough to handle 800 to 1,000 animals, and the arrangement of corrals will allow for separation of jacks from pregnant jennies, and jennies with foals from other animals.

Veterinarian services will be available at a central facility to ensure that animals receive proper care.

To ensure coordination of a complex plan and avoidance of stress to captured animals, a program review committee of National Park Service, Bureau of Land Management, and representatives from each of the participating animal protection groups will meet regularly and as needed to coordinate activities and work plans.

To prevent accidental disease transmission to remaining burros, horses, and native wildlife, no captured burros will be returned to monument lands.

IV. Rationale for the Decision

Significant public controversy was generated over the preferred alternative contained in the *Draft Environmental Impact Statement*. In addition to comments received at two public meetings attended by 75 persons, about 230 comments were received on the draft statement. As a result of this controversy, the National Park Service met with a number of animal protection groups to seek a more acceptable plan. These discussions eventually led to the development of a memorandum of agreement between the National Park Service and a coalition of animal protection groups. From this agreement, the final plan has been developed.

Twenty-nine written and telephone comments were received on the final plan and environmental statement between November 3, 1982 and January 10, 1983. There were 4 Federal, 1 state (Nevada Clearinghouse consolidated response), 1 county, 5 organizations, and 18 individual responses. No comments were received from California agencies or the state clearinghouse. Two individuals opposed the plan; all other individuals and organizations selected (preferred) or supported the plan.

During the comment period, the National Park Service requested formal consultation pursuant to Section 7 on endangered species from the U.S. Fish and Wildlife Service. The biological opinion of the U.S. Fish and Wildlife Service documenting the fact that the plan, as proposed, will promote conservation of the endangered Devils Hole pupfish is on file.

Following review of the document by the California and Nevada state historic preservation officers, memorandums of agreement with both states regarding management of cultural resources were approved.

Dated: February 19, 1983.

Howard H. Chapman,

Regional Director, Western Region, National Park Service.

BILLING CODE 4310-70-M

INTERSTATE COMMERCE COMMISSION

[Ex Parte No. 387]

Exemptions for Contract Tariffs; Ogilvie

AGENCY: Interstate Commerce Commission.

ACTION: Notice of Provisional Exemptions.

SUMMARY: Provisional exemptions are granted under 49 U.S.C. 10505 from the notice requirements of 49 U.S.C. 10713(e), and the below-listed contract tariffs may become effective on one day's notice. These exemptions may be revoked if protests are filed.

DATES: Protests are due within 15 days of publication in the **Federal Register.**

ADDRESS: An original and 6 copies should be mailed to: Office of the Secretary, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT:

Douglas Galloway, (202) 275-7278

or

Tom Smerdon, (202) 275-7277.

SUPPLEMENTARY INFORMATION: The 30-day notice requirement is not necessary in these instances to carry out the trasportation policy of 49 U.S.C. 10101a or to protect shippers from abuse of market power; moreover, the transaction is of limited scope. Therefore, we find that the exemption requests meet the requirements of 49 U.S.C. 10505(a) and are granted subject to the following conditions:

These grants neither shall be constued to mean that the Commission has approved the contracts for purposes of 49 U.S.C. 10713(e) not that the Commission is deprived of jurisdiction to institute a proceeding on its own initiative or on complaint, to review these contracts and to determine their lawfulness

Sub-No.	Name of Railroad, Contract Number, and Specifics	Review Board [1]	Decided date
835	Richard Ogilvie, Trustee for Property of Chicago, Milwaukee, St. Paul and Pacific Railroad Co., ICC-MILW-C-0032-A, Supplement 1, (Sodium carbonate)	2	2-28-83

BILLING CODE 7035-01-M

[Ex Parte No. MC-43]

Lease and Interchange of Vehicles by Motor Carriers

Decided: February 25, 1983.

Pacific Intermountain Express Co. (No. MC-730), Ryder Truck Lines, Inc. (No. MC-2900), Customized Transportation, Inc. (No. MC-152620, Gemini Trucking, Inc. (No. MC-150934), and Pioneer Trucking, Inc. (No. MC-151707), under common control, petition for waiver of the qualifying requirements prescribed by paragraphs (c), (d), and (e) of Section 1057.22 (Exemption for trip leasing between authorized carriers) of the *Lease and Interchange of Vehicles* regulations (49 CFR Part 1057).

Background

The cited paragraphs set forth some of the conditions which must be met to qualify under § 1057.22 in order to be exempt from most of the requirements of Subpart B (General leasing requirements) and, in particular, *§ 1057.12 Written lease requirements* which among other things, under paragraph (e) requires a 30-day lease where the equipment is to be operated for the authorized carrier by the owner or an employee of the owner. The Commission recently amended § 1057.22 in Ex Parte No. MC-43 (Sub-No. 12), but paragraph (e) of the section was not affected. Its decision has been temporarily stayed by the United States Court of Appeals for the Eleventh Circuit.

Petitioners seek waiver of the essential requirements of the exemption rule. Consequently, although this petition is directed to waiver of the cited paragraphs of the trip-leasing exemption, the petition will be considered as a request for waiver of Subpart B, with the exception of paragraph (c) of § 1057.11 regarding identification of equipment requirements.

We find:

The petitioners are commonly controlled by the parent, IU International Corporation. Such control was approved in proceedings docketed Nos. MC-F-10795, MC-F-14509F, MC-F-14546F, and MC-F-14576.

Granting the petition for waiver of Subpart B (§§ 1057.11 and 1057.12) of the leasing regulations solely with respect to equipment augmented among the petitioners will permit more efficient and economical operations. This waiver will not affect the application of the leasing regulations to a lease between an owner operator and its lessor carrier.

There is no public policy consideration or goal which overrides petitioners' goal of reducing energy consumption, fuel and other costs; and a denial of the petition would offer no protection to the public while preventing the realization of the stated objectives.

It is ordered:

The petition of Pacific Intermountain Express Co. (No. MC-730), Ryder Truck Lines, Inc. (No. MC-2900), Customized Transportation, Inc. (No. MC-152620), Gemini Trucking, Inc. (No. MC-150934), and Pioneer Trucking, Inc. (No. MC-151707), for waiver of Subpart B except paragraph (c) of § 1057.11 is granted solely with respect to equipment leased among the petitioners.

By the Motor Carrier Leasing Board, Board Members J. Warren McFarland, Bernard Gaillard, and John H. O'Brien.

Agatha L. Mergenovich,

Secretary.

[FR Doc. 83-6817 Filed 3-7-83; 8:45 am]

BILLING CODE 7035-01-M

Motor Carriers; Finance Applications; Decision Notice

As indicated by the findings below, the Commission has approved the following applications filed under 49 U.S.C. 10924, 10928, 10931 and 10932.

We find:

Each transaction is exempt from section 11343 of the Interstate Commerce Act, and complies with the appropriate transfer rules.

This decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

Petitions seeking reconsideration must be filed within 20 days from the date of this publication. Replies must be filed within 20 days after the final date for filing petitions for reconsideration; any interested person may file and serve a reply upon the parties to the proceeding. Petitions which do not comply with the relevant transfer rules at 49 CFR 1181.4 may be rejected.

If petitions for reconsideration are not timely filed, and applicants satisfy the conditions, if any, which have been imposed, the application is granted and they will receive an effective notice. The notice will recite the compliance requirements which must be met before the transferee may commence operations.

Applicants must comply with any conditions set forth in the following decision-notices within 20 days after publication, or within any approved extension period. Otherwise, the decision-notice shall have no further effect.

It is ordered:

The following applications are approved, subject to the conditions stated in the publication, and further subject to the administrative requirements stated in the effective notice to be issued hereafter.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035–01–M

Motor Carriers; Decisions; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (except fitness-only); Motor Common Carriers of Passengers (public interest); Freight Forwarders; Water Carriers; Household Goods Brokers. The following applications for motor common or contract carriers of property, water carriage, freight forwarders, and household goods brokers are governed by Supart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common carriage of passengers, filed on or after November 19, 1982, are governed by Subpart D of 49 CFR Part 1160, published in the **Federal Register** on November 24, 1982 at 47 FR 53271. For compliance procedures, see 49 CFR 1160.86. Carriers operating pursuant to an intrastate certificate also must comply with 29 U.S.C. 10922(c)(2)(E). Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E. In addition to fitness grounds, these applications may be opposed on the grounds that the transportation to be authorized is not consistent with the public interest.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations.

We make an additional preliminary finding with respect to each of the following types of applications as indicated: common carrier of property—that the service proposed will serve a useful public purpose, responsive to a public demand or need; water common carrier—that the transportation to be provided under the certificate is or will be required by the public convenience and necessity; water contract carrier, motor contract carrier of property, freight forwarder, and household goods broker—that the transportation will be consistent with the public interest and the transportation policy of section 10101 of chapter 101 of Title 49 of the United States Code.

These presumptions shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act or 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication (or, if the application later becomes unopposed), appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Agatha L. Mergenovich,

Secretary.

Note.— All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract." Applications filed under 49 U.S.C. 10922(c)(2)(B) to operate in intrastate commerce over regular routes as a motor common carrier of passengers are duly noted.

Please direct status inquiries to Team 4 at (202) 275–7669.

Volume No. OP4–114

Decided: February 28, 1983.

By the Commission, Review Board No. 2, Members Carleton, Williams, and Ewing.

MC 166286, filed February 15, 1983. Applicant: REFRIGERATED FOOD TRANSPORT, INC., 28090 Robinson Canyon Rd., Carmel, CA 93923. Representative: Lawrence Marquette, P.O. Box 629, Carmel Valley, CA 93924, (408) 625–2031. Transporting, (1) for or on behalf of the United States Government, *general commodities* (except used household goods, hazardous or secret materials, and sensitive weapons and munitions); (2) *shipments weighing 100 pounds or less* if transported in a motor vehicle in which no one package exceeds 100 pounds; (3) *food and other edible products and byproducts intended for human consumption* (except alcoholic beverages and drugs), *agricultural limestone and fertilizers, and other soil conditioners* by the owner ot the motor vehicle in such vehicle; (4) *used household goods* for the account of the United States Government incident to the performance of pack-and-crate service on behalf of the Department of Defense, between points in the U.S. (except AK and HI); (5) As a *broker of general commodities* (except household goods), between points in the U.S.; and (6) *general commodities* (except classes A and B explosives, household goods and commodities in bulk), between points in the U.S. (except AK and HI).

Note.— Because this application in Part (6) includes issues subject to a finding of public convenience and necessity, as well as fitness only, in Parts 1 through 5 it will be published in two volumes of this Federal Register issue. Parts 1 through 5 will be published in VOL 111. Part 6 will be published in VOL 114.

BILLING CODE 7035–01–M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (fitness-only); Motor Common Carriers of Passengers (fitness-only); Motor Contract Carriers of Passengers; Property Brokers (other than household goods). The following applications for motor common or contract carriage of property and for a broker of property (other than household goods) are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** on December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common or contract carriage of passengers filed on or after November 19, 1982, are governed by Subpart D of the Commission's Rules of Practice. See 49 CFR Part 1160, Subpart D, published in the **Federal Register** on November 24, 1982, at 49 FR 53271. For compliance procedures, see 49 CFR 1160.86. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E.

These applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with the appropriate statutes and Commission regulations.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce, over irregular routes unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract."

Please direct status inquiries to Team 2, (202) 275–7030.

Volume No. OP2–063

Decided: February 25, 1983.

By the Commission, Review Board No. 1, Members Parker, Chandler, and Fortier.

MC 166052, filed February 2, 1983. Applicant: H. WILLIAMS BUS RENTAL AND TOURS, 400 Bagley St., Detroit, MI 48226. Representative: Robert J. AGENCY: Interstate Commerce Commission.

ACTION: Notice of intent to prepare an environmental impact statement and statement of energy impact and proposed scope.

SUMMARY: On May 17, 1978 (43 FR 22151), the Commission instituted a proceeding in Ex Parte No. 347, the purpose of which was to establish freight rate guidelines for railroad movements of western coal. The scope of that proceeding subsequently was expanded to include nationwide coal freight rates. Recently, the Commission issued for this proceeding a revised notice of proposed policy (48 FR 6362, February 28, 1983), which should be read in conjunction with this notice. It has been determined that this proceeding could have potentially significant impacts on the quality of the human environment and energy efficency and consumption. Accordingly, consistent with applicable provisions of the National Environmental Policy Act of 1969, and the Energy Policy and Conservation Act of 1975, an environmental impact statement and statement of energy impact will be prepared.

Comments: Interested persons are encouraged to comment in writing on the proposed scope of the study (see "SUPPLEMENTARY INFORMATION," below), particularly for the purpose of identifying and/or refining pertinent issues. Written comments should be mailed to: Section of Energy and Environment, Room 4143, Interstate Commerce Commission, 12th Street and Constitution Ave., NW., Washington, D.C. 20423.

DATES: Written comments should be filed at the above address on or before April 7, 1983.

FOR FURTHER INFORMATION CONTACT: Carl Bausch or Robert Maestro at (202) 275-0600.

SUPPLEMENTARY INFORMATION: We have determined that the establishment of new maximum rate guidelines may have potentially significant impacts on the environment if rail rates for coal increase to a point where electric-generating utilities shift to other transportation modes or alternative fuels, or delay or cancel conversions to coal-fired plants. For example, the utilities might:

(a) Employ for the movement of needed coal other transportation modes, such as barge, truck or coal slurry pipeline;

(b) Rely to a greater extent on fuel sources other than coal, such as nuclear power;

(c) Build, delay, or cancel new generating facilities, or purchase power from elsewhere;

(d) Convert or delay conversion to coal-fired generating facilities; and

(e) Purchase coal from sources closer to generating facilities or from foreign markets.

Such decisions might affect environmentally sensitive areas, including air quality, safety, noise levels, energy consumption, wildlife, and water quality in major geographic regions of the United States. Accordingly, we believe it necessary to study further (and receive public comments on) exactly what impact our proposed coal rate guidelines will have on energy and the environment. Furthermore, we will examine and hope to receive suggestions on how to minimize any adverse effects.

The environmental document envisioned here will address the likely impacts of the Commission's action under various rate-level scenarios. A no-action alternative, as well as the effects of phasing to different rate levels, also will be examined. The study will focus on effects within the electric-generating utility industry only, since that industry, for which sufficient data exists, may be most substantially affected. Additionally, the document will consider the effect of the proposed action on potential overseas demand for domestic coal.

The analysis will not be site-specific, nor can it be. To a large extent, any impacts will result from changes brought about by electric-generating utilities' responses to this proceeding. While such responses cannot be known in advance, they may be fairly predicted with the assistance of computer models which will be used in this study.

Models presently contemplated for use in this study include the Department of Energy's International Coal Trade Model, Coal Supply and Transportation Model, and Intermediate Forecast System Model. Each of these models will be used to simulate annual coal freight rate increases of 5, 10, and 15 percent over time. Additionally, the models will be used to simulate immediate coal freight rate increases of 50, 75, 100, and 150 percent for purposes of projecting environmental impacts in 1990 and beyond.

It is anticipated that these models will produce, among other things, estimates of regional coal production, modal

transportation shifts, and the quantity and quality of coal consumed. They also will estimate the United States' market share of world coal shipments. Incremental changes in data for each model run will provide the bases for projections of environmental impacts associated with alternative rate scenarios.[1]

There are undoubtedly other computer models which, for proprietary or other reasons, cannot be made available to us. Nevertheless, we would welcome the submission, at the earliest practicable time, of concisely documented predictive data from such models. Model runs should be based on input substantially similar to that outlined above. Any data submitted should fully explain deviations and also include an explanation of the major assumptions contained in each model.

Comments are solicited, particularly with respect to the following:

(1) Specifically, what environmental and energy impacts will arise from the proposed action?

(2) Are there any ways to minimize any potentially significant adverse impacts on energy and the environment, assuming that the proposed coal rate guidelines are adopted?

(3) Are there realistic alternatives to the proposed action (*e.g.*, a different phase-in) which would mitigate adverse environmental and energy impacts while assisting the railroads to attain revenue adequacy?

(4) Is there another reasonable analytical approach better suited to predicting environmental and energy impacts associated with the proposed action? Please be specific.

(5) What are the most reliable data sources for purposes of developing quantifiable environmental and energy impacts associated with (a) movement of coal by rail and by alternative transportation modes, and (b) use of coal and use of alternative fuels?

(6) Is the importation of foreign coal by the electric-generating utility industry a realistic utility response to increases in the delivered price of domestic coal? What magnitude of delivered price increases might prompt importation?

(7) Are there perceptible market constraints which would limit the percentage increases in coal freight rates irrespective of the percentage increases authorized by the proposed action? Please identify and explain. How might the existence of any such constraints affect electric-generating utility industry responses?

(8) Is eastern coal technologically and economically substitutable for western coal in existing coal-burning electric-generating facilities? Could widespread substitution of eastern coal for western coal be accomplished within the framework of existing air quality standards? To what extent might the upper limits of such standards be approached? Please supply relevant data.

(9) What are the comparative environmental impacts of nuclear versus coal-fired electric generation when considered in the context of their respective fuel cycles? Please supply relevant data.

(10) How might the proposed action and alternatives affect other important considerations such as tax initiatives or incentives, export coal policy, and the like?

Decided: February 15, 1983.

By the Commission, Chairman Taylor, Vice Chairman Sterrett, Commissioners Andre, Simmons, and Gradison.

Agatha L. Mergenovich,

Secretary.

[FR Doc. 83-5816 Filed 3-7-83; 8:45 am]

BILLING CODE 7035-01-M

[1] These models will likely overestimate the energy and environmental impacts of our proposed rate policy because they predict how coal markets would respond to specified *average* increases in coal transportation rates. Our proposed policy does not, however, require carriers to increase rail rates to each shipper by the specified average; rather, it permits differential rate increases based on the carriers' estimate of individual utilities' demand elasticities. We request comments on the significance of the potential overestimates which result from use of these models, and on how best to compensate for them.

INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

Agency for International Development

[Redelegation of Authority No. 99.1.201]

Mission Directors and A.I.D. Principal Officers, Africa; Redelegation of Authority Regarding Contracting Functions

Pursuant to the authority delegated to me as Director, Office of Contract Management, under Redelegation of Authority No. 99.1, from the Assistant to the Administrator for Management dated May 1, 1973 (38 FR 12836), as amended, I hereby redelegate to the Mission Directors or A.I.D. Principal Officers for the following countries the authorities listed below:

Countries

Benin
Botswana
Burundi
Cameroon
Cape Verde
Central Africa Republic
Chad
Comoros
Congo
Djibouti
Ethiopia
The Gambia
Ghana
Guinea
Guinea-Bissau
Kenya
Lesotho
Liberia
Madagascar
Malawi
Mali
Mauritania
Mauritius
Mozambique
Niger
Nigeria
Principe
Rwanda
Sao Tome
Senegal
Seychelles
Sierra Leone
Somalia
Sudan
Swaziland
Tanzania
Togo
Uganda
Upper Volta
Zaire
Zambia
Zimbabwe

Authorities

1. To sign U.S. Government contracts (including nonpersonal services contracts with individuals for the services of the individual alone), cooperative agreements, grants (other than grants to foreign governments or agencies thereof), or amendments thereto provided that the aggregate amount of each individual contract, cooperative agreement, or grant does not exceed $100,000 or local currency equivalent.

2. To sign personal services contracts provided the aggregate amount of each individual contract does not exceed $250,000.

3. To make findings and determinations with respect to advance payments to nonprofit organizations that collect no fee for services including those financed by Federal Reserve letters of credit, and to approve the contract, cooperative agreement, and grant provisions relating to such advance payments.

4. To approve advances under nonpersonal services contracts with individuals.

5. To sign Operational Program Grants (OPGs) to U.S. private voluntary organizations (PVOs), as defined in Appendix 4B, Chapter 4, AID Handbook 3, *Project Assistance,* and in accordance with the procedures of Chapter 4, AID Handbook 13, *Grants,* on the following basis:

(a) Such OPG's shall not exceed $1,000,000 for the life of project;

(b) Each OPG shall constitute assistance; and

(c) The post must be advised by AID/W, prior to signing the OPG that Congress has been notified and funds have been allotted;

(d) The requirements set out above are in addition to any requirements imposed by Redelegation of Authority 133.4 and Africa Bureau Delegation of Authority 140.

The authorities delegated in 1, 2, and 3 above may be redelegated in writing, in whole or in part, by said Mission Director or AID Principal Officer at his/

her discretion to the person or persons designated by the Mission Director or AID Principal Officer as Contracting Officer. Such redelegation shall remain in effect until such designated person or persons ceases to hold the office of Contracting Officer or until the redelegation is revoked by the Mission Director or AID Principal Officer, whichever shall first occur. The authority so redelegated by the Mission Director or AID Principal Officer, may not be further redelegated.

The authorities delegated in 4 and 5 above are not redelegable.

The authorities delegated herein are to be exercised in accordance with regulations, procedures, and policies established or modified and promulgated within A.I.D. and are not in derogation of the authority of the Director of the Office of Contract Management to exercise any of the functions herein redelegated.

The authorities herein redelegated may be exercised by duly authorized persons who are performing the functions of the Mission Director or A.I.D. Principal Officer in an acting capacity.

The following Redelegations of Authority are hereby revoked:

1. Redelegation of Authority No. 99.1.10 (38 FR 27627), dated October 1, 1973, as amended.
2. Redelegation of Authority No. 99.1.11 (38 FR 27627), dated October 1, 1973, as amended.
3. Redelegation of Authority No. 99.1.12 (38 FR 27627), dated October 1, 1973, as amended.
4. Redelegation of Authority No. 99.1.28 (38 FR 29096 and 29097), dated October 1, 1973, as amended.
5. Redelegation of Authority No. 99.1.52 (38 FR 29095 and 29096), dated October 1, 1973, as amended.
6. Redelegation of Authority No. 99.1.54 (38 FR 29096), dated October 1, 1973, as amended.
7. Redelegation of Authority No. 99.1.57 (39 FR 41287), dated Nobember 11, 1974, as amended.
8. Redelegation of Authority No. 99.1.58 (39 FR 41287), dated November 11, 1974, as amended.
9. Redelegation of Authority No. 99.1.59 (39 FR 41287), dated November 11, 1974, as amended.
10. Redelegation of Authority No. 99.1.60 (39 FR 41286), dated November 11, 1974, as amended.
11. Redelegation of Authority No. 99.1.61 (39 FR 41287), dated November 11, 1974, as amended.
12. Redelegation of Authority No. 99.1.62 (39 FR 41286), dated November 11, 1974, as amended.
13. Redelegation of Authority No. 99.1.63 (39 FR 41286), dated November 11, 1974, as amended.
14. Redelegation of Authority No. 99.1.94 (42 FR 66194), dated November 22, 1977, as amended.
15. Redelegation of Authority No. 99.1.99 (43 FR 34856), dated July 27, 1978, as amended.
16. Redelegation of Authority No. 99.1.100 (43 FR 34856), dated July 27, 1978, as amended.
17. Redelegation of Authority No. 99.1.102 (43 FR 51887), dated October 1, 1978, as amended.
18. Redelegation of Authority No. 99.1.103 (43 FR 51886), dated October 1, 1978, as amended.
19. Redelegation of Authority No. 99.1.104 (43 FR 51887), October 1, 1978, as amended.
20. Redelegation of Authority No. 99.1.109 (45 FR 9141), dated November 15, 1979, as amended.
21. Redelegation of Authority No. 99.1.110 (45 FR 9140 and 9141), dated November 15, 1979, as amended.
22. Redelegation of Authority No. 99.1.111 (45 FR 9140), dated November 15, 1979, as amended.
23. Redelegation of Authority No. 99.1.112 (45 FR 6187 and 6188), dated January 4, 1980, as amended.
24. Redelegation of Authority No. 99.1.113 (45 FR 14719 and 14720), dated February 15, 1980, as amended.
25. Redelegation of Authority No. 99.1.116 (46 FR 2408 and 2409), dated December 3, 1980, as amended.
26. Redelegation of Authority No. 99.1.117 (46 FR 2409), dated September 19, 1979, as amended.
27. Redelegation of Authority No. 99.1.118 (46 FR 2408), dated December 3, 1980, as amended.
28. Redelegation of Authority No. 99.1.96 (43 FR 52569), dated November 1, 1978, as amended.

Any official actions taken prior to the effective date hereof by officers duly authorized pursuant to delegations revoked hereunder are hereby continued in effect, according to their terms until modified, revoked or superseded by action of the officer to whom I have delegated relevant authority in this delegation.

This redelegation of authority is effective on date of signature.

Dated: February 17, 1983.

Hugh L. Dwelley,

Director, Office of Contract Management.

BILLING CODE 8116-01-M

[Redelegation of Authority No. 99.1.200]

Mission Directors and A.I.D. Principal Officers, Asia; Redelegation of Authority Regarding Contracting Functions

Pursuant to the authority delegated to me as Director, Office of Contract Management, under Redelegation of Authority No. 99.1, from the Assistant to the Administrator for Management dated May 1, 1973 (38 FR 12830), as amended, I hereby redelegate to the Mission Directors or A.I.D. Principal Officers in the following countries the authorities listed below:

Countries

Bangladesh	India
Burma	Sri Lanka
Fiji	Thailand

Authorities

1. To sign U.S. Government contracts (including nonpersonal service contracts with individuals for the services of the individual alone), cooperative agreements, grants (other than grants to foreign governments or agencies thereof), or amendments thereto provided that the aggregate amount of each individual contract, cooperative agreement, or grant does not exceed $100,000 or local currency equivalent.

2. To sign personal services contracts provided the aggregate amount of each individual contract does not exceed $250,000.

3. To make findings and determinations with respect to advance payments to nonprofit organizations that collect no fee for services including those financed by Federal Reserve letters of credit, and to approve contract, cooperative agreement, and grant provisions relating to such advance payments.

4. To approve advances under nonpersonal services contracts with individuals.

5. To sign Operational Program Grants (OPGs) to U.S. private voluntary organizations (PVOs), as defined in Appendix 4B, Chapter 4, AID Handbook 3, *Project Assistance*, and in accordance with the procedures of Chapter 4, AID Handbook 13, *Grants*, on the following basis:

(a) Such OPG's shall not exceed $1,000,000 for the life of project;

(b) Each OPG shall constitute assistance; and

(c) The post must be advised by AID/W, prior to signing the OPG that Congress has been notified and funds have been allotted.

The authorities delegated in 1, 2, and 3 above may be redelegated in writing, in

whole or inpart, by said Mission Director or A.I.D. Principal Officer at his/her discretion to the person or persons designated by the Mission Director or A.I.D. Principal Officer as Contracting Officer. Such redelegation shall remain in effect until such designated person or persons ceases to hold the office of Contracting Officer or until the redelegation is revoked by the Mission Director or A.I.D. Principal Officer, whichever shall first occur. The authority so redelegated by the Mission Director or A.I.D. Principal Officer, may not be further redelegated.

The authorities delegated in 4 and 5 above are not redelegable.

The authorities delegated herein are to be exercised in accordance with regulations, procedures, and policies established or modified and promulgated within A.I.D. and are not in derogation of the authority of the Director of the Office of Contract Management to exercise any of the functions herein redelegated.

The authorities herein redelegated may be exercised by duly authorized persons who are performing the functions of the Mission Director or A.I.D. Principal Officer in an acting capacity.

The following Redelegations of Authority are hereby revoked:

1. Redelegation of Authority No. 99.1.15 (38 FR 29338), dated October 1, 1973, as amended.
2. Redelegation of Authority No. 99.1.22 (38 FR 27849), dated October 1, 1973, as amended.
3. Redelegation of Authority No. 99.1.65 (40 FR 2596), dated January 14, 1975, as amended.
4. Redelegation of Authority No. 99.1.73 (40 FR 45452), dated September 19, 1975, as amended.
5. Redelegation of Authority No. 99.1.93 (42 FR 64165), dated November 22, 1977, as amended.
6. Redelegation of Authority No. 99.1.108 (44 FR 45275), dated July 20, 1979, as amended.
7. Redelegation of Authority No. 99.1.95 (43 FR 24927 and 24928), dated May 26, 1978, as amended.
8. Redelegation of Authority No. 99.1.106 (44 FR 2051), dated December 18, 1978, as amended.
9. Redelegation of Authority No. 99.1.21 (38 FR 27849), dated October 1, 1973, as amended.
10. Redelegation of Authority No. 99.1.101 dated September 18, 1978, as amended.

Any official actions taken prior to the effective date hereof by officers duly authorized pursuant to delegations revoked hereunder are hereby continued in effect, according to their terms until modified, revoked, or superseded by action of the officer to whom I have delegated relevant authority in this delegation.

This redelegation of authority is effective on date of signature.

Dated February 23, 1983.

Hugh L. Dwelley,

Director, Office of Contract Management.

[FR Doc. 83-6722 Filed 3-4-83; 8:45 am]

BILLING CODE 8116-01-M

[Redelegation of Authority No. 99.1.202]

Mission Directors and A.I.D. Principal Officers, Latin America/Caribbean; Redelegation of Authority Regarding Contracting Functions

Pursuant to the authority delegated to me as Director, Office of Contract Management, under Redelegation of Authority No. 99.1, from the assistant to the Administrator for Management dated May 1, 1973 (38 FR 12836), as amended, I hereby redelegate to the Mission Directors or A.I.D. Principal Officers in the following countries or for the following regional programs the authorities listed below:

Countries

Belize
Bolivia
Costa Rica
Dominican Republic
Ecuador
El Salvador
Guatemala
Guyana
Haiti
Honduras
Jamaica
Mexico
Nicaragua
Panama
Paraguay
Peru
Regional Development Office for the Caribbean
Regional Office of Central American Programs/Guatemala

Authorities:

1. To sign U.S. Government contracts (including nonpersonal service contracts with individuals for the services of the individual alone), cooperative agreements, grants (other than grants to foreign governments or agencies thereof), or amendments thereto provided that the aggregate amount of each individual contract, cooperative agreement, or grant does not exceed $100,000 or local currency equivalent.
2. To sign personal services contracts provided the aggregate amount of each individual contract does not exceed $250,000.
3. To make findings and determinations with respect to advance payments to nonprofit organizations that collect no fee for services including those financed by Federal Reserve letters of credit, and to approve the contract, cooperative agreement, and grant provisions relating to such advances payments.
4. To approve advances under nonpersonal services contracts with individuals.
5. To sign Operational Program Grants (OPGs) to U.S. private voluntary organizations (POVs), as defined in Appendix 4B, Chapter 4, AID Handbook 3, *Project Assistance*, and in accordance with the procedures of Chapter 4, AID Handbook 13, *Grants*, on the following basis:

(a) Such OPG's shall not exceed $1,000,000 for the life of project;

(b) Each OPG shall constitute assistance; and

(c) The post must be advised by AID/W, prior to signing the OPG that Congress has been notified and funds have been allotted.

The authorities delegated in 1, 2, and 3, above may be redelegated in writing, in whole or in part, by said Mission Director or A.I.D. Principal Officer at his/her discretion to the person or persons designated by the Mission Director or A.I.D. Principal Officer as Contracting Officer. Such redelegation shall remain in effect until such designated person or persons ceases to hold the office of Contracting Officer or until the redelegation is revoked by the Mission Director or A.I.D. Principal Officer, whichever shall first occur. The authority so redelegated by the Mission Director or A.I.D. Principal Officer, may not be further redelegated.

The authorities delegated in 4 and 5 above are not redelegable.

The authorities delegated herein are to be exercised in accordance with regulations, procedures, and policies established or modified and promulgated within A.I.D. and are not in derogation of the authority of the Director of the Office of Contract Management to exercise any of the functions herein redelegated.

The authorities herein redelegated may be exercised by duly authorized persons who are performing the functions of the Mission Director or A.I.D. Principal Officer in an acting capacity.

The following Redelegations of Authority are hereby revoked:

1. Redelegation of Authority No. 99.1.20 (38 FR 27848), dated October 1, 1973, as amended.
2. Redelegation of Authority No. 99.1.29 (38 FR 29096), dated October 1, 1973, as amended.
3. Redelegation of Authority No. 99.1.31 (38 FR 29095), dated October 1, 1973, as amended.
4. Redelegation of Authority No. 99.1.34 (38 FR 29094), dated October 1, 1973, as amended.

5. Redelegation of Authority No. 99.1.35 (38 FR 28852), dated October 1, 1973, as amended.

6. Redelegation of Authority No. 99.1.37 (38 FR 29236), dated October 1, 1973, as amended.

7. Redelegation of Authority No. 99.1.38 (38 FR 28851), dated October 1, 1973, as amended.

8. Redelegation of Authority No. 99.1.39 (38 FR 29236), dated October 1, 1973, as amended.

9. Redelegation of Authority No. 99.1.40 (38 FR 29499), dated October 1, 1973, as amended.

10. Redelegation of Authority No. 99.1.41 (38 FR 29236), dated October 1, 1973, as amended.

11. Redelegation of Authority No. 99.1.42 (38 FR 29499), dated October 1, 1973, as amended.

12. Redelegation of Authority No. 99.1.43 (38 FR 29499), dated October 1, 1973, as amended.

13. Redelegation of Authority No. 99.1.44 (38 FR 29237), dated October 1, 1973, as amended.

14. Redelegation of Authority No. 99.1.45 (38 FR 29237), dated October 1, 1973, as amended.

15. Redelegation of Authority No. 99.1.46 (38 FR 29237), dated October 1, 1973, as amended.

16. Redelegation of Authority No. 99.1.47 (38 FR 29500), dated October 1, 1973, as amended.

17. Redelegation of Authority No. 99.1.48 (38 FR 29237 and 29238), dated October 1, 1973, as amended.

18. Redelegation of Authority No. 99.1.49 (38 FR 29498), dated October 1, 1973, as amended.

19. Redelegation of Authority No. 99.1.77 (41 FR 15678), dated April 5, 1976, as amended.

20. Redelegation of Authority No. 99.1.80 (41 FR 36044), dated August 19, 1976, as amended.

21. Redelegation of Authority No. 99.1.92 (42 FR 64164 and 64165), dated October 1, 1977, as amended.

22. Redelegation of Authority No. 99.1.95 (43 FR 24927 and 24928), dated May 26, 1978, as amended.

Any official actions taken prior to the effective date hereof by officers duly authorized pursuant to delegations revoked hereunder are hereby continued in effect, according to their terms until modified, revoked, or superseded by action of the officer to whom I have delegated relevant authority in this delegation.

This redelegation of authority is effective on date of signature.

Dated: February 23, 1983.

Hugh L. Dwelley,

Director, Office of Contract Management.

BILLING CODE 8116-01-M

[Redelegation of Authority No. 99.1.203]

Mission directors and A.I.D. Principal Officers, Near East; Redelegation of Authority Regarding Contracting Functions

Pursuant to the authority delegated to me as Director, Office of Contract Management, under Redelegation of Authority No. 99.1, from the assistant to the Administrator for Management dated May 1, 1973 (38 FR 12836), as amended, I hereby redelegate to the Mission Directors or A.I.D. Principal Officers in the following countries the authorities listed below:

Countries

Italy	Oman
Jordan	Portugal
Lebanon	Syria
Morocco	Tunisia
	Yemen

Authorities

1. To sign U.S. Government contracts (including nonpersonal service contracts with individuals for the services of the individual alone), cooperative agreements, grants (other than grants to foreign governments or agencies thereof), or amendments thereto provided that the aggregate amount of each individual contract, cooperative agreement, or grant does not exceed $100,000 or local currency equivalent.

2. To sign personal services contracts provided the aggregate amount of each individaul contract does not exceed $250,000.

3. To make findings and determinations with respect to advance payments to nonprofit organizations that collect no fee for services including those financed by Federal Reserve letters of credit, and to approve the contract, cooperative agreement, and grant provisions relating to such advance payments.

4. To approve advances under nonpersonal services contracts with individuals.

5. To sign Operational Program Grants (OPGs) to U.S. private voluntary organizations (PVOs), as defined in Appendix 4B, Chapter 4, AID Handbook 3, *Project Assistance*, and in accordance with the procedures of Chapter 4, AID Handbook 13, *Grants*, on the following basis:

(a) Such OPG's shall not exceed $1,000,000 for the life of project;

(b) Each OPG shall constitute assistance; and

(c) The post must be advised by AID/W, prior to signing the OPG that Congress has been notified and funds have been allotted.

The authorities delegated in 1, 2, and 3 above may be redelegated in writing, in whole or in part, by said Mission Director or A.I.D. Principal Officer at his/her discretion to the person or persons designated by the Mission Director or A.I.D. Principal Officer as Contracting Officer. Such redelegation shall remain in effect until such designated person or persons ceases to hold the office of Contracting Officer or until the redelegation is revoked by the Mission Director or A.I.D. Principal Officer, whichever shall first occur. The authority so redelegated by the Mission Director or A.I.D. Principal Officer, may not be further redelegated.

The authorities delegated in 4 and 5 above are not redelegable.

The authorities delegated herein are to be exercised in accordance with regulations, procedures, and policies established or modified and promulgated within A.I.D and are not in derogation of the authority of the Director of the Office of Contract Management to exercise any of the functions herein redelegated.

The authorities herein redelegated may be exercised by duly authorized persons who are performing the functions of the Mission Director or A.I.D. Principal Officer in an acting capacity.

The following Redelegations of Authority are hereby revoked:

1. Redelegation of Authority No. 99.1.26 (38 FR 29097), dated October 1, 1973, as amended.

2. Redelegation of Authority No. 99.1.51 (38 FR 29095), dated October 1, 1973, as amended.

3. Redelegation of Authority No. 99.1.53 (38 FR 29096), dated October 1, 1973, as amended.

4. Redelegation of Authority No. 99.1.67 (40 FR 12296), dated March 1, 1975, as amended.

5. Redelegation of Authority No. 99.1.68 (40 FR 25077), dated June 1, 1975, as amended.

6. Redelegation of Authority No. 99.1.70 (40 FR 19852 and 19853), dated April 30, 1975, as amended.

7. Redelegation of Authority No. 99.1.90 (43 FR 43468), dated August 13, 1977, as amended.

8. Redelegation of Authority No. 99.1.115 (45 FR 73186), dated October 17, 1980, as amended.

9. Redelegation of Authority No. 99.1.119 (46 FR 28673), dated April 24, 1981, as amended.

10. Redelegation of Authority No. 99.1.95 (43 FR 24927 and 24928), dated May 16, 1978, as amended.

Any official actions taken prior to the effective date hereof by officers duly authorized pursuant to delegations revoked hereunder are hereby continued in effect, according to their terms until modified, revoked, or superseded by action of the officer to whom I have delegated relevant authority in this delegation.

This redelegation of authority is effective on date of signature.

Dated: February 23, 1983.

Hugh L. Dwelley,

Director, Office of Contract Management.

DEPARTMENT OF JUSTICE

Agency Forms Under Review

March 3, 1983.

OMB has been sent for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) since the last list was published. The list has all the entries grouped into new forms, revisions, or extensions. Each entry contains the following information:

(1) The name and telephone number of the Agency Clearance Officer (from whom a copy of the form and supporting documents is available); (2) The office of the agency issuing this form; (3) The title of the form; (4) The agency form number, if applicable; (5) How often the form must be filled out; (6) Who will be required or asked to report; (7) an estimate of the number of responses; (8) An estimate of the total number of hours needed to fill out the form; (9) An indication of whether Section 3504(H) of Pub. L. 96-511 applies; (10) The name and telephone number of the person or office responsible for OMB review.

Copies of the proposed forms and supporting documents may be obtained from the Agency Clearance Officer whose name and telephone number appear under the agency name. Comments and questions about the items on this list should be directed to the reviewer listed at the end of each entry and to the Agency Clearance Officer. If you anticipate commenting on a form but find that time to prepare will prevent you from submitting comments promptly, you should advise the reviewer and the Agency Clearance Officer of your intent as early as possible.

Labor Surplus Area Classifications Under Executive Orders 12073 and 10582; Additions to Annual List of Labor Surplus Areas

Correction

In FR Doc. 83-3234 appearing on page 5823 in the issue of Tuesday, February 8, 1983, make the following correction in column two. Under the heading "Additions to the Annual List of Labor Surplus Areas" the entry for Ohio should appear as follows:

Labor surplus area	Civil jurisdiction included
Ohio	
Darke County	Darke County.
Balance of Stark County	Stark County less Canton City.

BILLING CODE 1505-01-M

[Employment and Training Order No. 1-83]

Designation of Certifying Officers—Worker Adjustment Assistance

1. *Purpose.* To designate certifying officers to carry out functions required under the worker adjustment assistance provisions of the Trade Act of 1974 (29 CFR Part 90).

2. *Directives Affected.* Employment and Training Orders No. 2-81 and 2-82 are superseded.

3. *Background.* Persons designated as certifying officers are assigned responsibilities under 29 CFR Part 90; this includes the authority to determine eligibility to apply for adjustment assistance under Section 223 of the Trade Act of 1974 (19 U.S.C. 2273).

Under Secretary's Order No. 3-81, all worker adjustment assistance functions of the Secretary of Labor were delegated to the Assistant Secretary for Employment and Training, including the authority to determine eligibility of groups of workers to apply for adjustment assistance.

4. *Designation of Officials.* Officials of the Employment and Training Administration designated as certifying officials are:

a. Assistant Secretary for Employment and Training
b. Associate Assistant Secretary for Employment and Training
c. Administrator, Office of Employment Security
d. Director, Unemployment Insurance Service, UIS
e. Director, Office of Program Management, UIS
f. Deputy Director, Office of Program Management, UIS
g. Director, Office of Legislation and Actuarial Services, UIS
h. Deputy Director, Office of Legislation and Actuarial Services, UIS

5. *Effective Date.* This Order is effective on March 8, 1983.

Signed at Washington, D.C., this 22nd day of February 1983.

Albert Angrisani,

Assistant Secretary of Labor.

BILLING CODE 4510-30-M

Federal Supplemental Compensation; Change 1 to General Administration; Letter No. 2-83

Section 544 of the Surface Transportation Assistance Act of 1982 of (Pub. L. 97-424) amended the Federal Supplemental Compensation (FSC) Act of 1982 by increasing the maximum amount of FSC payable in all States. The Technical Corrections Act of 1982

(Pub L. 97–448) amended the FSC Act to specify that interstate claimants are entitled to the lesser amount of FSC payable in the agent or liable State. The Department of Labor issued implementing instructions to all State employment security agencies with Change 1 to General Administration Letter Number 2–83. Change 1 is published below.

Dated: March 2, 1983.

Albert Angrisani,

Assistant Secretary of Labor.

Dated: February 17, 1983
Expiration Date: November 30, 1983
Directive: General Administration Letter No. 2–83, Change 1
To: All State Employment security Agencies
From: Royal S. Dellinger, Acting Administrator for Regional Management
Subject: Federal Supplemental Compensation

1. *Purpose.* To provide instructions for amendments made to the Federal Supplemental Compensation Act of 1982 by Section 544 of the Highway Revenue Act of 1982, title V of the Surface Transportation Assistance Act of 1982 (Pub. L. 97–424) and by the Technical Corrections Act of 1982 (Pub. L. 97–448).

2. *References.* The Highway Revenue Act of 1982, the Technical Corrections Act of 1982, Pub. L. 97–248, UIPL 14–81, GAL 21–81, GAL 22–81, GAL 2–83, FL 9–82, RAL 2–82; the Federal-State Extended Unemployment Compensation Act, as amended; 20 CFR Part 615.

3. *Background.* GAL 2–83 provided instructions for implementing the FSC program in all States. Under this Act, eligible workers receive 50 percent of their entitlement to regular benefits up to a maximum of 6 or 8 weeks of benefits (depending on the State's insured unemployment rate), or 10 weeks of benefits in States if an extended benefit period was in effect for any week beginning on or after June 1, 1982.

Section 544 of the Highway Revenue Act of 1982 of (Pub. L. 97–424) amended the FSC Act by increasing the maximum amount of FSC payable in all States. The Technical Corrections Act (Pub. L. 97–448) amended the FSC Act to specify that interstate claimants are entitled to the lesser amount of FSC payable in the agent or liable State. No change was made in the March 31, 1983 expiration date of the FSC program.

4. *Effect of Amendments on prior issuances.* The attached instructions reflect amendments made to the FSC Act.

Instructions for implementing amendments made by the Highway Revenue Act of 1982 are effective for weeks beginning on or after January 9, 1983, and FSC claims filed for weeks beginning prior to the effective date of the amendments will be determined according to GAL 2–83, as published in the **Federal Register** on December 3, 1982.

Instructions for implementing the amendment made by the Technical Corrections Act apply to all claims for FSC, filed on or after September 12, 1982. This is because the amendment is effective as if originally included in the FSC Act.

Part II of the attachment to GAL 2–83 contains the procedures for implementing FSC. Changes to Part II of the attachment to GAL 2–83 are identified by section and subsection. Sections and subsections unchanged by this issuance will continue to apply to claims for and payment of FSC. There are no changes to Part III of GAL 2–83.

5. *Action Required.* Administrators should provide the information and instructions contained herein to the appropriate staff.

6. *Inquiries.* Direct questions to the appropriate Regional Office.

7. *Attachment.* Instructions for implementing the amendments to the Federal Supplemental Compensation Program.

[Attachment to GAL 2–83, Change 1]

Amendments to the Federal Supplemental Compensation Act of 1982—Implementing Instructions

Part I. Explanation of the Amendments

A. Amendments Made by the Highway Revenue Act of 1982

1. *Computation of Maximum FSC Benefits Payable.* The computation of the maximum FSC payable changed from 50 percent to 65 percent of the total amount of regular compensation (including dependents' allowances) payable, up to the maximum FSC payable in the State.

2. *Maximum FSC Payable.* The number of weeks of FSC payable in a State—for weeks which begin on or after January 9, 1983—increases to 10, 14, 12, 10 or 8 weeks as follows:

a. *8 Weeks.* The base level of FSC payable increased from 6 to up to 8 weeks of FSC. Eight weeks of FSC are payable in States with an extended benefit indicator rate (i.e. the most recent 13-week insured unemployment rate) of less than 3.5 percent.

b. *16 Weeks.* States in a period of "higher unemployment" pay up to 16 weeks or FSC. A period of higher unemployment begins the third week after the first week the State's extended benefit indicator rate equals or exceeds 6.0 percent and ends the third week after the first week the State's extended benefit indicator rate drops below 6.0 percent. A "higher unemployment" period must last at least 4 weeks, and may begin as early as the first week which begins on or after January 9, 1983.

c. *14 Weeks.* States which are not in a "higher unemployment" period but were in an extended benefit period any time between June 1, 1982, and the date of enactment of the amendments pay up to 14 weeks of FSC, beginning with the first week which begins on or after January 9, 1983.

d. *12 Weeks.* States in a period of "high unemployment" or which begin an extended benefit period after the date of enactment of the amendments pay up to 12 weeks of FSC. For purposes of the amendments, a "high unemployment" period begins the third week after the first week the State's extended benefit indicator rate equals or exceeds 4.5 percent but is less than 6.0 and ends the third week after the first week the State's extended benefit indicator rate drops below 4.5 percent. A State must stay in a period of "high unemployment" for a minimum of 4 weeks, except it can move to a period of "higher unemployment" at any time after one week in a "high unemployment" period or after the beginning of an extended benefit period. A "high unemployment" period may begin as early as the first week which begins on or after January 9, 1983.

e. *10 Weeks.* States which have not been in an extended benefit period since June 1, 1982 and which do not begin an extended benefit period during the life of the FSC program pay up to a maximum of 10 weeks of FSC if the State is in a period of "intermediate unemployment". A period of "intermediate unemployment" begins the third week after the first week the State's extended benefit indicator rate equals or exceeds 3.5 percent but is less than 4.5 percent and ends the third week after the first week the extended benefit indicator rate drops below 3.5 percent. A State must remain in a period of "intermediate unemployment" at least 4 weeks, but it can move to a period of "high" or "higher" unemployment at any time after 1 week in an "intermediate unemployment" period or it can move to a 12-week duration upon the beginning of a new extended benefit period. An "intermediate unemployment" period may begin as early as the first week which begins on or after January 9, 1983.

f. The additional weeks of FSC provided by the amendments apply solely to weeks of unemployment which

begin on or after the date of enactment of the amendments.

3. *Effect on Prior FSC Recipients.* The increase in weeks of FSC payable and the change in the computation of the maximum FSC payable apply to all future, current and prior FSC recipients including those who have exhausted their entitlement to FSC.

The amendments also contain a special rule which applies to prior exhaustees of FSC, as follows:

a. The weeks occurring after an individual has exhausted his or her entitlement to FSC and prior to the first week beginning on or after January 6, 1983, shall not be counted in determining the two-year limitation (from the end of the individual's recent benefit year) on payment of FSC, and

b. An individual's eligibility for additional weeks of FSC shall not be terminated or limited by reason of any event or failure to meet any eligibility requirement relating to unemployment compensation which occurs after the date of exhaustion of FSC and prior to the first week beginning on or after January 6, 1983.

4. *Modification of the Agreement.* The Secretary of Labor is required, as soon as practicable after enactment, to propose to each State a modification to the agreement entered into under the FSC Act to ptovide for payments of FSC according to these amendments. If a State fails to enter into the modified agreement within three weeks from the date the Secretary proposes the modification (i.e., the date of the Secretary's letter), the agreement to administer FSC will be considered terminated. The termination of the agreement would be effecitve with the end of the last week which ends on or before such three week period.

5. *Effective Date.* The amendments are effective for weeks beginning on or after the date of enactment. The first compensable week for which additional FSC benefits are payable is the first week beginning on or after January 9, 1983. For this purpose, periods of higher unempolyment, high unempolyment, and intermediate unemployment begin and end with calendar weeks, the same as with extended benefit periods. No change was made in the termination date of the FSC program which is for weeks of unemployment beginning after March 31, 1983.

B. Amendment Made by the Techical Corrections Act

1. *Interstate Claimants.* Individuals filing FSC claims on an interstate basis are entitled to the lesser of:

a. The maximum payable in the agent State; or

b. The maximum payable in the liable State.

2. *Effective Date.* This provision is effective as if it were originally included in the FSC Act.

II. Changes to Part II of the Attachment to GAL 1–83

A. Section A, "Definitions".

A new subsection 6 is added to Section A, *Definitions,* to read as follows.

6. "Amendments" mean the amendments made to the Federal Supplemental Compensation Act by the Highway Revenue Act of 1982 (Pub. L. 97–424) and the Technical Corrections Act of 1982 (Pub. L. 97–448).

B. Section B, "Beginning and Ending of the FSC Program"

A new paragraph is added to Section B, to read as follows:

The amendments in the Highway Revenue Act of 1982 require the Secretary of Labor, as soon as practicable after January 6, 1983, to propose to each State a modification to the agreement entered into under the FSC Act to provide for payments of FSC in accordance with the amendments. If a State fails to enter into the modified agreement within 3 weeks from the date of the Secretary's letter proposing a modification of the agreement, the agreement to administer the FSC program in the State will be terminated effective with the end of the last week which ends on or before such 3-week period.

C. Section C, "Eligibility Requirements for Federal Supplemental Compensation"

1. Subsection g, under subsection 1, *Basic Eligibility Requirements,* is amended to read as follows.

g. Have a benefit year which ended *not* more than two years prior to the beginning date of the week he/she is claiming FSC, *except* that in determining whether this two-year limitation applies, the SESA shall disregard any weeks which begin prior to the first week beginning on or after January 6, 1983, which began after an individual had exhausted his or her entitlement to FSC under the original Federal Supplemental Compensation Act.

2. The following new subsection 8 is added to Section C.

8. *Special Eligibility Rule.* An individual's eligibility for additional weeks of FSC under the amendments to the FSC Act shall not be limited or terminated by reason of any event or failure to meet any requirement of State or Federal law relating to eligibility for benefits occurring after the date of exhaustion of the individual's entitlement under the original FSC Act and prior to the first week beginning on or after January 6, 1983. The eligibility requirements to which this rule applies include, but are not limited to, any issues which might arise with respect to:

a. Separations from work;

b. Refusals of referrals to or offers of work; and

c. Ability to work and availability and active search for work.

SESAs should especially note that this rule applies only to events occurring after an individual has exhausted entitlement to FSC and prior to the week beginning on or after January 6, 1983. It does not apply to any claims for FSC filed for weeks beginning on and after January 9, 1983.

D. Section D, "Weekly Benefit Amount"

There are no changes to Section D, *Weekly Benefit Amount.*

E. Section E, "Maximum FSC Benefits Payable"

1. Subsection 1, *Accounts,* is amended to read as follows:

1. *Accounts.* The SESA will establish a separate FSC account for each eligible individual. The amount of FSC in the individual's account will be the lesser of:

a. 65 percent of the total entitlement to regular benefits (including dependents' allowances) payable to the individual with respect to the most recent benefit year in which the individual received regular benefits, or

b. The maximum FSC benefits payable in the State.

When the 65 percent of total entitlement is not an even dollar amount, the State may round to the nearest dollar, depending upon State law, regulations, or practice.

The SESA must redetermine any individual's account which was previously determined on the basis of the prior 50 percent rule, using 65 percent of the total entitlement to regular benefits. In no case will this redetermined FSC amount exceed the maximum FSC payable in the State. Each individual affected by the change shall be given a written notice of redetermination.

2. Subsection 2, *"Maximum FSC payable in a State",* is amended to read as follows:

2. *Maximum FSC Payable in a State*

a. *Eight Weeks.* The base level of FSC payable is up to eight weeks of FSC benefits regardless of the State's extended benefit indicator rate. A State may pay up to a maximum of 10, 12, 14

or 16 weeks, depending on the State's extented benefit indicator rate or EB status, as specified below.

b. *Sixteen Weeks.* States which are in a period of "higher unemployment" will pay up to 16 weeks of FSC benefits. To determine a period of "higher unemployment", the State's extended benefit indicator rate is used. A higher unemployment period begins the third week after the first week the extended benefit indicator rate equals or exceeds 6.0 percent. A higher unemployment period ends the third week after the first week the extended benefit indicator rate drops below 6.0 percent. However, a "higher unemployment period" must last at least four weeks.

c. *Fourteen Weeks.* States which were in an extended benefit period on or after June 1, 1982, but prior to January 6, 1983 will pay up to a maximum of 14 weeks of FSC regardless of the current extended benefit indicator rate, unless the State is in a period of "higher unemployment." During periods of "higher unemployment," the State will pay up to a maximum of 16 weeks of FSC. Once a State is no longer in a period of "higher unemployment," as specified above, it will pay up to a maximum of 14 weeks of FSC.

d. *Twelve Weeks.* States which were not in an extended benefit period at any time between June 1, 1982 and January 6, 1983, but are in a period of "high unemployment", or begin an extended benefit period after January 6, 1983, will pay up to 12 weeks of FSC benefits. A "high unemployment" period begins the third week after the first week the extended benefit indicator rate equals or exceeds 4.5 percent but is less than 6.0 percent. A high unemployment period ends the third week after the first week the extended benefit indicator rate drops below 4.5 percent. However, a "high unemployment" period must last at least 4 weeks, unless a State moves to a period of "higher unemployment." A State may change from a period of "high unemployment" to a period of "higher unemployment" after one week.

e. *Ten Weeks.* States which are not in a period of "high" or "higher" unemployment and were not in an extended benefit period at any time since June 1, 1982 and do not begin an extended benefit period during the life of the FSC program, will pay up to 10 weeks of FSC, if the State is in a period of "intermediate unemployment". An "intermediate unemployment period" begins the third week after the first week the extended benefit indicator rate equals or exceeds 3.5 percent but is less than 4.5 percent. An "intermediate unemployment period" ends the third week after the first week the extended benefit indicator rate drops below 3.5 percent or exceeds 4.5 percent. An "intermediate unemployment period" must last at least 4 weeks, unless the State moves to a period of "high" or "higher" unemployment. A State may move to a period of "high" or "higher" unemployment after one week.

There is no minimum "off" period for States which drop below the 3.5, 4.5, or 6.0 percent trigger rates. For example, a State paying up to 16 weeks of FSC may drop to 12 or 14 weeks (depending on its prior EB status) and the following week, if its extended benefit indicator rate equals or exceeds the 6.0 percent rate, again be in a period of "higher" unemployment during which up to 16 weeks of FSC are payable.

Determinations of the beginning and ending of intermediate, high and higher unemployment periods shall be made by the head of the State agency, according to these instructions and 20 CFR Part 615. Public notice shall be given of any such determination, and each individual affected by the change shall be given a written notice.

Note.—There are no changes to subsection 3, *Computation of FSC payable based on a new benefit year.*

3. Subsection 4, *"Beginning of an Extended Benefit Period After the Effective Date of the Act,"* is amended to read as follows:

4. *Beginning of An Extended Benefit Period.* States may begin an extending benefit period after the effective date of the amendments. The beginning of an extended benefit period may affect the maximum weeks of FSC payable, depending on whether the State was in an extended benefit period after June 1, 1982.

If a State was in an extended benefit period at any time between June 1, 1982, and January 6, 1983, and again begins paying EB after January 6, 1983, the State will continue to pay up to 14 weeks of FSC, unless its extended benefit indicator rate equals or exceeds 6.0 percent. If its extended benefit indicator rate equals or exceeds 6.0 percent, the State will be in a period of "higher unemployment" and will pay up to 16 weeks of FSC. However, if a State was not in an extended benefit period between June 1, 1982 and January 6, 1983, and begins an extended benefit period thereafter, the State will begin paying up to 12 weeks of FSC, unless the State is in a period of "higher unemployment" which will raise the maximum amount of FSC payable to 16 weeks.

When an extended benefit period begins, the SESA must, before paying FSC for a week of unemployment, determine each person's eligibility for extended benefits, according to State law provisions relating to EB. If an individual has entitlement to extended benefits, such individual is not eligible for FSC. Once an individual exhausts any entitlement to extended benefits, the individual may receive the remaining balance in his/her FSC account. A new determination of entitlement to FSC is not made since the individual has the same period of eligibility upon which the FSC entitlement was determined.

4. Subsection 5, *"Interstate Claimants"*, is amended to read as follows:

5. *Interstate Claimants.*

a. *Technical Corrections Act.* The amendment to the FSC Act made by the Technical Corrections Act of 1982 (Pub. L. 97–448) specifies that in determining entitlement to FSC for interstate claims, the claimant will be limited to the lesser of:

i. The maximum payable in the agent State, or

ii. The maximum payable in the liable State.

The amendment is effective retroactively as if this provision was originally included in the Federal Supplemental Compensation Act of 1982 (Pub. L. 97–248). Accordingly, States which have paid FSC above the original minimum duration of 6 weeks at any time since the beginning of FSC program, must redetermine their interstate liable claims according to the above provision.

The redetermination must consider changes in the maximum FSC payable which have occurred in both agent and liable States for weeks beginning on or after September 12, 1982, and prior to weeks beginning on or after January 9, 1983, (the effective date of Pub. L. 97–424). The redetermination shall establish an overpayment for any weeks an individual received in excess of the amount of FSC payable which is the lesser of the maximum payable in the agent or liable States. Such overpayments may be considered for waiver according to the following special guidelines rather than the guidelines for waiver of overpayments set forth in subsection 2 of Section L, *Fraud and Overpayment.*

These guidelines pertain only to overpayments established for weeks beginning on or after September 12, 1982, and prior to weeks beginning on or after January 9, 1983, as a result of redeterminations reducing the maximum FSC benefits payable under the interstate benefit payment plan. Due to the retroactive nature of the FSC

interstate provision, all such overpayments may be considered to have been made without fault on the part of the individual, and recovery may be considered to be contrary to equity and good conscience.

Accordingly, unless the SESA has information contrary to the above, it may waive any overpayment created by such redetermination.

For FSC claims filed for any weeks beginning on or after January 9, 1983, the liable State must insure the claimant is limited to the lesser of the maximum FSC payable in the agent or liable State.

Should an SESA determine recoupment of such overpayments is *not* waived, the SESA shall follow the procedures for recovery of overpayments outlined in subsection 2 of Section L *Fraud and Overpayment.* In cases where recoupment of the overpayment is waived, the SESA shall determine the new maximum FSC payable based on the amount the individual properly received from his/her FSC account. For example, an individual received ten weeks of FSC. The claimant was overpaid four weeks since he/she was filing from an agent State that paid a maximum of six weeks of FSC. Recoupment of the four-week overpayment was waived and the claimant was properly paid six weeks of FSC. Thus, in determining the new maximum FSC payable under Pub. L. 97-424, the SESA shall base its calculation on the six weeks which were properly paid and the claimant will be entitled to additional weeks of FSC (for weeks beginning after January 6, 1983) based on the new maximum payable in the agent or liable State, whichever is less.

Liable States must continue to closely monitor their interstate claims for potential changes in FSC entitlement. If maximum weeks of FSC payable in either the agent or liable State changes or if any extended benefit period begins in the agent or liable State, an interstate claimant's entitlement to FSC will change. Interstate claimant's filing from Canada will be entitled to the FSC maximum in effect in the liable State.

b. *EB Limitations.* The extended benefit provisions apply to claims for and payment of FSC. The EB provisions limit interstate claimants to two weeks of extended benefits if they file claims in an agent State not in an extended benefit period. The two-week limitation applies only to claimants filing for FSC under the Interstate Benefit Payment Plan in agent States that have not entered into or have discontinued an agreement to administer the FSC program. Payment of FSC to individuals filing from such agent States is limited to two weeks regardless of whether or not the agent State is in an Extended Benefit period. The two-week limitation is applied because the agent State is not in an FSC period.

5. Subsection 6, *"Changes in Account"*, is amended to read as follows:

6. *Changes in Account.* The FSC amendments increase the maximum FSC payable in all States. Depending on economic conditions in a State (as defined by the amendments), an additional 2 or up to a possible 10 weeks of FSC benefits are payable. The increase applies to FSC payable for weeks beginning on or after January 9, 1983, and applies to all eligible individuals, including those who have previously exhausted entitlement to FSC. The SESA should make the appropriate change in any individual's FSC account who is entitled to more FSC as a result of the increase in the maximum FSC payable.

The FSC maximum in a State may also change with economic changes. When a State's FSC maximum goes up (for example, from 12 to 16 weeks), the maximum payable to all FSC recipients is increased. An individual who previously exhausted FSC is now eligible for the additional weeks of FSC as long as the new maximum does not exceed 65 percent of the individual's regular benefits. Such changes may occur even though many weeks have elapsed since the individual exhusted initial FSC entitlement.

When a State FSC maximum is reduced, e.g., from 16 to 12, the reduced maximum applies to all individuals claiming FSC after the date of the change. Individuals who have exhausted the new maximum are ineligible for further FSC, even though they had not exhausted old maximum.

If the individual is entitled to more or less FSC as a result of a change in the maximum weeks of FSC payable in the State, the appropriate change should be made in the individual's FSC account.

If it is later determined as the result of a redetermination or appeal that an individual was entitled to more or less regular or extended benefits under the State law or under 5 U.S.C. Chapter 85, the individual's status as an exhaustee should be redetermined as of the new date of the individual's exhaustion, and an appropriate change shall be made in the individual's FSC account.

F. Other Changes

Sections F through L of Part II of GAL 2-83 are not affected by the amendments and are unchanged. Part III, *Job Placement and Work Test Activities,* is also not affected by the amendments.

[FR Doc. 83-6080 Filed 3-7-83; 8:45 am]
BILLING CODE 4510-30-M

Occupational Safety and Health Administration

Alaska State Standards; Approval

1. *Background.* Part 1953 of Title 29, Code of Federal Regulations prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (hereinafter called the Act) by which the Regional Administrator for Occupational Safety and Health (hereinafter called the Regional Administrator) under a delegation of authority from the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary) (29 CFR 1953.4) will review and approve standards promulgated pursuant to a State plan which has been approved in accordance with section 18(c) of the Act and 29 CFR Part 1902. On August 10, 1973, notice was published in the **Federal Register** (38 FR 21628) of the approval of the Alaska plan and the adoption of Subpart R to Part 1952 containing the decision.

The Alaska plan provides for the adoption of State standards which are at least as effective as comparable Federal standards promulgated under section 6 of the Act. Section 1952.243 of Subpart R sets forth the State's schedule for the adoption of at least as effective State standards. In response to Federal standards changes, the State has submitted by letter dated April 19, 1982 from Edmund N. Orbeck, Commissioner, to James W. Lake, Regional Administrator, and incorporated as part of the plan, State standards comparable to 29 CFR 1910.20, Access to Employee Exposure and Medical Records, as originally published in the **Federal Register** (45 FR 35277) on May 23, 1980.

This State standard, which is contained in Subchapter 4, Alaska Occupational Safety and Health Code, was promulgated after public notice under authority vested by AS 18.60.020 and after compliance with the Administrative Procedure Act (AS 44.62) specifically including the notice under AS 44.62.210 to Edmund Orbeck, Commissioner, and became effective February 6, 1982.

2. *Decision.* Having reviewed the State submission in comparison with the Federal standards, it has been determined that the State standards are at least as effective as the Federal standards and accordingly are approved. The major differences are changes in text that do not diminish

from the State standard when compared to the text in the Federal standard.

3. *Location of supplement for inspection and copying.* A copy of the standards supplement, with the approved plan, may be inspected and copied during normal business hours at the following locations: Office of the Regional Administrator, Occupational Safety and Health Administration, Room 6000, Federal Office Building, 900 First Avenue, Seattle, Washington 98174; State of Alaska, Department of Labor, Office of the Commissioner, Juneau, Alaska 99811; and the Office of State Programs, Room N–3613, 200 Constitution Avenue NW., Washington, D.C. 20210.

4. *Public participation.* Under 29 CFR 1953.2(c) the Assistant Secretary may prescribe alternate procedures to expedite the review process or for other good cause which may be consistent with applicable laws. The Assistant Secretary finds that good cause exists for not publishing the supplement to the Alaska plan as a proposed change and making the Regional Administrator's approval effective upon publication for the following reasons:

1. The standards were adopted in accordance with the procedural requirements of State law which included public comment and further public participation would be repetitious.

This decision is effective March 8, 1983.

(Sec. 18, Pub.L. 91–596, 84 Stat. 1608 (29 U.S.C. 667))

Signed at Seattle, Washington this 7th day of September 1982.

Frank L. Strasheim,

Acting Regional Administrator.

[FR Doc. 83-6071 Filed 3-7-83; 8:45 am]

BILLING CODE 45-10-28-M

Office of the Secretary

Agency Forms Under Review by the Office of Management and Budget (OMB)

Background

The Department of Labor, in carrying out its responsibility under the Paperwork Reduction Act (44 U.S.C. Chapter 35), considers comments on the proposed forms and recordkeeping requirements that will affect the public.

List of Forms Under Review

On each Tuesday and/or Friday, as necessary, the Department of Labor will publish a list of the Agency forms under review by the Office of Management and Budget (OMB) since the last list was published. The list will have all entries grouped into new forms, revisions, extensions (burden change), extensions (no change), or reinstatements. The Departmental Clearance Officer will, upon request, be able to advise members of the public of the nature of any particular revision they are interested in.

Each entry will contain the following information: The Agency of the Department issuing this form; the title of the form; the Agency form number, if applicable; how often the form must be filled out; who will be required to or asked to report; whether small business or organizations are affected; the standard industrial classification (SIC) codes, referring to specific respondent groups that are affected; an estimate of the number of responses; an estimate of the total number of hours needed to fill out the form; the number of forms in the request for approval; and an abstract describing the need for and uses of the information collection.

Comments and Questions

Copies of the proposed forms and supporting documents may be obtained by calling the Departmental Clearance Officer, Paul E. Larson, Telephone 202–523–6331. Comments and questions about the items on this list should be directed to Mr. Larson, Office of Information Management, U.S. Department of Labor, 200 Constitution Avenue NW., Room S–5526, Washington, D.C. 20210. Comments should also be sent to the OMB reviewer, Arnold Strasser, Telephone 202–395–6880, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 3208, NEOB, Washington, D.C. 20503.

Any member of the public who wants to comment on a form which has been submitted to OMB should advise Mr. Larson of this intent at the earliest possible date.

BILLING CODE 4510–27–M, 4510–43–M

Secretary's Committee on Veterans' Employment; Establishment

In accordance with the provisions of the Federal Advisory Committee Act and Office of Management and Budget Circular A–63 of March 1974, I have determined that the establishment of the Secretary's Committee on Veterans' Employment is in the public interest in connection with the performance of duties imposed on the Department of Labor, by Section 308, Title III, Pub. L. 97–306, "Veterans Compensation, Education and Employment Amendments of 1982."

The Committee will advise the Secretary of Labor on such matters as problems and issues relating to veterans' employment and reemployment.

Under Section 308, Title III of the Act the Secretary is charged with the responsibility of acting as Chairman of the Committee with the Assistant Secretary of Labor for Veterans' Employment serving as Vice Chairman. The Committee will have a total of 13 members including representatives of: the Administrator of the Veterans Administration; Secretary of Defense; Secretary of Health and Human Services; Director of the Office of Personnel Management; Chairman of the Equal Employment Opportunity Commission; Administrator of the Small Business Administration; and a representative of each of the chartered veterans' organizations having a national employment program.

The Committee will function solely as an advisory body and in compliance with the provisions of the Federal Advisory Committee Act.

Interested persons are invited to submit comments regarding the establishment of the Secretary's Committee on Veterans' Employment. Such comments should be addressed to Mr. Vincent B. Pagano, 200 Constitution Avenue NW., Room S1315–FPB, Washington, D.C. 20210.

Signed at Washington, D.C., this 31st day of January, 1983.

Raymond J. Donovan,

Secretary of Labor.

BILLING CODE 4510–23–M

Secretary of Labor's Committee on Veterans' Employment; Meeting

The Secretary's Committee on Veterans' Employment was established under Section 308, Title III, Pub. L. 97–306, "Veterans Compensation, Education and Employment Amendments of 1982," to bring to the attention of the Secretary problems and issues relating to veterans' employment.

Notice is hereby given that the Secretary of Labor's Committee on Veterans' Employment will meet on Thursday, March 24, 1983, at 10:00 A.M., in the Secretary's Conference Room, S2508–FPB.

Items to be discussed are:

• Reorganization of the Office of the Assistant Secretary for Veterans' Employment.
• Reports of Committee Participants.
• Job Training Partnership Act—Title IV, Part C—Veterans Employment Programs.
• Wagner-Peyser Act Provisions.
• Review of Disabled Veterans Outreach Program.

The public is invited to attend.

For additional information contact: Mr. Vincent B. Pagano, 200 Constitution Avenue NW., Room S1315–FPB, Washington, D.C. 20210, (202) 523–9116.

Official records of the meeting will be available for public inspection in Room S1315–FPB, 200 Constitution Avenue NW., Washington, D.C. 20210.

Dated: February 1, 1983.

William C. Plowden, Jr.,

Assistant Secretary for Veterans' Employment.

BILLING CODE 4510–23–M

SECURITIES AND EXCHANGE COMMISSION

[File Nos. 22–12201, 22–12208]

Fedders Corp.; Application and Opportunity for Hearing

March 2, 1983.

Notice is hereby given that Fedders Corporation (the "Company") has filed an application pursuant to clause (ii) of Section 310(b)(1) of the Trust Indenture Act of 1939 (the "Act") for a finding by the Commission that trusteeship of Bradford Trust Company ("Bradford") under Indentures to be dated as of January 1, 1983 (the "New Indentures"), which will be qualified under the Act, is not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify Bradford from acting under the New Indentures. The Debentures to be issued pursuant to the New Indentures are to be equally and ratably partially secured by a mortgage on the Company's Buffalo, New York property.

The present application, filed pursuant to clause (ii) of Section 310(b)(1) of the Act, seeks to exclude the New Indentures from the operation of Section 310(b)(1) of the Act.

The effect of the proviso contained in clause (ii) of Section 310(b)(1) of the Act on the matter of the present application is such that the New Indentures may be excluded from the operation of Section 310(b)(1) of the Act if the Company shall

have sustained the burden of proving, by this application to the Commission and after opportunity for hearing thereon, that the trusteeship of Bradford under the New Indentures is not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify Bradford from acting as trustee under each of the New Indentures.

The Company alleges that:

(1) The Company proposes to issue $800 principal amount of its 11¾% Senior Subordinated Debentures due 1195 ("11¾% Debentures") in exchange for each $1,000 principal amount of its 5% Convertible Subordinated Debentures due 1996 and $800 principal amount of its 14¾% Senior Subordinated Debentures due 1993 ("14¾% Debentures") in exchange for each $1,000 principal amount of its 8¾% Subordinated Debentures due 1994. The 11¾% Debentures and the 14¾% Debentures will be partially secured on an equal and ratable basis by a $1,250,000 mortgage on the Company's Buffalo, New York property which has an appraisal value of only approximately $1,250,000. The maximum amount of 11¾% Debentures to be issued is $17,985,600, while the maximum amount of 14¾% Debentures to be issued is $14,973,600. The respective interests of the Trustee representing each class of Debentures is to be based pro rata on the outstanding principal amount of the respective Debentures.

(2) Such differences as will exist between each of the New Indentures are not likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify Bradford from acting as trustee under any of the New Indentures.

The Company has waived notice of hearing, hearing and any and all rights to specify procedures under the Rules of Practice of the Securities and Exchange Commission in connection with this matter.

For a more detailed statement of the matters of fact and law asserted, all persons are referred to said application which is on file in the offices of the Commission's Public Reference Section, 450 Fifth Street NW., Washington, D.C. 20549.

Notice is further given that an order granting the application may be issued by the Commission at any time on or after March 25, 1983, unless prior thereto a hearing upon the application is ordered by the Commission, as provided in clause (ii) of Section 310(b)(1) of the Trust Indenture Act of 1939. Any interested person may, no later than March 25, 1983, at 5:30 p.m., Eastern Daylight Time, in writing submit to the Commission, his views or any additional facts bearing upon this application or the desirability of a hearing thereon. Any such communication or request should be addressed: Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, D.C. 20549, and should state briefly the nature of the interest of the person submitting such information or requesting a hearing, the reasons for such request, and the issues of fact and law raised by the application which he desires to controvert.

By the Commission, by the Division of Corporation Finance, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 83-6087 Filed 3-7-83; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 13057 (812-5417)]

First Midwest Capital Corp.; Filing of application

March 1, 1983.

Notice is hereby given that First Midwest Capital Corporation ("Applicant"), Suite 700, Chamber of Commerce Building, 15 South Fifth Street, Minneapolis, Minnesota 55402, a non-diversified, closed-end, management investment company registered under the Investment Company Act of 1940 ("Act") and a federal licensee under the Small Business Investment Act of 1958, filed an application on January 3, 1983, and an amendment thereto on February 7, 1983, pursuant to Section 17(d) of the act and Rule 17d–1 thereunder, for an order of the Commission permitting the participation of Applicant in additional financing of BetaCom Corporation ("BetaCom"). Applicant is a wholly-owned subsidiary of First Midwest corporation, also a non-diversified, closed-end, management investment company registered under the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below, and to the Act for the complete text of pertinent provisions of the Act.

Applicant states that it is engaged in the business of providing long-term equity funding to eligible small businesses to assist them in their growth and development. According to the application, on January 26, 1981, the Applicant and another small business investment company ("Control Data Capital Corp.") provided debt and equity financing to BetaCom in the sum of $600,000. BetaCom is engaged in the manufacturing of terminal interface processor. Applicant's participation therein consisted of purchasing $125,000 of eight-year debentures bearing interest at the rate of 15 percent per annum, and 260 shares of common stock for $125,000. The common stock purchased by Applicant represented the power to vote 14.57 percent of the voting shares of BetaCom. As a result of such ownership, Applicant and Control Data Capital Corp. became affiliated persons, as defined by Section 2(a)(3) of the Act, of an affiliated person (BetaCom) of Applicant, Control Data Capital Corp. having purchased greater than five percent of the voting shares of BetaCom.

It is stated in the application that, subsequent to the above-described transaction, on March 24, 1982, additional financing totalling $650,000 was provided by a group of small business investment companies ("SBICs") to BetaCom. The financing took the form of $424,920 of eight-year 14 percent per annum debentures and common stock purchased at a total price of $425,080. Applicant's participation consisted of purchasing $37,440 of the debentures plus $37,560 worth of the common stock. as a result of the second financing, Applicant's ownership of BetaCom declined to 12.46 percent, and MorAmerica, a participating SBIC, became an affiliated person of BetaCom by virtue of its acquiring more than five percent of the voting shares thereof.

Applicant proposes now to provide an additional investment of $75,000, which would bring its total investment in BetaCom to $400,000, or $75,000 greater than 20 percent of its paid-in capital and surplus. Applicant represents that the investment by Applicant will be a part of a total investment of $280,000 to be provided by the previous investors, including MorAmerica and Control Data Capital Corp., on a pro rata basis. The investment will take the form of one-year promissory notes bearing interest at the rate of 12 percent per annum. It is anticipated, Applicant states, that this short-term financing will eventually be rolled over into permanent financing of $1.8 million through the sale of convertible stock by BetaCom, which will have identical conversion privileges for all holders of convertible stock.

Section 17(d) of the Act and Rule 17d–1 thereunder, taken together, provide, in pertinent part, that it is unlawful for an

affiliated person of a registered investment company, or any affiliated person of such person, acting as principal, to effect any transaction in which such registered company is a joint or a joint and several participants with such person unless an application regarding such joint enterprise has been filed with the Commission and permission to effect such transaction has been granted.

Applicant states that it believes Rule 17d–1(d)(5) would exempt the proposed transaction from the restrictions of Rule 17d–1 except for the fact that Applicant proposes to commit in excess of 20 percent of its paid-in capital and surplus to investments in BetaCom. Applicant represents that it has received permission from the Small Business Administration to exceed its investment limit. According to the application, the proposed transaction consists of the sale to First Midwest of $75,000 of one-year promissory notes bearing interest at the rate of 12 percent per annum.

Applicant states that it will be participating in the proposed transaction on a basis which is no less advantageous than that of any other participant. The Applicant further asserts that the proposed transaction is fair to all parties and that Applicant believes the investment has a potential for substantial return. The Applicant also contends that the proposed transaction is consistent with the general purposes and policies of the Act and, therefore, requests, pursuant to Section 17(d) of the Act and Rule 17d–1 thereunder, an order of the Commission permitting the proposed transaction.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than March 28, 1983, at 5:30 p.m. do so by submitting a written request setting forth the nature of his/her interest, the reasons for his/her request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 83–5894 Filed 3–7–83; 8:45 am]

BILLING CODE 8010–01–M

[Release No. 13058 (812–5418)]

Midland Bank Canada; Filing of Application

March 1, 1983.

Notice is hereby given that Midland Bank Canada ("Applicant"), c/o Peter V. Darrow, Esq., Shearman & Sterling, 53 Wall Street, New York, NY 10005, filed an application on January 3, 1983, and an amendment thereto on January 28, 1983, requesting an order of the Commission pursuant to Section 6(c) of the Investment Company Act of 1940 ("Act") exempting it from all provisions of the Act in connection with its proposed sale in the United States of short-term commercial paper notes ("Notes") and other debt securities whose payment would be unconditionally guaranteed by Midland Bank plc ("Midland"), Applicant's parent corporation. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicant states that in July 1975, Midland incorporated Midland Financial Services Limited ("Midland Financial"), a wholly-owned subsidiary, in Ontario, Canada. In 1981, following the enactment of the Bank Act of Canada (the "Bank Act") in November 1980, Midland Financial applied for a bank license, which was granted on October 8, 1981, and changed its name to Midland Bank Canada.

On February 16, 1982, the Commisison issued an order pursuant to Section 6(c) of the Act exemptiong Midland from all provisions of the Act (Investment Company Act Release No. 12229). Information with respect to Midland, including a description of its business and English and United States banking regulations to which Midland is subject, is included in Midland's application requesting that order (File No. 812–4997).

Applicant states that it is currently represented in four major Canadian cities, Toronto, Calgary, Edmonton and Vancouver, with a total staff of 42. Its lending operations include lease financing, syndicated loans, operating lines, construction and development loans, trade and project finance. It actively seeks deposits, but also relies heavily on the Canadian and international money markets for funding.

Applicant's operating income is derived principally from interest on loans, leases, securities and inter-bank placings. For the financial year ended October 31, 1982, 99% of Applicant's total operating income was derived from those sources. At October 31, 1982, Applicant states that 96.8% of its total assets consisted of loans, leases, securities and inter-bank placings, and 96.3% of its total liabilities consisted of deposits.

Applicant represents that it is subject to extensive regulation pursuant to the Bank Act, which is subject to decennial review. The current Bank Act, as recently amended, came into force on December 1, 1980. It contains provisions pertaining to the business of banking and the organization of banks in Canada, including the business and powers of chartered banks, their shareholders and directors, their capital stock and debentures, the maintenance of reserves, auditing requirements, financial disclosure and regular inspection by the Inspector General of Banks. Accordingly, Applicant states that it is subject to regulation comparable in many respects to the regulation of United States banks.

Applicant states that the Notes will be in denominations of $100,000, or more, will mature not more than nine months from the date of issuance and will not be payable on demand or include any provision for extension, renewal or automatic "roll-over" at the option of either the holders or Applicant. Applicant states that the presently proposed issue of Notes and any future issue of debt securities offered for sale in the United States by Applicant will be conditioned upon the receipt, prior to issuance, of one of the three highest investment grade ratings from at least one of the nationally recognized statistical rating organizations. United States counsel to Applicant will have certified that such a rating has been received. The proceeds of the Notes will be used for "current transactions" within the meaning of Section 3(a)(3) of the Securities Act of 1933.

Applicant will sell the Notes to one or more United States securities dealers, who will reoffer the Notes as principal to institutional investors and other entities and individuals in the United States who normally purchase commercial paper. The Notes will not be advertised or otherwise offered for sale to the general public. The aggregate principal amount of the Notes to be outstanding at any time is not currently

expected to exceed $200,000,000. Applicant represents that the purpose in making the proposed offering of the Notes is to provide an additional source of supply of United States dollars to supplement dollars currently obtained in the Eurodollar market. Applicant agrees to secure an undertaking from United States securities dealer to whom Notes are sold that each offeree who has indicated an interest in the Notes, prior to any sale of Notes to such offeree, will be provided by the dealer with a memorandum that describes the business of Applicant and contains Applicant's most recent publicly available annual financial statements (including a balance sheet, profit and loss account, statement of source and application of funds and notes thereto) audited in accordance with Canadian accounting principles, and the most recently publicly available unaudited interim statement for Applicant. If the Notes are sold by Applicant directly, Applicant will provide such a memorandum to each offeree who has indicated an interest in the Notes, prior to any sale of Notes to that offeree. The memorandum will describe the material differences between Canadian accounting principles applicable to Canadian banks and "generally accepted accounting principles" applicable to United States commercial banks. The memorandum will be at least as comprehensive as those customarily used in offering commercial paper in the United States and will be updated periodically to reflect material changes in Applicant's business and financial condition.

The application states that the Notes will rank *pari passu* among themselves and equally with all other unsecured and unsubordinated indebtedness of Applicant, including deposit liabilities (except for indebtedness of Applicant which is given a statutory preference under the Bank Act or other statute), and ahead of its share capital. Midland's guarantees will rank *pari passu* with all other unsecured and unsubordinated indebtedness of Midland (including deposit liabilities but excluding certain statutorily preferred liquidation claims for national or local taxation and for compensation of employees), and ahead of its share capital.

The application states that Applicant will appoint an issuing agent to issue the Notes from time to time. In addition, Applicant and Midland will appoint an agent to accept any process which may be served in any action based on the Notes or the Guarantees and instituted in any state or federal court by the holder of any Notes.

The application further states that Applicant and Midland will expressly accept the jurisdiction of any state or federal court in the Borough of Manhattan in the City and State of New York in respect of any action based on the Notes or arising out of the offering and sale of the Notes, or any action based on or arising out of the guarantees instituted by the holder of any Notes. This appointment of an authorized agent to accept service of process and the consent to jurisdiction will be irrevocable until all amounts due and to become due on the Notes or the guarantees have been paid. The application also states that Applicant will consent to jurisdiction and will appoint an agent for service of process in suits arising from any future offerings of debt securities in the United States.

The application states that Applicant may offer other securities for sale in the United States, including long-term debt securities, which may be unconditionally guaranteed by Midland. The Applicant further states that any future offering of securities in the United States will be made only pursuant to a registration statement under the Securities Act or pursuant to an applicable exemption from rgistration under the Securities Act, and any such offering will be done on the basis of disclosure documents at least as comprehensive in their description of Applicant and its business and financial statements as the disclosure memorandum referred to in the application, but in no event will such future disclosure documents be less comprehensive than is customary for United States offerings of similar debt securities. The application states that Applicant will promptly update any such documents to reflect material changes in its financial condition, and that Applicant will provide offerees of its securities with such disclosure documents prior to the sale of such securities to offerees.

Section 6(c) of the Act provides, in pertinent part, that the Commission, by order upon application, may conditionally or unconditionally exempt any person, security, or transaction, or any class or classes of persons, securities, or transactions, from any provision or provisions of the Act, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicant states that, among other things, compliance by it with a number of substantive provisions of the Act would, as a practical matter, conflict with its operation as a bank and that it would thus be effectively precluded from selling securities in the United States if it were required to register as an investment company and comply with such provisions of the Act. Applicant further submits that an exemptive order pursuant to Section 6(c) of the Act would benefit institutional and other sophisticated investors in the United States because they would otherwise be precluded from purchasing commerical paper notes issued by Applicant. Moreover, the application contends that because of the development of the large Eurodollar market, the major foreign banks which deal in the market need a source of United States dollars in case of a disuption of the market. As a closely regulated Canadian banking entity, Applicant also states that it is different from the type of institution that Congress intended the Act to regulate. It is asserted that the particular abuses against which the Act is directed are not present in Applicant's case.

Applicant concludes that granting an exemptive order pursuant to Section 6(c) of the Act would be appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act. Applicant also represents that the granting of the requested order will not give it an advantage over domestic banks in the issuance of debt securities in the manner described in the application.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than March 28, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 19558; (SR-NYSE-83-1)]

New York Stock Exchange, Inc.; Order Approving Proposed Rule Change

March 1, 1983.

The New York Stock Exchange, Inc. ("NYSE"), 11 Wall Street, New York, NY 10005, submitted on January 7, 1983, copies of a proposed rule change pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act") and Rule 19b-4 thereunder, to raise the standard for minimum acceptable specialist performance under NYSE Rule 103A from 3.00 to 4.50.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by the issuance of a Commission Release (Securities Exchange Act Release No. 19436, January 24, 1983) and by publication in the **Federal Register** (48 FR 3063, January 24; and 48 FR 3437, January 25, 1983).[1] No comments were received with respect to the proposed rule change.

The 4.50 Performance Standard

NYSE Rule 103A establishes minimum standards of acceptable performance for NYSE specialist units and provides a non-disciplinary procedure for the reallocation of one or more securities assigned to a specialist unit that has fallen below these minimum standards.[2] The minimum standards are based upon the results of the quarterly Specialist Performance Evaluation Questionnaire ("SPEQ").[3] Floor brokers currently grade specialist performance in the areas covered by the five SPEQ questions on a scale of 1 (lowest) to 7 (highest). The current standard for minimum acceptable performance under Rule 103A is 3.00,[4] a standard that was implemented by the NYSE in connection with its former 1–5 point SPEQ grading scale. The Exchange's adoption of the current 1–7 point grading scale in March 1982 necessitated that the numerical standard for minimum acceptable performance be increased.[5]

During the first three quarters of 1982, the period for which SPEQ results are available under the 1–7 grading scale, the average overall score for all NYSE specialist units has been well above 5.00, only one individual unit has received an overall grade below 4.50 for even one quarter since the adoption of the seven point scale, and just 10 units received scores below 4.50 on individual SPEQ questions a total of 14 times. Thus, had the 4.50 standard been in effect since the first quarter of 1982, no unit would have fallen below the 4.50 level a sufficient number of quarters to invoke the Rule 103A reallocation procedures.

The Exchange in its filing indicates that the increase in the Rule 103A standard is an interim measure designed to make the adjustments to the standard necessitated by the Exchanges adoption of a 1–7 point scale while reserving further revision until completion of the major study of the specialist system the Exchange has recently undertaken.

Discussion and Findings

The Commission agrees with the Exchange that adoption of the proposed 4.50 standard under Rule 103A is an adequate *interim* measure. This change has the effect of rasing the standard to the mathematical equivalent of a 3.21 on a 5-point rating scale.[6] In addition, 4.50 is above the level disignated on the SPEQ 1–7 point scale as the level indicating that the specialist "meets its requirements".[7]

The Commission, however, is not reaching any determination regarding the adequacy of a 4.50 standard as part of a permenent reallocation program. Based on the data reviewed above, the Commission is concerned that like its 3.00 predecessor, the revised standard may render Rule 103A at best a limited deterrent to substandard specialist performance.

Accordingly, the Commission believes it is appropriate for the Exchange to implement the 4.50 standard pending completion of the Exchange's review of this standard as part of its study of the specialist system. The Commission has previously indicated that completion of that study in time to permit the Exchange to submit the necessary changes to the Exchange's reallocation procedures to the Commission for its consideration prior to June 30, 1983 may be necessary in order for the Commission to grant any extension of Rule 103A and its related procedures.[8] If, by June 30, 1983, it appears that the 4.50 standard appears inadequate as a measure of satisfactory specialist performance (*i.e.*, if overall specialist SPEQ scores remain uniformly higher than 4.50), the Commission may view an upward revision in the 4.50 standard as necessary before considering further temporary extensions to or permanent approval of the pilot program, regardless of whether the exchange has completed its study of the specialist system.

The Commission finds, therefore, that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to national securities exchanges, and, in particular, the requirements of Section 6 and the rules and regulations thereunder.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the proposed rule change referenced above be, and hereby is approved.

---

[1] The proposed rule change included a proposal to extend the effectiveness of NYSE's Rule 103A through June 30, 1983; this portion of the proposed rule change was granted accelerated approval for good cause under Section 19(b)(2) of the Act; Securities Exchange Act Release No. 19436, January 17, 1983; 48 FR 3063, January 24, 1983) (the "January Release"). The "proposed rule change" as used hereafter in this order refers only to that portion of File No. SR-NYSE-83-1 proposing to change the Rule 103A standard for minimum levels of acceptable performance.

[2] For a more complete description of the Exchange's reallocation procedures under Rule 103A, see the January Release.

[3] For a more detailed discussion of NYSE's SPEQ, see the January Release and File No. SR-NYSE-83-7, which contains the Exchange's proposed rule change respecting the 1982 revisions to its SPEQ (Securities Exchange Act Release No. 19532, February 23, 1983).

[4] More specifically, Rule 103A states that a specialist unit's performance shall be considered below acceptable levels if it receives (1) an overall SPEQ grade (*i.e.*, the unit's grade on all 5 questions) below 3.00 for two or more quarters; or (2) average quarterly grades below 3.00 for three or more individual questions for two or more quarters; or (3) average quarterly grades below 3.00 for the same individual question for four or more consecutive quarters. These are the standards for triggering Rule 103A reallocation procedures. In addition, as described in NYSE's filing and in the January Release, performance below the Rule 103A standard for any one quarter will result in performance improvement action, which consists chiefly of counselling by the Exchange staff.

[5] Even before the adoption of the 1–7 point grading scale, the Commission expressed dissatisfaction with the 3.00 standard and has noted that, since the commencement of the Rule 103A pilot program in 1979, only one specialist unit has demonstrated unacceptable performance under the standards of Rule 103A, and no reallocation proceeding has ever been held under the rule.

[6] The Commission notes, however, that even a 3.21 standard on the old 5-point scale may not have been adequate. The Commission expressed concerns that grade inflation in brokers' SPEQ responses may have eviscerated the old 3.00 standard, and recommended adoption of a relative-ranking based standard. *See*, letter from Douglas Scarff, Director, Division of Market Regulation, to John Phelan, President, NYSE, dated November 10, 1981.

[7] Under the current SPEQ, a grade of 4.0 on an individual question indicates that a unit meets its requirements.

[8] *See* the January Release. As indicated above, Rule 103A is scheduled to terminate on June 30, 1983. *See*, note 1, *supra*.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 19554; File No. SR-PSE-83-5]

Pacific Stock Exchange, Inc.; Filing of Proposed Rule Change

March 1, 1983.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on February 15, 1983, the Pacific Stock Exchange filed with the Securities and Exchange Commission the proposed rule change as described herein. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

The Pacific Stock Exchange, Inc. ("PSE") proposes to adopt a new Equity Floor Procedure Advice 2–B, Dissemination of Quotations in Local Issues (the "Advice"). The proposed new Advice requires specialists to disseminate quotations in their assigned local issues prior to 7:30 a.m., Pacific Time. The Exchange's quotation system does not allow quotations to be entered prior to 7:00 a.m., Pacific Time. In addition, the proposed Advice authorizes the Joint Equity Floor Trading Committee to fine specialists for repeated violations of the requirement and sets forth guidelines for penalties to be imposed, based upon the number of violations for a particular local security. The PSE states that the statutory basis for the proposed rule change is Section 6(b)(5) of the Act in that it will facilitate transactions in securities traded on the PSE, and Section 6(b)(6) of the Act in that it provides a fine schedule for repeated violations of Exchange policy.

In order to assist the Commission in determining whether to approve the proposed rule change or institute proceedings to determine whether the proposed rule change should be disapproved, interested persons are invited to submit written data, views and arguments concerning the submission within 21 days after the date of publication in the **Federal Register**. Persons desiring to make written comments should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 450 5th Street, NW., Washington, D.C. 20549. Reference should be made to File No. SR-PSE-83-5.

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change which are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those which may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Room, 450 5th Street, NW., Washington, D.C. Copies of the filing and of any subsequent amendments also will be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 83-6060 Filed 3-7-83; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 19555; (SR-PSE-82-15)]

Pacific Stock Exchange, Inc.; Order Approving Proposed Rule Change

March 1, 1983.

The Pacific Stock Exchange, Inc. ("PSE"), 618 South Spring Street, Los Angeles, CA, submitted on December 22, 1982, copies of a proposed rule change pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act") and Rule 19b–4 thereunder to adopt certain amendments to PSE's pilot program for the appointment and evaluation of specialists and the creation of new specialist posts (the "program"), and to extend the program, as amended, to December 31, 1983.[1] The proposed rule change would amend PSE Rule II, Section 1, to codify the existing rules and procedures for the appointment and registration of new specialists and the creation of new specialist posts. In addition, the proposed rule change would modify the various methods used to measure specialist performance, and add new PSE Rule II, Section 11, to provide specific standards for determining when a specialist's performance is considered below acceptable performance levels and authorize the cancellation of a specialist's registration in selected stocks when his performance has been found to be substandard.[2]

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by the issuance of a Commission Release (Securities Exchange Act Release No. 19385, December 30, 1982) and by publication in the **Federal Register** (48 FR 918, January 7, 1983 and 48 FR 1256, January 11, 1983). The Exchange received one comment letter concerning the proposed rule change. The commentator, a PSE specialist firm, suggested that the PSE should (1) address the rights as to notification and hearing procedures pertaining to the specialist firm; and (2) make available to the specialist and his firm scores of other specialist units on the specialist's floor so as to enable the specialist and his firm to compare the specialist's performance to the other specialists on his floor.[3] The Exchange responded by indicating that it will (1) notify the firm in advance of any proceedings against one of the firm's specialists under the proposed rules; (2) allow the firm to participate in such proceedings in order to help explain the specialist's performance; and (3) send the firm the scores of all specialists on the appropriate floor of the Exchange so that the firm may compare its specialist's performance to that of other specialist on his floor.[4]

The Commission finds that the proposed rule change is consistent with the requirments of the Act and the rules and regulations thereunder applicable to national securities exchange.[5] In

---

[1] The Commission approved the program on a one-year pilot basis on May 27, 1981. Securities Exchange Act Release No. 17818, May 27, 1981; 46 FR 30016, June 4, 1981. The program has been extended several times since the end of the initial one-year pilot period; most recently, on December 30, 1983, the Commission granted temporary approval of the instant rule change, making the program effective, as amended, from January 1, 1983 through March 31, 1983. Securities Exchange Act Release No. 18385, December 30, 1982; 48 FR 1256, January 12, 1982.

[2] In its filing, PSE states that the purpose of the program is to improve the quality of the PSE marketplace through non-disciplinary procedures. In addition, the Exchange states in its filing that the proposed new rules will neither replace nor impair the PSE's authority to cancel a specialist's registration or impose other sanctions through disciplinary proceedings for violations of Exchange rules. The Commission believes that the Exchange's designation of proposed Rule II, Section 11 as non-disciplinary is appropriate. See Securities Exchange Act Release No. 15827, May 15, 1979; 44 FR 29776, May 22, 1979 (Order approving NYSE Rule 103A); and Securities Exchange Act Release No. 18975, August 15, 1982; 47 FR 37019, August 24, 1982 (Order approving Phlx Rules 501–506).

[3] *See* letter from Thomas R. Gaian, Senior Vice President, Wedbush Noble, Cooke Inc., to Jerry M. Gluck, Vice President, PSE, dated January 21, 1983.

[4] *See* letter from Jerry Gluck, Vice President, PSE to Thomas Gaian, Wedbush, Noble, Cooke, Inc., dated February 9, 1983. The Exchange has indicated that the scores sent to the firm will not indicate the identity of the specialists receiving those scores except, of course, for the firm's own specialist(s).

[5] The Commission finds that the Exchange's response to the specialist firm's comments described above, *see* note 4, *supra*, contains the commitments necessary to address adequately that commentator's concern.

particular, the Commission finds that the proposed rule change is designed to improve specialist performance, thereby fostering cooperation and coordination with persons engaged in facilitating transactions in securities, and, in general, protecting investors and the public interest in a manner consistent with Section 6 of the Act. In this regard, the amendements to the program and its extension for one year [6] will continue in place and strengthen the Exchange's system for the evaluation of specialist performance, and, in addition give the Exchange an adequate basis for reallocating stocks in instances of unacceptable specialist performance so as to improve market making capabilities with respect to such stocks. The one-year extension of the revised program should provided the Exchange, the Commission and the public an opportunity to evaluate the actual operation of the revised program in light of these objectives.

In addition, the Commission finds that the proposed rule change is consistent with Section 11(b) of the Act and the rules and regulations thereunder that permit national securities exchanges to regulate the registration of specialists. Finally, the Commission finds that the proposed rule change, by providing for improved specialist performance, has the potential for increasing competition among PSE specialists and is, therefore, consistent with Section 6(b)(8) of the Act in that it does not impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and hereby is approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 13055; (811-909)]

Revere Fund, Inc., Filing of an Application

March 1, 1983.

Notice is hereby given that Revere Fund, Inc. ("Applicant"), Greenville Center, C-200, 3801 Kennett Pike, Wilmington, DE 19807, registered under the Investment Company Act of 1940 ("Act") as an open-end, diversified, management investment company, filed an application on November 4, 1982, and an amendment thereto on January 3, 1982, for an order pursuant to Section 8(f) of the Act, declaring that it has ceased to be an investment company as defined in the Act. All interested persons are referred to the application on file with the commission for a statement of the representations contained therein, which are summarized below.

Applicant was organized as a Delaware corporation. On November 10, 1959, Applicant registered under the Act and filed a registration statement pursuant to the Securities Act of 1933 with respect to 250,000 shares of its common stock. That registration was declared effective on January 29, 1960, whereupon Applicant commenced the initial offering of its shares.

On June 21, 1982, Applicant's board of directors approved an Agreement and Plan or Reorganization ("Plan") which was further arpproved by Applicant's shareholders on September 30, 1982. Pursuant to the Plan, at the close of business on October 1, 1982, substantially all Applicant's assets were acquired by Sigma Special Fund, Inc. ("Sigma"), a registered open-end investment company under the Act, solely for shares of Sigma on the basis of their respective net asset values. According to the application, the rate of exchange was 0.6633 shares of Sigma for each share of Applicant.

Applicant further states that, in compliance with the provisions of the Internal Revenue Code applicable to regulated investment companies, its board declared a dividend representing all undistributed investment income, aggregating $88,196. Applicant further represents that it has been dissolved pursuant to a Certificate of Dissolution filed with the Secretary of the State of Delaware on October 6, 1982.

Applicant represents that it has no assets, liabilities or securityholders, and that it is not a party to any litigation or administrative proceedings. Applicant further represents that it is not now engaged, nor does it propose to engage, in any business activities other than those necessary for the winding up of its affairs.

Section 8(f) of the Act provides, in pertinent part, that when the Commission, upon application, finds that a registered investment company has ceased to be an investment company, it shall so declare by order and upon the effectiveness of such order, the registration of such company shall cease to be in effect.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than March 28, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission by the division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 83-6060 Filed 3-7-83; 8:45 am]

BILLING CODE 8010-01-M

[File No. 500-1]

Seiscom Delta, Inc.; Order of Suspension of Trading

March 3, 1983.

It appearing to the Securities and Exchange Commission that there are questions concerning unusual market activity in the securities of Seiscom Delta, Inc. and questions concerning an accumulation of approximately twenty (20) percent of the company's outstanding securities by an individual and certain affiliated persons and entities and the resulting potential impact on the market for Seiscom securities, the Commission is of the opinion that the public interest and the protection of investors require a summary suspension of trading in the securities of Seiscom Delta, Inc. The Commission also orders the suspension because of the failure of such persons to make payments to various broker-dealers in connection with the acquisition and maintenance of such securities as requested.

Therefore, it is ordered, pursuant to section 12(k) of the Securities Exchange Act of 1934, that exchange and over-the-counter trading in the securities of Seiscom Delta, Inc. is suspended for the period from March 3, 1983 through March 12, 1983.

---

[6] The program will be in effect through December 31, 1983, a period of one year from January 1, 1983, the date upon which the proposed rule change was granted temporary approval. *See* note 1, *supra*.

By the Commission.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 22865; (70-6840)]

Southern Co.; Proposal to Issue and Sell Common Stock at Competitive Bidding

March 1, 1983.

The Southern Company ("Southern"), 64 Perimeter Center East, Atlanta, Georgia 30346, a registered holding company, has filed a declaration with this Commission pursuant to sections 6(a) and 7 of the Public Utility Holding Company Act of 1935 ("Act") and Rule 50 promulgated thereunder.

Southern proposes to issue and sell at competitive bidding up to 15 million additional shares of its authorized but unissued common stock, par value $5 per share, in one or more transactions, from time to time, not later than March 31, 1984. Southern may employ alternative competitive bidding procedures in accordance with the Commission's statement of policy pursuant to Rule 50(a)(5) under the Act (HCAR No. 22623, September 2, 1982). Southern also indicates, however, that it may request at some future time that all or part of the stock sales be excepted from the competitive bidding requirements of Rule 50 should circumstances develop which, in the opinion of management, make such exception in the best interests of Southern and its investors and consumers.

Southern proposes to use the net proceeds from the sales of this common stock, together with treasury funds and the proceeds from the sales of common stock pursuant to an existing shelf registration program and through the operation of its Dividend Reinvestment and Stock Purchase Plan, Employee Savings Plan and Employee Stock Ownership Plan, to make additional equity investments in the form of capital contributions to its operating subsidiaries and for other corporate purposes. the subsidiaries propose to use these funds to provide a portion of their cash requirements to carry on their electric utility businesses.

The declaration and any amendments thereto are available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by March 28, 1983, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the declarant at the address specified above. Proof of service (by affidavit or, in the case of an attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date, the declaration, as it may be amended, may be permitted to become effective.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

FEDERAL COMMUNICATIONS COMMISSION

Closed Commission Meeting, Thursday, March 3, 1983

February 24, 1983.

The Federal Communications Commission will hold a Closed Meeting on the subjects listed below on Thursday, March 3, 1983 following the Open Meeting which is scheduled to commence at 9:30 a.m., in Room 856, at 1919 M Street, N.W., Washington, D.C.

Agenda, Item No., and Subject

Hearing—1—"Motion for FCC Invocation of Lottery Procedures in Place of Comparative Hearing Process and Deferral of Comparative Hearing Pending such Lottery Procedures" in the Santa Fe, New Mexico, comparative FM proceeding (BC Docket Nos. 82-403 through 82-405).

Hearing—2—Application for Review of Hearing Designation Order in the Knoxville, Tennessee, comparative television proceeding (BC Docket Nos. 82-382 through 82-394).

Hearing—3—Motion to adopt a Random Selection Process in the Tahoe City, California, comparative FM proceeding (BC Docket Nos. 81-637 through 81-643).

Hearing—4—Application for Review of Hearing Designation Order in the Albuquerque, New Mexico FM radio comparative proceeding (BC Docket Nos. 82-570 through 82-580).

Hearing—5—Application for Review in the Sandpoint, Idaho comparative AM radio proceeding (BC Docket Nos. 82-724, 82-725).

Hearing—6—Application for Review of a Review Board Ruling approving a settlement agreement in the Austin, Texas, comparative TV proceeding (BC Docket Nos. 80-578, et seq.).

Hearing—7—WIOO, Inc., Carlisle, Pennsylvania, AM radio comparative renewal proceeding (Docket Nos. 21506-07).

These items are closed to the public because they concern adjudicatory matters (See 47 CFR 0.603(j)).

The following persons are expected to attend:

Commissioners and their Assistants
General Counsel and members of this staff
Managing Director and members of his staff
Chief, Office of Public Affairs and members of his staff

Action by the Commission:

Item Nos. 1 through 6, February 22, 1983. Commissioners Fowler, Chairman; Quello, Fogarty, Jones, Dawson, Rivera and Sharp voting to consider these items in Closed Session.

Item No. 7, January 19, 1983. Commissioners Fowler, Chairman; Quello, Fogarty, Jones, Dawson, Rivera and Sharp voting to consider this item in Closed Session.

This meting may be continued to following work day to allow the Commission to complete appropriate action.

Additional information concerning this meeting may be obtained from Maureen Peratino, FCC Public Affairs Office, telephone number (202) 254-7674.

Issued: February 24, 1983.

William J. Tricarico,

Secretary, Federal Communications Commission.

BILLING CODE 6712-01-M

3

FEDERAL COMMUNICATIONS COMMISSION

Closed Commission Meeting, Wednesday, March 9, 1983

March 2, 1983.

The Federal Communications Commission will hold a Closed Meeting on the subject listed below on Wednesday, March 9, 1983, which is scheduled to commence at 2 p.m., in Room 856, 1919 M Street, N.W., Washington, D.C.

Agenda, Item No., and Subject

General—1—Report and Order in the Matter of Preparations for the 1983 Region 2 Administrative Radio Conference (GEN Docket No. 80-398).

This item is closed to the public because it concerns Premature Disclosure (See 47 CFR 0.603(i)).

The following persons are expected to attend:

Commissioners and their Assistants
General Counsel and members of his staff
Managing Director and members of his staff
Chief, Office of Plans and Policy and members of his staff
Chief, Office of Science and Technology and members of his staff
Chairman, U.S. Delegation, RARC-83
Chief, Mass Media Bureau and members of his staff
Chief, Office of Public Affairs and members of his staff

Action by the Commission March 2, 1983: Commissioners Fowler, Chairman; Quello, Fogarty, Jones, Dawson, Rivera and Sharp voting to consider this item in Closed Session.

This meeting may be continued the following work day to allow the Commission to complete appropriate action.

Additional information concerning this meeting may be obtained from Maureen Peratino, FCC Public Affairs Office, telephone number (202) 254-7674.

Issued: March 2, 1983.

William J. Tricarico,

Secretary, Federal Communications Commission.

[S-325-83 Filed 3-4-83; 3:16 pm]

BILLING CODE 6712-01-M

4

FEDERAL COMMUNICATIONS COMMISSION

Deletion of Agenda Item From March 3rd Closed Meeting

March 3, 1983.

The following item has been deleted from the list of agenda items scheduled for consideration at the March 3, 1983, Closed Meeting and previously listed in the Commission's Public Notice of February 24, 1983.

Agenda, Item No. and Subject

Hearing—7—WIOO, Inc., Carlisle, Pennsylvania, AM radio comparative renewal proceeding (Docket Nos. 21506–07).

Issued: March 3, 1983.

William J. Tricarico,

Secretary, Federal Communications Commission.

[S-326-83 Filed 3-4-83; 3:17 pm]

BILLING CODE 6712-01-M

5

FEDERAL ENERGY REGULATORY COMMISSION

March 3, 1983

TIME AND DATE: 9 a.m. March 10, 1983.

PLACE: Room 9306, 825 North Capitol Street NE., Washington, D.C. 20426.

STATUS: Open.

MATTERS TO BE CONSIDERED: Agenda.

Note.—Items listed on the agenda may be deleted without further notice.

CONTACT PERSON FOR MORE INFORMATION: Kenneth P. Plumb, Secretary, telephone (202) 357–8400.

This is a list of matters to be considered by the Commission. It does not include a listing of all papers relevant to the items on the agenda; however, all public documents may be examined in the Division of Public Information.

Consent Power Agenda—786th Meeting, March 10, 1983, Regular Meeting (9 a.m.)

FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

February 16, 1983.

TIME AND DATE: 10 a.m., Wednesday, March 9, 1983.

PLACE: Room 600, 1730 K Street, NW., Washington, D.C.

STATUS: Open.

MATTERS TO BE CONSIDERED: The Commission will consider and act upon the following:

1. Allied Chemical Corporation, Docket No. WEST 79–165–M. (Issues include whether the judge properly concluded that the operator violated 30 CFR 57.9–2, dealing with correction of equipment defects affecting safety).

CONTACT PERSON FOR MORE INFORMATION: Jean Ellen (202) 653–5632..

[S–324–83 Filed 3–4–83; 3:15 pm]
BILLING CODE 6735–01–M

7

FEDERAL RESERVE SYSTEM
BOARD OF GOVERNORS

TIME AND DATE: 10 a.m., Monday, March 14, 1983.

PLACE: 20th Street and Constitution Avenue NW., Washington, D.C. 20551.

STATUS: Closed.

MATTER TO BE CONSIDERED:

1. Personnel actions (appointments, promotion, assignment, reassignments, and salary actions) involving individual Federal Reserve System employees.
2. Any items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board, (202) 452–3204.

Dated: March 4, 1983.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210–01–M

8

NATIONAL SCIENCE BOARD

DATE AND TIME:
March 17, 1983 10 a.m., closed session
March 17, 1983 10:30 a.m., open session
March 18, 1983 7:45 a.m., closed session
March 18, 1983 8 a.m., open session

PLACE: National Science Foundation, 1800 G Street NW., Washington, D.C.

STATUS: Most of this meeting will be open to the public. Parts of the meeting will be closed to the public.

MATTERS TO BE CONSIDERED: Open Sessions:

Thursday, March 17, 10:30 a.m.
1. Minutes—Open Session—February 1983 Meeting.
2. Chairman's Items.
3. Director's Report.
4. Program Review—Electrical, Computer, and Systems.

Friday, March 18, 8–10 a.m.
5. Grants, Contracts, and Programs—Action Item.
6. Proposed Budget for Fiscal Year 1985.
7. NSB Annual Report—*Science Indicators—1982.*
8. Reports of Board Committees.
9. Board Representation at Advisory Committee and Other Meetings.
10. Other Business.
11. Next Meetings.

Closed Session:

Thursday, March 17, 10 a.m.
A. Minutes—Closed Session—February 1983 Meeting.
B. NSB and NSF Staff Nominees.
C. Report of 1983 Ad Hoc Nominating Committee for Board Officers.
D. Alan T. Waterman Award.
E. Vannevar Bush Award.

Friday, March 18, 7:45–8 a.m.
F. Grants, Contracts, and Programs—Action Items.

CONTACT PERSON FOR MORE INFORMATION: Ms. Margaret L. Windus, Executive Officer, NSB, 202/357–9582.

HARRY S. TRUMAN SCHOLARSHIP FOUNDATION

TIME AND DATE: 10 a.m., Friday, April 8, 1983.

PLACE: Board Room, 712 Jackson Place NW., Washington, D.C. 20006.

STATUS: The meeting will be open to the public.

MATTERS TO BE CONSIDERED: Portions open to the public:

1. Call meeting to order. Check quorum.
2. Adoption of proposed agenda.
3. Approval of minutes of September 13, 1982 meeting.
4. Report of Chairman.
5. Report of President.
6. Report of Executive Secretary.
7. Report of General Counsel.
8. Discussion of Awards Ceremony.
9. New Business.
10. Set date for next meeting in September, 1983.

Portions closed to the public:

1. Selection of Truman Scholars for 1983–84.

CONTACT PERSON FOR MORE INFORMATION: Malcolm C. McCormack, Executive Secretary, telephone, 202–395–4831.

March 2, 1983.

Department of Labor

Occupational Safety and Health Administration

Occupational Noise Exposure; Hearing Conservation Amendment; Final Rule

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

29 CFR 1910

Occupational Noise Exposure; Hearing Conservation Amendment

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Final rule

SUMMARY: This rule finalizes various aspects of the hearing conservation amendment to the occupational noise exposure standard. In January 1981, OSHA promulgated a hearing conservation amendment (46 FR 4078) requiring hearing conservation programs for all employees whose noise exposures equal or exceed an 8-hour time-weighted average (TWA) of 85 decibels (dB). The amendment was subsequently stayed for reconsideration and clarification. In August 1981, major portions of the amendment went into effect; the administrative stay was continued on other portions of the amendment and additional comments were solicited on these stayed portions (46 FR 42622).

By its action today, OSHA is (1) revoking many of the stayed provisions of the hearing conservation amendment, (2) lifting the administrative stay as to other portions of the amendments, and (3) making certain changes and corrections of a technical nature. The hearing conservation amendment to the OSHA noise standard, which is reprinted in its entirety at the end of this notice, establishes a comprehensive hearing conservation program, including exposure monitoring, audiometric testing, and training for employees with significant workplace noise exposures.

EFFECTIVE DATE: This final rule is effective April 7, 1983. Baseline audiograms must be completed by March 1, 1984. See Supplementary Information for details on effective dates.

FOR FURTHER INFORMATION CONTACT: James Foster, Director, Office of Information and Consumer Affairs, Occupational Safety and Health Administration, Room N–3637, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20210, Telephone (202) 523–8148.

Copies of any portion of the record, including the Regulatory Analysis, may be obtained by contacting: Docket Officer, Docket No. OSH–11, Room S–6212, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20210, Telephone (202) 523–7894.

SUPPLEMENTARY INFORMATION: The recordkeeping requirements in the amendment have been approved by the Office of Management and Budget pursuant to the Paperwork Reduction Act of 1980, Pub. L. 96–511, 44 U.S.C. 3501, *et seq.* The OMB approval number is 1218–0048.

I. Executive Summary

The following summary briefly discusses the required components of the hearing conservation program. For a more detailed discussion and explanation of the amendment, see parts II–VI of this Supplementary Information section.

Monitoring

The hearing conservation amendment requires employers to monitor noise exposure levels in a manner that will accurately identify employees who are exposed at or above an 85-decibel (dB) 8-hour time-weighted average (TWA). The exposure measurement must include all noise within an 80 dB to 130 dB range. The requirement is performance oriented and allows employers to choose the monitoring method that best suits each individual situation.

Under this revised amendment, employees are entitled to observe monitoring procedures and, in addition, they must be notified of the results of exposure monitoring. However, the method used to notify employees is left to the discretion of the employers.

Employers must remonitor workers' exposures whenever changes in exposures are sufficient to require new hearing protectors or cause employees who were previously not included in the program because they were not exposed to an 8-hour TWA of 85 dB, to be included in the program.

Instruments used for monitoring employee exposures must be calibrated to ensure that the measurements are accurate. Since calibration procedures are unique to specific instruments, employers should follow the manufacturer's instructions to determine when and how extensively to calibrate.

Audiometric Testing

Audiometric testing not only monitors employee hearing acuity over time, but also provides an opportunity for employers to educate employees about their hearing and the need to protect it. The audiometric testing program includes baseline audiograms, annual audiograms, training and follow-up procedures. The audiometric testing program should indicate whether hearing loss is being prevented by the employer's hearing conservation program. Audiometric testing must be made available to all employees who have average exposure levels of 85 dB. A professional (audiologist, otolaryngologist, or physician) must be responsible for the program but does not have to be present when a qualified technician is actually conducting the testing. Professional responsibilities include overseeing the program and the work of the technicians, reviewing problem audiograms and determining whether referral is necessary. Both professionals and trained technicians may conduct audiometric testing. In addition to administering audiometric tests, the tester (or the supervising professional) is also responsible for ensuring that the tests are conducted in an appropriate test environment and that the audiometer works properly, for reviewing audiograms for standard threshold shifts (STS), and for identifying problem audiograms requiring further evaluation by a professional.

a. Audiograms. There are two types of audiograms required in the hearing conservation program: Baseline and annual audiograms. The baseline audiogram is the reference audiogram against which future audiograms are compared. Baseline audiograms must be provided within six months of an employee's first exposure at or above a TWA of 85 dB. Where employers are using mobile test vans to obtain audiograms, baseline audiograms must be completed within one year after an employee's first exposure to workplace noise at or above a TWA of 85 dB. Additionally, where mobile vans are used and employers are allowed to delay baseline testing for up to a year, after 6 months those employees exposed at or above 85 dB must be issued and fitted with hearing protectors to be worn until the baseline audiogram is obtained. Baseline audiograms taken before the effective date of the amendment are acceptable as baselines in the program if the professional supervisor determines that the audiogram is valid. The annual audiogram must be conducted within one year of the baseline. It is important to test hearing on an annual basis in order to identify changes in hearing acuity so that protective follow-up measures can be initiated before hearing loss progresses.

b. Audiogram evaluation. Annual audiograms must be routinely compared to baseline audiograms to determine whether the audiogram is accurate and to determine whether the employee has lost hearing ability (that is, if a standard threshold shift (STS) has occurred). An effective program depends on a uniform and protective definition of STS. STS is defined in the amendment as an average

shift in either ear of 10 dB or more at 2000, 3000 and 4000 Hz. An averaging method of determining STS was chosen because it diminishes the number of persons falsely identified as having STS who are later shown not to have had a significant change in hearing ability.

If an STS is identified, employees must be fitted or refitted with adequate hearing protectors, shown how to use them, and required to wear them. In addition, employees must be notified within 21 days from the time the determination is made that their audiometric test results showed an STS. Some employees with an STS may need to be referred for further testing if the professional determines that their test results are questionable or if they have an ear problem of a medical nature caused or aggravated by wearing hearing protectors. If the suspected medical problem is not thought to be related to wearing protectors, employees must merely be informed that they should see a physician. If subsequent audiometric tests show that the STS identified on a previous audiogram is not persistent, employees whose exposures are less than a TWA of 90-dB may discontinue the wearing of hearing protectors.

A subsequent audiogram may be substituted for the original baseline audiogram if the professional supervising the program determines that the employee has experienced a persistent STS. The substituted audiogram becomes known as the revised baseline audiogram. This substitution will ensure that the same shift is not repeatedly identified. The professional may also decide to revise the baseline audiogram after an improvement in hearing has occurred, which will ensure that the baseline reflects actual thresholds to the extent possible. Where a baseline audiogram is revised, the employer must, of course, also retain the original audiogram. In order to obtain valid audiograms, audiometers must be used, maintained, and calibrated according to specifications given in Appendices C and E of the standard.

Hearing Protectors

Hearing protectors must be available to all workers exposed at or above the action level. This requirement will ensure that employees have access to protectors before they experience a loss in hearing. Where baseline audiograms are delayed because it is inconvenient for mobile test vans to visit the workplace more than once a year, protectors must be worn by employees for any period exceeding 6 months from the time they are first exposed to 8-hour average noise levels of 85 dB or above until they receive their baseline audiograms. Hearing protector use is also mandatory for employees who have incurred standard threshold shifts, since these workers have demonstrated that they are particularly susceptible to noise.

Employees should decide, with the help of a person who is trained in fitting hearing protectors, which size and type protector is most suitable for their working environment. The protector selected should be comfortable to wear and offer sufficient attenuation to prevent hearing loss. Employees must be shown how to use and care for their protectors and must be supervised on the job to ensure that they continue to wear them correctly.

Hearing protectors must provide adequate attenuation for each employee's work environment. The employer must re-evaluate the suitability of the employee's present protector whenever there is a change in working conditions that may cause the hearing protector being used to be inadequate. If workplace noise levels increase, employees must be given more effective protectors. The protector must reduce employee exposures to at least 90 dB, or to 85 dB when an STS has occurred.

Training

Employee training is important because when workers understand the reasons for the hearing conservation program's requirements and the need to protect their hearing, they will be better motivated to participate actively in the program and to cooperate by wearing their protectors and taking audiometric tests. Employees exposed to TWA's of 85 dB and above must be trained at least annually in the effects of noise; the purpose, advantages, disadvantages and attenuation of various types of hearing protectors; the selection, fitting and care of protectors; and the purpose and procedures of audiometric testing. Training does not have to be accomplished in one session. The program may be structured in any format, and different parts my be conducted by different individuals as long as the required topics are covered. For example, audiometric procedures could be discussed immediately prior to audiometric testing. The training requirements are such that employees must be reminded on a yearly basis that noise is hazardous to hearing and that they can prevent damage by wearing a hearing protector, where appropriate, and participating in audiometric testing.

Recordkeeping

Noise exposure measurement records must be kept for two years. Records of audiometric test results must be maintained for the duration of employment of the affected employee. Audiometric test records must include the name and job classification of the employee, the date, the examiner's name, the date of acoustic or exhaustive calibration, measurements of the background sound pressure levels in audiometric test rooms, and the employee's most recent noise exposure measurement.

II. Introduction

Noise, or unwanted sound, is one of the most pervasive occupational health problems. It is a by-product of many industrial processes. Sound consists of pressure changes in a medium (usually air), caused by vibration or turbulence. These pressure changes produce waves emanating away from the turbulent or vibrating source.

Sound pressure level is a logarithmic measure of the magnitude or intensity of the pressure change: it is perceived as loudness. Sound pressure level is expressed in decibels, abbreviated dB. Because of the logarithmic scale used to measure sound pressure or noise, a small increase in decibels represents a large increase in sound energy (sound pressure is directly related to vibrational energy). Technically, each increase of 3 dB represents a doubling of sound energy; an increase of 10 dB represents a tenfold increase, and a 20 dB increase represents a 100-fold increase in sound energy.[1]

The frequency of a sound is the number of times that a complete cycle of compressions and rarefactions occurs in a second. The descriptor, which used to be "cycles per second," is now hertz, abbreviated Hz. Frequency is perceived as pitch. Most everyday sounds contain a mixture of frequencies generated by a variety of sources. A sound's frequency composition is referred to as the spectrum. For a more complete discussion of the physical properties of sound and similar background information, see 46 FR 4079–4081 (January 16, 1981).

Exposure to high levels of noise causes hearing loss and may cause other harmful health effects as well. The extent of damage depends primarily on the intensity of the noise and the

[1] For purposes of 29 CFR 1910.95 as well as the hearing conservation amendment, however, a doubling rate of approximately 5 dB is used. That is, a 5 dB increase in level is permitted each time the exposure duration is decreased by half.

duration of the exposure. Noise-induced hearing loss can be temporary or permanent. Temporary hearing loss, also called temporary threshold shift,[2] results from short-term exposures to noise, with normal hearing returning after a period of rest.

Generally, prolonged exposure to high noise levels over a period of time causes permanent damage. Therefore a person who regularly sustains a temporary loss or shift in hearing threshold from exposure to noise will eventually suffer premanent hearing loss or noise induced permanent threshold-shift (NIPTS). This NIPTS is particularly insidious because it occurs very gradually over time. In fact, for a long time the worker may not notice any change in hearing acuity until the hearing loss begins to interfere with everyday communication. By then, it is too late to do anything about the hearing loss that has already been suffered.

Noise induced permanent threshold shift is not reversible and cannot be treated medically. Once a permanent threshold shift has occurred, only the further progression of hearing loss can be prevented. Noise induced hearing loss causes difficulty in interpreting sounds and in perceiving the intensity or loudness of sounds. Even if the sounds are amplified, as with a hearing aid, they remain indistinct.

Noise induced hearing loss typically starts with hearing threshold shifts in the higher frequencies. The loss usually appears first and is most severe at 4000 and 6000 Hz. If damaging noise exposure continues, the loss spreads to the lower frequencies. People with noise induced high frequency hearing loss frequently have difficulty hearing consonant sounds. Because of the crucial role the ability to distinguish consonant sounds has in the ability to understand speech, people with noise induced high frequency hearing loss characteristically have trouble understanding speech. For a more complete discussion of the health affects of noise and hearing loss, see 46 FR 4061–4113 (January 16, 1981), which is hereby incorporated by reference.

The type of hearing loss caused by exposure to noise, sensori-neural hearing loss, can be identified and measured by an audiometric examination even before a person becomes aware of a deterioration in hearing. The record of a given individual's hearing sensitivity is an audiogram. An audiogram shows hearing threshold level measured in decibels as a function of frequency measured in hertz. It indicates how intense or loud a sound at a given frequency must be before it can be perceived, and thereby provides a graphic representation of the status of the individual's hearing. With periodic audiometric testing it is possible to trace and document hearing loss, and by so doing to prevent further loss from occurring.

Evidence in the record demonstrates that many workplaces are not safe from the hazards posed by noise. Present noise exposures pose significant risk of harm to workers and this risk can be reduced by instituting hearing conservation programs for all workers exposed at or above 85 dB, as an 8-hour time-weighted average.

The hearing conservation program prescribed in the amendment to the occupational noise exposure standard, which is the subject of this document, is designed to protect workers with significant occupational noise exposures from suffering material hearing impairment even if they are subject to such noise exposures over their entire working lifetimes. The hearing conservation amendment requires employers to identify workers exposed to significant levels of workplace noise, to include workers so identified in an audiometric testing program, and to train exposed employees in the proper use and selection of hearing protectors. The provisions contained in the amendment are reasonably necessary and appropriate to provide noise exposed workers with safe and healthful employment (see 46 FR 4105–4107, January 16, 1981, for a general discussion of this issue).

III. Background

In January 1981, OSHA promulgated (46 FR 4078) a hearing conservation amendment to its occupational noise exposure standard (29 CFR 1910.95 (a) and (b)).[3] This amendment required that employees whose noise exposures equaled or exceeded an action level of 85 dB, as an 8-hour TWA,[4] be included in a hearing conservation program.

The hearing conservation amendment augmented the existing standard (29 CFR 1910.95 (a) and (b)) and specified numerous specific requirements that had to be included in each employer's hearing conservation program. The amendment added detailed provisions dealing with monitoring employee noise exposures, annual audiometric testing for employees exposed at or above a TWA of 85 dB, retesting under certain circumstances, the selection of adequate hearing protectors, employee education and training, warning signs, and the maintenance of records pertaining to exposure monitoring and audiometric testing (see paragraphs (c)–(s) of 29 CFR 1910.95, 46 FR 4161).

After the hearing conservation amendment was promulgated, the Agency received a number of requests to reconsider the amendment pursuant to the recently adopted Executive Order 12291 (see 46 FR 13193, February 17, 1981) and petitions to administratively stay the amendment. In addition, numerous requests for clarifications and interpretations of various provisions of the hearing conservation amendment were received by the Agency. A number of parties sought judicial relief under section 6(f) of the Act, requesting the court to set aside the hearing conservation amendment, alleging that various provisions were not supported by substantial evidence in the record considered as a whole.[5] As a result of the controversy and confusion generated by some of the provisions of the hearing conservation amendment, as well as the legal challenges to the amendment, it was necessary to defer the effective date of the amendment several times in order to consider the merits of the various petitions (see 46 FR 21365, April 10, 1981; 46 FR 29845, May 29, 1981; and 46 FR 39137, July 31, 1981.[6]

OSHA carefully reviewed and analyzed the comments, petitions, and requests for clarifications in light of the

[2] A person's hearing threshold represents the level of sound that that person can just barely hear.

[3] The existing standard (29 CFR 1910.95 (a) and (b) sets a permissible exposure level for noise at 90 dB as an 8-hour time-weighted average and requires the employer to reduce employee exposure to within this level by the use of feasible engineering controls or administrative controls. In addition, the existing standard (29 CFR 1910.95(b)(3)) requires that a "continuing effective hearing conservation program" be implemented when employee exposure exceeds 90 dB, without regard to the use of hearing protectors, but the standard does not spell out the elements of such a hearing conservation program.

[4] Assuming an exchange rate of 5 dB, the action level or trigger for initiating a hearing conservation program occurs when exposures are approximately half of the permissible exposure level (PEL), an 8-hour TWA of 90 dB.

[5] *Chocolate Manufacturers Association* v. *Occupational Safety and Health Administration of the U.S. Dept. of Labor*, No. 81–1210; *American Iron and Steel Institute et al.* v. *Secretary of Labor and OSHA*, No. 81–1991; *Chamber of Commerce* v. *OSHA, U.S. Dept. of Labor*, No. 81–1990. These cases were consolidated in the Fourth Circuit Court of Appeals. The Court is holding these cases in abeyance pending completion of the rulemaking proceeding. Fleck Industries also sued OSHA, see *Fleck Industries, Inc.* v. *OSHA*, No. 81–1400 (3rd Cir.), but the petition was subsequently withdrawn.

[6] The AFL–CIO subsequently sued to set aside the Secretary's deferral of the effective date of the hearing conservation amendment. See *AFL–CIO* v. *Donovan*, No. 81–1667 and 81–1763 (4th Cir.). On September 18, 1981 the Fourth Circuit Court of Appeals denied the motion without prejudice; the AFL–CIO subsequently moved for voluntary dismissal, and the motion was granted on November 6, 1981.

lengthy preamble to the amendment and consistent with the requirements of E.O. 12291 to evaluate regulations. Based on this review, OSHA decided that major portions of the amendment should be allowed to go into effect. A Regulatory Impact Analysis was prepared for the parts of the amendment going into effect. On August 21, 1981, the Agency lifted the administrative stay of major portions of the hearing conservation amendment, allowing the amendment to go into effect (see 46 FR 42622). The stay was continued, however, and the record reopened for additional comment on a number of other provisions that are discussed in detail below.

Generally, the record was reopened for substantive comment where there was reason to believe, based on the comments received, that there might be a more cost-effective way of accomplishing the desired result of protecting employee hearing, or where new information as to the feasibility or desirability of a particular requirement was submitted which deserved further evaluation. It was suggested that the stayed provisions were too detailed, imposed unnecessary restrictions on the operation of hearing conservation programs, were financially burdensome, and were confusing.

OSHA received a great number of submissions containing comments and evidence in response to the August **Federal Register** document. While many comments urged that the Agency should revoke the stayed provisions of the hearing conservation amendment, others objected to the stays of various provisions. For example, several labor groups objected to the continuation of the stays, feeling that they had an adverse effect on the enforceability of the standard. In addition, they requested that a hearing be held on the suggested changes. In response to these requests, an informal public hearing was scheduled. The hearing was convened on March 23, 1982, with Administrative Law Judge Stuart A. Levin presiding. The hearing lasted approximately five days, during which time about 50 interested parties offered testimony and evidence. At the close of the hearing, a 60-day period for receipt of post hearing comments was authorized by Judge Levin.

The provisions which went into effect in August 1981 are more performance oriented than the amendment originally promulgated in January 1981. These provisions set out certain basic elements that were thought necessary to include in industrial hearing conservation programs, while affording employers considerable flexibility in achieving the ultimate goal of the standard: conserving employee hearing. The provisions that went into effect in August allowed employers to adapt hearing conservation programs to their own operations better than those originally promulgated in January 1981.

The revised amendment being issued today has adopted a performance approach insofar as possible. This is in marked contrast with the detailed specifications of the January amendment, which did not fully consider the mandate of section 6(b)(5) of the Act that standards be expressed in terms of performance criteria where practicable. The revised amendment generally allows the employer to choose his own method of complying with the obligations imposed by the amendment. This approach is particularly appropriate where the standard applies to many different types of industrial settings and work environments. The flexibility inherent in the performance approach allows the employer, who is familiar with the unique circumstances and problems of his workplace, to use this knowledge to develop the most effective and efficient mechanism to protect his employees. The employer is given sufficient leeway to adopt a hearing conservation program which will be compatible with all of the peculiarities of the work environment and the needs of his business, rather than having to implement a number of requirements that would be inadequate, inappropriate or unnecessary in his working environment, merely because they are required by the standard. The performance approach allows and even encourages employers to develop creative and innovative methods of meeting the obligations imposed by the amendment.

It is expected that by providing some flexibility, the amendment will encourage compliance because compliance can be achieved in the manner that is the easiest under the circumstances present in the particular working environment. This is also consistent with one of the purposes of the Act, as stated in section 2(b)(1), of stimulating employers and employees to institute new programs and to perfect existing programs to provide healthful working conditions. In addition, the performance approach adopted herein is consistent with the Supreme Court ruling in *American Textile Manufacturers Institute, Inc.* v. *Donovan*, 452 U.S. 490, 101 S. Ct. 2478 (1981) suggesting that standards must be cost-effective. The revised hearing conservation amendment allows employers to adopt the most efficient method of compliance which will give the protection mandated by the amendment and achieve the goal of the standard, that is, conserving employee hearing.

As a result of new evidence placed into the record as well as testimony submitted at informal public hearings, OSHA has once again reviewed the record as it pertains to the issues in this proceeding. After carefully reconsidering the entire record, the Agency has decided to take the actions discussed in detail below. The entire hearing conservation amendment, rather than just those portions being revised, is reprinted at the end of this document. This is being done as a matter of convenience to avoid any confusion as to the various requirements of the standard.

IV. Summary of Regulatory Impact and Regulatory Flexibility Analysis

A Regulatory Impact and Regulatory Flexibility Analysis consistent with the requirements of Executive Order 12291 and the Regulatory Flexibility Act of 1980 has been prepared. The document discusses, *inter alia*, the costs of the hearing conservation provisions published in January 1981 and the costs of the provisions contained in this revised hearing conservation amendment, presents information on the relative cost-effectiveness of the two sets of provisions, and describes the impact on small business.

The total costs of the revised amendment are estimated to be $210.3 million a year, for an average cost of $41 per worker included in hearing conservation programs mandated by the amendment. For comparison, the Regulatory Impact Analysis also presents costs of the January 1981 amendment, which have been recalculated based on new information in the rulemaking record. That amendment would have cost $295.3 million a year,[7] for an average of $58 per worker, about 40 percent more than the costs of the revised amendment. After allowing for the hearing conservation activities already established, the provisions of the revised amendment are estimated to cost $197.3 million annually.

The analysis concludes that the regulation is both technologically and economically feasible for both large and small businesses. Even if firms were forced to absorb the total costs of the hearing conservation provisions, these

[7] The January 1981 Regulatory Analysis initially estimated the total costs of the hearing conservation amendment at $270 million a year (p. IV–2).

costs would represent less than 0.2 percent of profits for the industries studied. A typical small business with under 20 production workers might need to spend about $163 per year to comply with the hearing conservation amendment requirements.

The Regulatory Impact Analysis relies on the benefits calculations of the Regulatory Analysis that was prepared for the amendment promulgated on January 16, 1981. OSHA estimated that hearing conservation programs for all employees exposed above 85 dB would eliminate 212,000 cases of material impairment of hearing after 10 years, 696,000 after 30 years and 898,000 cases at equilibrium.[8] OSHA believes that the more performance-oriented provisions of the revised amendment will not significantly reduce these benefits. Therefore, the revised amendment will significantly reduce the risk of hearing impairment present in many workplaces.

Copies of the Regulatory Impact and Regulatory Flexibility Analysis can be obtained from the Docket Office, at the address listed in the "Further Information" section at the beginning of this Federal Register document.

V. Environmental Impact

On February 19, 1974, OSHA announced in the Federal Register its intention to prepare an Environmental Impact Statement assessing the impact of a standard that would be proposed for occupational noise exposure (see 39 FR 6119). Information was solicited from the public on a variety of environmentally related issues including possible environmental impacts of the recommended standard and any irreversible commitments of resources which would be involved if the standard should be implemented.

A draft Environmental Impact Statement was made available to the public on June 10, 1975 (40 FR 25525) and environmental impact was specifically an issue at the first hearing held in 1975.

A final Environmental Impact Statement was prepared in accordance with the Council on Environmental Quality (CEQ) Guidelines (40 CFR Part 1500 *et seq.*) and the Department of Labor's regulations (29 CFR Part 11) setting out procedures to be used by Department of Labor agencies to ensure compliance with the National Environmental Policy Act. The final Environmental Impact Statement was made available to the public at the time the final rule was published. The final Environmental Impact Statement concluded that the hearing conservation amendment would beneficially impact the workplace environment by reducing both the incidence and the degree of hearing loss among workers. It also concluded that the incidence of other adverse health effects associated with noise exposure might also be reduced.

In August 1981, OSHA concluded that staying the various provisions of the amendment would not have any significant environmental impact, and the Environmental Impact Statement was therefore not revised. OSHA also asked for comments on whether the Agency's action would have any significant environmental impact. No substantive comments were received on this issue. Based on the record, OSHA now concludes that the action taken today revising the amendment will have no significant environmental impact. Therefore, no revised Environmental Impact Statement is necessary.

VI. Summary and Explanation of Actions Taken

Monitoring

Monitoring provides a mechanism for measuring and evaluating the significance of an employee's occupational exposure to noise (see discussion, 46 FR at 4131 (January 16, 1981)). This is important because the senses alone are not reliable quantifiers of sound level. For example, people's perception of the relative intensities or loudness of sounds may be affected by the relative pitch of those sounds.

Monitoring of workplace noise levels is necessary for the following reasons:

(1) To identify employees who must be enrolled in the hearing conservation program;

(2) To identify employees for whom hearing protection is mandatory;

(3) To determine the amount of attenuation that hearing protectors need to provide; and

(4) To familiarize both employers and employees with the degree of the noise hazard.

The monitoring provisions in the January amendment were extensive and detailed. This document required that all employers make an initial determination as to whether any employee's exposure equalled or exceeded an 8-hour TWA of 85 dB. These determinations were to be based on exposure measurements, calculations, or other relevant information, including such elements as employee complaints about noise, indications that employees might be losing their hearing, or difficulties in understanding normal conversation in the workplace when the speaker and listener faced each other at a distance of two feet. If this initial determination was positive, the employer was required to measure personal noise doses for all or representative employees within 90 days.[9] The amendment also required that initial determinations and subsequent monitoring (if the initial determination was positive) be repeated every two years and within 90 days of any change in process or working conditions that might increase the noise level and thereby render any hearing protectors being used inadequate or which would result in the inclusion of new employees in the hearing conservation program.

The January amendment also required that all monitoring be conducted with sound level meters or dosimeters meeting certain detailed specifications. It also contained specific requirements for the calibration of measuring equipment.

Many comments, objections, requests for clarification, and petitions for administrative stays were received in response to the monitoring requirements of the January amendment. Many employers objected to the prohibition against area monitoring, asserting that the personal monitoring mandated in the January amendment was burdensome, impractical, and unnecessary for the purposes of implementing successful hearing conservation programs (Exh. 325–266–A, pp. 6–8; Exh. 325–136; Exh. 325–47; Exh. 325–87). These commenters believe that area monitoring is simpler and less costly, and that the adequacy of hearing protector attenuation can be computed from sound levels obtained for the various areas in which employees work.

Some employers maintained that the requirement for an initial determination was unnecessary, and that the conditions determining the need for monitoring were unnecessarily complicated and expensive (Exh. 325–66; Exh. 325–68; Exh. 325–70). Other commenters objected to the requirement that if the employer wished to use representative monitoring the employee with the highest exposure must be selected and measured as representative, asserting that the effect of such a requirement would be to force employers to monitor all employees. In addition, commenters objected to the periodic remonitoring requirement, stating that remonitoring every two years was costly and unnecessary, and

---

[8] Final Regulatory Analysis of the Hearing Conservation Amendment, January 1981, p. III–27. Equilibrium is defined as that time in the future after which all current and retired workers would have been enrolled in a hearing conservation program for their entire working lives.

[9] The January amendment did not permit area monitoring to be used to comply with the monitoring requirements (see 46 FR at 4136).

that remonitoring when there was a change in process or equipment should be sufficient (Exh. 325–68; Exh. 325–66; Exh. 325.57; Exh. 325–138; Exh. 325–214; Exh. 325–256; Exh. 325–252).

In response to these objections, OSHA decided to seek additional public input on the various monitoring provisions published in January. In August, therefore, the administrative stay was continued on many of the detailed monitoring provisions. The monitoring requirements put into effect in August were more performance oriented, and consisted of two provisions:

(e)(1) When information indicates that any employee's exposure may equal or exceed an 8-hour time-weighted average of 85 decibles, the employer shall obtain measurements for employees who may be exposed at or above that level.

(g)(2)(ii)(*b*) All continuous, intermittent, and impulsive sound levels from 80 dB to 130 dB shall be integrated into the computation.

Many comments were submitted in response to the fourteen questions related to monitoring that were raised in the August 21 **Federal Register** document (see 46 FR at 42624). Most commenters recognized the need for monitoring to implement hearing conservation programs effectively. Moreover, a majority of the parties submitting comments favored the performance-oriented monitoring requirements in the August document (Exh. 327–20; Exh. 327–51; Exh. 327–70; Exh. 327–71; Exh. 327–86; Exh. 327–99; Exh. 327–102; Exh. 327–138; Exh. 327–143; Tr. Vol. IV, p. 76, March 3, 1982). These participants felt that the rigid specifications contained in the monitoring provisions promulgated in January were not practical and could not effectively accommodate the diverse work situations encountered in the American industrial environment. For example, it was alleged that factors such as worker mobility variations in worker tasks, changing sound sources and levels, and transient work sites made personal monitoring, and even representative personal sampling, difficult and inappropriate in some circumstances (Exh. 327–70 p. 2; Exh. 327–86, p. 3). Most respondents believed that performance requirements for monitoring would allow employers the flexibility to adopt the most cost-effective and appropriate methods of noise monitoring in their particular exposure situations (Exh. 326–55; Exh. 327–70; Exh. 327–71 p. 2; Exh. 327–86; p. 2; Exh. 327–91; Exh. 327–99).

However, several labor groups objected to staying the various monitoring provisions, stating that the stay would have an adverse effect on the enforceability of the standard (Exh. 327–59; Exh 327–107; Exh. 327–136; Exh. 329–57; Exh. 345; Tr. Vol. III, pp. 31–48, March 25, 1982; Tr. Vol. IV, pp. 109–114, March 26, 1982; Tr. Vol. V, p. 273 March 29, 1982). In addition, these commenters urged OSHA to reinstate the original specification requirements, contending that they were more protective of employee health (Exh. 331–17; Tr. Vol V, p. 273, March 29, 1982). These objections are discussed more specifically below.

Area Versus Personal Sampling

The January amendment did not permit the use of area monitoring to fulfill the noise monitoring requirements (see 46 FR at 4133). The more performance-oriented monitoring provisions of the August document, however, allow the employer to use any monitoring technique, including area monitoring, that will correctly identify all employees eligible for inclusion in the hearing conservation program (i.e., those exposed at or above the action level) and will allow the employer to determine that the hearing protectors provided to employees have sufficient attenuation capability to protect the employees in their particular work environment.

The relative merits of area versus personal exposure monitoring generated a great deal of comment. A review of these submittals indicates some misunderstanding (Exh. 327–107, p. 4; Exh. 326–21; Exh. 327–32, p. 1; Exh. 384, pp. 9–11) as to what constitutes "personal" as opposed to "area" monitoring within the meaning of this standard.

Personal monitoring consists of measurements taken with the instrument microphone in the proximity of the exposed employee's ear (for a dosimeter, near the employee's shoulder or head, and for a sound level meter, not less than two inches or more than two feet from the employee's ear). Personal monitoring is generally used to obtain estimates of employee exposures or to determine the effects of different work practices on employee exposure. Personal monitoring can be done with either a sound level meter or a dosimeter.

Personal monitoring with a sound level meter usually requires the person performing the sampling to hand-hold the sound level meter near the employee's ear. Because sound level meters are only capable of taking spot measurements at the instant measured, a sampling strategy which includes sufficient sound level meter readings taken at various times and locations throughout the work shift is necessary to estimate employee exposure accurately. Personal monitoring using a dosimeter involves positioning the device on the body of the employee, with the microphone located near the employee's ear. The employee carries the dosimeter throughout the day, during which time the dosimeter is continuously recording sound levels. Employee exposure is determined simply by attaching the dosimeter to another instrument or reader and reading out the results. OSHA believes that personal monitoring is one method of providing an accurate estimate of employee exposure, and the Agency routinely uses dosimeters and personal sampling techniques for compliance purposes. As discussed below, OSHA does not believe that personal monitoring is the only method of collecting the information necessary to fulfill the needs of the hearing conservation program.

Area monitoring is any method of sampling with sound measuring instruments when the microphone is not placed in the vicinity of the employee's ear. Area monitoring is used to evaluate workplace noise for various purposes, including the design of engineering controls and estimation of employee exposures. Either a dosimeter or a sound level meter can be used for area monitoring.

A large number of commenters favored permitting the use of either area monitoring or personal monitoring to fulfill the monitoring requirement, noting that the sampling method most appropriate to a particular work situation should be selected (Exh. 327–67; Exh. 327–70; Exh. 327–86; Exh. 327–89; Exh. 327–91; Exh. 327–96; Exh. 327–102; Exh. 327–105; Exh. 327–121; Exh. 327–122; Exh. 327–135–a; Exh. 327–151; Exh. 331–11).

Many respondents pointed out that area monitoring usually is less disruptive of work flow, is generally easier to conduct, and is less costly to perform than personal monitoring (Exh. 326–35; Exh. 327–58; Exh. 327–63A; Exh. 327–103; Exh. 327–110; Exh. 327–122; Exh. 329–2; Exh. 329–16). Further, commenters asserted that area monitoring makes it easier to gauge general changes in the acoustic environment, simplifies recordkeeping, is independent of employee turnover or job reassignment, and can be as effective as personal monitoring in some acoustic environments or in association with certain work regimens (Exh. 326–41; Exh. 327–55; Exh. 327–103; Exh. 327–106; Exh. 329–2).

However, others objected to the use of area monitoring, asserting that OSHA was unjustifiably modifying the January monitoring requirements and that

allowing area monitoring and using performance requirements would be unenforceably vague (Tr. Vol. IV, p. 243, March 26, 1982; Exh. 328-41; Exh. 327-59; Exh. 327-109; Exh. 345). Additionally, other participants stated that area monitoring was not acceptable because they felt it would underestimate exposures and thereby exclude eligible employees from membership in the hearing conservation program (Exh. 328-H; Tr. Vol. III, p. 107, March 25, 1982). They supported this opinion by citing a report by Bolt Beranek and Newman (BBN) (Exh. 327-04-C), which they contended showed evidence of exposure underestimation.

BBN surveyed seven establishments in the Iron and Steel Foundry Industry (SIC 332) having a total sample size of 531 employees, and nine establishments in the Saw Mill and Planer Mill Industry (SIC 242) with a total sample size of 906 employees. The purpose of the initial study (Exh. 373-I, pp. 1-3; Exh. 327-04-C p. 2-2) was to develop a machinery noise computer model that could be used to assess the effect of occupational noise on industrial workers. After completion of the study, the data were reanalyzed to obtain a comparison of personal and area-wide monitoring techniques. All noise measurements were taken using Type 2 (or better) sound level meters. A criterion of ±3 dB variation was used to define any specific area, and this criterion was applied to all work situations.

According to the BBN study (Exh. 373-I; Exh. 327-04-C), there was little difference in the percentage of employees predicted by area versus personal monitoring as being exposed at or above a TWA of 85 dB.[10] However, when the criterion was changed to 90 dB, a substantial difference in the percentage identified was seen in one industry.[11] This difference appeared to increase as sound levels increased. Therefore, BBN concluded in part that area monitoring underestimated personal exposures, particularly at high exposure levels.

Although the BBN report does reflect a problem that would arise if area monitoring was used in all work situations, the report included results obtained with area monitoring in situations where this sampling method might not be considered appropriate. It is not surprising that substantial disagreement between area and personal samples would occur in such a case. A more reasonable use of area sampling (e.g., when work conditions were favorable) would be expected to yield much closer agreement between personal and area monitoring results.

Despite this shortcoming, the use of area monitoring may have little adverse effect on identifying employees to be included in a hearing conservation program. In fact, BBN even stated that "It is possible that * * * the area monitoring method could be used as an indicator that a hearing conservation program is required (i.e., that one or more workers have TWA's equal to, or greater than, 85 dB)" (Exh. 327-04-C, pp. 2-11).

Additionally, BBN admitted that the procedure for estimating area sound levels involved the subjective determination of the spatial distribution of measurements to encompass all sound level variations within an area. BBN reported that "Consequently, it is possible that different area sound levels could be obtained if measurements were made at arbitrarily selected locations" (Exh. 327-04-C, p. 2-4).

It seems clear that the BBN report (Exh. 373-I; Exh. 327-04-C) has been taken out of context when it is used to develop area versus personal monitoring comparisons. These data were derived, as the report clearly states, "for the purpose of developing a machinery noise computer model to be used in assessing the effect of occupational noise on the health and welfare of industrial workers" (Exh. 327-04-C, p. 2-2). BBN has also explained that, "the end result of the evaluation is a rank-ordering of the machinery items which most contribute to the noise exposure problem in each industry [of the two sampled]" (Exh. 373-I, Executive Summary). Moreover, the inaccuracies involved in area sampling may not be as great as the BBN report leads one to believe. As AISI points out, BBN's sound level meter sampling strategy "was touted as the definitive and most accurate means for determining employee exposure (and against which the allegedly inaccurate 'area monitoring' was compared)" (Exh. 367, p. 7). After reviewing the report's orginial objectives and study protocols, the AISI felt that BBN's personal monitoring "may in fact have been spot checks of employee exposures at their operating stations," and that "In fact no full shift time weighted average exposure levels were determined for each employee or even for representative employees" (Exh. 367, pp. 7-8). In addition, AISI noted that "* * * area monitoring measurements were actually measurements of a limited number of equipment types which were not selected with the goal of identifying employee exposures" (Exh. 367, p. 7). In addition, BBN allowed a 6 dB range in defining a given sound level area (i.e., ± 3 dB), which would by definition lead to disagreements between the area and personal monitoring data in certain situations.

OSHA agrees that area monitoring is not appropriate in all situations; nothing in the monitoring provisions encourages its use in inappropriate circumstances. In other words, the indiscriminate application of area monitoring to all work situations is recognized to be inappropriate. For example, where workers are highly mobile, tasks are dissimilar, a large component of impulsive sound is contained in the exposure, or there is a great deal of variation in sound level, area monitoring becomes more difficult and less appropriate. However, as indicated in numerous submittals, area monitoring can be used in many situations and is a valuable tool that should not be overlooked (Exh. 328-15; Exh. 328-34; Exh. 327-34; Exh. 327-55; Exh. 327-66; Exh. 327-89; Exh. 327-90; Exh. 327-103; Exh. 327-113; Exh. 327-133; Exh. 327-140; Exh. 329-2). One of the reasons OSHA prohibited area monitoring in the January amendment was the problem of monitoring workers who move from place to place during their workshifts. However, as unrebutted testimony at the March 1982 hearing indicated, there are many workplaces where in-plant mobility is not a factor (Tr. Vol. III, pp. 101-102, March 25, 1982). Therefore, it would be unwise to prohibit the use of area monitoring in all situations simply because it may not be useful in some circumstances.

In order to emphasize the point that area monitoring can only be used where it is appropriate, language has been added to the amendment requiring that the sampling strategy employed to measure noise must be capable of properly identifying the correct employees for inclusion in the hearing conservation program.

In addition, the revised amendment prohibits the use of area monitoring in certain situations unless the employer can show that this type of sampling strategy will produce results similar to personal sampling. This prohibition on the use of area sampling to fulfill the monitoring obligation under the hearing conservation amendment is only operative when factors are present that are generally conceded to make area monitoring inappropriate. In most instances, area sampling will not be appropriate where there are significant variations in sound levels, where there

[10] 81.9% to 87.9% for SIC 332 and 70.8% to 88.4% for SIC 242.

[11] 5.1% to 88.1% for SIC 332 and 34.2% to 36.6% for SIC 242.

is a significant amount of impulse noise present or where workers move around a lot within a particular work area or between various work areas. In recognition of the extremely wide variation among these situations and the high degree of sophistication that may be used in refining area monitoring techniques, OSHA has decided not to absolutely prohibit the use of area monitoring in the situations described above, but instead to shift the burden to the employer who wishes to use area monitoring under these circumstances to show that the results of such monitoring are equivalent to those that would be obtained using personal or representative personal sampling. The shifting of the burden of proof to the employer to show the adequacy of area sampling is appropriate under these circumstances and strikes a good balance between the need to assure adequate employee protection and the desire to give the employer sufficient flexibility in complying with the requirements to allow the use of new or innovative techniques and to adopt a compliance mode that is the least burdensome to the employer without diminishing necessary employee protection.

Typical of comments supporting the performance monitoring approach was a statement that "Monitoring should be required, but the choice between area and personal should depend upon the particular situation in the workplace" (Exh. 327–102, p. 6).

In fact, when comparing personal representative sampling of similarly situated employees of careful area sampling, Deborah Berkowitz [Health and Safety Director, Food and Beverages Trades Department, AFL–CIO] admitted, "I think you come up with the same results" (Tr. Vol. V, p. 138, March 29, 1982).

Support for a choice of monitoring technique was also voiced by Dan MacLeod, certified Industrial Hygienist with the United Brotherhood of Automobile, Aerospace, and Agricultural Implements Workers of America (UAW). Although he expressed some concern about the ability of small or non-union companies to conduct area monitoring, Mr. MacLeod stated "I think that there are a lot of locations where it would be perfectly okay to do a lot of area sampling" (Tr. Vol. III, p. 102, March 25, 1982). In addition, MacLeod specifically described certain specific work situations involving thousands of employees in which area monitoring would be appropriate (Tr. Vol. III, p. 102, March 25, 1982).

Another concern raised by commenters (Exh. 327–76; p. 5; Exh. 327–109; p. 5; Exh. 345, p. 5) was that permitting employers to use area monitoring for the purposes of the hearing conservation amendment would be contrary to OSHA's directive to its compliance personnel and field industrial hygienists. Although it is true that the Agency requires its field staff to use personal monitoring for compliance purposes, the question in this case, as John Martonik, OSHA's Deputy Director of Health Standards, pointed out at the public hearing, is "whether this much detail in specification is necessary * * * for the purposes of the Hearing Conservation Amendment * * *" (Tr. Vol. I–A, pp. 31–32, March 23, 1982).

In the compliance context, it is generally simpler for OSHA staff to use the dosimeter, although a sound level meter may also be used to obtain personal samples. This is advisable because compliance personnel are generally not familiar with the details and variations of exposure patterns within individual workplaces, and sometimes must conduct monitoring the first time they are on site. Therefore, personal monitoring is more appropriate in such a situation because it saves the compliance officer the time of determining noise exposure patterns before the sampling begins. However, the employer's familiarity with his or her own workplace should in many instances enable the employer to develop a monitoring program based on area monitoring that is just as protective as personal monitoring. When enforcing the amendment, OSHA inspections will focus on whether employers have included all employees exposed to noise at or above the action level in their hearing conservation programs. OSHA inspectors will in most cases continue to use personal sampling methods because in view of the compliance officer's purpose and lack of familiarity with each particular workplace, this method is generally easier and yields more reproducible results (see Tr. Vol. I–A, pp. 40–41, March 23, 1982).

George Taylor [ALF–CIO] and several other commenters questioned the legality of performance-oriented monitoring requirements; these participants believed that performance monitoring requirements, which remain part of the hearing conservation standard published today, are contrary to the legislative mandate of section 6(b)(7) of the Act (Exh. 327–109, pp. 5–7; Tr. Vol. V, p. 209, March 29, 1982; Tr. Vol. III, pp. 34, 37, March 25, 1982). Section 6(b)(7) of the Act states in pertinent part:

> Where appropriate, such standard [promulgated under this subsection] * * * shall provide for monitoring or measuring employee exposure at such locations and intervals, and *in such manner as may be necessary for the protection of employees.* [emphasis added]

The performance monitoring requirements contained in the hearing conservation amendment are not contrary to the mandate of section 6(b)(7) of the Act. Nothing in the Act requires personal monitoring to be used as the exclusive monitoring technique. As discussed above, in many instances area monitoring can be as effective as personal monitoring. The most cost-effective method of monitoring should be allowed, if it is appropriate in the situation. As shown above, the area method of monitoring is appropriate in many work areas. Substantial evidence in the record clearly supports the conclusion that the performance monitoring requirements prescribed in the amendment will provide the necessary protection of employees referred to in section 6(b)(7). In other words, the monitoring prescribed will identify the appropriate employees for inclusion in an employer's hearing conservation program and allow the employer to determine that any hearing protectors used have sufficient attenuation capability to protect employees. Moreover, this performance-oriented monitoring approach is clearly consistent with the mandate of section 6(b)(5) of the Act, which states that when practical, standards dealing with harmful physical agents should be drafted "in terms of objective criteria and of the performance desired."

Another objection to the performance-based monitoring provisions now used in the amendment was that they would not be enforceable (Exh. 327–109, p. 6). The Agency disagrees; the Agency believes that the standard does provide fair and reasonable warning of situations in which monitoring is required [12] and does specify what sounds should be included in the measurements. [13]

There is widespread agreement that area monitoring is appropriate in many work situations, and it is also clear that any type of monitoring may be inaccurate if it is applied inappropriately. However, OSHA also believes that the employer should be

---

[12] Appropriate monitoring is required when information indicates that any employee's exposure may equal or exceed an 8-hour time weighted average of 85 decibels (paragraph (d)(1) of the revised amendment).

[13] All continuous, intermittent and impulsive sound levels from 80 dB to 130 dB shall be integrated into the noise measurements (paragraph (d)(2) of the revised amendment).

permitted to develop a monitoring program, whether area or personal monitoring is chosen, that will protect exposed employees from occupationally-induced hearing loss. Therefore, it is appropriate to allow the employer to select any monitoring technique that will ensure that the objectives of the standard are met.

Also, many commenters who supported the use of area monitoring use a "worst case" method for determining which employees to include in their hearing conservation programs. These employers attribute the highest sound level in a particular area to all employees in the area (Exh. 326–11; Exh. 327–79; Exh. 327–101; Exh. 327–133; Tr. Vol. I–B, p. 118, March 23, 1982). Use of this approach would lead to the assignment of more than the required number of employees to the program. OSHA encourages employers to take a more protective posture relative to hearing conservation; i.e., to do more than the minimum required.

Some commenters suggested that OSHA provide a simplified non-mandatory monitoring guide as an appendix (Exh. 327–102, p 7; Exh. 366, p. 2). Such an appendix was seen as being particularly helpful to small businesses who were considering area sampling as an alternative monitoring method. A general non-mandatory appendix (Appendix G) has been included to familiarize employers with various approaches to monitoring as well as resources to which they may look for help in meeting their noise measuring obligations under the amendment.

OSHA's decision to permit employers to choose the most appropriate monitoring sampling strategy parallels the January amendment's performance approach toward selection of monitoring instruments. Although the January preamble (46 FR at 4136) noted that a sound level meter might be less accurate than a dosimeter "in situations where there is a significant impulse noise component," employers were given the "option of using a sound level meter, providing it is used in a manner which * * * ensures the maximum accuracy." Similarly, the monitoring provisions in the revised amendment generally permit either area or personal monitoring, providing it is used in a manner which ensures that valid data are generated.

Initial Determination

The amendment as promulgated in January required employers to make initial determinations, stating that "This determination must be based on the employer's good faith inquiry into any factors which would tend to indicate that noise exposures in the workplace are in the vicinity of an 8-hour TWA of 85 dB" (46 FR at 4131). The January amendment listed factors meriting a positive initial determination, including employee complaints about noise, difficulties in communication at a distance of approximately two feet, or measurements recording levels at or above the action level made with a sound level meter or dosimeter. OSHA stayed this requirement because "some employers maintained that the requirement for initial determination was unnecessary" (46 FR at 42624).

Although some commenters felt that the initial determination was a normal part of the monitoring process in identifying those employees exposed at or above the action level, they also felt that the initial determination was subsumed by the existing performance monitoring requirements (Exh. 326–15; Exh. 326–34; Exh. 327–101; Exh. 327–122; Exh. 329–2). In addition, some felt that the initial determination should not be a separate requirement (Exh. 327–67; Exh. 326–49; Exh. 326–54; Exh. 326–32; Exh. 326–15; Exh. 326–31; Exh. 327–76; Exh. 327–97).

Russell Hannula [Manager-Noise Services; National Loss Control Service Corporation] objected to the inclusion of employee complaints as a factor meriting a positive initial determination, noting:

> "Employee complaints are * * * not valid since these are based on a subjective determination by inexperienced people. It has been my experience that employee complaints are often related to noise that is annoying, as opposed to noise that is hazardous. Difficulties related to understanding normal conversations in the presence of background noise may be related to hearing impairment of the participants in the conversation and not to potentially hazardous noise levels" (Exh. 326–12, p. 1).

Also challenging the necessity of a separate initial determination requirement was Dr. Carl Bohl [Monsanto Fellow, Monsanto Company]. He stated:

> "* * * The need for monitoring is not disputed. Normal procedure for evaluating a work area for a hazard requires an initial determination not only to determine if an exposure is probable but, also, what instrumentation is to be used. Then, if needed, samples or measurements are taken and from this data conclusions are reached about the significance of the exposure. This is the way monitoring is performed and trying to separate initial determination from monitoring is foolishness" (Exh. 326–49, p. 1).

On the other hand, some commenters were in favor of retaining the specific language for initial determination (Exh. 326–42, p. 10; Exh. 326–11; Exh. 327–50; Exh. 327–109). They felt that an initial determination is necessary to specify when monitoring is required and when a hearing conservation program is needed. Margaret Seminario of the AFL–CIO, stated "Deletion of the initial determinations of exposure provision has removed any affirmative obligation of the employer to conduct a preliminary evaluation of noise exposure levels" (Tr. Vol. V, p. 268, March 29, 1982). Moreover, the AFL–CIO claimed it would be difficult for compliance personnel to cite employers for inadequate exposure monitoring without specific criteria such as those contained in the initial determination requirement (Exh. 327–109, p. 4).

Still other commenters favored some modification of the explicit initial determination requirements (Exh. 327–101; Exh. 327–20; Exh. 327–102). For example, some asserted that professionals with a background in acoustics should be allowed to use their judgment about initial determinations, and further that the specific factors listed as meriting a positive determination might result in needless monitoring.

OSHA believes that an initial determination is an inseparable portion of any overall performance-oriented monitoring process, and that the initial determination provision originally included in the January amendment was merely an articulation of the thought process of a person doing the monitoring. As originally promulgated, the initial determination provision might have been difficult to enforce in and of itself, since there was no requirement that it be written. Moreover, the Agency believes an initial determination is implicit in the monitoring requirements in the revised amendment. It is therefore not necessary to require it specifically.[14] Accordingly, the initial determination provisions are being revoked.

Remonitoring

The issue of remonitoring also generated considerable interest. The January promulgation required monitoring to be conducted at least every two years and within sixty days of a change in production, processes, equipment, controls or personnel that changed noise exposures to the extent that employees previously exposed below a TWA of 85 dB would be exposed at or above that level. Remonitoring was also required if the

[14] The employer's ultimate obligation is to monitor when noise exposures are at or above the action level. Regardless of the outcome of any initial determination, employers are subject to citation for failing to monitor.

change rendered the hearing protectors issued inadequate.

The January preamble also stated that sound levels tend to be affected as machinery ages, causing changes in employee exposure. Therefore, various hearing conservation amendment requirements might not be implemented without some remonitoring. Another justification for remonitoring was that "workers will be reminded of the nature and extent of their exposures and will be better motivated to participate cooperatively in the hearing conservation program, and to wear properly fitted hearing protectors" (46 FR at 4134).

The January preamble noted that many commenters were opposed to a periodic monitoring requirement, especially where noise levels were uniform over long periods of time (46 FR at 4133). Similarly, other groups (Exh. 142; Exh. 64–4; Exh. 14–862) believed "periodic monitoring was unnecessary unless there was a significant change in production process" (46 FR at 4134).

In August 1981, OSHA continued the stay of this requirement, noting that "comments [received since the promulgation] objected to the periodic monitoring requirement, stating that remonitoring every two years was costly and unnecessary, and that remonitoring when there is a change in process or equipment should be sufficient" (46 FR at 42624).

Comments and testimony submitted since the August publication were overwhelmingly in favor of some form of remonitoring (Exh. 327–59; Exh. 327–88; Exh. 327–109; Exh. 331–17; Exh. 326–62; Exh. 327–20; Exh. 327–95; Exh. 329–16). Some commenters preferred retaining periodic monitoring (Exh. 326–12; Exh. 327–59; Exh. 327–109; Exh. 327–113; Exh. 327–135; Exh. 329–36; Exh. 331–17). Generally, their rationale paraphrased that used in the January 16 preamble, i.e., sound levels tend to increase as machinery ages and may therefore alter the need for or the adequacy of a company's hearing conservation program. Comments by Robert Frase [Director of Health and Safety, United Paperworkers International Union] typified this group's concerns:

> "Monitoring of noise exposures should be done every two years to ensure noise levels are not increasing. Many machines will have increased noise as they get older and tolerances increase due to wear. * * * It is imperative that noise level monitoring be done within sixty (60) days of a change to the production process, equipment or controls. Any of these changes could potentially increase noise levels to the extent that hearing protection may be required or that existing protection would not be adequate" (Exh. 327–59, pp. 1–2).

The majority of those favoring remonitoring, however, supported it only when there was a significant change in process or equipment rather than at set time intervals (Exh. 327–89; Exh. 327–98; Exh. 327–112; Exh. 327–122; Exh. 327–149; Exh. 329–15).

For example, Julia Phillips of Du Pont stated:

> "Remonitoring is unnecessary absent some change in process, equipment or exposure pattern. Unless there is reason to suspect a change in the noise environment, the remonitoring requirement will simply add additional costs to the hearing conservation program without there being a corresponding benefit" (Exh. 326–28, pp. 2–3).

Similarly, R. W. Murray and Paul E. Toth [Ford Motor Company], indicated "it would be more appropriate to require follow-up monitoring only when there has been a significant change in production, processes, equipment, controls or personnel which impacts on employee noise exposures. Requiring routine periodic monitoring of areas where no significant changes have been made since the last monitoring would result in inefficient use of scarce resources" (Exh. 329–2, p. 1).

OSHA agrees with those commenters who recognize that conditions and sound levels in the work environment are not static over time, and that exposures may be adversely affected by these changes. OSHA believes that under certain conditions remonitoring is necessary to accomplish the objectives of the amendment. Therefore, a remonitoring requirement which is stated in performance terms has been included in this revised hearing conservation amendment. Remonitoring must be done when there is reason to believe that employee exposures may have increased to the extent that employees not already included in the hearing conservation program would need to be included. Additional monitoring must also be undertaken when there are increases in exposure sufficient to render the attenuation provided by any employee's hearing protectors inadequate. In view of the tremendous variation among workplace environments covered by this amendment, a periodic remonitoring requirement is neither necessary nor appropriate to provide adequate employee protection. Therefore, the requirement to remonitor every two years is being revoked.

Some objections were also raised concerning the rigid time frame permitted for remonitoring (60 days) in the January amendment when significant changes did occur. Commenters reported that these specific time constraints presented practical problems in arranging the remonitoring (Exh. 327–121; Exh. 331–11), because in cases where employers do not do their own monitoring, it would be difficult to arrange for a return visit by a consultant within such a short time. This type of detailed requirement is inconsistent with the performance approach adopted herein and is therefore being revoked. It should be noted, however, that the performance remonitoring provisions adopted herein will require monitoring to be conducted frequently enough to correctly identify those employees who should be included in the hearing conservation program and to allow sufficient information to be gathered to assess the adequacy of hearing protectors.

A few comments stated that it was difficult to obtain meaningful remonitoring data because of the wide variety of tasks and noise exposures of employees in their particular industries (Exh. 329–1; Exh. 360). However, OSHA believes that the performance monitoring approach in this revised amendment will accommodate this type of job site and task variability. It allows the employer the flexibility to determine if and when remonitoring is necessary.

The performance monitoring approach adopted herein also allows for the exercise of professional discretion in conducting noise monitoring, a major component of the hearing conservation program. It also allows the most cost-effective monitoring methods to be applied in establishing and maintaining the mandated hearing conservation program.

Representative Monitoring

The amendment promulgated in January permitted employers to fulfill their monitoring obligation by using representative personal sampling for employees engaged in similar work and exposed to similar noise levels, but required measuring that member of the exposed group reasonably expected to have the highest exposure. Since this result was then attributed to the remaining employees of the group, the exposures of many employees would be overestimated. Therefore, an employer using representative personal monitoring would probably include more employees in the program than were required. This "worst case" representative employee monitoring approach may be overly protective and unnecessarily expensive for the company. The alternative to representative personal monitoring allowed in the January document was to continue to monitor increasing numbers

of employees to ensure that all exposed workers are included in the program [15].

In many specific work situations, the representative monitoring approach can be more cost-effective in identifying the appropriate employees for inclusion in a hearing conservation program. The employer is not prohibited from using the "worst case" or representative approach, thereby providing a more protective program than required. However, the Agency believes the performance monitoring approach does not require that degree of specificity to accomplish the objectives of the hearing conservation amendment. OSHA is therefore revoking the representative monitoring paragraphs of the January amendment; employers may use any monitoring strategy which correctly identifies the correct employees for inclusion in the hearing conservation program.

Employee Notification

The majority of commenters supported some form of employee notification of noise levels or exposure levels (Tr. Vol. V, pp. 112–113, 3/29/82; Exh. 326–11; Exh. 326–41; Exh. 327–62; Exh. 327–64; Exh. 327–148; Exh. 327–122; Exh. 349–1). Most commenters favored a more performance-oriented approach rather than the detailed notification provisions of the January amendment, which continued to be stayed when the hearing conservation provisions went into effect in August (Exh. 326–28; Exh. 326–34; Exh. 326–35; Exh. 327–62; Exh. 327–64; Exh. 327–70; Exh. 327–76; Exh. 327–89; Exh. 327–90; Exh. 327–97; Exh. 327–101; Exh. 327–103; Exh. 327–106; Exh. 327–122; Exh. 327–129; Exh. 327–136; Exh. 329–2; Exh. 349–1; Exh. 364). Major objections were raised with regard to the detailed specifications requiring individual employee notification in writing and within 21 days, and requiring that specific exposure doses be computed for each employee (Exh. 326–12; Exh. 326–28; Exh. 326–58; Exh. 327–12; Exh. 327–71; Exh. 327–76; Exh. 327–99; Exh. 327–102; Exh. 327–105; Exh. 328–5; Exh. 349–1). Objections were also raised to including a specific notification requirement in the hearing conservation amendment when 29 CFR 1910.20, Access to Records, already provides employees with access to monitoring information (Exh. 327–76; Exh. 327–89; Exh. 327–98; Exh. 327–122; Exh. 327–136). Moreover, individual notification was said to increase costs and recordkeeping burdens (Exh. 326–35; Exh. 327–21; Exh. 327–103).

The comments that follow are representative of this view. The DuPont Company stated that individual notification is burdensome in light of the fact that "* * * employees receive adequate notification when results of their area or personal monitoring are posted. Employers should be given flexibility to determine the most effective and efficient method of communicating monitoring results to employees" (Exh. 326–28, P. 3). "Notification of employees within 21 days of monitoring is not reasonable when an outside consultant is used" (Kaiser Aluminum and Chemical Company, Exh. 327–62, p. 1). A report submitted by North Carolina OSHA asserted that industry should not be required to determine individual TWA's but instead should be required to inform employees what their area or job-equivalent TWA is (Exh. 327–84, p. 57). "The basic right of all employees to have access to their exposure records is guaranteed by another OSHA standard [29 CFR 1910.20] and need not be reiterated in the hearing conservation amendment" (American Telephone and Telegraph, Exh. 327–89). The Motor Vehicle Manufacturers Association stated that:

> "[Employee] notification would require that records of noise measurements be retained for individual employees. For individuals who are reassigned frequently, this would involve extensive remonitoring and recordkeeping. It is more appropriate to notify the employee of the representative exposure he can expect in a work area and/or job classification, and the appropriate protection which may be necessary" (Exh. 327–103, p. 2).

On the other hand, some commenters were opposed to altering the specifications of the stayed employee notification provision. Lonnie L. Johnson [Director of the National Post Office Mail Handlers * * * Union, AFL–CIO] stated: "We strongly object to the total stay of employee [exposure] notification requirements * * *" (Exh. 326–42, p. 11). The Mail Handlers also believe notification is necessary to protect and inform employees of conditions posing significant risks to their health so they may avail themselves of statutory protection. Comments from the AFL–CIO asserted that by staying the employee notification provisions, OSHA was not complying with Section 8(c)(3) of the Act, which mandates that "Each employer shall promptly notify any employee who has been or is being exposed to * * * harmful physical agents * * * at levels which exceed those prescribed by an applicable occupational safety and health standard promulgated under Section 6 * * *" George Taylor, Director of Occupational Safety and Health, AFL–CIO, contended that staying worker notification of monitoring results is not justified simply by exposure variability because that factor is present for all the hazards addressed by other Section 6(b) standards and because Section 8(c)(3) of the OSH Act mandates notification. However, the AFL–CIO admits that posting is an acceptable way to transmit worker exposure information "as long as such posting methods are fully effective in apprising workers of exposure levels" (Exh. 327–109, p. 15).

Those who opposed including employee notification in the amendment generally felt that other provisions of the hearing conservation program, such as training, would provide adequate notice of exposure (Exh. 326–62, p. 2; Exh. 327–71, p. 2; Exh. 327–93, p. 2; Exh. 327–146, p. 4). OSHA believes employees have a fundamental right to be apprised of the results of monitoring. This is consistent with the mandate of Section 8(c)(3) of the Act to notify employees of exposure. Moreover, this right of notification of exposure goes beyond the provisions of 29 CFR 1910.20 which merely requires that employees have access to exposure records upon request. This explicit requirement to inform employees has educational value and will encourage more effective and enlightened worker participation in hearing conservation programs. In recognition of the many practical objections raised, however, the Agency has decided that the time frame within which to notify employees and the requirement for individual written notifications will be revoked because such specificity is inconsistent with the general performance approach toward monitoring adopted herein. The administrative stay of the more general employee notification requirements will be lifted. The amendment now requires the employer to notify each employee who is exposed at or above the action level of the monitoring results. This allows employers the flexibility needed to communicate monitoring results in what they judge to be the most reasonable and cost-effective manner.

OSHA believes that employers will notify their employees of monitoring results as promptly as possible. Moreover, although it is no longer specifically required, employers may want to inform their employees in writing rather than orally because written notification may be helpful in gaining employee cooperation in the
